Be a DrumHead Discover how your "drum space" affects everything you do. Includes a revolutionary CD package with a time management program that helps drummers maximize practice. The Drumhead Over the past 50 years artist Gerry Bibby has inserted narratives and instructional texts into his artworks as acts of tactical withdrawal. The Drumhead, Bibbys first publication, includes a series of his Language Costumes or fragmentary texts which, like William Burroughss The Wild Boys or Robert Walsers The Walk, attest to an offended intelligence. Moving across performance, sculpture and writing, Gerry Bibbys artworks take form at the uncomfortable fissures between the three. His Language Costumes arrive at these junctions as self-styled instructional texts, photocopy machine manuals, drinks menus and poetic passages. His captivating passages brim with wit, wry observation and occasionally with disgust, offering viewers ways out even if only at the time of reading. Commissioned by If I Cant Dance, I Dont Want to Be Part of Your Revolution, The Drumhead follows a two-year collaboration with KUB Arena of the Kunsthau Bregenz, The Showroom London, CCA Glasgow, and the Institute of Modern Art, Brisbane. Encyclopedia of Percussion *Routledge* The Encyclopedia of Percussion is an extensive guide to percussion instruments, organized for research as well as general knowledge. Focusing on idiophones and membranophones, it covers in detail both Western and non-Western percussive instruments. These include not only instruments whose usual sound is produced percussively (like snare drums and triangles), but those whose usual sound is produced concussively (like castanets and claves) or by friction (like the cuíca and the lion's roar). The expertise of contributors have been used to produce a wide-ranging list of percussion topics. The volume includes: (1) an alphabetical listing of percussion instruments and terms from around the world; (2) an extensive

section of illustrations of percussion instruments; (3) thirty-five articles covering topics from Basel drumming to the xylophone; (4) a list of percussion symbols; (5) a table of percussion instruments and terms in English, French, German, and Italian; and (6) an updated section of published writings on methods for percussion.

Strafbattalion Hitler's Penal Battalions *Fonthill Media* The German Army's Strafbattalions were infantry units made up largely of convicts, felons, malingerers, thugs and the criminally insane. Previously unpublished story of the units. The accounts of the most famous Strafbattalion units in combat. A story of little-known Nazi units: Hitler's 'Dirty Dozens' When war broke out in 1939, Hitler created Strafbattalion (Penal Battalion) units to deal with incarcerated members of the Wehrmacht as well as 'subversives'. His order stated that any first-time convicted soldier could return to his unit after he had served a portion of his sentence in '...a special probation corps before the enemy'. Beginning in April 1941, convicted soldiers, even those sentenced to death, who had shown exceptional bravery or meritorious service could rejoin their original units; however, those in probation units were expected to undertake dangerous operations at the front. Refusal entailed enforcement of the original sentence. The soldiers who 'won back an honourable place in the national community' had done everything that was asked of them from suicidal advance teams, shock troops, and laying mines under fire. By 1945, over 50,000 Wehrmacht troops had served in punishment regiments.

Strafbattalion: Hitler's Penal Battalions examines the penal units, their combat history and order of battle.

