### The First Circumnavigators

## Unsung Heroes of the Age of Discovery

**Yale University Press** *Prior histories of the first Spanish mariners to circumnavigate the globe in the sixteenth century have focused on Ferdinand Magellan and the other illustrious leaders of these daring expeditions. Harry Kelsey's masterfully researched study is the first to concentrate on the hitherto anonymous sailors, slaves, adventurers, and soldiers who manned the ships. The author contends that these initial transglobal voyages occurred by chance, beginning with the launch of Magellan's armada in 1519, when the crews dispatched by the king of Spain to claim the Spice Islands in the western Pacific were forced to seek a longer way home, resulting in bitter confrontations with rival Portuguese. Kelsey's enthralling history, based on more than thirty years of research in European and American archives, offers fascinating stories of treachery, greed, murder, desertion, sickness, and starvation but also of courage, dogged persistence, leadership, and loyalty.*

## Was Australia Charted Before 1606?

## The Java la Grande Inscriptions

**National Library Australia** *Dutchman Willem Janszoon's arrival on the shores of Cape York in the Duyfken in 1606 is universally regarded as the first reliably documented non-Aboriginal arrival on Australia's shores. Yet claims abound that the Portuguese, French, Spanish, Indonesians and, most recently, the Chinese were earlier visitors. Author William A.R. Richardson, Associate Professor at Flinders University, South Australia, examines the evidence for these claims and presents his own case. Much of the Portuguese claim rests on the evidence of a series of sixteenth-century French maps which show a charted landmass?Jave la Grande, south of Indonesia?which some have identified as Australia. Richardson devotes much of his book to considering this issue in detail, in particular the information that place-names can provide in identification. This book is illustrated throughout with charts and maps, some of which are beautifully embellished, showcasing the exquisite art and skill of the mapmakers of the day.*

## Straits

## Beyond the Myth of Magellan

**Univ of California Press** *An uncompromising study of the fictions, the failures, and the real man behind the myth of Magellan. With Straits, celebrated historian Felipe Fernández-Armesto subjects the surviving sources to the most meticulous scrutiny ever, providing a timely and engrossing biography of the real Ferdinand Magellan. The truth that Fernández-Armesto uncovers about Magellan's life, his character, and the events of his ill-fated voyage offers up a stranger, darker, and even more compelling narrative than the fictional version that has been celebrated for half a millennium. Magellan did not attempt--much less accomplish--a journey around the globe. In his lifetime he was abhorred as a traitor, reviled as a tyrant, self-condemned to destruction, and dismissed as a failure. Straits untangles the myths that made Magellan a hero and discloses the reality of the man, probing the passions and tensions that drove him to adventure and drew him to disaster. We see the mutations of his character: pride that became arrogance, daring that became recklessness, determination that became ruthlessness, romanticism that became irresponsibility, and superficial piety that became, in adversity, irrational exaltation. As the real Magellan emerges, so do his real ambitions, focused less on circumnavigating the world or cornering the global spice market than on exploiting Filipino gold. Straits is a study in failure and the paradox of Magellan's career, showing that renown is not always a reflection of*

merit but often a gift and accident of circumstance.

## Subversions of the American Century

### Filipino Literature in Spanish and the Transpacific Transformation of the United States

**University of Michigan Press** *Subversions of the American Century: Filipino Literature in Spanish and the Transpacific Transformation of the United States* argues that the moment the United States became an overseas colonial power in 1898, American national identity was redefined across a global matrix. The Philippines, which the United States seized at that point from Spain and local revolutionaries, is therefore the birthplace of a new kind of America, one with a planetary reach that was, most profoundly, accompanied by resistance to that reach by local peoples. Post-1898 Filipino literature in Spanish testifies crucially to this foregrounding fact of American global power, for it is the language of that tradition that speaks directly to the reality of one empire having wrested land from another. Yet this literature is invisible in American Studies programs, Asian Studies programs, Spanish and English departments, and everywhere else. *Subversions of the American Century* will change that. After *Subversions*, students and scholars in various American Studies disciplines as well as Asian, Spanish, and Comparative Literature fields will find it necessary to revisit and revamp the basic parameters by which they approach their subjects.

## Habsburg Peru

### Images, Imagination and Memory

**Liverpool University Press** "The two case studies presented in this book represent two distinct types of imagining by two diametrically different groups: literate, and in some cases erudite Europeans, and a vanquished native nobility. The former endeavoured to make sense of Spain's (and Portugal's) 'marvellous possessions' in the New World with the limited conceptual tools at their disposal, the latter to construct a colonial identity based on their shared ancestral memory while incorporating elements from the even more wondrous Hispanic culture that had overwhelmed them. There were, of course, multiple misunderstandings and misinterpretations. Yet for the Spanish such distortions were a matter of government and religion, rectifiable in the fullness of time, whether by evangelisation or the relentless application of civil and canon law.

