### The Green Book

## Appraisal and Evaluation in Central Government : Treasury Guidance

**Stationery Office** This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

## Marketing : 10 cases studies

### Case studies with solutions

**Renault, Samsung, Lacoste** This book provides opportunities to discover a selection of issues recently faced by 10 major French companies. Each case offers in a clear and structured manner: a case presentation sheet including the problem statement, learning objectives, as well as the main themes and marketing tools used throughout the case; a narrative reviewing important information about the company and its environment, leading to the problem to be investigated; a series of questions guiding the draft of a structured solution; a detailed solution outlining the main strategic recommendations. Based on real issues and written in collaboration with the companies, the 10 field-based case studies allow applying marketing principles, theories and models: segmentation, positioning, marketing plan, as well as designing strategies at the product, price, place and promotion levels. Learning by doing, applied to marketing!"

## Afro-global Management Innovation Practices

### Re-imagining Work and Workplaces

**African Sun Media** This book represents views, frameworks and practices on stimulating and realising our optimal potential as human beings in the context of a workplace where there is a desire to achieve shared goals and aspirations in order to accomplish positive economic, societal and environmental impacts and outcomes. It describes a vision of how life and work in organisations could be. We describe a new kind of organisation. Being a good person and doing good things while making profit are a real possibility for those management innovators who think beyond immediate trade-offs. In this book we explore management innovation as core study field and arena for re-inventing and re-imagining how people in organisations could execute management activities such as planning, organising, leading and controlling for multiple stakeholder satisfaction and benefits. Work can be much more joyful and fulfilling than we think, but it requires courage from us to take responsibility when freedom is offered.

## Services, Experiences and Innovation

### Integrating and Extending Research

**Edward Elgar Publishing** Whilst innovation has traditionally focused on manufacturing, recently research surrounding service innovation has been flourishing. Furthermore, as consumers become ever more sophisticated and look for experiences, a research field investigating this topic has also emerged. This book aims to develop an integrated approach to the field of experience and services through innovation by showing that it is necessary to take several factors into account. As such, it makes a substantial and compelling contribution to the interdependencies between innovation, services and experience research.

## Handbook of Research on Policies, Protocols, and Practices for Social Work in the Digital World

IGI Global Social work plays an important role in reintegrating individuals into society, educating, raising awareness, implementing social policy, and realizing legal regulations. The emergence of digital innovations and the effects of health problems including the COVID-19 pandemic on individuals and society have led to the development of innovations, virtual/digital practices, and applications in this field. The contributions of the recent pandemic and digital transformation to social work and practices should be revealed in the context of international standards. **Policies, Protocols, and Practices for Social Work in the Digital World** presents the current best practices, policies, and protocols within international social work. It focuses on the impact of digital applications, the effects of the COVID-19 pandemic, and digital transformation on social work. Covering topics including burnout, management, social engineering, anti-discrimination strategies, and women's studies, this book is essential for social workers, policymakers, government officials, scientists, clinical professionals, technologists, practitioners, researchers, academicians, and students.

## Digital Transformation and Innovative Services for Business and Learning

IGI Global In a world dependent on digital technologies, business corporations continually try to stay ahead of their competitors by adopting the most updated technology into their business processes. Many companies are adopting digital transformation models, data analytics, big data, data empowerment, and data sharing as key strategies and as service disruptors for information delivery and record management. Higher education institutions have adopted digital service innovation as a core to driving their business processes. Such services are key to ensuring efficiency and improving organizational performance. **Digital Transformation and Innovative Services for Business and Learning** is a collection of innovative research on the latest digital services and their role in supporting the digital transformation of businesses and education. While highlighting topics including brand equality, digital banking, and generational workforce, this book is ideally designed for managers, executives, IT consultants, industry professionals, academicians, researchers, and students.

This comprehensive resource is beneficial for academics, PhD students, policymakers, and government officials.

