KEY=BOUNDARIES - ALISSON CULLEN

TRAVERSING PHILOSOPHICAL BOUNDARIES

Addressing six primary philosophical concerns - the self, reality, epistemology, ethics, politics and religion, this text contains not only many readings from the Western canon, but essential readings from many cultural perspectives not typically included in introductory philosophy classes as well.

CONVERSATIONS IN PHILOSOPHY

CROSSING THE BOUNDARIES

Cambridge Scholars Publishing **Conversations in Philosophy: Crossing the Boundaries** consists of essays that revolve around the question of the nature and meaning of philosophy, even as it demonstrates philosophy's significance and relevance to some fundamental human problems and issues. The essays present diverse views of what philosophy might be and might aspire to be, with contributors being influenced by a wide range of philosophical approaches and traditions. The conversations also cut across disciplinary boundaries to interrogate and utilize ideas taken from ethics, epistemology, metaphysics, literary studies, cultural studies, and the sociology of science. Traversing regional boundaries, the essays show philosophical analysis at work in exploring some issues pertinent to African, Caribbean, European and American experiences, even while not ignoring Asian traditions. The collection presents interesting and intriguing views on how philosophical inquiry can illuminate various pressing problems: development, conflict, the discriminating preservation of worthwhile traditions, and the prevalence of apathy. It also reflects the vitality and multifaceted nature of philosophical discourse in grappling with live issues. **Conversations in Philosophy** is a comprehensive, balanced, and unique anthology of readings capturing the diversity of philosophical investigation.

TRAVERSING PHILOSOPHICAL BOUNDARIES

Wadsworth Publishing Company **TRAVERSING PHILOSOPHICAL BOUNDARIES** is the most comprehensive multicultural text/reader for introductory philosophy. Addressing six primary philosophical concerns—the self, reality, epistemology, ethics, politics, and religion—this book contains not only many readings from the Western canon, but also essential readings from many cultural perspectives not typically included in introductory philosophy classes. Asian, African, African-American, Latin American, and Feminist traditions are broadly represented and fully integrated into the exploration of these fundamental matters.

A MORE CHARITABLE ATHEISM

ESSAYS ON LIFE WITHOUT—BUT NOT NECESSARILY AGAINST—GOD

Rowman & Littlefield The fourteen essays in this book, a product of the author's interactions with students and his own personal journey from Christianity to humanism, are arranged into four sections: Chronic Illness and Deicide, Epistemic Limitations and Respect for Persons, A Humanist Approach to Reading the Bible, and Ethical Reasoning without God.

TRANSCENDING BOUNDARIES IN PHILOSOPHY AND THEOLOGY

REASON, MEANING AND EXPERIENCE

Routledge Presenting new opportunities in the dialogue between philosophy and theology, this interdisciplinary text addresses the contemporary reshaping of intellectual boundaries. Exploring human experience in a 'post-Christian' era, the distinguished contributors bring to bear what have been traditionally seen as theological resources while drawing on contemporary developments in philosophy, both 'continental' and 'analytic'. Set in the context of two complementary narratives - one philosophical concerning secularity, the other theological about the question of God - the authors point to ways of reconfiguring both traditional reason / faith oppositions and those between interpretation / text and language / experience. Contributors: David Brown, Philip Clayton, Chris Firestone, Grace Jantzen, Nicholas Lash, George Pattison, Dan Stiver, Charles Taylor, Kevin Vanhoozer, Graham Ward, Martin Warner.

PHILOSOPHY AT THE BOUNDARY OF REASON

ETHICS AND POSTMODERNITY

SUNY Press

TRANSFORMING THE THEOLOGICAL TURN

PHENOMENOLOGY WITH EMMANUEL FALQUE

Rowman & Littlefield Publishers Continental philosophers of religion have been engaging with theological issues, concepts and questions for several decades, blurring the borders between the domains of philosophy and theology. Yet when Emmanuel Falque proclaims that both theologians and philosophers need not be afraid of crossing the Rubicon - the point of no return - between these often artificially separated disciplines, he scandalised both camps. Despite the scholarly reservations, the theological turn in French phenomenology has decisively happened. The challenge is now to interpret what this given fact of creative encounters between philosophy and theology means for these disciplines. In this collection, written by both theologians and philosophers, the question "Must we cross the Rubicon?" is central. However, rather than simply opposing or subscribing to Falque's position, the individual chapters of this book interrogate and critically reflect on the relationship between theology and philosophy, offering novel perspectives and redrawing the outlines of their borderlands.

