The book describes argumentative strategies used by Chinese legal scholars to legitimize and subvert China's state-sanctioned ideology. It also examines Chinese efforts to invent new, alternative rule of law conceptions. In addition to this descriptive project, the book advances a more general argument about the rule of law phenomenon, insisting that many arguments about the rule of law are better understood in terms of their intended and actual effects rather than as analytic propositions or descriptive statements. To illustrate this argument, the book demonstrates that various paradoxical, contradictory and otherwise implausible arguments about the rule of law play an important role in Chinese debates about the rule of law. Paradoxical statements about the rule of law, in particular, can be useful for an ideological project.* **The Limits of Law The Public Regulation of Private Pollution Cambridge University Press** *An analysis of the development of US water pollution laws, showing how legal processes and social relations interact as the state struggles to reconcile contradictory responsibilities.* **Trusted Criminals: White Collar Crime In Contemporary Society Cengage Learning** *This comprehensive text helps students understand the problems involved in studying white collar crime, explanations for crime, the principal focus of the crimes, and the character of the legal and criminal justice response to the crime. **Contemporary Challenges to Human Rights Law Cambridge Scholars Publishing** *This collection of essays highlights the many problems and challenges facing human rights law today. Bringing together academics, practitioners and NGOs, it examines some of the contemporary challenges facing human rights law and practice in England, Northern Ireland, the Republic of Ireland, France and America. It is clear that we live in a time where human rights are in crisis. A decade of austerity measures at the domestic, regional and international levels evidently has had a detrimental effect on the protection of human rights. Cuts to social spending have resulted a failing social welfare system, a health service buckling under pressure, unprecedented rises in homelessness and child poverty, and the emergence of the 'working poor' and zero hours contracts. Austerity, famine, civil war, oppressive governmental regimes and climate change have seen vast migrations, resulting in a resurrection of far right-wing ideology. In the UK, this is seen in what can only be described as propaganda and scaremongering during the campaign for Brexit and in subsequent political elections evidenced by the increase in racially motivated hate crime within the UK. The landscape of human rights is such that it has resulted in some beginning to question, are human rights rights at all?*

**Literature and The Contemporary Fictions and Theories of the Present Routledge** *At the end of the century, much criticism has become devoted to 'last things': the end of history, the end of the subject, the end of the novel, the end, even, of the end. Literature and the Contemporary, in contrast, aims to provide through twelve essays evidence of the way in which the literature of the 1990s is*

constantly engaging in questions of memory and history and the representation of time in the present day. The essays in the book survey theories of temporality from various cultural and philosophical standpoints, and represent critics writing from feminist, postcolonial and 'queer' perspectives discussing literature in 'our time'. The collection addresses such central issues as the politics of memory, colonial legacies, women's time, racial and sexual identities in the 1990s, and covers a wide range of contemporary authors, works and issues, some of which are treated for the first time. Among the contemporary works discussed are the prize-winning books Graham Swift's *Last Orders*, Anne Michaels' *Fugitive Pieces*, and Jane Smiley's *A Thousand Acres*. While discussing some of the most significant novels of the 1990s, this collection also offers a diverse yet cohesive critique of the millennial leanings of much 'postmodernist' criticism, which it argues should be replaced by more variously nuanced engagements with literature and the contemporary.

**The Contemporary Relevance of Carl Schmitt Law, Politics, Theology Routledge** What does Carl Schmitt have to offer to ongoing debates about sovereignty, globalization, spatiality, the nature of the political, and political theology? Can Schmitt's positions and concepts offer insights that might help us understand our concrete present-day situation? Works on Schmitt usually limit themselves to historically isolating Schmitt into his Weimar or post-Weimar context, to reading him together with classics of political and legal philosophy, or to focusing exclusively on a particular aspect of Schmitt's writings. Bringing together an international, and interdisciplinary, range of contributors, this book explores the question of Schmitt's relevance for an understanding of the contemporary world. Engaging the background and intellectual context in which Schmitt wrote his major works – often with reference to both primary and secondary literature unavailable in English – this book will be of enormous interest to legal and political theorists.

**Contemporary Ijtihad Limits and Controversies Edinburgh University Press** Examines the usefulness, challenges and limits of ijtihad for Muslims today. This book explores the limits and controversies of ijtihad in the context of the diverse needs of Muslim cultures and communities living in Muslim and non-Muslim nations and continents including Europe and North America. Ijtihad is the process of making a legal decision by independent interpretation of the legal sources. The resurgence of Islam, geopolitical crises involving Muslim nations, violence associated with Islam and the immigration of millions of Muslims to Western countries have impressed upon Muslims the need to rethink classical jurisprudence. As a result, a powerful contemporary ijtihad has unleashed a tremendous intellectual energy that is transforming legal systems across the Muslim world.

**The Limits of the Rule of Law in China University of Washington Press** In *The Limits of the Rule of Law in China*, fourteen authors from different academic disciplines reflect on questions that have troubled Chinese and Western scholars of jurisprudence since classical times. Using data from the early 19th century through the contemporary period, they analyze how tension between formal laws and discretionary judgment is discussed and manifested in the Chinese context. The contributions cover a wide range of topics, from interpreting the rationale for and legacy of Qing practices of collective punishment, confession at trial, and bureaucratic supervision to assessing the political and cultural forces that continue to limit the authority of formal legal institutions in the People's Republic of China.