Topics such as complex analysis, matrix theory, vector and tensor analysis, Fourier analysis, integral transforms, ordinary and partial differential equations are presented in a discursive style that is readable and easy to follow. Numerous examples, completely worked out, together with carefully selected problem sets with answers are used to enhance students' understanding and manipulative skill. The goal is to make students comfortable in using advanced mathematical tools in junior, senior, and beginning graduate courses. The question is a fair one in view of the proliferation of monographs, texts, and periodicals on the vast subject of infectious disease. The goal of this series is to provide an additional service to the clinician in the form of clinical information not usually assembled in one convenient volume. One type of monograph presented in this series will cover a specific infection, detailing microbiologic research and clinical aspects. It is hoped that such a compilation will be helpful in both its thoroughness and breadth to the clinician interested in this particular problem. The other type of monograph that this series will provide will discuss a clinical presentation that comprises many possible specific etiologies, such as the present volume, Infections of the Head and Neck. Using this volume as an example, one must presently refer to a multitude of sources to cover the diseases discussed in this text, even though they must all be considered by the clinician in the differential diagnosis of specific patients. Volumes in the series will be multi-authored, giving us the opportunity to invite authorities in each specific area to contribute their expertise and experience. Regular revisions are planned so that each volume will remain as current as it is thorough. Congress Civil War Courts-Martial of North Carolina Troops *McFarland* **During**
the Civil War, Confederate military courts sentenced to death more soldiers
from North Carolina than from any other state. This study offers the first
exploration of the service records of 450 of these wayward Confederates,
most often deserters. Arranged by army, corps, division and brigade, it
chronicles their military trials and frequent executions and offers
explanations of how the lucky and the clever were able to avoid their fate.
Focus on court activity by company allows for comparisons that emphasize
the wide disparity in discipline within a regiment and brigade. By stressing
the effectiveness of these deadly decisions as deterrents to others, this
work maintains that an earlier and wider reliance on execution would have
strengthened the Confederacy sufficiently to force a negotiated end to the
war, thus saving many Confederate and Federal lives. Queen Alexandra's

the role that nursing has played in the army from the 17th century until
the present day. The author describes the rise of the early army nursing
organizations and the genesis of QARANC. Her picture of Florence
Nightingale is revealing in that it puts aside the conventional myths and
shows us a woman of powerful influence and fierce determination who
provided the administrative impetus for the formal advancement of army
nursing. **The Journal of Ophthalmology, Otology and Laryngology THE**

Pelican Publishing The true story of one man's reluctant but relentless war

against the invaders of his country. A quiet, wealthy plantation owner, Jack Hinson watched the start of the Civil War with disinterest. Opposed to secession and a friend to Union and Confederate commanders alike, he did not want a war. After Union soldiers seized and murdered his sons, placing their decapitated heads on the gateposts of his estate, Hinson could remain indifferent no longer. He commissioned a special rifle for long-range accuracy, he took to the woods, and he set out for revenge. This remarkable biography presents the story of Jack Hinson, a lone Confederate sniper who, at the age of 57, waged a personal war on Grant's army and navy. The result of 15 years of scholarship, this meticulously researched and beautifully written work is the only account of Hinson's life ever recorded and involves an unbelievable cast of characters, including the Earp brothers, Jesse James, and Nathan Bedford Forrest. The Britannica Guide to The Atom *The Rosen Publishing Group, Inc* Discusses the structure of the atom and reveals the ways the parts facilitate both radioactivity and nuclear reactions. Marse Henry: An Autobiography (Complete) *Library of Alexandria* I am asked to jot down a few autobiographic odds and ends from such data of record and memory as I may retain. I have been something of a student of life; an observer of men and women and affairs; an appraiser of their character, their conduct, and, on occasion, of their motives. Thus, a kind of instinct, which bred a tendency and grew to a habit, has led me into many and diverse companies, the lowest not always the meanest. Circumstance has rather favored than hindered this bent. I was born in a party camp and grew to manhood on a political battlefield. I have lived through stirring times and in the thick of events. In a vein colloquial and reminiscential, not ambitious, let me recall some impressions which these have left upon the mind of one who long ago reached and turned the corner of the Scriptural limitation; who, approaching fourscore, does not yet feel painfully the frost of age beneath the ravage of time's defacing waves. Assuredly they have not obliterated his sense either of vision or vista. Mindful of the adjuration of Burns, Keep something to yourself, Ye scarcely tell to only, I shall yet hold little in reserve, having no state secrets or mysteries of the soul to reveal. It is not my purpose to be or to seem oracular. I shall not write after the manner of Rousseau, whose Confessions had been better honored in the breach than the observance, and in any event whose sincerity will bear question; nor have I tales to tell after the manner of Paul Barras, whose Memoirs have earned him an immortality of infamy. Neither shall I emulate the grandiose volubility and self-complacent posing of Metternich and Talleyrand, whose pretentious volumes rest for the most part unopened upon dusty shelves. I aspire to none of the honors of the historian. It shall be my aim as far as may be to avoid the garrulity of the raconteur and to restrain the exaggerations of the ego. But neither fear of the charge of self-exploitation nor the specter of a modesty oft too obtrusive to be real shall deter me from a proper freedom of narration, where, though in the main but a humble chronicler, I must needs appear upon the scene and speak of myself; for I at least have

