THE INTERNATIONALIZATION OF GOVERNMENT PROCUREMENT REGULATION

Oxford University Press As governments are major buyers of goods and services, foreign companies are keen to be able to participate in procurement opportunities on an equal footing with national firms. This has given rise to the inclusion of procurement disciplines in trade agreements and to internationally-agreed good regulatory practices in this important policy area. The contributions to this book examine how the dynamic mix of bilateral, regional, plurilateral and international norms on government procurement is reflected in purchasing practices at the national level and whether these are leading to convergence in policies and approaches. The countries studied span both advanced, high-income economies and

emerging economies. Some are members of the WTO procurement agreement, others are not. Most WTO members have decided not to commit to binding international disciplines on procurement in trade agreements. This book explores whether there has been nonetheless internationalization of good procurement practices, and what current public purchasing processes suggest as regards the value added of signing on to binding rules of the game in this area. The approach taken in the volume is interdisciplinary. Contributors include economists, political scientists, legal scholars, and practitioners with a solid understanding of both the extant international disciplines and national government procurement policies. Each chapter assesses the current state of play as regards legislation and procurement practices; the degree to which industrial policy considerations feature in the relevant regulatory frameworks; the existence and use of domestic dispute resolution and review procedures that allow firms to contest the behavior of procuring entities; and the availability of data on procurement processes and outcomes.

PUBLIC POLICY, GOVERNANCE AND POLARIZATION

MAKING GOVERNANCE WORK

Taylor & Francis Polarization is widely diagnosed as a major cause of the decline of evidence-based policy making and public engagement-based styles of policy making. It creates an environment where hardened partisan viewpoints on major policy questions are less amenable to negotiation, compromise or change. Polarization is not a temporary situation – it is the “new normal.” Public Policy, Governance and Polarization seeks to provide a theoretical foundation for scholars and policy makers who need to understand the powerful and often disruptive forces that have arisen in Europe and North America over the past decade. Academics and practitioners need to better understand this growing trend and to find ways in which it may be managed so that policy solutions to these threats may be developed and implemented. Researchers and future policymakers in fields such as public administration, public management and public policy need to recognise how institutional design, corporatist interest group systems and different pedagogical approaches may help them understand, discuss and work beyond policy polarization. Edited by two leading political science scholars, this book aims to begin that process.

A CHRONICLE OF ECHOES

WHO'S WHO IN THE IMPLOSION OF AMERICAN PUBLIC EDUCATION

IAP "Corporate reform" is not reform at all. Instead, it is the systematic destruction of the foundational American institution of public education. The primary motivation behind this destruction is greed. Public education in America is worth almost a trillion dollars a year. Whereas American public education is a democratic institution, its destruction is being choreographed by a few wealthy, well-positioned individuals and organizations. This book investigates and exposes the handful of people and institutions that are often working together to become the driving force behind destroying the community public school.

CHINA'S AIR POLLUTION PROBLEMS

Routledge China's rapid industrialisation has led to "an air pollution catastrophe". Concerted efforts to achieve economic growth have led to veiled skies of toxic air and created health and morbidity problems as well as tremendous environmental degradation. China's Air Pollution Problems provides an overview of air pollution in China describing how and why China has ended up in such a dire situation, what the government is doing to address the problem and the difficulties it is encountering in attempting to reduce the pollution. The analysis is based on both grey literature (newspaper articles, NGO reports, Chinese government information) and on academic studies. The grey literature gives a voice to those who suffer from the pollution, their advocates, and government officers, and allows the reader to better grasp the conditions on the ground, and the impact of air pollution among people in different areas in China. The academic literature adds a theoretical perspective and brings these different case studies into a broader context. This book will be of great interest to students of environmental pollution and contemporary Chinese studies looking for an introduction to the topic and also for researchers looking for an extensive list of sources and analysis of China's environmental problems.

GERMANY'S ROLE IN THE EURO CRISIS

BERLIN'S QUEST FOR A MORE PERFECT MONETARY UNION

Springer This book analyses Germany's role in the euro crisis. Based on the perception of Berlin as the emerging capital of the European Union, the author investigates three interrelated issues: Did the German policy approach of imposing austerity programs on countries in the middle of a deep recession contribute to the successful management of the euro crisis? Does Germany extend its sway over its European partners by forcing them to surrender to the German diktat of fiscal Disziplin and economic efficiency? Is the stubborn insistence on rigid fiscal adjustment another ominous sign of the Berlin Republic moving away from the country's traditional European vocation toward an imperial leadership role? The book's main argument is that Germany's role in and responses to the euro crisis can

best be explained by different concepts of self, historical memory, and institutional practices.

MARK DION

MISADVENTURES OF A 21ST-CENTURY NATURALIST

Yale University Press A comprehensive survey of American artist Mark Dion, examining three decades of his critically engaged practice interrogating our relationship with nature The first book in two decades to consider the entire oeuvre of Mark Dion (b. 1961), this volume examines thirty years of the American artist's pioneering inquiries into how we collect, interpret, and display nature. Part of a generation of artists expanding institutional critique in the 1990s, Dion adopted the methods of the archaeologist or the natural history museum, juxtaposing natural objects, taxidermy, books, and more to reorganize the natural and the manmade in poetic, witty ways. These sculptures, installations, and interventions offer novel approaches to questioning institutional power, which he sees as connected to the control and representation of nature. Generously illustrated, this publication introduces new insights and features more than seventy-five artworks. Essays address topics ranging from Dion's ecological activism to his loving critique of museums. A diverse group of contributors explores his work as a teacher, his public artworks such as Neukom Vivarium in Seattle, and his intricate curiosity cabinets installed throughout the world. They reveal how Dion's practice and formal investigations--which are rooted in history--connect to contemporary questions of disciplinary boundaries and the acquisition of knowledge in the age of the Anthropocene.