SCIENCE WITHOUT BOUNDARIES

INTERDISCIPLINARITY IN RESEARCH, SOCIETY AND POLITICS

University Press of America This book discusses the many issues involved in going beyond disciplinary research practices in science, politics and society, and addresses the complexities of their interface. Polar research is used to show how politics may intermingle with science to safeguard national interests in times of dramatic international change.

A GENEALOGY OF MARION'S PHILOSOPHY OF RELIGION

APPARENT DARKNESS

Indiana University Press Tamsin Jones believes that locating Jean-Luc Marion solely within theological or phenomenological discourse undermines the coherence of his intellectual and philosophical enterprise. Through a comparative examination of Marion's interpretation and use of Dionysius the Areopagite and Gregory of Nyssa, Jones evaluates the interplay of the manifestation and hiddenness of phenomena. By placing Marion against the backdrop of these Greek fathers, Jones sharpens the tension between Marion's rigorous method and its intended purpose: a safeguard against idolatry. At once situated at the crossroads of the debate over the turn to religion in French phenomenology and an inquiry into the retrieval of early Christian writings within this discourse, *A Genealogy of Marion's Philosophy of Religion* opens up a new view of the phenomenology of religious experience.

CONTEMPORARY PRACTICE AND METHOD IN THE PHILOSOPHY OF RELIGION

NEW ESSAYS

A&C Black Among contemporary Anglo-American philosophers and students there is a growing awareness of the need to engage more both with philosophical perspectives of other faith traditions and also the distinctive 'continental' tradition of philosophy. This important new collection aims to engage philosophers from a variety of different backgrounds and traditions (religious and non-religious) to stimulate dialogue on philosophical method. The volume aims to ask an emerging generation of philosophers - who specialize in philosophy of religion - to write about their personal understanding of the practice, method and future focus of the subject, with the ultimate goal of illustrating why this expanding subject area is important.

BOUNDARY OBJECTS AND BEYOND

WORKING WITH LEIGH STAR

MIT Press The multifaceted work of the late Susan Leigh Star is explored through a selection of her writings and essays by friends and colleagues. Susan Leigh Star (1954-2010) was one of the most influential science studies scholars of the last several decades. In her work, Star highlighted the messy practices of discovering science, asking hard questions about the marginalizing as well as the liberating powers of science and technology. In the landmark work *Sorting Things Out*, Star and Geoffrey Bowker revealed the social and ethical histories that are deeply embedded in classification systems. Star's most celebrated concept was the notion of boundary objects: representational forms—things or theories—that can be shared between different communities, with each holding its own understanding of the representation. Unfortunately, Leigh was unable to complete a work on the poetics of infrastructure that further developed the full range of her work. This volume collects articles by Star that set out some of her thinking on boundary objects, marginality, and infrastructure, together with essays by friends and colleagues from a range of disciplines—from philosophy of science to organization science—that testify to the wide-ranging influence of Star's work. Contributors Ellen Balka, Eevi E. Beck, Dick Boland, Geoffrey C. Bowker, Janet Ceja Alcalá, Adele E. Clarke, Les Gasser, James R. Griesemer, Gail Hornstein, John Leslie King, Cheris Kramarae, Maria Puig de la Bellacasa, Karen Ruhleder, Kjeld Schmidt, Brian Cantwell Smith, Susan Leigh Star, Anselm L. Strauss, Jane Summerton, Stefan Timmermans, Helen Verran, Nina Wakeford, Jutta Weber

BOUNDARY REPRESENTATION MODELLING TECHNIQUES

Springer Science & Business Media Boundary representation is the principal solid modelling method used in modern CAD/CAM systems. There have been a long series of developments on which currently available systems are based, full details of which are only partially known. Ian Stroud's thorough coverage of these developments puts this technology in perspective and provides the most complete presentation of boundary representation solid modelling yet published.

