## ENGLISH in FILMS: English as a Second Language Exercises for Teachers & Study-at-Home Students, Vol. 1 English As a Second Language Exercises for Teachers & Study-at-home Students

Lulu.com A collection of classroom and study-at-home exercises for learning English as a second language. Five films are included: The Karate Kid, Finding Forrester, Rain Man, Apollo 13, & Erin Brockovich. The exercises can be copied for distribution in classrooms

on a non-commercial basis. The author created these exercises for use in his own classroom. Students enjoyed this method of studying and learning English. Each film includes vocabulary exercises, viewing and discussion questions, tests, and answers. Also, provided are instructions for teachers and students.

## Fundamentals of Qualitative Research

### A Practical Guide

Taylor & Francis This book is the road map to proficiency and development in the field of qualitative research. Borrowing from a wealth of experience teaching introductory qualitative research courses, author Kakali Bhattacharya lays out a dynamic program for learning different paradigms of inquiry, empowering students to recognize the convergence of popular research methodologies as well as the nuances and complexities that set each of them apart. Her book: supplements the readings and activities in a qualitative methods class, exposing students to the research process and the dominant types of qualitative research; introduces a variety of theoretical perspectives in qualitative research, including positivism and postpositivism, interpretivism, feminism, symbolic interactionism, phenomenology, hermeneutics, critical theory, and Critical Race Theory; identifies and summarizes the three dominant methodological approaches in qualitative research: narrative inquiry, grounded theory, and ethnography; provides interactive activities and exercises to help students crystallize their understanding of the different topics in each chapter.

## Physics for Scientists and Engineers, Technology Update

Cengage Learning Achieve success in your physics course by making the most of what PHYSICS FOR SCIENTISTS AND ENGINEERS has to offer. From a host of in-text features to a range of outstanding technology resources, you'll have everything you need to understand the natural forces and principles of physics. Throughout every chapter, the authors have built in a wide range of examples, exercises, and illustrations that will help you understand the laws of physics AND succeed in your course! Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

# Educators Guide to Free Social Studies Materials

## Principles of Physics: A Calculus-Based Text

Cengage Learning PRINCIPLES OF PHYSICS is the only text specifically written for institutions that offer a calculus-based physics course for their life science majors. Authors Raymond A. Serway and John W. Jewett have revised the Fifth Edition of PRINCIPLES OF PHYSICS to include a new worked example format, new biomedical applications, two new Contexts features, a revised problem set based on an analysis of problem usage data from WebAssign, and a thorough revision of every piece of line art in the text. The Enhanced WebAssign course for PRINCIPLES OF PHYSICS is very robust, with all end-of-chapter problems, an interactive YouBook, and book-specific tutorials. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## Leadership from the Mission Control Room to the Boardroom: A Guide to Unleashing Team Performance

Atlast Press Failure is always an option, and so is choosing to lead your team into an environment that helps them avoid catastrophe and pull off miracles. For more than fifty years, NASA's Mission Control has done just that. Take the ultimate insider's look at the leadership values and culture that made that track record possible. Paul Hill paints a vivid picture, candidly portraying the critical cultural connections in human spaceflight triumphs and failures. By demonstrating how his Mission Control team learned to steward this culture into their management roles, Paul provides a guide for any organization to boost their own performance by leveraging the core ideas and values that have delivered "impossible" wins for decades. Whether failure means cost and schedule overruns, quality escapes, loss of market share, bankruptcy, or putting people's lives at risk, how we lead can determine whether even small mistakes snowball out of control and destroy an enterprise. Discover how to take Leadership from the Mission Control Room to the Boardroom, and enable this leadership environment in your team. What can your team learn from top tier leaders at NASA Mission Control? Maybe more than you think. In Leadership from the Mission Control Room to the Boardroom, former NASA flight director Paul Hill tells the true story of the game-changing transformation of Mission Control's senior leadership team. Ride along on a journey of evolution as these

