WHY JOHNNY STILL CAN'T READ OR WRITE OR UNDERSTAND MATH

AND WHAT WE CAN DO ABOUT IT

Bombardier Books **“Stephen King? A piker: no horror story is as harrowing as Andrew Bernstein’s must-read Why Johnny Still Can’t Read or Write or Understand Math. Bernstein tears the genteel cover off the educational system and reveals the truly shocking extent of the destruction that has been wrought by fashionable Leftist educational theories, the con men, quacks and psychopaths who have gained control of American public education over the last few decades, and the public educational system’s addiction to taxpayer funding and the latest societal trends, no matter how damaging they are to children. But Bernstein doesn’t just leave us screaming: he also offers a practical, readily applicable program for taking back the educational system and saving our children from these lunatics. If you have children in school, this is essential reading. And even if you don’t, but care about the future of society, you must not miss this all-important book.”** —Robert Spencer, bestselling author of *The History of Jihad, Did Muhammad Exist?* and *The Critical Qur'an Coming out of the COVID-19 pandemic*, parents across the nation grapple with a new and horrifying understanding of just how bad our educational system has become. It all adds up to a system that seems hopelessly, terribly, and irrevocably broken. But as an educator and author, Andrew Bernstein reminds us that American education in the nineteenth through early-twentieth century was superb. This nation once knew how to turn out the brightest, most

resourceful and independent-thinking people the world had ever seen. We can do it again.

A PIECE OF THE ACTION

HOW THE MIDDLE CLASS JOINED THE MONEY CLASS

Simon and Schuster Winner of the Helen Bernstein Award for Excellence in Journalism One of Business Week's "Ten Best Business Books of the Year" When it was published in 1994, *A Piece of the Action* was wildly acclaimed by Fortune, The Wall Street Journal, authors Michael Lewis and Brian Burroughs; it won the Helen Bernstein Prize and was a national bestseller. Joseph Nocera describes the historical process by which millions of middle class Americans went from being savers—people who kept their money in the bank, and spent it frugally—to being unrepentant borrowers and investors. *A Piece of the Action* is an important piece of financial and social history, and with a new introduction, Nocera's 2013 critique of the uses of the revolution is a powerful warning and admonition to understand what is at stake before we act, to look before we jump.

KENNY RILEY AND BLACK UNION LABOR POWER IN THE PORT OF CHARLESTON

McFarland Their ancestors may have been cargo in the slave ships that arrived in Charleston, S.C. Today, the scale has been rebalanced: black longshoremen run the port's cargo operation. They are members of the International Longshoremen's Association, a powerful labor union, and Kenny Riley is the charismatic leader of the Charleston local. Riley combines commitment to the civil rights movement with the practicality to ensure that Charleston remains a principal East Coast port. He emerged on the international stage in 2000, rallying union members worldwide to the defense of "The Charleston Five," longshoremen arrested after a confrontation with police turned violent. This is Riley's story as well as a behind-the-scenes look at organized black labor in a Deep South port.

SUBURGATORY

LIFE TRAPPED AMONG THE MANICURED MOMS, BARELY THERE DADS, AND NIGHTMARE NEIGHBORS

Rowman & Littlefield Suburgatory lampoons the absurdities and contradictions that Linda Keenan has witnessed since leaving New York City, where she was a thoroughly urban CNN news producer for seven years, and settling down as a hapless stay-at-home suburban mother. The original proposal for this book was picked up by Warner Brothers, and you can see their imagining of Suburgatory on the ABC show of the same title. Keenan was forced by the man in her life to leave her beloved New York City for a supposed suburban utopia. Instead she found herself trapped in a place where conformity is king, and where she often felt like she had been taken hostage by an adult Girl Scout troop. So Keenan decided to train her twisted reporter's eye on the strange inhabitants of this new foreign land. Thought of as a local town newspaper or website, Suburgatory excoriates—through satirical local “news stories”—the mostly upper middle class American pieties and parenting obsessions, targeting

the all-around bad behavior raging underneath the surface of those obsessively tended suburban lawns and bikini lines.