## Rational Decisions in Organisations

### Theoretical and Practical Aspects

CRC Press Managers in organisations must make rational decisions. Rational decision making is the opposite of intuitive decision making. It is a strict procedure utilising objective knowledge and logic. It involves identifying the problem to solve, gathering facts, identifying options and outcomes, analysing them, considering all the relationships and selecting the decision. Rational decision making requires support: methods and software tools. The identification of the problem to solve needs methods that would measure and evaluate the current situation. Identification and evaluation of options and analysis of the available possibilities involves analysis and optimisation methods. Incorporating intuition into rational decision making needs adequate methods that would translate ideas or observed behaviours into hard data. Communication, observation and opinions recording is hardly possible today without adequate software. Information and data that form the input, intermediate variables and the output must be stored, managed and made accessible in a user-friendly

manner. **Rational Decisions in Organisations: Theoretical and Practical Aspects** presents selected recent developments in the support of the widely understood rational decision making in organisations, illustrated through case studies. The book shows not only the variety of perspectives involved in decision making, but also the variety of domains where rational decision support systems are needed. The case studies present decision making by medical doctors, students and managers of various universities, IT project teams, construction companies, banks and small and large manufacturing companies. Covering the richness of relationships in which the decisions should and must be taken, the book illustrates how modern organisations operate in chains and networks; they have multiple responsibilities, including social, legal, business and ethical duties. Nowadays, managers in organisations can make transparent decisions and consider a multitude of stakeholders and their diverse features, incorporating diverse criteria, using multiple types and drivers of information and decision-making patterns, and referring to numerous lessons learned. As the book makes clear, the marriage of theoretical ideas with the possibilities offered by technology can make the decisions in organisations more rational and, at the same time, more human.

## Cases on Active Blended Learning in Higher Education

IGI Global Active blended learning (ABL) is a pedagogical approach that combines sensemaking activities with focused interactions in appropriate learning settings. ABL has become a great learning tool as it is easily accessible online, with digitally rich environments, close peer and tutor interactions, and accommodations per individual learner needs. It encompasses a variety of concepts, methods, and techniques, such as collaborative learning, experiential learning, problem-based learning, team-based learning, and flipped classrooms. ABL is a tool used by educators to develop learner autonomy, engaging students in knowledge construction, reflection, and critique. In the current educational climate, there is a strong case for the implementation of ABL. Cases on Active Blended Learning in Higher Education explores strategies and methods to implement ABL in higher education. It will provide insights into teaching practice by describing the experiences and reflections of academics from around the world. The chapters analyze enablers, barriers to engagement, outcomes, implications, and recommendations to benefit from ABL in different contexts, as well as associated concepts and models. While highlighting topics such as personalized university courses, remote service learning, team-based learning, and universal design, this book is ideal for in-service and preservice teachers, administrators, instructional designers, teacher educators, practitioners, researchers, academicians, and students interested in pedagogical approaches aligned to ABL and how this works in higher education institutions.

## Adoption and impact of OER in the Global South

African Minds Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in developing countries.

## School Improvement

### Best Practices from China

Taylor & Francis The book analyzes school improvement from the perspective of theory and practice in China. By theoretically exploring definitions, characteristics, and models of school improvement, the author develops and explains an effective set of criteria. Ten cases of best practice are shared, exploring different aspects of school improvement such as school development planning, teacher human resource management, and instructional leadership. Integrating theory and practice, the book further discusses the generation and application of best practice case studies. It contributes to the knowledge of new management and practical innovation in the field of school improvement. Policymakers, educators, managers, researchers, and all those interested in improving the quality of basic education will find this book helpful.

### Good Services

## Decoding the Mystery of What Makes a Good Service

BIS Publishers Service design is a rapidly growing area of interest in design and business management. There are a lot of books on how to get started, but this is the first book that describes what a 'good' service is, what makes a good service and why. This book lays out the essential principles for building services that work well for users. Demystifying what we mean by a 'good' and 'bad' service and describing the common elements within all services that mean that it either works for users or doesn't. This book is for anyone who is involved in designing or delivering services and aims to give the reader an understanding of what the common characteristics of a "good service" are to users. For readers who are not professional service designers, this book gives an indication of what they or their teams should be aiming for, without presuming they will invest a significant amount of time designing a service themselves.

