### Vocabulary Development

**MDPI** Knowledge of word meanings is critical to success in reading. A reader cannot fully understand a text in which the meaning to a significant number of words is unknown. Vocabulary knowledge has long been correlated with proficiency in reading. Yet, national surveys of student vocabulary knowledge have demonstrated that student growth in vocabulary has been stagnant at best. This volume offers new insights into vocabulary knowledge and vocabulary teaching. Articles range from a presentation of theories of vocabulary that guide instruction to innovative methods and approaches for teaching vocabulary. Special emphasis is placed on teaching academic and disciplinary vocabulary that is critical to success in content area learning. Our hope for this volume is that it may spark a renewed interest in research into vocabulary and vocabulary instruction and move toward making vocabulary instruction an even more integral part of all literacy and disciplinary instruction.

### Critical Medical Anthropology

#### Perspectives in and from Latin America

**UCL Press** Critical Medical Anthropology presents inspiring work from scholars doing and engaging with ethnographic research in or from Latin America, addressing themes that are central to contemporary Critical Medical Anthropology (CMA). This includes issues of inequality, embodiment of history, indigeneity, non-communicable diseases, gendered violence, migration, substance abuse, reproductive politics and judicialisation, as these relate to health. The collection of ethnographically informed research, including original theoretical contributions, reconsiders the broader relevance of CMA perspectives for addressing current global healthcare challenges from and of Latin America. It includes work spanning four countries in Latin America (Mexico, Brazil, Guatemala and Peru) as well as the trans-migratory contexts they connect and are defined by. By drawing on diverse social practices, it addresses challenges of central relevance to medical anthropology and global health, including reproduction and maternal health, sex work, rare and chronic diseases, the pharmaceutical industry and questions of agency, political economy, identity, ethnicity, and human rights.

#### New and Old Routes of Portuguese Emigration

#### Uncertain Futures at the Periphery of Europe

**Springer** This open access book offers a comparative overview on Portuguese emigration in Europe and outside the EU in times of recession. It looks at Portuguese emigrants who, after the crisis of 2008, moved both intra-EU, such as UK, France, Switzerland, Germany and Spain, but also into countries with historical links, such as the USA and Canada, and to Portuguese speaking countries such as Brazil, Angola and Mozambique, as well as the processes of return. In addition to the dynamics of movement, the book provides an in-depth analysis of the heterogeneity of this emigration. It deepens the multifaceted identities concerning social and professional pathways among highly skilled and less skilled emigrants. The labour market continues to be the main regulatory force of Portuguese emigration, which helps to explain the outflow and the processes of settlement and return. Nonetheless, this book demonstrates that non-economic factors have likewise been of great importance in the decision to emigrate. As such this book will be a valuable read to policy makers, students and scholars in migration.

#### Dietary Intake and Type 2 Diabetes

**MDPI** The prevalence of diabetes is on the increase in the UK and worldwide, partly due to changes in lifestyle which predispose individuals to overweight and obesity. It is estimated that about 90% of the currently diagnosed adults have type 2 diabetes, and based on the World Health Organisation (WHO) report, about 422 million adults were living with diabetes in 2014 compared with 108 million in 1980; this condition caused about 1.5 million deaths in 2012. In the United States of America, it is estimated that about 30.3 million adults are living with diabetes, with a further 1.5 million new diabetes cases diagnosed every year, representing an increasing prevalence of this condition. Diabetes represents a major public health challenge, despite advances in technology and the pharmaceutical industry. These problems may be in the form of acute or long-term complications. Therefore, in order to attenuate the problems of diabetes, management strategies usually include lifestyle changes such as increased physical activity and dietary interventions. Studies which evaluate the role of nutrition in the management of type 2 diabetes often involve human and animal models as these approaches enable us to have a broader and more in-depth understanding of the condition. In some cases, diabetes may co-exist with other conditions, such as stroke, and these may present unique challenges with regard to nutritional interventions. This Special Issue aims to evaluate the risk factors associated with type 2 diabetes and the role of the diet in the management of people with this condition. This evidence is drawn from both human and animal studies.

