HIGH-FREQUENCY SIGHT WORDS: BOXED WORDS

Classroom Complete Press ****This is the chapter slice "Boxed Words" from the full lesson plan "High-Frequency Sight Words"**** Increase sight word recognition, vocabulary and comprehension as you help your students identify 130 sight words using real life pictures as an aid. Sight words are words that must become automatically recognized by the reader because they are often not pronounced or spelled in regular ways. We include the 100 high-frequency words that make almost 50 percent of everything that we read as adults having a bank of high frequency words is essential to building fluent reading skills. As students begin to read and build their sight word knowledge, they will build a bank of known vocabulary words that will aid them in beginning to read and spell. Boxes are used to help students come to understand that words can be recognized by the shapes of their letters, as they contain small, tall or hanging letters. Color graphic organizers and a comprehension quiz are included. All of our content meets the Common Core State Standards and are written to Bloom's Taxonomy.

INTRODUCTION TO PROBABILITY

CRC Press Developed from celebrated Harvard statistics lectures, *Introduction to Probability* provides essential language and tools for understanding statistics, randomness, and uncertainty. The book explores a wide variety of applications and examples, ranging from coincidences and paradoxes to Google PageRank and Markov chain Monte Carlo (MCMC). Additional application areas explored include genetics, medicine, computer science, and information theory. The print book version includes a code that provides free access to an eBook version. The authors present the material in an accessible style and motivate concepts using real-world examples. Throughout, they use stories to uncover connections between the fundamental distributions in statistics and conditioning to reduce complicated problems to manageable pieces. The book includes many intuitive explanations, diagrams, and practice problems. Each chapter ends with a section showing how to perform relevant simulations and calculations in R, a free statistical software environment.

CLASSIFICATION & ADAPTATION GR. 5-8

Classroom Complete Press Delve deep into ecosystems by classifying the beings that live there. Our resource breaks down the different kinds of animals before studying their different adaptations. Start off by answering the question: what do we classify? Then, break down this classification into kingdom, phylum, class, family, genus, and finally species. Compare the differences between warm-blooded and cold-blooded animals. Create a brochure on your favorite vertebrate before inventing your own invertebrate. Introduce the concept of adaptation and how animals have changed based on their environment. Take this further by conducting a case study on the adaptations of the koala. Finally, explore the concept of evolution and how this idea is backed up by fossil records. Aligned to the Next Generation Science Standards and written to Bloom's Taxonomy and STEAM initiatives, additional hands-on experiments, crossword, word search, comprehension quiz and answer key are also included.
