Power Pack

U.s. Intervention in the Dominican Republic 1965-1966

Createspace Independent Publishing Platform **In the early 1960s, President John F. Kennedy expressed concern that Communist sponsored unconventional warfare was one of the most pervasive threats to American security and that the U.S. military establishment was inadequately prepared to counter the threat. To correct this deficiency, the White House put pressure on the services, especially the U.S. Army, to develop the doctrine and forces necessary to conduct what was variously called counterinsurgency, counter guerrilla warfare, special warfare, special operations, or stability operations. As the military's capability to engage in unconventional warfare grew, so, too, did the opportunities to translate this capability into action. One such opportunity was the crisis in the Dominican Republic in 1965. In "Power Pack: U.S. Intervention in the Dominican Republic, 1965-1966," Dr. Lawrence A. Yates vividly describes the role of the military in what today would be termed peacetime contingency and peacekeeping operations. After tracing the origins of the Dominican crisis, Dr. Yates analyzes the concerns that led to U.S. intervention; the joint planning, command and control arrangements, and intelligence gathering efforts that preceded and followed the introduction of U.S. marines and**

paratroopers into the country; the missions of those forces and the difficulties they encountered; the formation of an inter-American peace force that transformed unilateral intervention into a multilateral undertaking; and the way in which military forces provided the foundation upon which a political settlement was negotiated. In virtually every phase of the Dominican intervention, political considerations far outweighed military requirements. In this sense, "Power Pack" illustrates the kind of political military operations U.S. armed forces are most likely to engage in today under conditions short of all-out war. Many of the problems the military experienced in playing a supporting role to the diplomats and civil authorities instead of occupying stage center would later be reprised in Vietnam. In some respects, the U.S. intervention in the Dominican Republic was a dress rehearsal for Vietnam. In other respects, the dissimilarities are equally striking. In the Dominican Republic, the United States deployed, in the course of one week, a force large enough to end a civil war, suppress a potential insurgency, assist in restoring order and democracy, prevent a Communist takeover, and, having accomplished all this, leave the country one year later with its objectives achieved. The intervention in the Dominican Republic represents a successful application of U.S. power and diplomacy and an instructive case study for professional officers today.

The Bluegrass Conspiracy

iUniverse When Kentucky Blueblood Drew Thornton parachuted to his death in September 1985—carrying thousands in cash and 150 pounds of cocaine—the gruesome end of his startling life blew open a scandal that reached to the most secret circles of the U.S. government. The story of Thornton and "The Company" he served, and the lone heroic fight of State Policeman Ralph Ross against an international web of corruption is one of the most portentous tales of the 20th century.

Killing Hope

US Military and CIA Interventions Since World War II

Is the United States a force for democracy? From 1940s China to Guatemala today, Blum presents a study of American covert and overt interference in the internal affairs of other countries. Each chapter of the book covers a year in which the author takes one particular country case and tells the story.

Latin American Research Review

Scenes from an Unfinished War

Low-Intensity Conflict in Korea, 1966-1969

www.Militarybookshop.CompanyUK **Low-intensity conflict (LIC) often has been viewed as the wrong kind of warfare for the American military, dating back to the war in Vietnam and extending to the present conflicts in Iraq and Afghanistan. From the American perspective, LIC occurs when the U.S. military must seek limited aims with a relatively modest number of available regular forces, as opposed to the larger commitments that bring into play the full panoply of advanced technology and massive commitments of troops. Yet despite the conventional view, U.S. forces have achieved success in LIC, albeit "under the radar" and with credit largely assigned to allied forces, in a number of counterinsurgency wars in the 1960s."Scenes from an Unfinished War: Low-Intensity Conflict in Korea, 1966-1969" focuses on what the author calls the Second Korean conflict, which flared up in November 1966 and sputtered to an ill-defined halt more than three years later. During that time, North Korean special operations teams had challenged the U.S. and its South Korean allies in every category of low-intensity conflict - small-scale skirmishes along the Demilitarized Zone between the two Koreas, spectacular terrorist strikes, attempts to foment a viable insurgency in the South, and even the seizure of the USS Pueblo - and failed. This book offers a case study in how an operational-level commander, General Charles H. Bonesteel III, met the challenge of LIC. He and his Korean subordinates crafted a series of shrewd, pragmatic measures that defanged North Korea's aggressive campaign. According to the convincing argument made by "Scenes from an Unfinished War," because the U.S. successfully fought the "wrong kind" of war, it likely blocked another kind of wrong war - a land war in Asia. The Second Korean Conflict serves as a corrective to assumptions about the American military's abilities to formulate and execute a winning counterinsurgency strategy. Originally published in 1991. 180 pages. maps. ill.**