#### A Bed for the Night

#### Humanitarianism in Crisis

**Random House** Timely and controversial, *A Bed for the Night* reveals how humanitarian organizations trying to bring relief in an ever more violent and dangerous world are often betrayed and misused, and have increasingly lost sight of their purpose. Drawing on first-hand reporting from hot war zones around the world - Bosnia, Rwanda, Congo, Kosovo, Sudan and, most recently, Afghanistan - David Rieff shows us what humanitarian aid workers do in the field and the growing gap between their noble ambitions and their actual capabilities for alleviating suffering. Tracing the origins of major humanitarian organizations such as the International Committee of the Red Cross, Doctors Without Borders, and CARE, he describes how many of them have moved from their founding principle of neutrality, which gave them access to victims, to encouraging the international community to take action to stop civil wars and ethnic cleansing. Rieff demonstrates how this advocacy has come at a high price. By overreaching, the humanitarian movement has allowed itself to be hijacked by the major powers, sometimes to become a fig leaf for actions that major powers take in their own national interests, as in Afghanistan, sometimes for their inaction, as in Bosnia and Rwanda. With the exception of cases of genocide, where the moral imperative to act overrides all other considerations, Rieff contends that if humanitarian organisations are to continue doing what they do best - alleviating suffering - they must remain independent.

#### Introduction to Advanced Nursing Practice

#### An International Focus

**Springer** Prepared under the auspices of the International Council of Nurses (ICN), this first volume provides a comprehensive overview of the rapidly emerging field of advanced nursing practice. It addresses central issues in the role and practice development that are fundamental to defining and differentiating the nature of this field. Topics include defining the role, role characteristics, scope of practice, education, regulation and research. Obstacles to and facilitators of that role are addressed and include ethical questions arising in the context of practice development. With an international focus, this volume examines international developments in the field, as reflected in country-specific case studies and examples. It offers a valuable resource for advanced practice nurses, educators and administrators at healthcare institutions.

#### Reducing Gun Violence in America

#### Informing Policy with Evidence and Analysis

**JHU Press** The book includes an analysis of the constitutionality of many recommended policies and data from a national public opinion poll that reflects support among the majority of Americans—including gun owners—for stronger gun policies.

#### Identity Processes and Dynamics in Multi-ethnic Europe

### Regulating Gun Sales

## An Excerpt from Reducing Gun Violence in America, Informing Policy with Evidence and Analysis

[Johns Hopkins University Press+ORM](#) This excerpt from the "masterful, timely, data-driven" study of the gun control debate examines the potential of stronger purchasing laws (Choice). As the debate on gun control continues, evidence-based research is needed to answer a crucial question: How do we reduce gun violence? One of the biggest gun policy reforms under consideration is the regulation of firearm sales and stopping the diversion of guns to criminals. This selection from the major anthology of studies *Reducing Gun Violence in America* presents compelling evidence that stronger purchasing laws and better enforcement of these laws result in lower gun violence. Additional material for this edition includes an introduction by Michael R. Bloomberg and Consensus Recommendations for Reforms to Federal Gun Policies from the Johns Hopkins University.

### Strategic Employee Communication

### Building a Culture of Engagement

[Springer](#) Employee engagement (or a lack thereof) can often be linked to poor communication and a detachment from company goals. Companies of all sizes are looking for ways to boost communication, recognizing its impact on key business outcomes, such as productivity and profitability. This book offers fresh insights about opportunities to improve the quality of employee communications based on employees' needs. It highlights the importance of simple, jargon-free communication that focuses on dialogue and content. High-performing organizations are more likely to think about communication from the audience perspective, rather than purely from the management perspective. The case studies offer readers a firm understanding of ways to implement and measure communication in daily practice. Effective communication requires planning and this book, with its focus on the US, Latin America, and emerging markets, will guide readers in using communication in the alignment of corporate and employee needs.

### Understanding and Proving International Sex Crimes

[Torkel Opsahl Academic EPublisher](#) "[This anthology] addresses the gap between international standard-setting prohibiting international sex crimes and actual accountability for individuals who are responsible for such crimes. The book provides detailed analysis of the legal requirements of international sex crimes and types of fact that can be used to meet these requirements. It includes a unique knowledge-base that digests international case law on such crimes. The anthology also contains several studies of institutional and evidentiary challenges in the prosecution of international sex crimes"--Series pref.

### Ombuds Institutions, Good Governance and the International Human Rights System

### Second Revised Edition

[BRILL](#) This book uses comparative law and comparative international law approaches to explore the role of human rights ombuds, classic-based ombuds and other types of ombuds institutions in human rights protection and promotion, their methods of application of international and domestic human rights law and their roles in strengthening good governance. It highlights the increasing importance of national human rights ombuds institutions globally and their roles as national human rights institutions (NHRIs).