GROWING UP FAST

RE-VISIONING ADOLESCENT MOTHERS' TRANSITIONS TO YOUNG ADULTHOOD

Psychology Press The first edition of *Growing Up Fast* attempted to counter the stereotype of poor, minority adolescent mothers and describe the diversity of their educational, work, parenting, and relationship experiences. The volume followed a strengths-based approach to understanding why some mothers appeared resilient to the stresses of early parenting, compared to their peers, and what obstacles undermine resiliency for some of these young women. We hear their stories in their own words. We also see how many disadvantaged mothers go on to succeed in school, work, and parenting while avoiding many of the risk associated with teen parenting . The research is based on a six-year study of 120 young disadvantaged mothers and their children from New York City. It uniquely combines the analysis of longitudinal questionnaire data with qualitative analysis of extensive interviews conducted with these women focusing on the first six years after their child was born. A past winner of the Society for Research on Adolescence best book award, *Growing Up Fast* is a fascinating study of human resilience that will continue to be recognized for its contribution to individuals involved in program development and policymaking with teenage parenting. A new introductory chapter to the book suggests that we can look at the previous findings through a new lens that emphasizes not only the diversity of outcomes for young mothers and the sources of their strengths, but also asks what we can learn from these women about supporting their educational and work goals, as they transition to adulthood. New attention to emerging adulthood shows that this is a critical stage of life when the foundations for health and healthy life styles are laid down. Developmental tasks of this phase include building the capacity for financial and residential independence through post-secondary education and job training, and establishing stable sources of support from parents, romantic partners, and peers for all youth. Leadbeater addresses the societal changes that make these tasks particularly salient for young women and focuses attention on how we can support youth who make this transition with children.

ALFRED TARSKI

EARLY WORK IN POLAND—GEOMETRY AND TEACHING

Springer Alfred Tarski (1901-1983) was a renowned Polish/American mathematician, a giant of the twentieth century, who helped establish the foundations of geometry, set theory, model theory, algebraic logic and universal algebra. Throughout his career, he taught mathematics and logic at universities and sometimes in secondary schools. Many of his writings before 1939 were in Polish and remained inaccessible to most mathematicians and historians until now. This self-contained book focuses on Tarski's early contributions to geometry and mathematics education, including the famous Banach-Tarski paradoxical decomposition of a sphere as well as high-school mathematical topics and pedagogy. These themes are significant since Tarski's later research on geometry and its foundations stemmed in part from his early employment as a high-school mathematics teacher and teacher-trainer. The book contains careful translations and much newly uncovered social background of these works written during Tarski's years in Poland. Alfred Tarski: Early Work in Poland serves the mathematical, educational, philosophical and historical communities by publishing Tarski's early writings in a broadly accessible form, providing background from archival work in Poland and updating Tarski's bibliography. A list of errata can be found on the author Smith's personal webpage.

HYPER EDUCATION

WHY GOOD SCHOOLS, GOOD GRADES, AND GOOD BEHAVIOR ARE NOT ENOUGH

NYU Press An up-close look at the education arms race of after-school learning, academic competitions, and the perceived failure of even our best schools to educate children Beyond soccer leagues, music camps, and drama lessons, today's youth are in an education arms race that begins in elementary school. In Hyper Education, Pawan Dhingra uncovers the growing world of high-achievement education and the after-school learning centers, spelling bees, and math competitions that it has spawned. It is a world where immigrant families vie with other Americans to be at the head of the class, putting in hours of studying and testing in order to gain a foothold in the supposed meritocracy of American public education. A world where enrichment centers, like Kumon, have seen 194 percent

growth since 2002 and target children as young as three. Even families and teachers who avoid after-school academics are getting swept up. Drawing on over 100 in-depth interviews with teachers, tutors, principals, children, and parents, Dhingra delves into the why people participate in this phenomenon and examines how schools, families, and communities play their part. Moving past "Tiger Mom" stereotypes, he addresses why Asian American and white families practice what he calls "hyper education" and whether or not it makes sense. By taking a behind-the-scenes look at the Scripps National Spelling Bee, other national competitions, and learning centers, Dhingra shows why good schools, good grades, and good behavior are seen as not enough for high-achieving students and their parents and why the education arms race is likely to continue to expand.

THE EARTHQUAKE PROPHET

AND OTHER STORIES

iUniverse In this distinctive collection of thirty-nine short stories, author David H. Brandin mixes satire and political incorrectness with startling story-line twists in the tradition of O. Henry. Divided into four parts, *The Earthquake Prophet* combines modern history, fantasy, and current events to deliver a treasure trove of prose. Brandin delves into a variety of subjects that range from earthquake prediction and World War II to the hot political topics of today such as global warming, sanctuary cities, and TSA's no-fly lists. With wit and his own unique brand of humor, Brandin offers an interesting explanation for the collapse of the American economic system; deftly describes the inanity of professional politicians; exposes corruption in the judicial system; and skewers high-stakes issues in national security. Stories also explore how the ordinary can turn extraordinary. Scuba diving takes a strange turn, a piano lesson lapses into terror, and an unusual Texas slot machine creates quite the controversy. Blending political, historical, and general fiction with tales of science fiction and fantasy, *The Earthquake Prophet* promises a fascinating literary adventure.
