Law and Society in the South

A History of North Carolina Court Cases

University Press of Kentucky *Law and Society in the South* reconstructs eight pivotal legal disputes heard in North Carolina courts between the 1830s and the 1970s and examines some of the most controversial issues of southern history, including white supremacy and race relations, the teaching of evolution in public schools, and Prohibition. Finally, the book explores the various ways in which law and society interacted in the South during the civil rights era. The voices of racial minorities—some urging integration, others opposing it—grew more audible within the legal system during this time. *Law and Society in the South* divulges the true nature of the courts: as the unpredictable venues of intense battles between southerners as they endured dramatic changes in their governing values.

Indigenous Education

New Directions in Theory and Practice

University of Alberta For Indigenous students and teachers alike, formal teaching and learning occurs in contested places. In *Indigenous Education*, leading scholars in contemporary Indigenous education from North America and the Pacific Islands disentangle aspects of education from colonial relations to advance a new, Indigenous-informed philosophy of instruction. Broadly multidisciplinary, this volume explores Indigenous education from theoretical and applied perspectives and invites readers to embrace new ways of thinking about and doing schooling. Part of a growing body of research, this is an exciting, powerful volume for both Indigenous and non-Indigenous scholars, researchers, policy makers, and teachers, and a must-read for anyone who wants to understand the contested spaces of contemporary education.
