Revelation *Canongate Books* **The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self. The Oxford History of the British Empire: Volume V: Historiography *OUP Oxford* **The Oxford History of the British Empire is a major new assessment of the Empire in the light of recent scholarship and the progressive opening of historical records. From the founding of colonies in North America and the West Indies in the seventeenth century to the reversion of Hong Kong to China at the end of the twentieth, British imperialism was a catalyst for far-reaching change. The Oxford History of the British Empire as a comprehensive study helps us to understand the end of Empire in relation to its beginning, the meaning of British imperialism for the ruled as well as for the rulers, and the significance of the British Empire as a theme in world history. This fifth and final volume shows how opinions have changed dramatically over the generations****

about the nature, role, and value of imperialism generally, and the British Empire more specifically. The distinguished team of contributors discuss the many and diverse elements which have influenced writings on the Empire: the pressure of current events, access to primary sources, the creation of relevant university chairs, the rise of nationalism in former colonies, decolonization, and the Cold War. They demonstrate how the study of empire has evolved from a narrow focus on constitutional issues to a wide-ranging enquiry about international relations, the uses of power, and impacts and counterimpacts between settler groups and native peoples. The result is a thought-provoking cultural and intellectual inquiry into how we understand the past, and whether this understanding might affect the way we behave in the future.

Religious Thought in England in the Nineteenth Century The Rebirth of Revelation German Theology in an Age of Reason and History, 1750-1850 *University of Toronto Press* **The Evidence of Christianity in the Nineteenth Century, Or, Results of Inquiry as to the Divine Origin of the Scripture The Nineteenth Century; Or, the New Dispensation: Being a Brief Examination of the Claims and Assertions of Emanuel Swedenborg. By a Layman Christocentric Reformed Theology in Nineteenth-Century America Key Writings of Emanuel V. Gerhart** *Wipf and Stock Publishers* Knowledge of the ideas of the theologian Emanuel V. Gerhart is essential for understanding nineteenth-century American theology. Gerhart was one of the first to introduce a complete systematic Christocentric theological system to Americans. His Institutes of the Christian Religion developed the ideas of European theologians and promoted the effort to systematize Mercersburg theology. Gerhart embraced German idealism rather than Scottish philosophy in his scholarship. As a mediating theologian, he attempted to reconcile historical Christianity with modern culture. His lectures, essays, and texts addressed the religious challenges and intellectual issues of his day from a Christocentric perspective. Together they were a major contribution to the Mercersburg Movement in particular and American theology in general from the antebellum period to the progressive era. His publications were devoted to a range of disciplines that included education, philosophy, and theology. This volume portrays Gerhart's core theological ideas as found in his main texts and offers introductory commentaries and gives the historical background for his intellectual contributions.

Reading Maimonides' Philosophy in 19th Century Germany The Guide to Religious Reform *Springer Science & Business Media* This book investigates the re-discovery of Maimonides' *Guide of the Perplexed* by the *Wissenschaft des Judentums* movement in Germany of the nineteenth and beginning twentieth Germany. Since this movement is inseparably connected with religious reforms that took place at about the same time, it shall be demonstrated how the Reform Movement in Judaism used the *Guide* for its own agenda of historizing, rationalizing and finally turning Judaism into a philosophical enterprise of 'ethical monotheism'. The study follows the reception of Maimonidean thought, and the *Guide* specifically, through the nineteenth century, from the first beginnings of early