Public Affairs

The Military and the Media, 1962-1968

Government Printing Office **United States Army in Vietnam. CMH Pub. 91-13. Draws upon previously unavailable Army and Defense Department records to interpret the part the press played during the Vietnam War. Discusses the roles of the following in the creation of information policy: Military Assistance Command's Office of Information in Saigon; White House; State Department; Defense Department; and the United States Embassy in Saigon.**

Scenes from an Unfinished War

Low Intensity Conflict in Korea 1966-1969

DIANE Publishing **Discusses how South Korean and American forces battled North Korean special operations teams across the Korean peninsula during the Second Korean Conflict. This conflict included small-scale skirmishes along the demilitarized zone, terrorist strikes, the seizure of the USS Pueblo, and several North Korean efforts to foment a viable insurgency. A case study of a successful low-intensity conflict. Illustrated.**

Who's who in Engineering

Short of War

Major USAF Contingency Operations, 1947-1997

U.S. Government Printing Office **Since the fall of the Berlin Wall, a series of geographically localized crises caused by political, religious, or ethnic unrest; outright military aggression; and natural disasters has replaced the relative stability that characterized international relations for more than fifty years of the Cold War. For the United States Air Force (USAF), this has meant short-notice deployments, airlifts, and other operational missions conducted in reaction to local crises. Such missions-once of secondary importance to nuclear deterrence or preparations for theater war-have come to dominate Air Force operations. The result has been recognition**

that global aerospace power and mobility are central to effective American crisis intervention in the post-Cold War world. This recognition has led the U.S. Air Force to restructure itself as an Expeditionary Aerospace Force, exploiting diverse core competencies consisting of global air and space superiority, rapid global mobility, precision engagement, global attack, information superiority, and agile combat support. Via rapid-response air expeditionary forces, the U.S. Air Force can furnish global power and presence for humanitarian or combat purposes--"bombs or bread or both"--In hours to any spot on Earth. A traditional precept of USAF doctrine has been that the service must always be prepared to assess its roles and missions in light of new and ever-changing national policy and strategy. Recognizing that doctrine is largely a distillation of knowledge gained from historical experience, the Air Force Historical Research Agency has compiled this record of USAF contingency operations covering the last half-century.

Personnel - Awards and Memorialization Program (Air Force Manual 36-2806)

Lulu.com This manual implements Air Force Policy Directive (AFPD) 36-28, Awards and Decorations Programs; and AFPD 36-31, Personal Affairs. This manual governs the Air Force special trophies, awards, decorations and memorialization programs. It applies to Regular Air Force, Air Force Reserve and Air National Guard personnel; and where specified applies to Air Force civilian employees paid through appropriated funds. In collaboration with the Chief of Air Force Reserve (AF/RE) and Director of the Air National Guard (NGB/CF), the Deputy Chief of Staff for Manpower, Personnel, and Services (AF/A1) develops personnel policy for the Air Force Awards and Memorialization Program. Ensure all records created as a result of processes prescribed in this publication are maintained in accordance with Air Force Manual (AFMAN) 33-363, Management of Records, and disposed of in accordance with the Air Force Records Disposition Schedule located in the Air Force Records Information Management System.

173d Airborne Brigade Sky Soldiers

Turner Publishing Company

Apollo's Warriors

DIANE Publishing Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces. Bibliography. Extensive photos & maps. Charts & tables.

Congressional Record

Proceedings and Debates of the ... Congress

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

"Not War But Like War"

The American Intervention in Lebanon

DIANE Publishing

The Overseas Territories

Security, Success and Sustainability

The Stationery Office The Government, in consultation with the Territories and other stakeholders, has developed a strategy of re-engagement: strengthening links between the Territories and the UK; strengthening governance; and enhancing support to the Territories. This White Paper sets out priorities for action in terms of defending the Territories;

supporting successful economic development; preserving the Territories' rich environmental heritage and addressing the challenges of climate change; making government work better; community issues; and strengthening links with international and regional organisations or other countries. Taking this forward will require a partnership between the UK Government and Territory Governments. The UK wants to strengthen political engagement between Ministers in the UK and the Territories, particularly through the proposed Joint Ministerial Council, and is determined to live up to its responsibilities to the Territories

World Urbanization Prospects

The 2018 Revision

The report presents findings from the 2018 revision of World Urbanization Prospects, which contains the latest estimates of the urban and rural populations or areas from 1950 to 2018 and projections to 2050, as well as estimates of population size from 1950 to 2018 and projections to 2030 for all urban agglomerations with 300,000 inhabitants or more in 2018. The world urban population is at an all-time high, and the share of urban dwellers, is projected to represent two thirds of the global population in 2050. Continued urbanization will bring new opportunities and challenges for sustainable development.

