Living in Smart Cities

Innovation and Sustainability

[World Scientific](#) Cities around the world are becoming increasingly popular as economic powerhouses and magnets for migrants from rural and suburban areas. All big cities in First and Third World countries as well as emerging markets such as New York, London, Tokyo, Paris, Shanghai, Hong Kong, Singapore, New Dehli, Jakarta etc. have to cope with high population density and serious challenges such as air pollution or traffic congestion. How do we pack more people into big cities and yet continue to realise a high quality of life? How do we plan, create and manage 'good cities' which are safe, spacious, green, connected, fair and resilient? How can cities create economic wealth while still fulfilling the vision of sustaining our "Green Planet"? What are best practice designs and innovative technical smart city solutions which could be leveraged to tackle these challenges and how can they be successfully commercialised? These are some of the questions the reader addresses from a multi-disciplinary perspective with special reference to Singapore whose development from regional entrepôt to First World Metropolis continues to impress business and societal leaders around the world. The book's contents are broadly structured according to the following aspects: (i) definition and taxonomy of innovative & sustainable cities, including its core characteristics and how they create value in terms of innovativeness and sustainability; (ii) governance, planning and selected design principles of innovative & sustainable cities and how they pan out with regard to livability and sustainability; and (iii) in-depth study of selected smart city dimensions such as governance, clustering, connectivity, mobility, ageing, water, sports, and safety.

The U. S. Paper Industry and Sustainable Production An Argument for Restructuring

[MIT Press](#) The problems recyclers face with wastepaper are connected to the issues addressed by forest advocates, as well as to the difficulties confronted by those involved with industrial pollution from the paper industry. In this richly detailed study, Maureen Smith shows how industrial and environmental analysis can be synthesized to clarify these complex problems and produce solutions. Smith outlines the basic structural characteristics of the U.S. pulp and paper industry and its relationship to the larger forest products sector, as well as its patterns of domestic and global fiber resource use. She then reviews the core technologies employed in virgin pulp production, with an emphasis on their environmental impacts, the role of technological innovation, and the relationships between fiber choices and pollution prevention. Building on this base she reveals structural barriers within the industry that have impeded positive change and shows how these barriers are reinforced by the traditional isolation of environmental policy domains. The study includes a comparative analysis of how organochlorine pollution from pulp mills has been addressed in the United States, Europe, and Canada (and why the United States has seen the slowest rate of progress); an assessment of commodity trade patterns in the industry and how they are linked to resource demand; an examination of the momentum building around annual plant fiber use and the diverse interests it reflects; and a review of recent developments in paper recycling within the context of historical trends in fiber utilization. A case study of the controversial environmental review process of the largest recycled pulp and paper mill ever proposed ties together earlier elements of the book and forms the basis for the conclusions. In closing, Smith argues convincingly against narrowly focused attempts to "fix" the problems associated with the industry, and offers practical guidance on new frameworks and approaches for industrial restructuring. She highlights the need for regional perspectives that integrate environmental, social, and economic objectives. Urban and Industrial Environment series

Before and After Getting Your Puppy

The Positive Approach to Raising a Happy, Healthy, and Well-Behaved Dog

[New World Library](#) How to raise the perfect puppy A revolution for dogs: Very few dog trainers have not been influenced by Dr. Ian Dunbar's dog-friendly philosophy. In the 1970s, Dr. Ian Dunbar sparked a dramatic shift in puppy training — away from leash corrections and drill-sergeant adult dog training classes based on competitive obedience and toward a positive approach using toys, treats, and games as rewards for teaching basic manners, preventing behavior problems, and modifying temperament. Before Dr. Dunbar there were no classes for puppy training, very few family dog classes, and not much fun in dog training. His positive approach revolutionized the dog training field, especially puppy training. Raising a great dog: Now, in Before and After Getting Your Puppy, Dr. Ian Dunbar combines his two popular puppy training manuals into one indexed, value-priced hardcover dog training book. In clear steps, with helpful photos and easy-to-follow puppy training milestones, he presents a structured yet playful and humorous plan for raising a wonderful dog. Dr. Dunbar's guide is based around six developmental milestones: Your doggy education Evaluating puppy's progress Errorless housetraining and chewtoy-training Socialization with People Learning bite inhibition The world at large Fans of The Art of Raising a Puppy, Training the Best Dog Ever, or Zak George's Dog Training Revolution, will love Ian Dunbar's Before and After Getting Your Puppy.

Angel Dogs with a Mission

Divine Messengers in Service to All Life

[New World Library](#) This fascinating book puts the spotlight on working dogs — those heroic canines who have found ways to give back more than sloppy kisses and happy snuggles. The courageous dogs you will meet include: Keno, a yellow Lab, who rescued a lift operator buried in an avalanche. Kobi, a beloved and intelligent family pet with an exceptional sense of smell, who became one of the most famous cancer-sniffing dogs in the world. Tuffy, a Cavalier King Charles spaniel, who served as a grief counselor with Dr. Karla Rose during the horrible days following the Virginia Tech shootings. Abdul, the first service dog for people with mobility impairments, who was trained by Bonnie Bergin and Kerrill Knaus-Hardy and paved the way for people with disabilities to be independent. Anna, a German shepherd, who damaged her lungs searching through the wreckage at Ground Zero after 9/11 and inspired Sarah Atlas to found an assistance program for volunteer search-and-rescue dog handlers. Skidboot, the world-famous Texas blue heeler, who performed for Jay Leno, Oprah Winfrey, and David Letterman and on Animal Planet (with cowboy and entertainer David Hartwig) but started life as an abandoned puppy.

