HOOF PRINTS TO HIS PRINTS

WHERE THE WOODS MEETS THE WORD

Woods2Word Publishing "Hoof Prints to HIS Prints" brings together everything a spiritually-minded deer hunter experiences while pursuing the whitetail deer. Many deer hunters are talking about how they feel so close to God in the woods. It's not surprising. The Bible says, "As the deer pants for the water brooks, so pants my soul for you, O God." In "Hoof Prints to HIS Prints", you will enjoy more than 52 stories tracking through the seasons of life—stories of inspiration, laughter, friendship and comradery, family and even trials. Each devotional walks a trail through the woods and into the Word of God. You will likely relive many of your own adventures in the whitetail woods. You don't even have to hunt to be captivated by this book. It aims to interest everyone who is searching for meaning in life. This is a book you will read and then want to share with others. Come along for the pursuit. There's a great trophy waiting at the end.

CLOUD HUNTER

Lulu.com Set against the backdrop of decadence and corruption that came to symbolise the excesses of the Celtic Tiger boom years, the story follows one loner's journey as he tries to claw his way out of the gutter. Alone, broke, a jobless dreamer, he roams the streets of Dublin in search of work, love and a way out of his own personal misery. A twisted love story of longing, love and loss, full of black humour, dry wit and biting social commentary, this honest and gritty novel brings the streets of Dublin to life and offers a fascinating insight into what it was like to live in Ireland during that insane era which preceded the collapse of the Irish economy.

RESOURCES FOR TEACHING MIDDLE SCHOOL SCIENCE

National Academies Press *With age-appropriate, inquiry-centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. Resources for Teaching Middle School Science, developed by the National Science Resources Center (NSRC), is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of Resources for Teaching Elementary School Science, the first in the NSRC series of annotated guides to hands-on, inquiry-centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area-Physical Science, Life Science, Environmental Science, Earth and Space Science, and Multidisciplinary and Applied Science. They are also grouped by type-core materials, supplementary units, and science activity books. Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National*

Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed-and the only guide of its kind-Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.