## The Ocean Basins: Their Structure and Evolution

**Elsevier** *This is an invaluable textbook, prepared by the Open University team and designed so that it can be read on its own or as part of the OU course. This second edition has been fully revised and updated including new colour illustrations increasing the striking spread of full colour diagrams throughout the book. The clarity of the text has been improved, providing comprehensive coverage of the evolution of ocean basins and their structure in a clear, concise manner aimed specifically at the student market. In this second edition the technological advances in fields as diverse as: - deep-towed instruments for 'sniffing' hydrothermal plumes - mapping the sea-floor by sophisticated sonar techniques - three-dimensional imaging of crustal structure by seismic tomography - the use of satellites for navigation, and for making precise measurements of the height of the sea-surface The first chapters describe the processes that shape the ocean basins, determine the structure and composition of oceanic crust and control the major features of continental margins. How the 'hot springs' of the oceanic ridges cycle chemical elements between seawater and oceanic crust is then explored. Sediment distributions are examined next, to demonstrate how sediments can preserve a record of past climatic and sea-level changes. Finally, the role of the oceans as an integral part of global chemical changes is reviewed. High quality full colour diagrams Substantial chapter summaries ideal for revision Answers, hints and notes for questions at back of the book*

## Popes, Lawyers, and Infidels

## The Church and the Non-Christian World, 1250-1550

**University of Pennsylvania Press** *Criticism of the way in which Europeans have treated the inhabitants of the non-European world in the course of European expansion has a long history, Three centuries before Christopher Columbus encountered the American Indians, European intellectuals and clergymen had criticized the treatment of the peoples whom the crusaders and other Europeans met as they moved outward from the heartland of European civilization. The connection between the sixteenth-century Spanish writers who criticized the Spanish conquest of the Americas and medieval writers who criticized the behavior of Europeans toward the non-Europeans they encountered on their borders, is more familiar. Yet, their criticism referred back to medieval legal traditions and arguments about the rights of infidels in the face of European expansion. However, it is the increased recognition of the importance of this connection that has inspired much new research in the field of medieval canon law. The most important theorist of what we now call "race relations", in the Middle Ages, was Sinibaldo Fieschi, a distinguished canon-lawyer, who became Pope Innocent IV (1243-54), whose pontificate is the starting point of this study. As a working canon-lawyer and pope, Innocent's work provides an unusual insight into the whole development of Christian-infidel relations, for his work covers those who lived within Christian Europe, those who were recent converts to Christianity, and those who lived beyond the bounds of Christendom. As pope he initiated the Mongol mission, the first attempt to deal with the Mongol threat to Eastern Europe on a diplomatic level, and to convert the Mongols to Christianity. As a lawyer he was also the author of a commentary on the nature of a just war that became the basis for all future discussion of the rights of infidels who lived in the path of European expansion. A wide knowledge of both legal theory and papal practice blended in a single career and it was this union of these two traditions that formed the intellectual background of Vitoria and Las Casas, and the eminent critics who followed them. This is the first complete study of this subject, based upon a careful analysis of papal and legal sources. Papal sources included letters found in papal registers, including the unpublished Vatican Register 62 which contains only letters dealing with the problems raised by infidel societies. The legal sources include commentaries on the basic texts of canon law that bear on the status of infidels, as well as legal opinions written to deal with specific problems involving Christian-infidel relations. Although directed to specialists and students of this period, this work, original in concept and exceptionally well-written, is sure to find a far wider audience. The whole subject is important, and topical too, in view of the current interest in racism and race relations, itself the subject of the author's Appendix.*

## Art, Trade, and Cultural Mediation in Asia, 1600–1950

**Springer** *This Palgrave Pivot explores the social and cultural impact of global trade at a micro-level from around 1600 to 1950. Bringing together the collaborative skills of cultural, social, economic, and art historians, it examines how the diffusion of trade, goods and objects affected people's everyday lives. The authors tell several stories: of the role played by a host of intermediaries – such as apothecaries, artisans and missionaries who facilitated the process; of objects such as Japanese export lacquer-ware and paintings; of how diverse artistic influences came to be expressed in colonial church architecture in the Philippines; of revolutionary changes wrought on quotidian tastes and preferences, as shown in the interior decoration of private homes in the Dutch East Indies; and of transformations in the smoking and drinking habits of Southeast Asians. The chapters consider the conditions from which emerged new forms of artistic production and transfer, fresh cultural interpretations, and expanded markets for goods, objects and images.*