**Rules of Law and Laws of Ruling On the Governance of Law Routledge** *Offering an anthropological perspective, this volume explores the changing relations between law and governance, examining how changes in the structure of governance affect the relative social significance of law within situations of legal pluralism. The authors argue that there has been a re-regulation rather than a de-regulation, propagated by a plurality of regulative authorities and this re-regulation is accompanied by an increasing ideological dominance of rights talk and juridification of conflict. Drawing on insights into such processes, this volume explores the extent to which law is used both as a constitutive legitimation of governance and as the medium through which governance processes take place. Highlighting some of the paradoxes and the unintended consequences of these regulating processes and the ensuing dynamics, Rules of Law and Laws of Ruling will be a valuable resource for researchers and students working in the areas of legal anthropology and governance.*

**Washington University Journal of Urban and Contemporary Law Contemporary Masculinities in the UK and the US Between Bodies and Systems Springer** *This book is about ways to understand masculinity as systemic and corporeal, structural and performative all at once. It argues that the tension between an understanding of "masculinity" in the singular and "masculinities" in the plural poses a problem that can better be understood in relation to a concomitant tension: between systems on the one hand, and bodies on the other - between abstract structures such as patriarchy, kinship or even language, and the various concrete forms*

taken by gendered, individuated corporeality. The contributions collected here investigate how masculinities become apparent, how they take shape and what systemic functions they have. What, they ask, are the relations between the abstract and corporeal, metaphorical and metonymic manifestations of masculinity? How are we to understand masculinity as a simultaneously systemic and corporeal, performative concept?

**Making Sense of Contemporary British Muslim Novels Springer** This book is the sequel to *Britain Through Muslim Eyes* and examines contemporary novelistic representations of and by Muslims in Britain. It builds on studies of the five senses and 'sensuous geographies' of postcolonial Britain, and charts the development since 1988 of a fascinating and important body of fiction by Muslim-identified authors. It is a selective literary history, exploring case-study novelistic representations of and by Muslims in Britain to allow in-depth critical analysis through the lens of sensory criticism. It argues that, for authors of Muslim heritage in Britain, writing the senses is often a double-edged act of protest. Some of the key authors excoriate a suppression or cover-up of non-heteronormativity and women's rights that sometimes occurs in Muslim communities. Yet their protest is especially directed at secular culture's ocularcentrism and at successive British governments' efforts to surveil, control, and suppress Muslim bodies.

**Contemporary Wine Studies Dancing with Bacchus Routledge** The purchase and consumption of wine, whether in hospitality environments or domestic settings, has huge anthropological significance underpinned by a discourse of wine appreciation. It can be seen as a multi-sensory and symbolically status-rich activity framed by historical, social, cultural and ethical discourses. This innovative book offers a critical study of wine from social and cultural perspectives. The field of wine studies spans the spectrum of cultural and technical issues concerning the place of wine in society from viticulture, vinification, labelling, regulation, marketing, purchasing, storage and its final consumption. It combines social history and contemporary questions including the notion of terroir, the nature of protected wine designations, the pricing of wine and the different motivations for buying and consuming wine. It considers wine as a beverage, as an aesthetic exercise and as a marker of status, as well as health implications and legal controls. The title offers a timely contribution into the significance of wine and the role of knowledge, both of which have conceptual and managerial implications in terms of

marketing, promotion, consumption and distribution. The author draws on rights literature, bio-political scholarship, and a gender-studies perspective as a foundation for rethinking the sovereign relationship. In approaching the politicization of reproductive space from this direction, the study resituates the role of rights and rights-granting within the sovereign relationship. A second theme running throughout the book explores the international implications of these arguments and addresses the role of abortion, adultery and rape legislation in constructing 'civilizational' relationships. In focusing on the Ottoman Empire, Turkey, France and Italy as case studies, Miller presents a discussion of what 'Europe' is, and the role of sexuality and reproduction in defining it. **Contemporary Readings in Social Problems Pine Forge Press** This reader was developed to be used in several courses taught in sociology; it can be used in an introductory social problems course as well as a theory or special topics course. **Overcriminalization The Limits of the Criminal Law** Oxford University Press In the US, one out of every 138 residents is incarcerated. The size of the prison population has quadrupled since 1980. Approximately 2.4% of Americans are either on probation and parole. The US has the highest rate of criminal punishment in the Western world. The problem with American criminal law, as the philosopher of law Douglas Husak and many others see it, is that there is simply too much of it. Recent years have seen a dramatic expansion in the amount of criminal statutes, and in the resulting reliance on punishment for convictions under those laws. Husak argues that this is regrettable for several reasons, but most importantly, he says that much of the resulting punishment is unjust, excessive, and disproportionate. He also claims that it is destructive to the rule of law and undermines the principle of legality. What should be done? Husak's goal in this book is formulate a

*normative theory of criminalization that will allow us to distinguish which criminal laws are justified, and which are not--something he sees this as essential in order to reverse the trend towards too many criminal laws. The first part of his book makes the case that there is both too much criminal law and too much punishment, and clarifies the relationship between the two using empirical data. He then provides examples of dubious criminal laws enacted by legislatures, in particular statutes on drugs possession and guns. The latter part of the book develops his theory, which establishes principles that should set limits (both external and internal to the criminal law) on what we can and should criminalize.*