### Global Biodiversity in a Changing Environment

### Scenarios for the 21st Century

[Springer Science & Business Media](#) The scientific community has voiced two general concerns about the future of the earth. Firstly, climatologists and oceanographers have focused on the changes in our physical environment, ie climate, oceans, and air. And secondly, environmental biologists have addressed issues of conservation and the extinction of species. There is increasing evidence that these two broad concerns are intertwined and mutually dependent. Past changes in biodiversity have both responded to and caused changes in the earth's environment. In its discussions of ten key terrestrial biomes and freshwater ecosystems, this volume uses our broad understanding of global environmental change to present the first comprehensive scenarios of biodiversity for the twenty-first century. Combining physical earth science with conservation biology, the book provides a starting-point for regional assessments on all scales. The book will be of interest to those concerned with guiding research on the changing environment of the earth and with planning future policy, especially in accordance with the Global Biodiversity Convention.

### The Handbook of Salutogenesis

[Springer Nature](#) This open access book is a thorough update and expansion of the 2017 edition of *The Handbook of Salutogenesis*, responding to the rapidly growing salutogenesis research and application arena. Revised and updated from the first edition are background and historical chapters that trace the development of the salutogenic model of health and flesh out the central concepts, most notably generalized resistance resources and the sense of coherence that differentiate salutogenesis from pathogenesis. From there, experts describe a range of real-world applications within and outside health contexts. Many new chapters emphasize intervention research findings. Readers will find numerous practical examples of how to implement salutogenesis to enhance the health and well-being of families, infants and young children, adolescents, unemployed young people, pre-retirement adults, and older people. A dedicated section addresses how salutogenesis helps tackle vulnerability, with chapters on at-risk children, migrants, prisoners, emergency workers, and disaster-stricken communities. Wide-ranging coverage includes new topics beyond health, like intergroup conflict, politics and policy-making, and architecture. The book also focuses on applying salutogenesis in birth and neonatal care clinics, hospitals and primary care, schools and universities, workplaces, and towns and cities. A special section focuses on developments in salutogenesis methods and theory. With its comprehensive coverage, *The Handbook of Salutogenesis, 2nd Edition*, is the standard reference for researchers, practitioners, and health policy-makers who wish to have a thorough grounding in the topic. It is also written to support post-graduate education courses and self-study in public health, nursing, psychology, medicine, and social sciences.

### An Educational Calamity

### Learning and Teaching During the Covid-19 Pandemic

The Covid-19 pandemic caused major disruptions to education around the world. Since the World Health Organization declared a pandemic on March 11, 2020, most students on the planet were affected by the interruption of in-person schooling. To mitigate the educational loss such interruption would cause, education authorities the world over created a variety of alternative mechanisms of education delivery. They did so quickly and with insufficient knowledge about what would work well, for which children, and for what aspects of the schooling experience. Having to create such alternative arrangements in short order was the ultimate adaptive leadership challenge, one for which no playbook existed, one for which solutions would have to be invented, rather than drawn from existing technical knowledge. The nature of the challenge differed across the world and regions, and it differed also within countries as a function of the differential public health and economic impact of the pandemic on communities, and of variations in institutional and financial resources available to redress such impact, including availability of digital infrastructure and previous knowledge and experience of teachers and students with digi-pedagogies and other resources to create alternative education delivery systems. Sustaining educational opportunities amidst these challenges created by the pandemic was an example of adaptive education response not to a unique unexpected challenge but to one in a larger class of problems, just one of the many adaptive conundrums facing communities and societies. Beyond the challenges resulting from the pandemic, other complications of that sort predating the pandemic included those resulting from poverty, inequality, social inclusion, governance, climate change, among others. In some ways, the pandemic served as an accelerant for some of those, augmenting their impact or underscoring the urgency of addressing them. Adaptive puzzles of this sort, including pandemics, are likely to continue to impact education systems in the foreseeable future. This makes it necessary to strengthen the capacity of education systems to respond to them. Reimagining education systems so they are resilient in the face of adaptive challenges is an opportunity to mobilize new talent and institutional resources. Partnerships between school systems and universities can contribute to those reimagined and more resilient systems, they can enhance the institutional capacity of education systems to devise solutions and to implement them. Such partnerships are also an opportunity for universities to be more deliberate in integrating their three core functions of research, teaching and outreach in service of addressing significant social challenges in a context in rapid flux. In this book we present the results of one approach to produce the integration between research, teaching and outreach just described, resulting from engaging graduate students in