## Public Services and the European Union

## Healthcare, Health Insurance and Education Services

Springer Science & Business Media Politically sensitive and economically important, welfare services such as health care, health insurance and education have opened up a heated debate in the EU. The application of EU law to welfare services raises discontent from the part of the Member States who perceive their systems to be under threat. Resisting to the application of the EU law is sometimes seen as part of protecting those values. This book suggests that this resistance is largely unjustified. EU law is not damaging to welfare systems, but it provides adequate balancing mechanisms to ensure that all interests are protected. The approach taken in analysing the impact of EU law on welfare services is to look at the negative integration process and answer the questions related to the extent to which EU law applies to welfare services and the kinds of safeguards the Court offers for these services. The proportionality principle distinguishes itself as the central element in balancing national and Community interests. Being part of the broader integration process, negative harmonization creates legislative lacunae, and therefore, this book also looks at alternative solutions to the negative harmonization process, namely positive and soft law.

## Databases and Information Systems V

### Selected Papers from the Eighth International Baltic Conference, DB&IS 2008

**IOS Press** The Eighth International Baltic Conference on Databases and Information Systems took place on June 25 2008 in Tallinn, Estonia. This conference is continuing a series of successful bi-annual Baltic conferences on databases and information systems (IS). The aim is to provide a wide international forum for academics and practitioners in the field of databases and modern information systems for exchanging their achievements in this area. The original research results presented in Databases and Information Systems V mostly belong to novel fields of IS and database research such as database technology and the semantic web, ontology-based IS, IS and AI technologies and IS integration. The contribution of Dr. Jari Palomaumiki showed how different ontological commitments affect the way we are modeling the world when creating an information system. As semantic technologies have been gaining more attention recently, a special session on semantic interoperability of IS was organized. The invited talks from each Baltic State gave a good insight how semantic interoperability initiatives are developing in each of the Baltic States and how they relate to the European semantic interoperability framework.

## Resources in Education

### Handbook of Research on Managerial Solutions in Non-Profit Organizations

**IGI Global** Non-profit Organizations (NPOs) are the fastest growing organizations in modern society. They exist in a liminal realm between public and private organizations, and because of this, new jurisdictions are created for NPOs. The existence of NPOs is contingent upon their adequacy, and management is a key determining factor as to whether an organization survives. The Handbook of Research on Managerial Solutions in Non-Profit Organizations provides relevant theoretical frameworks and the latest empirical research findings related to the successful management of nonprofits. Providing insights into the best practices and valuable comparisons between strategies in different contexts, this book gives invaluable support for nonprofit managers, policy makers, students, and researchers.

### Research Anthology on Public Health Services, Policies, and Education

**IGI Global** Public health has become an essential area of focus in terms of the way it operates, the services offered, policies, and more. Maintaining an effective public health system and infrastructure, updated and useful policies, and health literacy are primary concerns. A critical analysis of public healthcare policy and services is critical to accommodate the

changing health demands of the global population. Through a deeper understanding of the way public health services are offered, a look into policymaking and current policies in healthcare, and the way health literacy and health education are promoted, the current state and future of public health are acknowledged. The Research Anthology on Public Health Services, Policies, and Education presents a view of public health through an analysis of healthcare services and delivery; policies in terms of policymaking, ethics, and governance; as well as the way society is educated on public health affairs. The chapters will cover a wide range of issues such as healthcare policy, health literacy, healthcare reform, accessibility, public welfare, and more. This book is essential for public health officials, government officials, policymakers, teachers, medical professionals, health agencies and organizations, professionals, researchers, academics, practitioners, and students interested in the current state of public health and the improvement of public health services and policies for the future.
