Master Tara Singh in Indian History

Colonialism, Nationalism, and the Politics of Sikh Identity

Oxford University Press, USA This is the first comprehensive study of the life and work of Master Tara Singh (1885-1967), Akali leader, freedom fighter, and arguably the foremost leader of the Sikhs. Master Tara Singh's vision of the "Indian National State" was fundamentally different from that of Jawaharlal Nehru and the Indian National Congress. The partition of British Punjab and the formation of Punjabi Suba are the lasting legacies of his determined efforts to protect Sikh interests. Employing new and a broad variety of sources in English and Punjabi, J.S. Grewal weaves a comprehensive biography of Master Tara Singh. Divided into two parts, the first deals with Master Tara Singh's anti-British activity in colonial India, while the second traces the political and religious trajectories of the movements led by him in pursuit of a unilingual Punjab state. Lending unity to the two parts is Master Tara Singh's politics based on Sikh identity as a source of confrontation with the colonial state and the Congress government. Revealing new facts, ideas, and perspectives on Master Tara Singh, this book throws fresh light on the freedom struggle, the Akali movement, the politics of partition, and the working of the Congress governments in the states and at the Centre during a tumultuous and transformative period of Indian history.

The Biography of Holy Woman Bibi Lajo

A Perfect Disciple

Lulu Publishing Services The Biography of Holy Woman Bibi Lajo: A Perfect Disciple How was I able to find this holy woman? In 1952 when I had my summer vacations from the school in Amritsar, I was living with my parents in Punjab state in India when I saw a book lying on the table. When I opened the book I read something about Hazur Sawan Singh (the Great Master of Beas.) The book's name was Sakhian, which means "the travels." This was the right time in my life to start reading such a book. Day by day I was taking

interest to read every story in the book. I went through the book twice. There are about sixty five stories of Hazur's travels written by Bibi Lajo, who herself was traveling with Hazur. She wrote so as to keep the memories of her beloved Master fresh and to pass her time in the separation from her Guru.

Sikhs in Continental Europe

From Norway to Greece and Russia to Portugal

Routledge This book is the third in the trilogy of books looking at the comparatively less-known destinations of Sikh migration to non-English speaking countries. The first one was Sikhs in Latin America, followed by Sikhs in Asia Pacific. Earlier Sikh migration was focused on the British Commonwealth and the USA. Once restrictions were placed on entering the UK, the Sikhs were forced to explore the possibility of migrating to other countries including Continental Europe. The pace of migration picked up in 1970s. Later there were more asylum seekers in the 1980s and 1990s adding to the migration numbers. Some could enter Europe through legal channels, while others found alternative routes as undocumented migrants. Sikhs found employment mostly as unskilled labour but now they have been able to create niche professions such as dairying in Italy and restaurants/bars in Finland. There is now a large second generation who is fully qualified to enter other professions. The author describes how Sikhs have kept up their traditions through 'Nagar Kirtans', Turban, Youth Summer camps, and 'sewa'. There are almost 140 gurdwaras in Europe with a meagre population of less than a quarter million.

INDIA'S NEW CAPITALISTS

Caste, Business, and Industry in a Modern Nation

Hachette UK It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book - acclaimed for being the first social history to document and understand India's new entrepreneurial groups - Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.

Terramechanics and Off-road Vehicles

Amsterdam ; New York : Elsevier (distributor) Hardbound. The computer-aided methods presented in this book represent recent advances in the methodology for predicting and evaluating off-road vehicle performance. The mathematical models established for vehicle-terrain systems will enable the engineering practitioner to evaluate, on a rational basis, a wide range of options and to select an appropriate vehicle configuration for a given mission and environment. The models take into account all major design and operational parameters, as well as pertinent terrain characteristics. Applications of the computer-aided engineering methods to the parametric analysis of off-road vehicle design are demonstrated through examples.

Structural Dynamics

Theory and Computation

Springer Science & Business Media The use of COSMOS for the analysis and solution of structural dynamics problems is introduced in this new edition. The COSMOS program was selected from among the various professional programs available because it has the capability of solving complex problems in structures, as well as in other engineering fields such as Heat Transfer, Fluid Flow, and Electromagnetic Phenomena. COSMOS includes routines for Structural Analysis, Static, or Dynamics with linear or nonlinear behavior (material nonlinearity or large displacements), and can be used most efficiently in the microcomputer. The larger version of COSMOS has the capacity for the analysis of structures modeled up to 64,000 nodes. This fourth edition uses an introductory version that has a capability limited to 50 nodes or 50 elements. This version is included in the supplement, STRUCTURAL DYNAMICS USING COSMOS 1. The sets of educational programs in Structural Dynamics and Earthquake Engineering that accompanied the third edition have now been extended and updated. These sets include programs to determine the response in the time or frequency domain using the FFT (Fast Fourier Transform) of structures modeled as a single oscillator. Also included is a program to determine the response of an inelastic system with elastoplastic behavior and a program for the development of seismic response spectral charts. A set of seven computer programs is included for modeling structures as two-dimensional and three dimensional frames and trusses.