not always been a dummy and have sometimes in a way helped to make history. In my early life--as it were, my salad days--I aspired to becoming what old Simon Cameron called "one of those damned literary fellows" and Thomas Carlyle less profanely described as "a leeterary celeebriety." But some malign fate always sat upon my ambitions in this regard. It was easy to become The National Gambler in Nast's cartoons, and yet easier The National Drunkard through the medium of the everlasting mint-julep joke; but the phantom of the laurel crown would never linger upon my fair young brow. Though I wrote verses for the early issues of Harper's Weekly--happily no one can now prove them on me, for even at that jejune period I had the prudence to use an anonym--the Harpers, luckily for me, declined to publish a volume of my poems. I went to London, carrying with me "the great American novel." It was actually accepted by my ever too partial friend, Alexander Macmillan. But, rest his dear old soul, he died and his successors refused to see the transcendent merit of that performance, a view which my own maturing sense of belles-lettres values subsequently came to verify. When George Harvey arrived at the front I "'ad 'opes." But, Lord, that cast-iron man had never any bookish bowels of compassion--or political either for the matter of that!--so that finally I gave up fiction and resigned myself to the humble category of the crushed tragi-comedians of literature, who inevitably drift into journalism. Thus my destiny has been casual. A great man of letters quite thwarted, I became a newspaper reporter--a voluminous space writer for the press--now and again an editor and managing editor--until, when I was nearly thirty years of age, I hit the Kentucky trail and set up for a journalist. I did this, however, with a big "J," nursing for a while some faint ambitions of statesmanship--even office--but in the end discarding everything that might obstruct my entire freedom, for I came into the world an insurgent, or, as I have sometimes described myself in the Kentucky vernacular, "a free nigger and not a slave nigger."

Fata Morgana *Blackstone Publishing* At the height of the air war in Europe, Captain Joe Farley and the baseball-loving, wisecracking crew of the B-17 Flying Fortress Fata Morgana are in the middle of a harrowing bombing mission over eastern Germany when everything goes sideways. The bombs are still falling and flak is still exploding all around the 20-ton bomber as it is knocked like a bathtub duck into another world. Suddenly stranded with the final outcasts of a desolated world, Captain Farley navigates a maze of treachery and wonder—and finds a love seemingly decreed by fate—as his bomber becomes a pawn in a centuries-old conflict between remnants of advanced but decaying civilizations. Caught among these bitter enemies, a vast power that has brought them here for its own purposes, and a terrifying living weapon bent on their destruction, the crew must use every bit of their formidable inventiveness and courage to survive. **Fata Morgana**—the epic novel of love and duty at war across the reach of time.

Percussive Notes New Trends in Geometry Their Role in the Natural and Life Sciences *World Scientific* This volume focuses on the interactions between mathematics, physics, biology and neuroscience by exploring new geometrical and topological modelling in these fields. Among the highlights are the central roles played by multilevel and scale-change approaches in these disciplines. The integration of mathematics with physics, as well as molecular and cell biology and the neurosciences, will constitute the new frontier of 21st century science, where breakthroughs are more likely to span across traditional disciplines.

Shamanic Drumming Circles Guide *Talking Drum Publications* Indigenous shamanic peoples of diverse cultures have gathered in community drumming circles for thousands of years. Although most of us did not grow up in an indigenous shamanic tradition, we can still tap into the healing power of shamanic drumming. Drawing upon twenty-five years of experience, shamanic practitioner Michael Drake has written a step-by-step guide to shamanic circling. In *Shamanic Drumming Circles Guide*, Drake offers some guidelines for anyone considering forming a shamanic drumming circle. The guidelines are also meant to help established drumming circles go deeper and become more effective. For anyone searching for a drumming circle, this guide can help you find the right circle for you.