RACE, PHILOSOPHY, AND FILM

Routledge This collection fills a gap in the current literature in philosophy and film by focusing on the question: How would thinking in philosophy and film be transformed if race were formally incorporated moved from its margins to the center? The collection's contributors anchor their discussions of race through considerations of specific films and television series, which serve as illustrative examples from which the essays' theorizations are drawn. Inclusive and current in its selection of films and genres, the collection incorporates dramas, comedies, horror, and science fiction films (among other genres) into its discussions, as well as recent and popular titles of interest, such as *Twilight*, *Avatar*, *Machete*, *True Blood*, and *The Matrix* and *The Help*. The essays compel readers to think more deeply about the films they have seen and their experiences of these narratives.

UPDATING BERGSON

A PHILOSOPHY OF THE ENDURING PRESENT

Rowman & Littlefield This book argues for an actualist and presentist reading of Bergson's philosophy of time. Instead of the past or future, what matters is the self-realization of diverse durations. Through both philosophical and interdisciplinary means, Adam Lovasz actualizes Bergson's work and brings it into dialogue with contemporary scientific debates.

KANT AND THEOLOGY AT THE BOUNDARIES OF REASON

Routledge This book examines the transcendental dimension of Kant's philosophy as a positive resource for theology. Firestone shows that Kant's philosophy establishes three distinct grounds for transcendental theology and then evaluates the form and content of theology that emerges when Christian theologians adopt these grounds. To understand Kant's philosophy as a completed process, Firestone argues, theologians must go beyond the strictures of Kant's critical philosophy proper and consider in its fullness the transcendental significance of what Kant calls 'rational religious faith'. This movement takes us into the promising but highly treacherous waters of Kant's Religion within the Boundaries of Mere Reason to understand theology at the transcendental bounds of reason.

FROM RELIGION TO PHILOSOPHY

A STUDY IN THE ORIGINS OF WESTERN SPECULATION

Ravenio Books The words, Religion and Philosophy, perhaps suggest to most people two distinct provinces of thought, between which, if (like the Greeks) we include Science under Philosophy, there is commonly held to be some sort of border warfare. It is, however, also possible to think of them as two successive phases, or modes, of the expression of man's feelings and beliefs about the world; and the title of this book implies that our attention will be fixed on that period, in the history of the western mind, which marks the passage from the one to the other. It is generally agreed that the decisive step was taken by the Greeks about six centuries before our era. At that moment, a new spirit of rational inquiry asserted its claim to pronounce upon ultimate things which had hitherto been objects of traditional belief. What I wish to prove, however, is that the advent of this spirit did not mean a sudden and complete breach with the older ways of thought. There is a real continuity between the earliest rational speculation and the religious representation that lay behind it; and this is no mere matter of superficial analogies, such as the allegorical equation of the elements with the Gods of popular belief. Philosophy inherited from religion certain great conceptions—for instance, the ideas of 'God,' 'Soul,' 'Destiny,' 'Law'—which continued to circumscribe the movements of rational thought and to determine their main directions. Religion expresses itself in poetical symbols and in terms of mythical personalities; Philosophy prefers the language of dry abstraction, and speaks of substance, cause, matter, and so forth. But the outward difference only disguises an inward and substantial affinity between these two successive products of the same consciousness. The modes of thought that attain to clear definition and explicit statement in philosophy were already implicit in the unreasoned intuitions of mythology.

AN ESSAY ON AFRICAN PHILOSOPHICAL THOUGHT

THE AKAN CONCEPTUAL SCHEME

Temple University Press In this sustained and nuanced attempt to define a genuinely African philosophy, Kwame Gyekye rejects the idea that an African philosophy consists simply of the work of Africans writing on philosophy. It must, Gyekye argues, arise from African thought itself, relate to the culture out of which it grows, and provide the possibility of a continuation of a philosophy linked to culture. Offering a philosophical clarification and theology, and ethics of the Akan of Ghana, Gyekye argues that critical analyses of specific traditional African modes of thought are necessary to develop a distinctively African philosophy as well as cultural values in the modern world. --

A THEORETICAL AND PRACTICAL TREATISE...