executives rediscover the core purpose and values that had never left their organization. Hill's candor and intensity makes this a fascinating read for every leader! — KEN BLANCHARD, COAUTHOR OF THE NEW ONE MINUTE MANAGER® AND LEADING AT A HIGHER LEVEL There is no higher-stakes environment than NASA's Mission Control. This incredible team's leadership journey — and development of precise decision-making in the face of unbelievable pressure — are inspiring. Filled with fascinating insights into spaceflight and leadership alike, every leader will find parallels to their own organization. Paul's incredible book is a must-have for anyone leading a high-performance team and an invaluable addition to any business library. — MARSHALL GOLDSMITH - THE THINKERS 50 #1 LEADERSHIP THINKER IN THE WORLD This is an arresting work by a former NASA Flight Director with whom I was privileged to work during the Return-to-Flight of the Space Shuttle Program in 2005. Paul Hill takes the reader through NASA's legendary 'Mission Control' in a way not found in any other work with which I am familiar. From its origins in aircraft flight test, to the early days of the space program with Project Mercury, and on to the iconic time of Apollo, and from there to the Space Shuttle program, Paul Hill offers a view from the inside track to both laymen and space professionals. From there, he takes you to the business world outside of NASA, and shows how the principles and values of the Mission Operations Directorate apply in a far larger arena. No leader or manager can fail to benefit from the lessons captured here. — MICHAEL D. GRIFFIN, NASA ADMINISTRATOR, 2005-09 AND SCHAFER CORPORATION CEO Paul Hill has written a stunning 'instructional manual' for business executives and leaders who want to learn from the best team on the planet: The men and women of NASA's Mission Control. For the first time, a leader of the Mission Operations Directorate of NASA shares the hard-won lessons of this world-famous organization and translates them into key principles and examples designed to hone a superior leadership team grounded in integrity and bedrock organizational values. Steeped in the lessons of history, rich with achievement and heart-rending loss, laser-focused on application and results, and above all a great narrative, this book, like its author, is one-of-a kind. — MARY LYNNE DITTMAR, EXECUTIVE DIRECTOR OF THE COALITION FOR DEEP SPACE EXPLORATION AND FORMER MEMBER, HUMAN SPACEFLIGHT COMMITTEE, NATIONAL ACADEMIES OF SCIENCES, ENGINEERING AND MEDICINE This engaging book tells the story of how NASA's renowned Mission Control evolved into an extraordinary team that directed many of the world's greatest technical triumphs. Equally important is Paul Hill's cautionary tale that sustaining excellence may be more difficult than attaining it. He shares how Mission Control learned the importance of articulating, modeling and nurturing its core values of technical truth, integrity and courage to maintain exceptional performance under adverse circumstances. Leaders from every organization will benefit from these vital lessons. — WALTER E. NATEMEYER, CHAIRMAN AND CEO, NORTH AMERICAN TRAINING AND DEVELOPMENT

## Lost Moon

# The Perilous Voyage of Apollo 13

The untold story of the American moon shot that almost ended in a fatal catastrophe, told by the flight's commander, offers a chronicle of courage, heroism, and adventure.

## What's the Least I Can Believe and Still be a Christian?

# A Guide to what Matters Most : New Edition with Study Guide

Westminster John Knox Press Pastor and author Martin Thielen has compiled a list of ten things people need to believe, and ten things they don't, in order to be a Christian. This lively and engaging book will be a help to seekers as well as a comfort to believers who may find themselves questioning some of the assumptions they grew up with. With an accessible, storytelling style that's grounded in solid biblical scholarship, Thielen shows how Christians don't need to believe that sinners will be "left behind" to burn in hell or that it's heresy to believe in evolution. And while we must always take the Bible seriously, we don't always have to take it literally. At the same time, Christians do need to believe in Jesus--his life, his teachings, his death and resurrection, and his vision for the world. A great benefit of those beliefs is that they provide promising answers to life's most profound questions, including: Where is God? What matters most? What brings fulfillment? What about suffering? Is there hope? Thielen articulates centrist, mainline Christianity in a way that's fresh and easy to understand, and offers authentic Christian insights that speak to our deepest needs. This new edition includes a leader's guide, previously only available online, and a new introduction from the author that reflects on the book's reception. The leader's guide features unique and easily implemented aids for carrying out a seven-week, congregation-wide initiative that will help local churches reach out to their communities. More information is available at [thielen.wjkbooks.com](http://thielen.wjkbooks.com).

