Chemical, Biological, Radiological, and Nuclear Operations (FM 3-11)

Lulu.com FM 3-11 provides commanders and staffs with overarching chemical doctrine for operations to assess, protect, and mitigate the entire range of CBRN threats and hazards-including support to countering weapons of mass destruction (CWMD) activities in all operational environments. It addresses principles, fundamentals, planning, operational considerations, and training and support functions. It provides a common framework and language for CBRN operations and constitutes the doctrinal foundation for developing other fundamentals and tactics, techniques, and procedures detailed in subordinate doctrine manuals. This manual is a key integrating publication that links the doctrine for the CBRN units and staffs with Army operational doctrine and joint doctrine. The principal audience for FM 3-11 is commanders, staffs, and leaders of theater armies, corps, divisions, and brigades as well as CBRN units that integrate capability into those formations. However, FM 3-11 is applicable to all members of the profession of arms

Preparing the U.S. Army for Homeland Security Concepts, Issues, and Options

Rand Corporation *Homeland security encompasses five distinct missions: domestic preparedness and civil support in case of attacks on civilians, continuity of government, continuity of military operations, border and coastal defense, and national missile defense. This report extensively details four of those mission areas (national missile defense having been covered in great detail elsewhere). The authors define homeland security and its mission areas, provide a methodology for assessing homeland security response options, and review relevant trend data for each mission area. They also assess the adequacy of the doctrine, organizations, training, leadership, materiel, and soldier systems and provide illustrative scenarios to help clarify Army planning priorities. The report concludes with options and recommendations for developing more cost-effective programs and recommends a planning framework that can facilitate planning to meet homeland security needs.*

Emergency Response Guidebook

A Guidebook for First Responders during the Initial Phase of a Dangerous Goods/Hazardous Materials Transportation Incident

Simon and Schuster Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials.

The Practical Guide to Humanitarian Law

Rowman & Littlefield Publishers Now in a comprehensively updated edition, this indispensable handbook analyzes how international humanitarian law has evolved in the face of these many new challenges. Central concerns include the war on terror, new forms of

armed conflict and humanitarian action, the emergence of international criminal justice, and the reshaping of fundamental rules and consensus in a multipolar world. The Practical Guide to Humanitarian Law provides the precise meaning and content for over 200 terms such as terrorism, refugee, genocide, armed conflict, protection, peacekeeping, torture, and private military companies—words that the media has introduced into everyday conversation, yet whose legal and political meanings are often obscure. The Guide definitively explains the terms, concepts, and rules of humanitarian law in accessible and reader-friendly alphabetical entries. Written from the perspective of victims and those who provide assistance to them, the Guide outlines the dangers, spells out the law, and points the way toward dealing with violations of the law. Entries are complemented by analysis of the decisions of relevant courts; detailed bibliographic references; addresses, phone numbers, and Internet links to the organizations presented; a thematic index; and an up-to-date list of the status of ratification of more than thirty international conventions and treaties concerning humanitarian law, human rights, refugee law, and international criminal law. This unprecedented work is an invaluable reference for policy makers and opinion leaders, students, relief workers, and members of humanitarian organizations. Published in cooperation with Doctors Without Borders/Médecins Sans Frontières.

CBRN Security Culture in Practice

IOS Press Evolving threats of chemical, biological, radiological and nuclear (CBRN) attack make it imperative to find ways to support global efforts against the proliferation of weapons of mass destruction (WMD) and terrorism. This book contains papers presented at the NATO Advanced Study Institute (ASI) on CBRN security culture, held in Yerevan, Armenia, in June 2014. The conference was timely in bringing together the various aspects of security culture in the different substantive areas from a CBRN perspective, focusing efforts to advance CBRN security culture in the everyday work of those who must deal with these ever present threats. The primary aim of the conference was to promote the concept of a CBRN security culture which recognizes synergy across the individual disciplines. As a first step in the practical application of this synergistic view, the conference introduced assessment methodologies that could be refined and customized to enhance the role of the human factor in CBRN security. This, we hope, will enable countries to fulfill their international obligations and implement United Nations Security Council Resolution 1540. The book reflects the presentations and deliberations of workshop participants and will be of interest to governments, international organizations, researchers and practitioners whose work involves the human dimension of the security of CBRN materials.

