Economic Censuses Advance and Destroy Patton as Commander in the Bulge** University Press of Kentucky In the winter of 1944-1945, Hitler sought to divide Allied forces in the heavily forested Ardennes region of Luxembourg and Belgium. He deployed more than 400,000 troops in one of the last major German offensives of the war, which became known as the Battle of the Bulge, in a desperate attempt to regain the strategic initiative in the West. Hitler's effort failed for a variety of reasons, but many historians assert that Lieutenant General George S. Patton Jr.'s Third Army was ultimately responsible for securing Allied victory. Although Patton has assumed a larger-than-life reputation for his leadership in the years since World War II, scholars have paid little attention to his generalship in the Ardennes following the relief of Bastogne. In *Advance and Destroy*, Captain John Nelson Rickard explores the commander's operational performance during the entire Ardennes campaign, through his "estimate of the situation," the U.S. Army's doctrinal approach to problem-solving. Patton's day-by-day situational understanding of the Battle of the Bulge, as revealed through ULTRA intelligence and the influence of the other Allied generals on his decision-making, gives readers an in-depth, critical analysis of Patton's overall effectiveness, measured in terms of mission accomplishment, his ability to gain and hold ground, and a cost-benefit analysis of his operations relative to the lives of his soldiers. The work not only debunks myths about one of America's most controversial generals but provides new insights into his renowned military skill and colorful personality. **Petroleum supply specialist Fire Support Coordination Closing with the Enemy How GIs Fought the War in Europe, 1944-1945** Describes how American innovation under the pressures of combat helped ensure victory, and recounts the attitudes and battle experiences of American soldiers **United States Army Aviation Digest HumRRO Special Reports Battle Scenarios to Exercise Division Staffs Research Product - U.S. Army Research Institute for the Behavioral and Social Sciences Intelligence Analyst Coast Artillery Field Manual Antiaircraft Artillery : Organization and Tactics Coast Artillery Field Manual****
