It offers a comprehensive overview of recent results and thus outlines a diversity of drivers and levers for scaling up energy communities or, at least, local energy sharing. Analysing the main types of energy communities such as collective self-consumption, citizen cooperatives and peer-to-peer digital platforms, the book does not only raise new questions for social scientists, but also offers a comprehensive overview for all those contributing to the circular economy and the decentralization of energy production in inhabited areas where energy consumption is concentrated. This book provides input for the ongoing debates in many European countries implementing the national law on the European directives for energy communities. Furthermore, without evading the antagonism between cooperative and market approaches, or the contradictions between different issues, the book outlines the innovative decision-making tools that can facilitate the development of local energy production and sharing systems. As well as being of interest to postgraduates and researchers in the field of energy studies, this book will be vital to energy professionals looking to support local energy communities' decision-making and design, who wish to consider sociological, organizational and territorial dimensions. **Shakespeare's Hamlet Philosophical Perspectives** Oxford University Press This book assembles a team of leading literary scholars and philosophers to probe philosophical questions that assert themselves in Shakespeare's Hamlet, including issues about subjectivity, knowledge, sex, grief, and self-theatricalization. **As You Like it A Comedy The Merchant of Venice** Cambridge University Press The New Cambridge Shakespeare appeals to students worldwide for its up-to-date scholarship and emphasis on performance. Where Mahood focuses in her Introduction on the expectations of the play's first audience and on our modern experience of seeing and hearing the drama performed, Edelman explores the play's sexual politics. He also foregrounds recent scholarship on the position of Jews in Shakespeare's time and surveys the international scope and diversity of theatrical interpretations of the text in the 1980s and 1990s. He pays particular attention to the ways in which directors and actors

A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. It starts with the "strange" physics of matter, including particle physics, atomic physics and quantum mechanics, cosmology, relativity and their consequences (Chapter I), and it continues by describing the properties of material systems that are best understood by statistical and phase-space concepts (Chapter II). These lead to entropy and to the classical picture of quantitative information, initially devoid of value and meaning (Chapter III). Finally, "information space" and dynamics within it are introduced as a basis for semantics (Chapter IV), leading to an exploration of life and thought as new problems in physics (Chapter V). Dynamic equations - again of a strange (but very general) nature - bring about the complex familiarity of the world we live in. Surprising new results in the life sciences open our eyes to the richness of physical thought, and they show us what can and what cannot be explained by a Darwinian approach. The abstract physical approach is applicable to the origins of life, of meaningful information and even of our universe. **Hearings on Military Posture and Legislation to Authorize Appropriations During the Fiscal Year 1970 For Procurement of Aircraft, Missiles, Naval Vessels, and Tracked Combat Vehicles, Research, Development, Test, and Evaluation for the Armed Forces, and to Prescribe the Authorized Strength of the Reserve Forces, and for Other Purposes Judicial Review and Judicial Power in the Supreme Court The Supreme Court in American Society** Routledge Available as a single volume or as part of the 10 volume set *Supreme Court in American Society* **Japan Weekly Mail Julius Caesar** Standard Ebooks After defeating enemies in battle, Roman citizens celebrate in the streets as Julius Caesar and his entourage make their way through the city.
