## Medical Anthropology A Biocultural Approach

*Oxford University Press, USA* **Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.**

## Prince2 Foundation Training Manual

Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for

the foundation exam.

## The University and Urban Revival Out of the Ivory Tower and Into the Streets

*University of Pennsylvania Press* In the last quarter of the twentieth century, urban colleges and universities found themselves enveloped by the poverty, crime, and physical decline that afflicted American cities. Some institutions turned inward, trying to insulate themselves rather than address the problems in their own backyards. Others attempted to develop better community relations, though changes were hard to sustain. Spurred by an unprecedented crime wave in 1996, University of Pennsylvania President Judith Rodin knew that the time for urgent action had arrived, and she set a new course of proactive community engagement for her university. Her dedication to the revitalization of West Philadelphia was guided by her role not only as president but also as a woman and a mother with a deep affection for her hometown. The goal was to build capacity back into a severely distressed inner-city neighborhood—educational capacity, retail capacity, quality-of-life capacity, and especially economic capacity—guided by the belief that "town and gown" could unite as one richly diverse community. Cities rely on their academic institutions as stable places of employment, cultural centers, civic partners, and concentrated populations of consumers for local business and services. And a competitive university demands a vibrant neighborhood to meet the needs of its faculty, staff, and students. In keeping with their mission, urban universities are uniquely positioned to lead their communities in revitalization efforts, yet this effort requires resolute persistence. During Rodin's administration (1994-2004), the Chronicle of Higher Education referred to Penn's progress as a "national model of constructive town-gown interaction and partnership." This book narrates the challenges, frustrations, and successes of Penn's campaign, and its prospects for long-term change.