collaborations with school systems for the purpose of helping identify ways to sustain educational opportunity during the disruption caused by the pandemic. This activity engaged our students in research and analysis, contributing to their education, and it engaged them in service to society. The book examines what happened to educational opportunity during the Covid-19 pandemic in Bangladesh, Belize, the municipality of Santa Ana in Costa Rica, Guatemala, Kenya, in the States of Sinaloa and Quintana Roo in Mexico, South Africa, United Arab Emirates, and in the United States in Richardson Independent School District in Texas. It offers an systematic analysis of policy options to sustain educational opportunity during the pandemic.

## Financial Crisis Management and Democracy

### Lessons from Europe and Latin America

[Springer Nature](#) This open access book discusses financial crisis management and policy in Europe and Latin America, with a special focus on equity and democracy. Based on a three-year research project by the Jean Monnet Network, this volume takes an interdisciplinary, comparative approach, analyzing both the role and impact of the EU and regional organizations in Latin America on crisis management as well as the consequences of crisis on the process of European integration and on Latin America's regionalism. The book begins with a theoretical introduction, exploring the effects of the paradigm change on economic policies in Europe and in Latin America and analyzing key systemic aspects of the unsustainability of the present economic system explaining the global crises and their interconnections. The following chapters are divided into sections. The second section explores aspects of regional governance and how the economic and financial crises were managed on a macro level in Europe and Latin America. The third and fourth sections use case studies to drill down to the impact of the crises at the national and regional levels, including the emergence of political polarization and rise in populism in both areas. The last section presents proposals for reform, including the transition from finance capitalism to a sustainable real capitalism in both regions and at the inter-regional level of EU-LAC relations. The volume concludes with an epilogue on financial crises, regionalism, and domestic adjustment by Loukas Tsoukalis, President of the Hellenic Foundation for European and Foreign Policy (ELIAMEP). Written by an international network of academics, practitioners and policy advisors, this volume will be of interest to researchers and students interested in macroeconomics, comparative regionalism, democracy, and financial crisis management as well as politicians, policy advisors, and members of national and regional organizations in the EU and Latin America.

## Urban Planning Against Poverty

### How to Think and Do Better Cities in the Global South

[Springer Nature](#) This open access book revisits the theoretical foundations of urban planning and the application of these concepts and methods in the context of Southern countries by examining several case studies from different regions of the world. For instance, the case of Koudougou, a medium-sized city in one of the poorest countries in the world, Burkina Faso, with a population of 115.000 inhabitants, allows us to understand concretely which and how these deficiencies are translated in an African urban context. In contrast, the case of Nueve de Julio, intermediate city of 50.000 dwellers in the pampa Argentina, addresses the new forms of spatial fragmentation and social exclusion linked with agro export and crisis of the international markets. Case studies are also included for cities in Asia and Latin America. Differences and similarities between cases allow us to foresee alternative models of urban planning better adapted to tackle poverty and find efficient ways for more inclusive cities in developing and emerging countries, interacting several dimensions linked with high rates of urbanization: territorial fragmentation; environmental contamination; social disparities and exclusion, informal economy and habitat, urban governance and democracy.

## Offshoring and the Internationalization of Employment

### A Challenge for a Fair Globalization?

[International Labour Organization](#) Are job losses and the degradation of working conditions in the developed world due to globalization and the offshoring of jobs? Contrary to popular beliefs and fears, most economic analysis evaluating the long-term and global implications of the internationalization of employment does not support this view. Yet for workers who have been displaced, a positive global impact does not remove their immediate loss. This study discusses a paradox: globalization may have enhanced the overall well-being of those countries that have participated, and reduced poverty worldwide, but it looks more and more like a monster that devours jobs, as there are few mechanisms to compensate those that have suffered. The book analyzes trends and patterns in the internationalization of employment, looks at losers and winners, and proposes new policies of compensation.