# Project Management Casebook: Instructor's Manual

Project Management Institute Each of the cases provides new and unique challenges that have been mastered by the practice of project management. Readers will be able to apply the knowledge learned from this casebook in their work. The cases enable readers to see how and why projects are used in a wide variety of organizational settings in contemporary life. Readers are exposed to both successful and not-so-successful project management practices. The case-study approach encourages reader participation and active learning, and provides the opportunity to learn something of the real world of project management. It is essential in the curricula of project management training for both undergraduate and graduate students, as well as for continuing education, consulting, and in-house company training programs. The cases were chosen for their importance in discussing the fundamentals of project management. Most contain descriptions of actual projects, and each is followed by a series of questions to guide readers' analysis of the article to maximize the learning process.

Best STEM Resources for NextGen Scientists: The  
Essential Selection and User's Guide

# The Essential Selection and User's Guide

ABC-CLIO Intended to support the national initiative to strengthen learning in areas of science, technology, engineering, and mathematics, this book helps librarians who work with youth in school and public libraries to build better collections and more effectively use these collections through readers' advisory and programming. • Introduces more than 500 STEM resource suggestions for toddlers to young adults • Highlights more than 25 detailed library program or activity suggestions to be paired with STEM book titles • Provides resource suggestions for professional development • Contains bonus sections on STEM-related graphic novels, apps, and other media

## Growing with God by Ronwyn

### Everyday God

AuthorHouse Ronwyn realized the faith that came naturally to her was often a struggle for many, especially new believers. The GrowingwithGod by Ronwyn blog site was launched in November 2010 and through these blogs Ronwyn communicated the simplicity of her faith by linking events from everyday life to her knowledge of scripture. This devotional is based on those blogs. A word from the Editor - This book is written in a way that will be interesting to both Christians and Non-Christians, with the thread of salvation, walking with God and the Holy Spirit carried throughout through focusing on issues and events that are relevant to everyday life. I have gained much from this book and pray that it will become a light to many others – June Louw

## Triumph of the Spirit

iUniverse Eighteen year old Matthew has always been a dreamer living an ordinary life and yet, he sensed a special calling that he never fully understood. But everything changed the day he noticed a flash of light across the sky while working on his grandfather's Indiana farm. Compelled to investigate, Matthew finds a mysterious metallic oval object has landed in the adjacent field. Later that night, Matthew begins to have bizarre dreams within which he encounters a guide named Samuel. Driven to discover his destiny and unlock the secret of The Oval, Matthew is thrust into a quest filled with adventure containing powerful lessons that become more personal and challenging as the path unfolds. The young man embarks on this journey having no idea how important unlocking his

true potential is to the future of humankind and what awaits him if he succeeds. Nor does Matthew realize how his progression can only go so far until he must finally face himself and the darkness deeply buried within his soul.

## College Algebra and Trigonometry

Cengage Learning Accessible to students and flexible for instructors, COLLEGE ALGEBRA AND TRIGONOMETRY, Seventh Edition, uses the dynamic link between concepts and applications to bring mathematics to life. By incorporating interactive learning techniques, the Aufmann team helps students to better understand concepts, work independently, and obtain greater mathematical fluency. The text

also includes technology features to accommodate courses that allow the option of using graphing calculators. The authors' proven Aufmann Interactive Method allows students to try a skill as it is presented in example form. This interaction between the examples and Try Exercises serves as a checkpoint to students as they read the textbook, do their homework, or study a section. In the Seventh Edition, Review Notes are featured more prominently throughout the text to help students recognize the key prerequisite skills needed to understand new concepts. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## Failure Is Not an Option