reformers in 1810 and their reading of Maimonides to the development of a sophisticated reform-theology, based on Maimonides, in the writings of Hermann Cohen more than a hundred years later. *A Short World History of Christianity, Revised Edition Westminster John Knox Press* Church historians have long known and appreciated Christianity's global history. Until recently, however, introductory textbooks on the history of Christianity focused almost exclusively on Europe and North America. Robert Bruce Mullins's *A Short World History of Christianity*, by contrast, offers a panoramic picture of the history of Christianity in its Western and non-Western expressions. It tells the story of the early church in the Greek East as well as the Latin West; of Christianity's spread into Asia as well as Europe during the Middle Ages; and its explosion around the world during the modern period. Mullins's highly readable narrative explores why global perspectives have emerged so strongly in our understanding of the story of Christianity and how they have impacted Christianity's perspective on its place in the world. This newly revised edition adds information on such global phenomena as early Syriac-speaking Christianity; the growth of Pentecostalism around the world, especially in the southern hemisphere; and recent trends in Christianity, including the elevation of the first pope born in the Americas. A time line of key dates, call-out boxes, and other helpful study materials are also provided. Beginning students will appreciate this memorable introduction to the most important events in the history and development of Christianity.

Walter de Gruyter The series Religion and Society (RS) contributes to the exploration of religions as social systems - both in Western and non-Western societies; in particular, it examines religions in their differentiation from, and intersection with, other cultural systems, such as art, economy, law and politics. Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual, the religious imagination, constructions of tradition, iconography, or media. In addition, the formation of religious communities, their construction of identity, and their relation to society and the

wider public are key issues of this series. From Immigrant to Inventor *Cosimo, Inc.* As I sat on the deck of the ship which was taking me to the universities of Europe, and watched its eagerness to get away from the busy harbor of New York, I thought of the day when, nine years before, I had arrived on the immigrant ship. I said to myself: "Michael Pupin, the most valuable asset which you carried into New York harbor nine years ago was your knowledge of, and profound respect and admiration for, the best traditions of your race...the most valuable assets which you are now taking with you from New York harbor is your knowledge of, and profound respect and admiration for, the best traditions of your adopted country." Michael Pupin's was a genuinely American story, the lifelong journey of a boy from rural Serbia, from a town so tiny it appeared on no maps, who became one of the greatest scientists of the early 20th century, changing the lives of people the world over with his technological innovations-he invented the therapeutic X-ray and made telephone communications practical and inexpensive-and helping to invent the modern world we know today. First published in 1922, Pupin's autobiography won the Pulitzer Prize in 1924, but Pupin's insightful and incisive words are their own greatest recommendation. Also available from Cosimo Classics: Pupin's *The New Reformation*. American physicist and writer MICHAEL IDVORSKY PUPIN (1858-1935) was born in Serbia and emigrated to the United States as a teenager. As a professor and researcher at Columbia University, he invented sonar and made important discoveries in the fields of X-ray physics and telecommunications. *The Living Age ... Littell's Living Age A History of the Mishnaic Law of Purities, Part 14 Miqvaot: Literary and Historical Problems Wipf and Stock Publishers The Quran and the Secular Mind A Philosophy of Islam Routledge* This book is concerned with the rationality and plausibility of the Muslim faith and the Qur'an, and in particular how they can be interrogated and understood through Western analytical philosophy. It also explores how Islam can successfully engage with the challenges posed by secular thinking. *The Quran and the Secular Mind* will be of interest to students and scholars of Islamic philosophy, philosophy of religion, Middle East studies, and political Islam. *The Development of English Theology in the Later Nineteenth Century Biographical Dictionary of Twentieth-century Philosophers Taylor & Francis* This Dictionary provides detailed accounts of the lives, works, influences and receptions of the most important philosophers of the twentieth century. Over 1000 entries give both biographical and bibliographical information. *14th century to the French revolution, with a glimpse into the 19th century The History of the Holy Roman Empire: 1st Century A.D. - 19th Century e-artnow* The main goal of this edition is to present the Holy Roman Empire as an institution or system, the wonderful offspring of a body of beliefs and traditions which have passed away from the world. Such a description, however, would not be intelligible without some account of the great events which accompanied the growth and decay of imperial power; and it has therefore appeared best to give the book the form rather of a narrative than of a dissertation; and to combine with an exposition of what

