Bibliography on Educational Finance 1923-1931 Harvard Business School ... Catalog of Teaching Materials The Research-Practice Gap on Accounting in the Public Services An International Analysis Springer *This book considers how the practical and public policy relevance of research might be increased, and academics and practitioners can better engage to define research agendas and deliver findings relevant to accounting and accountability in the public services. To do so, an international comparative analysis of the research-practice gap in public sector accounting has been undertaken. This involved academic perspectives from over twenty countries, and practitioner perspectives from leading international professional accounting bodies actively involved in the public services arena. It was found that research is valued for informing practice, but engaging at a high level of policy engagement has been primarily by a small group of experienced researchers. For other researchers the impact accomplished may not always be valued highly in the academic community relative to other, more scholarly, activities. The book therefore looks at how engagement and impact between academics and practitioners can be increased.* **Business Analysis and Valuation** Business Analysis and Valuation has been developed specifically for students undertaking accounting Valuation subjects. With a significant number of case studies exploring various issues in this field, including a running chapter example, it offers a practical and in-depth approach. This second edition of the Palepu text has been revitalised with all new Australian content in parts 1-3, making this edition predominantly local, while still retaining a selection of the much admired and rigorous Harvard case studies in part 4. Retaining the same author team, this new edition presents the field of valuation accounting in the Australian context in a clear, logical and thorough manner. **Announcements for the Year ...