### Mission Control from Mercury to Apollo 13 and Beyond

Simon & Schuster Gene Kranz was present at the creation of America's manned space program and was a key player in it for three decades. As a flight director in NASA's Mission Control, Kranz witnessed firsthand the making of history. He participated in the space program from the early days of the Mercury program to the last Apollo mission, and beyond. He endured the disastrous first years when rockets blew up and the United States seemed to fall further behind the Soviet Union in the space race. He helped to launch Alan Shepard and John Glenn, then assumed the flight director's role in the Gemini program, which he guided to fruition. With his teammates, he accepted the challenge to carry out President John F. Kennedy's commitment to land a man on the Moon before the end of the 1960s. Kranz was flight director for both Apollo 11, the mission in which Neil Armstrong fulfilled President Kennedy's pledge, and Apollo 13. He headed the Tiger Team that had to figure out how to bring the three Apollo 13 astronauts safely back to Earth. (In the film *Apollo 13*, Kranz was played by the actor Ed Harris, who earned an Academy Award nomination for his performance.) In *Failure Is Not an Option*, Gene Kranz recounts these thrilling historic events and offers new information about the famous flights. What appeared as nearly flawless missions to the Moon were, in fact, a series of hair-raising near misses. When the space technology failed, as it sometimes did, the controllers' only recourse was to rely on their skills and those of their teammates. Kranz takes us inside Mission Control and introduces us to some of the whiz kids -- still in their twenties, only a few years out of college -- who had to figure it all out as they went along, creating a great and daring enterprise. He reveals behind-the-scenes details to demonstrate the leadership, discipline, trust, and teamwork that made the space program a success. Finally, Kranz reflects on what has happened to the space program and offers his own bold suggestions about what we ought to be doing in space now. This is a fascinating firsthand account written by a veteran mission controller of one of America's greatest achievements.

## With Us Always

### Daily Devotions Framed by the Movies

The United Church of Canada This book of devotions demonstrates how our faith journey can be explored and energized through vehicles of popular culture like movies. Using lectionary readings, the weekly themes remind us that God is with us in every situation. Designed for Lent, it can also be used at any time in the year. Includes a study guide and movie guide.

## Project Innovation

### Gaining Project Success in an Ever-Changing Environment

Page Publishing Inc Is it time to innovate on a project level? Are you facing a project problem that your current practices and technology cannot solve? Are the time horizons of your projects getting shorter but the means to accomplish it have not changed? If you answered yes to either question, then you need to innovate on the project level. Why? Your company wants to be more competitive and will reduce the timelines of projects to fit more within the fiscal year. Your customers need to have more flexible solutions from the companies they do business with. Or, your industry is moving in a direction that your company is not heading in. These situations require the project leader to become adept at managing grass roots innovation on their projects. Books and blogs abound on the corporate innovator and how your company can have the next hot thing. But there is very little in the way of writing regarding bottom up innovation, and there is very little material out there for the project leader to navigate this path of innovation. This book takes the conversation to a new level, to one where the largest impact of innovation is felt; at the project level. We will discuss innovation through the eyes of the project leader and the project team since this book was written for project leaders by a project leader!

## Apollo Remastered

### The Sunday Times Bestseller

Penguin UK AN INSTANT SUNDAY TIMES BESTSELLER Discover space as you've never seen it before, with these awe-inspiring, breathtakingly restored images of our first missions to the Moon 'The next best thing to being there' Charlie Duke, Apollo 16 astronaut In a frozen vault in Houston sits the original NASA photographic film of the Apollo missions. For half a century, almost every image of the Moon landings publicly available was produced from a lower-quality copy of these originals. Now we can view them as never before. Expert image restorer Andy Saunders has taken newly available digital scans and, applying pain-staking care and cutting-edge enhancement techniques, he has created the highest quality Apollo photographs ever produced. Never-before-seen spacewalks and crystal-clear portraits of astronauts in their spacecraft, along with startling new visions of the Earth and the Moon, offer astounding new insight into one of our greatest endeavours. This is the definitive record of the Apollo missions and a mesmerizing, high definition journey into the unknown.