## The Land Within

### Indigenous Territory and the Perception of the Environment

[IWGIA](#) By describing the fabric of relationships indigenous peoples weave with their environment, The Land Within attempts to define a more precise notion of indigenous territoriality. A large part of the work of titling the South American indigenous territories may now be completed but this book aims to demonstrate that, in addition to management, these territories involve many other complex aspects that must not be overlooked if the risk of losing these areas to settlers or extraction companies is to be avoided. Alexandre Surralls holds a doctorate in anthropology from the School for Higher Studies in Social Sciences and is a researcher on the staff of the National Centre for Scientific Research. Pedro Garca Hierro is a lawyer from Madrid Complutense University and the Pontifical Catholic University of Peru. He has worked with various indigenous organizations, on issues related to the identification and development of collective rights and the promotion of intercultural democratic reforms.

## Gender in Local Government

### A Sourcebook for Trainers

"This sourcebook aims at providing local governments with the tools to better understand the importance of gender in the decision-making process and to reach better solutions for the communities they serve. For this publication the following key issues of local governance have been selected: participation in local government, land rights, urban planning, service provision, local government financing, violence against women and local economic development. Each of these issues is introduced by a brief gender analysis. Numerous case studies illustrate what local governments can do. Reflection questions and training exercises help trainers to develop successful training events. [...] [The manual] is designed as a companion to other UN-HABITAT training tools, providing local government trainers with the background and tested training methods they need to strengthen the gender dimension in their day-to-day training activities. The source book may also be used as a stand-alone tool, introducing local governments to gender issues and their importance for local government policy-making and project implementation." -- P. iv.

## Reading Fluency

[MDPI](#) Reading fluency has been identified as a key component of proficient reading. Research has consistently demonstrated significant and substantial correlations between reading fluency and overall reading achievement. Despite the great potential for fluency to have a significant outcome on students' reading achievement, it continues to be not well understood by teachers, school administrators and policy makers. The chapters in this volume examine reading fluency from a variety of perspectives. The initial chapter sketches the history of fluency as a literacy instruction component. Following chapters examine recent studies and approaches to reading fluency, followed by chapters that explore actual fluency instruction models and the impact of fluency instruction. Assessment of reading fluency is critical for monitoring progress and identifying students in need of intervention. Two articles on assessment, one focused on word recognition and the other on prosody, expand our understanding of fluency measurement. Finally, a study from Turkey explores the relationship of various reading competencies, including fluency, in an integrated model of reading. Our hope for this volume is that it may spark a renewed interest in research into reading fluency and fluency instruction and move toward making fluency instruction an even more integral part of all literacy instruction.

## International Community Psychology

### History and Theories

[Springer Science & Business Media](#) This is the first in-depth guide to global community psychology research and practice, history and development, theories and innovations, presented in one field-defining volume. This book will serve to promote international collaboration, enhance theory utilization and development, identify biases and barriers in the field, accrue critical mass for a discipline that is often marginalized, and to minimize the pervasive US-centric view of the field.

### Counternetwork

## Countering the Expansion of Transnational Criminal Networks

[Rand Corporation](#) Through an analysis of transnational criminal networks originating in South America, this report presents operational characteristics of these networks, strategic alliances they have established, and the multiple threats that they pose to U.S. interests and to the stability of the countries where they operate. It also identifies U.S. government policies and programs to counter these networks and examines the military's role in that context.

## Second Handbook of English Language Teaching

[Springer](#) The Second Handbook of English Language Teaching provides a comprehensive examination of policy, practice, research and theory related to English language teaching in international contexts. Over 70 chapters focus on the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second-language acquisition and pedagogy. In countries around the globe, English has become the second language taught most frequently and intensively. In many countries, particularly in Asia, government policies have made English a part of the curriculum from primary school on. Demand for English teaching by parents and adult learners is fueled by the desire to increase economic competitiveness, globalization of the workforce, immigration, and a move toward lifelong learning. Immigration has led to an increased demand for English-language teaching even in countries where English is the dominant language.

## Why Translation Studies Matters

[John Benjamins Publishing](#) Whether Translation Studies really matters is an important and challenging question which practitioners of translation and interpreting raise repeatedly. TS scholars, many of whom are translators and interpreters themselves, are not indifferent to it either. The twenty papers of this thematic volume, contributed by authors from various parts of Europe, from Brazil and from Israel, address it in a positive spirit. Some do so through direct critical reflection and analysis, arguing in particular that the engagement of TS with society should be strengthened so that the latter could benefit more from the former. Others illustrate the relevance and contribution of TS to society and to other disciplines from various angles. Topics broached include the cultural mediation role of translators, issues in literary translation, knowledge as intellectual capital, globalization through English and risks associated with it, bridging languages, mass media, corpora, training, the use of modern technology, interdisciplinarity with psycholinguistics and neurophysiology.