may be called the theory of the Empire an outline of the political history of Germany, as well as some notices of the affairs of medieval Italy. L. Greenslade God's Autopsy and the Living Truth of Soul A History of Western Consciousness *Wipf and Stock Publishers* The Grand Narrative of Christianity that the Bible created is dead, and the Bible is silent. Does the Bible have anything relevant to say to our modern circumstances? We ask, where did God come from? What happened to God? God's Autopsy reinterprets soul and God as historical-psychological phenomena related to the cultural structure of consciousness, the invisible shared context of thought, which has changed dramatically over the past three millennia. This book offers a new way to understand the trajectory of Western civilization by making the implicit foundation of Western consciousness—soul—visible and conscious. Our modern Western consciousness is radically different from that of antiquity when the Bible emerged. Jung's psychological-philosophical insight that whenever we speak about the psyche it is the psyche speaking about itself, leads to the realization that today consciousness has come home to itself. Beginning with preliterate polytheism, the emergence of the transcendent god Yahweh and Christ, which led directly to the Enlightenment, objective soul continues to unfold itself. How did late modernity become a topsy-turvy, quantum, virtual, digital, impersonal, and abstract world that appears to be running away from us? The answer is unexpectedly and shockingly in the Bible itself. A New History of the Sermon The Nineteenth Century *BRILL* This collection offers fresh perspectives on British and American preaching in the nineteenth century. Drawing on many religious traditions and addressing a host of cultural and political topics, it will appeal to scholars specializing in any number of academic fields. The Victorian Novel, Service Work, and the Nineteenth-Century Economy *Springer* This book offers a much-needed study of the Victorian novel's role in representing and shaping the service sector's emergence. Arguing that prior accounts of the novel's relation to the rise of finance have missed the emergence of a wider service sector, it traces the effects of service work's many forms and class positions in the Victorian novel. Mary Dyer, a Quaker who was hanged for heresy; Lizzie Robinson, a former slave and laundress who sold Bibles door to door; Sally Priesand, a Reform rabbi; Estela Ruiz, who saw a vision of the Virgin Mary--how do these women's stories change our understanding of American religious history and American women's history? In this provocative collection of twelve essays, contributors explore how considering the religious history of American women can transform our dominant historical narratives. Covering a variety of topics--including Mormonism, the women's rights movement, Judaism, witchcraft trials, the civil rights movement, Catholicism, everyday religious life, Puritanism, African American women's activism, and the Enlightenment--the volume enhances our understanding of both religious history and women's history. Taken together, these essays sound the call for a new, more inclusive history. Contributors: Ann Braude, Harvard Divinity School Catherine A. Brekus, University of Chicago Divinity School Anthea D. Only the Third Heaven? 2 Corinthians 12.1-10 and Heavenly Ascent *A&C Black* Offers a fresh appraisal of the ascent of Christ to the third heaven in 2 Corinthians 12, proposing that it records a failed, not a successful, ascent into heaven. Writing Pain in the Nineteenth-Century United States *Oxford University Press* This book examines how pain is represented in a range of literary texts and genres from the nineteenth-century United States. It considers the aesthetic, philosophical, and ethical implications of pain as the national culture of pain progressively transformed in the wake of the invention of anesthesia. Nineteenth Century Short-title Catalogue: phase 1. 1816-1870 To Promote, Defend, and Redeem The Catholic Literary Revival and the Cultural Transformation of American Catholicism, 1920-1960 *Greenwood Publishing Group* The Catholic literary revival in America refers both to the impact of the modern resurgence in European Catholic

thought and letters upon the American Church between 1920 and 1960, and to efforts by American Catholic leaders to induce a similar flowering in their own country. Sparr examines those areas of Catholic thought and culture that most concerned educated American Catholics, critics, and cultural leaders between 1920 and 1960: the renaissance in Catholic literary, theological, philosophical, and social thought; its application to modern problems; and the growth and development of the 20th century Catholic novel.