OXFORD STUDIES IN EXPERIMENTAL PHILOSOPHY, VOLUME 2

Oxford University Press The new field of experimental philosophy has emerged as the methods of psychological science have been brought to bear on traditional philosophical issues. Oxford Studies in Experimental Philosophy is the place to go to see outstanding new work in the field. It features papers by philosophers, papers by psychologists, and papers co-authored by people in both disciplines. The series heralds the emergence of a truly interdisciplinary field in which people from different disciplines are working together to address a shared set of questions. This second volume in the series is divided into three sections that explore epistemology, moral and political philosophy, and metaphysics and mind.

PERCEPTION AND DISCOVERY

AN INTRODUCTION TO SCIENTIFIC INQUIRY

Springer Norwood Russell Hanson was one of the most important philosophers of science of the post-war period. Hanson brought Wittgensteinian ordinary language philosophy to bear on the concepts of science, and his treatments of observation, discovery, and the theory-ladenness of scientific facts remain central to the philosophy of science. Additionally, Hanson was one of philosophy's great personalities, and his sense of humor and charm come through fully in the pages of *Perception and Discovery*. *Perception and Discovery*, originally published in 1969, is Hanson's posthumous textbook in philosophy of science. The book focuses on the indispensable role philosophy plays in scientific thinking. *Perception and Discovery* features Hanson's most complete and mature account of theory-laden observation, a discussion of conceptual and logical boundaries, and a detailed treatment of the epistemological features of scientific research and scientific reasoning. This book is of interest to scholars of philosophy of science, particularly those concerned with Hanson's thought and the development of the discipline in the middle of the 20th century. However, even fifty years after Hanson's early death, *Perception and Discovery* still has a great deal to offer all readers interested in science.

BOUNDARY ELEMENT ANALYSIS IN COMPUTATIONAL FRACTURE MECHANICS

Springer Science & Business Media The Boundary Integral Equation (BIE) method has occupied me to various degrees for the past twenty-two years. The attraction of BIE analysis has been its unique combination of mathematics and practical application. The EIE method is unforgiving in its requirement for mathematical care and its requirement for diligence in creating effective numerical algorithms. The EIE method has the ability to provide critical insight into the mathematics that underlie one of the most powerful and useful modeling approximations ever devised--elasticity. The method has even revealed important new insights into the nature of crack tip plastic strain distributions. I believe that EIE modeling of physical problems is one of the remaining opportunities for challenging and fruitful research by those willing to apply sound mathematical discipline coupled with physical insight and a desire to relate the two in new ways. The monograph that follows is the summation of many of the successes of that twenty-two years, supported by the ideas and synergisms that come from working with individuals who share a common interest in engineering mathematics and their application. The focus of the monograph is on the application of EIE modeling to one of the most important of the solid mechanics disciplines--fracture mechanics. The monograph is not a treatise on fracture mechanics, as there are many others who are far more qualified than I to expound on that topic.

BĀUL PHILOSOPHY

APH Publishing

A NEW HISTORY OF WESTERN PHILOSOPHY

OUP Oxford This book is no less than a guide to the whole of Western philosophy—the ideas that have undergirded our civilization for two-and-a-half thousand years. Anthony Kenny tells the story of philosophy from ancient Greece through the Middle Ages and the Enlightenment into the modern world. He introduces us to the great thinkers and their ideas, starting with Plato, Aristotle, and the other founders of Western thought. In the second part of the book he takes us through a thousand years of medieval philosophy, and shows us the rich intellectual legacy of Christian thinkers like Augustine, Aquinas, and Ockham. Moving into the early modern period, we explore the great works of Descartes, Hobbes, Locke, Leibniz, Spinoza, Hume, and Kant, which remain essential reading today. In the nineteenth and twentieth centuries, Hegel, Mill, Nietzsche, Freud, and Wittgenstein again transformed the way we see the world. Running through the book are certain themes which have been constant concerns of philosophy since its early beginnings: the fundamental questions of what exists and how we can know about it; the nature of humanity, the mind, truth, and meaning; the place of God in the universe; how we should live and how society should be ordered. Anthony Kenny traces the development of these themes through the centuries: we see how the questions asked and answers offered by the great philosophers of the past remain vividly alive today. Anyone interested in ideas and their history will find this a fascinating and stimulating read.