The Bizarre Careers of John R. Brinkley

University Press of Kentucky By 1926, it seemed that John R. Brinkley's experimental rejuvenation cure—transplanting goat glands into aging men—had taken the nation by storm. Never mind that "Doc" Brinkley's medical credentials were shaky at best and that he prescribed medication over the airwaves via his high-power radio stations. To most in the medical field, he was a quack. But to his many patients and listeners, he was a brilliant surgeon, a savior of their lost manhood and youth. His rogue radio stations, XER and its successor XERA, eventually broadcast at an antenna-shattering 1,000,000 watts and not only were a megaphone for Brinkley's lucrative quackery but also hosted an unprecedented number of then-unknown country musicians and other guests. *The Bizarre Careers of John R. Brinkley* tells the story of the infamous "Goat Gland Doctor"—a controversial medical charlatan, groundbreaking radio impresario, and prescient political campaigner—and recounts his amazing rags-to-riches-to-rags career. A master manipulator and skilled con artist, Brinkley left behind a patchwork of myths and unreliable personal accounts that many writers have merely perpetuated—until now. Alton Lee brings Brinkley's

infamous legacy to the forefront, exploring how he ruthlessly exploited the sexual frustrations of aging men and the general public's antipathy toward medical doctors. Lee leaves no stone unturned in this account of a man who changed the course of American institutions forever.

The CIA

A Forgotten History : US Global Interventions Since World War 2

"The CIA: a forgotten history tells the remarkable story of the CIA interventions in more than fifty countries, from the earliest actions in China to the present day campaign against Nicaragua. Investigative writer William Blum describes the grim role played by the Agency in overthrowing governments, preventing elections, assassinating leaders, suppressing revolutions, manipulating trade unions and manufacturing 'news' -- in detail that's never before appeared in one book. Blum also shows how the mainstream media have frequently not bothered to probe, highlight or even report many of America's aggressive actions abroad. Effectively, this has helped the US Government camouflage its operations and intentions abroad ever since World War II. Washington's deception and the media's laxity combine to leave us functionally illiterate about the history of modern US foreign policy. And that, the author believes, is good neither for democracy, nor for development and world peace. This immensely readable account has been carefully pieced together from widely disparate sources and with a scrupulous eye to documentation." --

Brothers in Berets

The Evolution of Air Force Special Tactics, 1953-2003

The Air Force Special Operations Command (AFSOC) special tactics community is a small, tight-knit brotherhood of proficient and committed warriors, consisting of special tactics officers and combat controllers, combat rescue officers and pararescuemen, and officer and enlisted special operations weathermen. These warriors have consistently proven themselves to be an invaluable force multiplier throughout history in conflicts around the world. This is their story.--Provided by publisher.

U.S. Army Counterinsurgency and Contingency Operations Doctrine, 1860-1941 (Paperbound)

Government Printing Office **NOTE: NO FURTHER DISCOUNT FOR THIS PRINT PRODUCT--OVERSTOCK SALE -- Significantly reduced list price U.S. Army Counterinsurgency and Contingency Operations Doctrine, 1860-1941, is the first of a two-volume study on the U.S. Army's experience in "small war" situations and the development of low-intensity conflict doctrine. Focusing on the suppression of insurgent or other irregular forces during overseas constabulary and contingency operations from the Civil War years up to America's entry into World War II, Andrew J. Birtle has filled an important omission in military historiography by writing about the underlying theories, concepts, and methods employed in the conduct of myriad unconventional missions with soldiers serving as governors, constables, judges, diplomats, explorers, colonizers, educators, administrators, and engineers. Even though official, codified, written doctrine for counterinsurgency, pacification, and nation-building activities prior to World War II has long been viewed as nonexistent, Birtle uncovers through his meticulous research an evidentiary thread of continuity in the Army's performance and thus maintains that some of the central principles**

governing such operations were indeed incorporated into official Army doctrinal literature. The events discussed unquestionably occurred long ago, but many of the issues raised by Birtle have enduring relevance for today's Army. People, places, and events may change, yet the fundamental questions involved in suppressing insurrections, fighting irregulars, administering civilian populations, and conducting foreign intervention remain surprisingly constant in this unpredictable world of ethnic tensions and turmoil. By studying how soldiers dealt with these complex issues in the past, Birtle's well-written account offers valuable insights to guide current and future soldiers when called upon to conduct similar operations. Military strategists, historians, and civilians interested in America's early history may find this resource appealing and offer a better understanding of Army doctrine from a historical perspective. Short of War: Major U. S. A. F. Contingency Operations