Gale Environmental Sourcebook

A Guide to Organizations, Agencies, and Publications

Sustainability Compendium: Edition II

Fibre2Fashion Sustainability Compendium is an informative sourcebook that will hold detailed description of hundred sustainable textile companies filtered from different categories of the textile value chain. It will be a guiding tool for companies who are seeking to turn their business sustainable as well as be an inspiration for others to turn towards ecological business. This compendium will give the featured companies a voice to narrate their sustainable story to the corporate world. Each participant would have a space in this feature to present their sustainable activities setting an example that would lead others to join the sustainable drive. Sustainability may probably be the fastest growing idea in the global textile industry. It benefits everybody involved in the supply chain, be it the consumers, manufacturers, retailers, or related service providers. Firms profit from sustainable actions by enhancing their goodwill in the eyes of their potential buyers, while consumers profit by availing quality products at affordable rates. Sustainability Plus, in brief, is Fibre2Fashion's efforts to further boost this already growing concept in the global textile, apparel, and fashion industry. Through the medium of this book, we have tried to disseminate as much information as possible with respect to sustainability in the industry. Social, economical, and environmental aspects of sustainability have been given due attention in the book. Fibre2Fashion as an organization may only have limited views. Realizing this fact, we have incorporated views and opinions on various issues from experts all over the world. Various topics have been dealt with in the form of articles, interviews, features, and company profiles.

Inside of a Dog

What Dogs See, Smell, and Know

[Simon and Schuster](#) As an unabashed dog lover, Alexandra Horowitz is naturally curious about what her dog thinks and what she knows. As a cognitive scientist she is intent on understanding the minds of animals who cannot say what they know or feel. This is a fresh look at the world of dogs -- from the dog's point of view. The book introduces the reader to the science of the dog -- their perceptual and cognitive Abilities -- and uses that introduction to draw a picture of what it might be like to be a dog. It answers questions no other dog book can -- such as: What is a dog's sense of time? Does she miss me? Want friends? Know when she's been bad? Horowitz's journey, and the insights she uncovered from studying her own dog, Pumpernickel, allowed her to understand her dog better, and appreciate her more through that understanding. The reader will be able to do the same with their own dog. This is not another dog training book. Instead, Inside of a Dog will allow dog owners to look at their pets' behaviour in a different, and revealing light, enabling them to understand their dogs and enjoy their relationship even more.

Pets Gone Green

Live a More Eco-Conscious Life with Your Pets

[Fox Chapel Publishing](#) In *Pets Gone Green*, New York Times best-selling author Eve Adamson explores how pet owners can have a positive effect on the environment and their pets' place within it. This engaging and enlightening book outlines strategies that pet owners can pursue to reduce the family's carbon foot- and pawprints, from using less toxic flea repellent to offering earth-friendly treats and toys to our much-loved pets. Adamson's goal in writing *Pets Gone Green* stemmed from her desire to find ways to save her dogs from the increasingly toxic environment around us. "we are obligated to speak up for our furry companions, who are unable to think or act green on their own." *Pets Gone Green* remains a timely exploration of many of the hot-button topics in our world today, from eating local and animal rescue to activism and recycling! The book offers practical advice for owners of all pets, from dogs and cats to birds, small mammals, and more. As pet rescue has increasingly become "the thing to do," the book begins with a chapter on "Recycled Companions: The Ultimate Earth-Friendly Act," in which the author discusses the many advantages of rescuing a pet from a shelter or rescue society. Pet food, another hot topic in the pet world, is the subject of "Green Food," which includes a brief history of commercial food and the pluses and minuses of using natural, homemade, raw, and vegetarian diets for pets. The chapter "Altered States" is devoted to the importance and health benefits of spaying and neutering pets. Buying and eating local, diminishing consumerism, organic materials, holistic pet care, and recycling are all discussed in terms of improving humans' and pets' lives and reducing waste on a community, national, and global level. Printed with soy ink on recycled paper, *Pets Gone Green* presents the original artwork of New England painter and woodblock printmaker Willy Reddick. The book includes over 50 woodblock images of her beautiful peaceful animals, lending a down-home organic feel that is truly unique for a pet book. The ultimate message of the book is summarized in the final chapter "Animal Wisdom," in which Adamson focuses in on what our pets can teach us about the world around us through their natural instincts, simplicity, and view of the world. She concludes, "animals are companions worthy of our respect, love, and care, and because they are so close to nature in ways we can only begin to comprehend, they are also the key to our salvation. Animals understand how to live lightly on the earth, and we can learn from them." Resources of animal welfare websites and agencies, green organizations, holistic resources, green product manufacturers, and green websites and publications included. Fully indexed.