MERLEAU-PONTY AND ENVIRONMENTAL PHILOSOPHY

DWELLING ON THE LANDSCAPES OF THOUGHT

State University of New York Press Connects the work of Merleau-Ponty to environmental studies. This richly diverse collection looks at the contemporary relevance of the philosophy of Maurice Merleau-Ponty to environmental issues and builds a coherent philosophical ecology based on his thought. The contributors describe and analyze relations within the natural world by focusing on the centrality of relations in Merleau-Ponty's work; his concept of the bond between humanity and nature; and his novel philosophies of perception, embodiment, and "wild" Being. Eco-phenomenologies of living places such as Central Park in New York City, Midwestern farmlands, and communal

household dwellings of Pacific Northwest Coast people are closely examined. The contributors also explore Merleau-Ponty's philosophy for environmental ethics and develop notions such as vital values, somatic empathy, and interspecies sociality. Suzanne L. Cataldi is Professor of Philosophy at Southern Illinois University at Edwardsville and the author of *Emotion, Depth, and Flesh: A Study of Sensitive Space: Reflections on Merleau-Ponty's Philosophy of Embodiment*, also published by SUNY Press. William S. Hamrick is Professor Emeritus of Philosophy at Southern Illinois University at Edwardsville and the author of the SUNY Press book *Kindness and the Good Society: Connections of the Heart*, winner of the 2004 Edward Goodwin Ballard Book Prize in Phenomenology.

THE ROUTLEDGE HANDBOOK OF PHILOSOPHY OF THE CITY

Routledge The Routledge Handbook of Philosophy of the City is an outstanding reference source to this exciting subject and the first collection of its kind. Comprising 40 chapters by a team of international contributors, the Handbook is divided into clear sections addressing the following central topics: • Historical Philosophical Engagements with Cities • Modern and Contemporary Philosophical Theories of the City • Urban Aesthetics • Urban Politics • Citizenship • Urban Environments and the Creation/Destruction of Place. The concluding section, Urban Engagements, contains interviews with philosophers discussing their engagement with students and the wider public on issues and initiatives including experiential learning, civic and community engagement, disability rights and access, environmental degradation, professional diversity, social justice, and globalization. Essential reading for students and researchers in environmental philosophy, aesthetics, and political philosophy, The Routledge Handbook of Philosophy of the City is also a useful resource for those in related fields, such as geography, urban studies, sociology, and political science.

THE PHILOSOPHY OF STORMS

INTRODUCING GREEK PHILOSOPHY

Routledge Aimed at students of classics and of philosophy who would like a taste of the subject before being committed to a full course and at those who have already started and need to find their bearings in what may seem at first a complex maze of names and schools, "Introducing Greek Philosophy" is a concise, lively, philosophically aware introduction to ancient Greek philosophy. The book begins with the Milesians in Asia Minor before moving over to the developments in the western Greek world, then focusing on Socrates, Plato and Aristotle in Athens, finishing with the Hellenistic schools and their arrival in Rome, where the main ideas are set out in the Latin poetry of Lucretius and the prose of Cicero. The book eschews the method of most histories of ancient philosophy of addressing one thinker after another through the centuries. Instead, after a basic mapping of the territory, it takes the great themes that the Greeks were engaged in from the earliest times, and looks at them individually, their development in argument and counter-argument, from the beginnings of recorded Greek history, through the various upheavals of tyrannies, democracies, oligarchies and kingships, to their introduction into Rome in the first century BC.