## Bowker's Complete Video Directory

### The Iliad

Aegitas The Iliad is an ancient Greek epic poem in dactylic hexameter, traditionally attributed to Homer. Set during the Trojan War, the ten-year siege of the city of Troy (Ilium) by a coalition of Greek states, it tells of the battles and events during the weeks of a quarrel between King Agamemnon and the warrior Achilles.

# The Apollo Guidance Computer Architecture and Operation

Springer Science & Business Media The technological marvel that facilitated the Apollo missions to the Moon was the on-board computer. In the 1960s most computers filled an entire room, but the spacecraft's computer was required to be compact and low power. Although people today find it difficult to accept that it was possible to control a spacecraft using such a 'primitive' computer, it nevertheless had capabilities that are advanced even by today's standards. This is the first book to fully describe the Apollo guidance computer's architecture, instruction format and programs used by the astronauts. As a comprehensive account, it will span the disciplines of computer science, electrical and aerospace engineering. However, it will also be accessible to the 'space enthusiast'. In short, the intention is for this to be the definitive account of the Apollo guidance computer. Frank O'Brien's interest in the Apollo program began as a serious amateur historian. About 12 years ago, he began performing research and writing essays for the Apollo Lunar Surface Journal, and the Apollo Flight Journal. Much of this work centered on his primary interests, the Apollo Guidance Computer (AGC) and the Lunar Module. These Journals are generally considered the canonical online reference on the flights to the Moon. He was then asked to assist the curatorial staff in the creation of the Cradle of Aviation Museum, on Long Island, New York, where he helped prepare the Lunar Module simulator, a LM procedure trainer and an Apollo space suit for display. He regularly lectures on the Apollo computer and related topics to diverse groups, from NASA's computer engineering conferences, the IEEE/ACM, computer festivals and university student groups.

## TV Guide

## Apollo 8

# The Thrilling Story of the First Mission to the Moon

Henry Holt and Company The untold story of the historic voyage to the moon that closed out one of our darkest years with a nearly unimaginable triumph In August 1968, NASA made a bold decision: in just sixteen weeks, the United States would launch humankind's first flight to the moon. Only the year before, three astronauts had burned to death in their spacecraft, and since then the Apollo program had suffered one setback after another. Meanwhile, the Russians were winning the space race, the Cold War was getting hotter by the month, and President Kennedy's promise to put a man on the moon by the end of the decade seemed sure to be broken. But when Frank Borman, Jim Lovell and Bill Anders were summoned to a secret meeting and told of the dangerous mission, they instantly signed on. Written with all the color and verve of the best narrative non-fiction, Apollo 8 takes us from Mission Control to the astronaut's homes, from the test labs to the launch pad. The race to prepare an untested rocket for an unprecedented journey paves the way for the hair-raising trip to the moon. Then, on Christmas Eve, a nation that has suffered a horrendous year of assassinations and war is heartened by an inspiring message from the trio of astronauts in lunar orbit. And when the mission is over—after the first view of the far side of the moon, the first earth-rise, and the first re-entry through the earth's atmosphere following a flight to deep space—the impossible dream of walking on the moon suddenly seems within reach. The full story of Apollo 8 has never been told, and only Jeffrey Kluger—Jim Lovell's co-author on their bestselling book about Apollo 13—can do it justice. Here is the tale of a mission that was both a calculated risk and a wild crapshoot, a stirring account of how three American heroes forever changed our view of the home planet.

## Medical Catalog of Selected Audiovisual Materials Produced by the United States Government

Medical and allied health audiovisual materials currently available. Arranged in 2 listings by subjects and by titles. Each entry in title section gives title, description, and abstract.