### Virtual Voyages

## Travel Writing and the Antipodes 1605-1837

**Anthem Press** *'Virtual Voyages'* is a fascinating account of the European discovery of the elusive 'great south land' told through the literature of 'imaginary voyages'. Written at the height of the era of European maritime exploration, these bizarre and captivating tales, with their wildly imaginative visions of antipodean inversion and strangeness, reveal a hidden history of attitudes to colonization. By exposing the relationship between myth and reality in the antipodes, this book casts new light on the power of fiction to influence history. In the post-colonial studies field, books about travel writing and empire have tended to focus on the high period of nineteenth-century imperialism and on the colonial settings of Africa and India. This book offers a fresh perspective by focussing on the eighteenth century, and referring to the geographical region of Australia and the Pacific, which has had far less attention. The book also breaks new ground by being the first to approach the genre of the imaginary voyage from a post-colonial perspective. In addition to the new insights into European colonialism that it offers, the book illustrates many broader themes in eighteenth-century history and thought. These include connections between the rise of science and modern imperialism, the development of narrative history and fiction and the influence of romanticism, the evolution of the early novel in Britain and France, and the role of mythology in the development of national identity.

## Governance and Regulation in Social Life

## Essays in Honour of W.G. Carson

**Routledge** Comprising fourteen articles by leading international contributors, including some of the most prominent socio-legal and criminological scholars working in the field, this volume is currently the only work available that critically examines W.G. Carson and his crucial influence in the turn towards sociological approaches to criminology and a criminological interest in governance and social control. The 1970s witnessed an epiphany in the sociological understanding of crime in Britain. The correctional perspective, which assumed crimes had inherent or essential qualities that distinguished them from other acts, was superseded by the analysis of how social events came to be defined as so harmful and repugnant as to require criminalization. This shift in perspectives was exemplified in W.G. Carson's work, which combines a Marxist acknowledgement of the imperative for profit with a symbolic interactionist attention to the restraining effect of prestige and status among producers and regulators. This key work is an essential read for postgraduates and researchers studying and researching in the areas of criminology and law.

## Dante & the Unorthodox

## The Aesthetics of Transgression

**Wilfrid Laurier Univ. Press** During his lifetime, Dante was condemned as corrupt and banned from Florence on pain of death. But in 1329, eight years after his death, he was again viciously condemned—this time as a heretic and false prophet—by Friar Guido Vernani. From Vernani's inquisitorial viewpoint, the author of the *Commedia* "seduced" his readers by offering them "a vessel of demonic poison" mixed with poetic fantasies designed to destroy the "healthful truth" of Catholicism. Thanks to such pious vituperations, a sulphurous fume of unorthodoxy has persistently clung to the mantle of Dante's poetic fame. The primary critical purpose of *Dante & the Unorthodox* is to examine the aesthetic impulses behind the theological and political reasons for Dante's allegory of mid-life divergence from the papally prescribed "way of salvation." Marking the septicentennial of his exile, the book's eighteen critical essays, three excerpts from an allegorical drama, and a portfolio of fourteen contemporary artworks address the issue of the poet's conflicted relation to orthodoxy. By bringing the unorthodox out of the realm of "secret things," by uncensoring them at every turn, Dante dared to oppose the censorious regime of Latin Christianity with a transgressive zeal more threatening to papal authority than the demonic hostility feared by Friar Vernani.

## The Penguin Historical Atlas of the Pacific

**Penguin Group USA** Outlines the history of the Pacific Ocean and the lands around it prehistoric times to the present

## Alien Volcanoes

**JHU Press** At once terrifyingly destructive and awe-inspiringly beautiful, volcanoes have long fascinated humankind. From Vesuvius and Etna to Krakatau and Mount Saint Helen's, these molten rock- and ash-spewing geysers have destroyed whole cities and countless lives, and altered the course of history. Yet our understanding of volcanoes on Earth—and throughout the celestial world—remains maddeningly incomplete. With *Alien Volcanoes*, Rosaly M. C. Lopes and Michael W. Carroll offer a dynamic tour of volcanic activity across the solar system. Through eight gracefully written chapters laced with gripping photographs and stunning artwork, Lopes and Carroll survey the complete spectrum of volcanism in time and location, from the solar system's origin to the modern era and from the familiar shield volcanoes of the terrestrial worlds to the bizarre superchilled geysers on distant ice moons. In the process, they entertain the possibility of hidden lakes on Saturn's moon Enceladus, discuss the potential effects of greenhouse gases on Neptune's moon Triton, reconstruct the last moments of life for Pompeiians in the face of an erupting Mount Vesuvius, and explain how a 4,000-mile-long river of lava could have once flowed freely across the plains of Venus. Richly illustrated with original paintings supplemented by NASA and European Space Agency photographs, *Alien Volcanoes* advances our knowledge of volcanoes on other heavenly bodies, enhances our ability to comprehend how they came into being on Earth, and describes how we might better predict the impact of future eruptions.