CreateSpace **Spanning the decades from the beginning of the Cold War to today's strategy of global engagement, the twenty-three operational summaries in this book illustrate each of the objective for military operations other than wart. The USAF conducted each of these contingencies in a combat zone or area of serious civil disturbance. Since the fall of the Berlin Wall, a series of geographically localized crises caused by political, religious or ethnic unrest; outright military aggression; and natural disasters has replaced the relative stability that characterized international relations for more than 50 years of the Cold War. For the United States Air Force, this has meant short notice deployments, air lifts, and other operational missions conducted in reaction to local crises. Such missions have come to dominate Air Force Operations.**

The Chairmanship of the Joint Chiefs of Staff, 1949-1999

Office of the Chairman of the Joint Chiefs of Staff By Lorna S. Jaffe, et al. Gives a historical perspective on the development of the chairmanship as an institution as well as on the Chairman's and Vice Chairman's role in the formation and implementation of our national security policy. Sheds light on civil-military relations at the highest level during the Cold War and its immediate aftermath. Provides valuable insight into the interaction of individuals, circumstances, and law, which produced the chairmanship as we know it today.

Human Factors Considerations of Undergrounds in Insurgencies Second Edition

Createspace Independent Publishing Platform From the preface: "The 1966 'Human Factors' edition focused on the contemporary threat of Maoist insurgencies, particularly in Southeast Asia, and also drew extensively on World War II resistance movements in Europe. Much of this information is still relevant and has been retained and integrated. In the post-Cold War world, the most important insurgencies tend to be ethnic and religious. Long-simmering conflicts, sometimes with roots in colonial policies, have become prominent; examples include the Liberation Tigers of Tamil Eelam (LTTE) in Sri Lanka, Euskadi Ta Askatasuna (Basque Homeland and Freedom or ETA) in Spain, the Hutu-Tutsi genocides, the Ushtia and Kiriimtara and Kosovos (Kosovo Liberation Army, or KLA), and the Provisional Irish Republican Army (PIRA). Battle lines in these conflicts are often drawn along ethnic lines, even when land or politics are the immediate issues in contention. The other important new category is extremist religious movements, most prominently Islamic groups, including regional insurgent movements like Hizbollah and Harakat al-Muqawamah al-Islamiyyah (Islamic Resistance Movement, or HAMAS) and global movements like Al Qaeda. These present a different profile of ideology, organizational forms, and psychology than either Cold War Maoists or post-colonial ethnic insurgencies (although the Palestinian cause could be considered a post-colonial issue). Globalization has also changed underground operations in numerous ways. Insurgencies, enabled by low-cost transportation, Internet based communications, and other information technologies, can more easily recruit, communicate, and operate across borders. It is correspondingly much more difficult to contain an insurgency in a region.

Global media has led to development of new tactics, in particular new types of terrorism, designed to capture worldwide attention. Compared with what was available in the 1960s, there are orders of magnitude more academic research available relevant to this study's topics. We were able to draw on more recent work in psychology, political science, economics, sociology, organizational studies, and communications studies. Readers of this edition will, over the course of eleven chapters, get a wide exposure to basic concepts from a number of disciplines".

Cambridge University Press **Enth.:** Bd. 1-2: Colonial Latin America ; Bd. 3: From Independence to c. 1870 ; Bd. 4-5: c. 1870 to 1930 ; Bd. 6-10: Latin America since 1930 ; Bd. 11: Bibliographical essays.

