OF BODY AND BRUSH

GRAND SACRIFICE AS TEXT/PERFORMANCE IN EIGHTEENTH-CENTURY CHINA

University of Chicago Press The Qianlong emperor, who dominated the religious and political life of eighteenth-century China, was in turn dominated by elaborate ritual prescriptions. These texts determined what he wore and ate, how he moved, and above all how he performed the yearly Grand Sacrifices. In *Of Body and Brush*, Angela Zito offers a stunningly original analysis of the way ritualizing power was produced jointly by the throne and the official literati who dictated these prescriptions. Forging a critical cultural historical method that challenges traditional categories of Chinese studies, Zito shows for the first time that in their performance, the ritual texts embodied, literally, the metaphysics upon which imperial power rested. By combining rule through the brush (the production of ritual texts) with rule through the body (mandated performance), the throne both exhibited its power and attempted to control resistance to it. Bridging Chinese history, anthropology, religion, and performance and cultural studies, Zito brings an important new perspective to the human sciences in general.

POLYMERS

TECHNICAL ACTIVITIES 1987 (CLASSIC REPRINT)

Forgotten Books Excerpt from *Polymers: Technical Activities 1987* There are many opportunities for innovation and cost savings that could be realized through more intelligent design and control of processing. Industry trends already reflect a need for more research on the fundamental principles involved in the processing of polymers. We have begun to study some applications of novel sensors for viscosity, flow, and mixing that are the beginning of an increased emphasis on providing this science base. One of the ways in which we provide technical services to industry and the scientific community is by making major measurement facilities available for collaborative research or, in some cases, for proprietary measurements. This past year we have opened up our 10-meter small angle x-ray scattering facility to outside users. These users have been interested in the structure of novel blend systems, the structure of high strength fibers, and measurement of structure in processed sheet and film. The facility is useful in measuring structures on a size scale in the 1 to 100 nanometer range. We welcome inquires from any other potential users. VIRGINIANS AT WAR

THE CIVIL WAR EXPERIENCES OF SEVEN YOUNG CONFEDERATES

Rowman & Littlefield Virginians at War is the tale of seven Virginians who strongly supported the Confederacy from beginning to end. Selby describes in vivid prose their seven intriguing lives based on their diary entries, letters, and memoirs.