The Baha Mousa Public Inquiry report

The Stationery Office The terms of reference for this inquiry were to investigate and report on the circumstances surrounding the death of Baha Mousa and the treatment of those detained with him. It takes account of previous investigations that have already taken place, in particular where responsibility lay for approving the practice of conditioning detainees by any members of the 1st Battalion, The Queen's Lancashire Regiment in Iraq in 2003. The report is divided into four modules: the history of the use of conditioning techniques (from the time of internment in Northern Ireland in the early 1970s up to and including March 2003; Baha Mousa and other detainees; training and the chain of command; the future - what has happened since 2003 is considered in relation to conditioning techniques. Baha Mousa died with 93 injuries in custody in Basra in 2003. His relatives claim he was beaten to death by troops. The inquiry concluded that his death was caused by a combination of his weakened physical state and a final struggle with his guards. The Inquiry has criticised the conduct of individual soldiers, senior army officers and their legal advisers and also failures in the chain of command. The lack of training and preparation British troops received for the invasion of Iraq is also highlighted. The report found that systematic abuse of civilians by British troops did not happen. There are 64 recommendations to the Ministry of Defence including that the MoD should keep its current absolute prohibition on the use of hoods on captured personnel. Arguments for the ban are overwhelming and a return to their use is difficult to justify

Chemical Warfare Agents

Toxicity at Low Levels

CRC Press Many books cover the emergency response to chemical terrorism. But what happens after the initial crisis? Chlorine, phosgene, and mustard were used in World War I. Only years after the war were the long-term effects of these gases realized. In the 60s, 70s, and 80s, these and other agents were used in localized wars. Chemical Warfare Agents: Toxicity at Low Levels explores the long range effects of, protection against, and remedies for chemicals used during war and the chronic problems possibly resulting from toxic exposures during the Persian Gulf War.

DSCA Handbook

United States Department of Defense This two-in one resource includes the Tactical Commanders and Staff Toolkit plus the Liaison Officer Toolkit. Defense Support of Civil Authorities (DSCA)) enables tactical level Commanders and their Staffs to properly plan and execute assigned DSCA missions for all hazard operations, excluding Chemical, Biological, Radiological, Nuclear, high yield Explosives

(CBRNE) or acts of terrorism. Applies to all United States military forces, including Department of Defense (DOD) components (Active and Reserve forces and National Guard when in Federal Status). This hand-on resource also may be useful information for local and state first responders. Chapter 1 contains background information relative to Defense Support of Civil Authorities (DSCA) including legal, doctrinal, and policy issues. Chapter 2 provides an overview of the incident management processes including National Response Framework (NRF), National Incident Management Systems (NIMS), and Incident Command System (ICS) as well as Department of Homeland Security (DHS). Chapter 3 discusses the civilian and military responses to natural disaster. Chapter 4 provides a brief overview of Joint Operation Planning Process and mission analysis. Chapter 5 covers Defense Support of Civil Authorities (DSCA) planning factors for response to all hazard events. Chapter 6 is review of safety and operational composite risk management processes Chapters 7-11 contain Concepts of Operation (CONOPS) and details five natural hazards/disasters and the pertinent planning factors for each within the scope of DSCA.

Defending Air Bases in an Age of Insurgency

Military Bookshop This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

USAIC Pamphlet 350-6 Training the Expert Infantryman Badge (EIB) Test - 1 February 2007 Preface The USAIS Pamphlet 350-6 establishes and standardizes policies, procedures, and standards for testing and awarding the Expert Infantryman Badge (EIB). The EIB test measures a Soldier's physical fitness and ability to perform to standards of excellence in a broad spectrum of critical Infantry skills. Detailed instructions and forms contained in this pamphlet ensure Army-wide uniformity. Expert Infantryman Badge training and testing is intended to be rigorous, mission-focused and conducted under realistic conditions. Flexibility is provided to allow units to structure the Weapons, Medical, and Patrol lanes from an approved task list in order to test the Infantryman's expertise in the attention to detail of skill level one tasks selected, for these reasons, the EIB is appropriate for individual Soldier task training in preparation for unit leader and collective task training. The target audience for this pamphlet is: • Infantry Soldiers currently serving in Career Management Field 11. • Special Forces Soldiers in occupational specialties 18A, 18B, 18C, 18E, 18F, and 18Z. • Infantry Soldiers and Commissioned Infantry Officers in the U.S. Army, U.S. Army Reserve (USAR), and Army National Guard (ARNG). Note: This training publication can be used for other Military Occupational Specialties as a guide for their warrior task training events; however training, testing, and awarding of the Expert Infantryman Badge is specifically for Infantry and Special Forces personnel only. This standard may not be waived.
