TRAINING COGNITION

OPTIMIZING EFFICIENCY, DURABILITY, AND GENERALIZABILITY

Psychology Press **Training is both a teaching and a learning experience, and just about everyone has had that experience. Training involves acquiring knowledge and skills. This newly acquired training information is meant to be applicable to specific activities, tasks, and jobs. In modern times, where jobs are increasingly more complex, training workers to perform successfully is of more importance than ever. The range of contexts in which training is required includes industrial, corporate, military, artistic, and sporting, at all levels from assembly line to executive function. The required training can take place in a variety of ways and settings, including the classroom, the laboratory, the studio, the playing field, and the work environment itself. The general goal of this book is to describe the current state of research on training using cognitive psychology to build a complete empirical and theoretical picture of the training process. The book focuses on training cognition, as opposed to physical or fitness training. It attempts to show how to optimize training efficiency, durability, and generalizability. The book includes a review of relevant cognitive psychological literature, a summary of recent laboratory experiments, a presentation of original theoretical ideas, and a discussion of possible applications to real-world training settings.**

A 90-DAY PLAN FOR COACHING NEW TEACHERS

John Wiley & Sons **Effective and practical coaching strategies for new educators** Many teachers are only observed one or two times per year on average—and, even among those who are observed, scarcely any are given feedback as to how they could improve. The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90-Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, we break down the most critical actions leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. It's the book's focus on what's practical and actionable that drives its effective approach to coaching. By practicing the concrete actions and micro-skills listed here, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time. Junior and experienced teachers alike

BREAKING ALL THE RULES: IMPLEMENTING THE ADULT EDUCATION MODEL INTO POLICE TRAINING

Charles C Thomas Publisher In his capacity as researcher and director of the Police Training Institute at the University of Illinois, Michael T. Charles undertook the difficult task of making needed changes to the police training academy curriculum. In *Police Training: Breaking All the Rules*, he gives the reader an overview of the history of police training in Illinois and follows with a description of the organizational and cultural changes that he helped to bring about. These include discussions of changes in areas such as method of teaching (pedagogical versus andragogical),

discipline (quasi-military versus nonmilitary), and fitness training (morning program versus wellness program). The author also describes the steps taken to redefine student rules and regulations regarding an Honor Code and dress code. He outlines the administrative goal of providing recruits the opportunity to learn to follow orders in an atmosphere of mutual respect, an expectation of success, and team effort. Instructional personnel and staff were key to the process of changing the Institute and its culture. The author relates the actions taken to develop standards of quality including a mission statement, goals, and organizational philosophy. As a result of the director's efforts, the Institute's reputation for quality training, research, and innovation had been greatly enhanced and is now a leader in police training.

DYNAMIC POLICE TRAINING

CRC Press As police work has become increasingly professionalized, classrooms have become a preferred environment for training. However, the best preparation for police work has traditionally been conducted on the job. **Dynamic Police Training** partners the experienced law enforcement officer's "street-smart" perspective of what makes training work with a professional educator's "book-smart" approach to writing curriculum to achieve the best results in police training programs. A results-oriented handbook for police trainers seeking clear and definitive information on curriculum development, the book facilitates training designed to develop students' critical thinking skills, physical competencies, and in-depth understanding of concepts such as use of force, consequences of failure, and value-based judgment. Authored by a former police officer and trainer with over 14 years of experience in the field and the classroom, this volume: Examines the typical strengths and limitations of police trainers and describes how to build on existing skills Explains how to go beyond the lecture and slide show format to make police training an interactive and thought-provoking experience for students Translates the theoretical basis of cognitive, affective, and psychomotor skills training into police-oriented language Outlines the methods for developing high-quality law enforcement instructional content Provides a step-by-step construction guide for law enforcement lesson plan development with versatile templates included for the reader's use Understanding how to write an interactive curriculum that allows police officers to achieve mastery of skills in the classroom is what differentiates outstanding training from the mediocre. **Dynamic Police Training** helps police trainers who deliver, revise, or develop training programs in the academy and beyond, enabling them to achieve top-notch training results within the confines of the classroom setting that translate into real results on the street.

THE EXTREME PRINCIPLE

WHAT MATTERS MOST, WHAT WORKS BEST

R&L Education This book gives the reader a critique of the typical, bureaucratic, mandated education reform efforts which often fail and which often lead to another education reform effort which also is likely to fail. This book shows a better way to improve what is done in classrooms, throughout a school, in an entire school district, and at the state or national levels of education policy development. The better way is guided by application of The Extreme Principle.

THE NAVIGATOR

TEACHER INVOLVEMENT IN HIGH-STAKES LANGUAGE TESTING

Springer This book advocates that teachers should play an active role in high-stakes language testing and that more weight should be given to teacher judgement. This is likely to increase the formative potential of high-stakes tests and provide teachers with a sense of ownership. The implication is that the knowledge and skills they develop by being involved in these tests will feed into their own classroom practices. The book also considers the arguments against teacher involvement, e.g. the contention that teacher involvement might entrench the practice of teaching to the test, or that teachers should not be actively involved in high-stakes language testing because their judgement is insufficiently reliable. Using contributions from a wide range of international educational contexts, the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high-stakes language testing. It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy. Moreover, teacher involvement empowers them to play a role in reforming high-stakes language testing so that it is more equitable and more likely to enhance classroom practices. High-stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers, which ultimately benefits all their students.

HANDBOOK FOR ACHIEVING GENDER EQUITY THROUGH EDUCATION

Routledge First published in 1985, the Handbook for Achieving Gender Equity Through Education quickly established itself as the essential reference work concerning gender equity in education. This new, expanded edition provides a

20-year retrospective of the field, one that has the great advantage of documenting U.S. national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX, the landmark federal law prohibiting sex discrimination in education, equity programs and research. Key features include: Expertise - Like its predecessor, over 200 expert authors and reviewers provide accurate, consensus, research-based information on the nature of gender equity challenges and what is needed to meet them at all levels of education. Content Area Focus - The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters including mathematics, science, and engineering. Global/Diversity Focus - Global gender equity is addressed in a separate chapter as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latina/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students. Action Oriented - All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education. New Material - Expanded from 25 to 31 chapters, this new edition includes: *more emphasis on male gender equity and on sexuality issues; *special within population gender equity challenges (race, ability and disability, etc); *coeducation and single sex education; *increased use of rigorous research strategies such as meta-analysis showing more sex similarities and fewer sex differences and of evaluations of implementation programs; *technology and gender equity is now treated in three chapters; *women's and gender studies; *communication skills relating to English, bilingual, and foreign language learning; and *history and implementation of Title IX and other federal and state policies. Since there is so much misleading information about gender equity and education, this Handbook will be essential for anyone who wants accurate, research-based information on controversial gender equity issues—journalists, policy makers, teachers, Title IX coordinators, equity trainers, women's and gender study faculty, students, and parents.

THE LEADER IN ME

HOW SCHOOLS AND PARENTS AROUND THE WORLD ARE INSPIRING GREATNESS, ONE CHILD AT A TIME

Simon and Schuster Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