## Unspeakable Truths 2e

## Transitional Justice and the Challenge of Truth Commissions

[Routledge](#) In a sweeping review of forty truth commissions, Priscilla Hayner delivers a definitive exploration of the global experience in official truth-seeking after widespread atrocities. When *Unspeakable Truths* was first published in 2001, it quickly became a classic, helping to define the field of truth commissions and the broader arena of transitional justice. This second edition is fully updated and expanded, covering twenty new commissions formed in the last ten years, analyzing new trends, and offering detailed charts that assess the impact of truth commissions and provide comparative information not previously available. Placing the increasing number of truth commissions within the broader expansion in transitional justice, *Unspeakable Truths* surveys key developments and new thinking in reparations, international justice, healing from trauma, and other areas. The book challenges many widely-held assumptions, based on hundreds of interviews and a sweeping review of the literature. This book will help to define how these issues are addressed in the future.

## The Quality of Life in Latin American Cities

### Markets and Perception

[World Bank Publications](#) A growing number of cities around the world have established systems for monitoring the quality of urban life. Many of those systems combine objective information with subjective opinions and cover a wide variety of topics. This book assesses a method that takes advantage of both types of information and offers criteria to identify and rank the issues of potential importance for urban dwellers. This method which combines the so-called 'hedonic price' and 'life satisfaction' approaches to value public goods was tested in pilot studies in six Latin American cities: Bogot , Buenos Aires, Lima, Medell n, Montevideo, and San Jos of Costa Rica. It provides valuable insights to address key questions such as, Which urban problems have the greatest impact on people s opinions of city management and the most widespread effects on their lives? Do gaps between perception and reality vary from one area of the city to another, especially between high- and low-income neighborhoods? Where can homebuilders most feasibly seek solutions to problems such as inadequate road infrastructure, a lack of recreational areas, or poor safety conditions? Which problems should government authorities address first, in light of their impact on the well-being of various groups of individuals and given private actors abilities to respond? Which homeowners benefit the most from public infrastructure or services? When can or should property taxes be used to finance the provision of certain services or the solution of certain problems? 'The Quality of Life in Latin American Cities: Markets and Perception' proposes a monitoring system that is easy to operate and that entails reasonable costs but also has a solid conceptual basis. Long the ideal of many scholars and practitioners, such a system may soon become a reality and have the potential to make a significant contribution to the decision-making processes in any city concerned with the well-being of its residents.

## Towards Universal Social Protection

## Latin American Pathways and Policy Tools

[UN](#) This book reflects on the public policies, programmes and regulatory frameworks that are taking a rights-based approach to expanding social protection coverage and benefits in Latin America, with a view to achieving universal coverage. Its discussion of the policy tools and programmes pursued in the region aims to provide the reader with technical and programmatic insights for assembling and coordinating public policies within consistent and sustainable social protection systems. The combination of normative orientations and stock of technical knowledge, together with advances regarding the rights-based approach to social protection within a life cycle framework, afford the reader not only a tool box of specific social protection instruments, but also an in-depth examination of related political economy aspects.

## Agropolis

## The Social, Political, and Environmental Dimensions of Urban Agriculture

[IDRC](#) ?A rare achievement, one of the first books to link technological and behavioural change to the sustainability agenda?Charles Landry, author of *The Creative City*?Any course interested in sustainable development in practice would benefit from the case studies here?Dr Adrian Smith, SPRU Science and Technology Policy Research Unit, University of Sussex, UKTwo disjointed voices can be identified in the prevailing sustainability discourse: one technology-focused, the other favouring behavioural solutions. This new, practical text bridges the gap in a 'co-evolutionary' framework, enabling more sustainable policies and projects to be developed. Arguing that technical and social realms are much more connected than most people concerned with sustainability tend to admit, the author has developed an innovative and integrated strategy that encourages planners, architects and politicians to work with end-users in 'co-designing' technologies and infrastructures that make socially desired behaviours more attractive. Having explained the nature of the problem, the author outlines key concepts and shared characteristics of co-evolutionary projects and anticipates possible criticisms. Through detailed analysis and diverse case studies, the reader is presented with a clear picture of a more holistic approach to planning sustainable cities and regions, which will be invaluable for students and professionals alike. This will be an invaluable textbook and planning tool suitable for students of science and technology studies (STS), regional policy and planning, and practitioners including city and regional planners, policy makers and consultants.