America's Role in Nation-Building From Germany to Iraq

Rand Corporation **The post-World War II occupations of Germany and Japan set standards for postconflict nation-building that have not since been matched. Only in recent years has the United States has felt the need to participate in similar transformations, but it is now facing one of the most challenging prospects since the 1940s: Iraq. The authors review seven case studies--Germany, Japan, Somalia, Haiti, Bosnia, Kosovo, and Afghanistan--and seek lessons about what worked well and what did not. Then, they examine the Iraq situation in light of these lessons. Success in Iraq will require an extensive commitment of financial, military, and political resources for a long time. The United States cannot afford to contemplate early exit strategies and cannot afford to leave the job half completed.**

The Growth Report Strategies for Sustained Growth and Inclusive Development

World Bank Publications **The result of two years work by 19 experienced policymakers and two Nobel prize-winning economists, 'The Growth Report' is the most complete analysis to date of the ingredients which, if used in the right country-specific recipe, can deliver growth and help lift populations out of poverty.**

The Past, Present, and Future of U.S. Ground Interventions

Identifying Trends, Characteristics, and Signposts

"In recent years, the frequency of U.S. military interventions in overseas areas, including not only those involving conventional war but also peacekeeping and humanitarian relief operations, has risen. These interventions have involved thousands of troops, cost billions of dollars, and placed significant demands on Army leadership, planning, and resources. The Army would benefit from an enhanced ability to anticipate the types and conditions of overseas military interventions it is most likely to be called upon to undertake in the future. This report constructs three different sets of models using historical data (one for each of three intervention types: interventions into armed conflict, stability operations in conflict and postconflict environments, and deterrent interventions). It examines the key factors influencing the incidence of military interventions and intervention size. Finally, the analysis provides the Army with signposts and metrics that can be used to identify countries, conflicts, and crises that are at highest risk for a U.S. intervention. Key signposts include the relationship between the target of the intervention and the United States, past U.S. military involvement in that country, and the severity of the crisis or threat to which the United States is responding. These signposts would allow the Army to better anticipate and plan for future interventions and could improve both near- and medium-term force-planning decisions"--Publisher's description.

Global Innovation Index 2017

Innovation Feeding the World

WIPO The Global Innovation Index provides detailed metrics about the innovation performance of 127 countries and economies around the world. Its 81 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. This year's report reviews the state of innovation in agriculture and food systems across sectors and geographies. Chapters of the report provide more details on this year's theme from academic, business, and particular country perspectives from leading experts and decision makers.

Guide to U.S. Army Museums

DIANE Publishing This Guide will lead military personnel, their families, and other students interested in the lessons of military history through the vast richness of exhibits and artifacts in the Army Museum System, both in the U.S. and abroad. Open to the public, these museums help form a bridge linking today's Army with yesterday and tomorrow for the citizen. The Army's materiel culture comprises over 600,000 artifacts valued at over \$740 million. Lists over 80 museums and includes: hours of operation, address, telephone, directions, background, programs and services, museum publications, and a photo. Also includes Army Reserve museums.

Collapse

How Societies Choose to Fail or Survive

Penguin UK From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times

The U.S. Military Intervention in Panama: Origins, Planning, and

Crisis Management, June 1987- December 1989 (Paperback)

Government Printing Office This history examines the Panama crisis from June 1987 to December 1989 not simply as a prelude to Operation Just Cause but as a case study in its own right - as an extended series of interrelated actions and issues that U.S. military personnel had to confront on a daily basis in a process that imparted no sense of inevitability as to the outcome.

Visual Aircraft Recognition

This manual is primarily a ready reference to assist the ground observer in aircraft recognition and identification. It provides information on current operational aircraft of the United States and foreign countries, which may be observed worldwide in the combat area. It can be used as source material for personnel conducting unit training in visual aircraft recognition. The procedures in this publication apply throughout the US Army. The data is based on the best information available at the time of publication; however, it is not all-inclusive because of some classification guidelines. This publication, by nature, has a built-in time lag, and some aircraft may still be under development or classified at the time of writing, but may be fielded or unclassified at, or after, publication.

Forty Years of Uranium Resources, Production and Demand in Perspective

"the Red Book Retrospective."

OECD The "Red Book", jointly prepared by the OECD Nuclear Energy Agency and the International Atomic Energy Agency, is a recognised world reference source on the uranium industry. This publication collates and analyses key information drawn from the twenty editions of the Red Book published between 1965 and 2004, in order to set out a comprehensive review of developments in the world uranium industry from the birth of civilian nuclear energy through to the beginning of the 21st century. It summarises developments in the major uranium-producing countries and topics covered include: installed nuclear capacity, reactor-related uranium requirements, market price, exploration, resources, production, natural

and enriched uranium inventories, thorium, mine start-up and closure histories, environmental aspects of uranium mining and processing.