## Empirical modelling of translation and interpreting

[Language Science Press](#) Empirical research is carried out in a cyclic way: approaching a research area bottom-up, data lead to interpretations and ideally to the abstraction of laws, on the basis of which a theory can be derived. Deductive research is based on a theory, on the basis of which hypotheses can be formulated and tested against the background of empirical data. Looking at the state-of-the-art in translation studies, either theories as well as models are designed or empirical data are collected and interpreted. However, the final step is still lacking: so far, empirical data has not lead to the

formulation of theories or models, whereas existing theories and models have not yet been comprehensively tested with empirical methods. This publication addresses these issues from several perspectives: multi-method product- as well as process-based research may gain insights into translation as well as interpreting phenomena. These phenomena may include cognitive and organizational processes, procedures and strategies, competence and performance, translation properties and universals, etc. Empirical findings about the deeper structures of translation and interpreting will reduce the gap between translation and interpreting practice and model and theory building. Furthermore, the availability of more large-scale empirical testing triggers the development of models and theories concerning translation and interpreting phenomena and behavior based on quantifiable, replicable and transparent data.

## Strategic Communication and Deformative Transparency

### Persuasion in Politics, Propaganda, and Public Health

**Routledge** This book examines deformative transparency and its different manifestations in political communication, propaganda and public health. The objective is to present the theoretical foundations of deformative transparency, as grotesque and esperpentic transparency, and illustrate the validity of such approach to understand the strategic and ethical implications of the proactive disclosure of the "shocking", "ugly" or "outside the norm". Four areas are discussed: political communication with particular focus on populist politicians as the deceased Venezuelan president Hugo Chávez, the campaign and presidency of Donald Trump, and the tenure in office of the mayor of Toronto, Rob Ford; propaganda strategies of Islamist terrorist organizations such as the Islamic State's escalation of the visually horrific; and public health campaigns that use "disturbing images" to promote public awareness and eventually influence behavioural change. This study on the transparently grotesque is part of a research program about the economy of emotions in public communication.

### Corporatism And National Development In Latin America

**Routledge** This book emphasizes the necessity of coming to grips with historic and contemporary corporatism in order to fully comprehend Latin American and Iberian development on its own terms and in its own sociopolitical context.

### Taken from the Lips

### Gender and Eros in Mesoamerican Religions

**Religion in the Americas** This epistemological study, which is based on ancient chronicles and stories, hymns and ritual discourses, epics and poetics, as well as contemporary ethnographic studies of Mesoamerica, has as its salient issues: gender fluidity, eroticism linked to religion, permeable corporeality, embodied thought and the amblings of oral thought

### Responding to Domestic Violence

### Emerging Challenges for Policy, Practice and Research in Europe

**Jessica Kingsley Publishers** This book offers a critical overview of established and emerging manifestations of domestic violence across Europe. It describes how countries within and outside the EU are responding to the problem in policy, practice and research. Eminent academics and professionals from a range of European countries share their findings from new groundbreaking victim surveys, and weigh up the legal, social and healthcare challenges. The issues addressed include: - the cultural challenges of combating abuse forms most prevalent in migrant communities such as female genital mutilation and forced marriage; - emerging problems such as child-to-parent violence, teenage relationship violence and digital intimate partner abuse; and - barriers to help-seeking faced by marginalised victims such as LGBTQ and older people. By showcasing the most effective responses formulated in Europe and exploring innovative ways to research and understand domestic violence, this book is a crucial resource for all those with responsibility for implementing social policy and good practice.

### The Megabook of Fluency

**Scholastic Professional** All the latest research on fluency plus dozens of practical lessons and ready-to-use fluency-priming tools, including partner poems, word ladders, and more!

### Abbreviated Criminal Procedures for Core International Crimes

**Torkel Opsahl Academic Epubliher** This anthology analyses the need for abbreviated criminal procedures for less serious core international crimes in countries that have opened more case files than criminal justice can handle through regular trials. It suggests that ideas can be found in national procedural law. It presupposes that such procedures respect human rights standards.
