THE NEW EUROPEAN MOTORCYCLE TEST

SIXTH REPORT OF SESSION 2009-10, REPORT, TOGETHER WITH FORMAL MINUTES, ORAL AND WRITTEN EVIDENCE

The Stationery Office In April 2009 a new testing regime, based on the Second EU Driving Licence Directive, was introduced. Deadlines for implementation had not been met and when the new test was finally introduced, it was met with intense criticism and safety concerns. The number of tests taken dropped dramatically in the first few months and the industry suggested that the new test regime would threaten many small businesses and jobs. The Committee was concerned to not only establish whether the test had gone wrong and how problems could be rectified but also to ensure lessons are learned before the implementation of the Third EU Driving Licence Directive. They concluded that they could not see why the Government failed to obtain derogation from certain speed requirements and that though many elements of the new regime were appropriate it was important to take into account the concerns expressed and consider what adjustments might be required. They also believe that training and instruction for the motorcycle test needs to develop and change to reflect the new test requirements. The off-road module of the test also needs to be amended to allow candidates to adapt their riding to reflect prevailing weather, road and other circumstances. The development of better awareness of motorcyclists among other road users is also crucial and should not be neglected. Though the Government exceeded what was necessary to comply with the EU directive the Committee believes they were right to do so. It is the development of Multi Purpose Test Sites for which justification was weak and implementation inept which represents the least effective element.

THE OXFORD HANDBOOK OF DEAF STUDIES IN LEARNING AND COGNITION

Oxford University Press, USA In recent years, the intersection of cognitive psychology, developmental psychology, and neuroscience with regard to deaf individuals has received increasing attention from a variety of academic and educational audiences. Both research and pedagogy have addressed questions about whether deaf children learn in the same ways that hearing children learn, how signed languages and spoken languages might affect different aspects of cognition and cognitive development, and the ways in which hearing loss influences how the brain processes and retains information. There are now a number of preliminary answers to these questions, but there has been no single forum in which research into learning and cognition is brought together. The Oxford Handbook of Deaf Studies in Learning and Cognition aims to provide this shared forum, focusing exclusively on learning, cognition, and cognitive development from theoretical, psychological, biological, linguistic, social-emotional, and educational perspectives. Each chapter includes state-of-the-art research conducted and reviewed by international experts in the area. Drawing this research together, this volume allows for a synergy of ideas that possesses the potential to move research, theory, and practice forward.

MEETING THE CHALLENGES TO MEASUREMENT IN AN ERA OF ACCOUNTABILITY

Routledge Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas, with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The NCME series editorial board is comprised of Michael J. Kolen, Chair; Robert L. Brennan; Wayne Camara; Edward H. Haertel; Suzanne Lane; and Rebecca Zwick.

GLOBAL EDUCATION MONITORING REPORT 2020

INCLUSION AND EDUCATION - ALL MEANS ALL

United Nations This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

THE GOVERNMENT'S MOTORCYCLING STRATEGY

FIFTH REPORT OF SESSION 2006-07, REPORT, TOGETHER WITH FORMAL MINUTES, ORAL AND WRITTEN EVIDENCE

The Stationery Office The Government's Motorcycling Strategy was published in February 2005, with the aim of facilitating motorcycling as a choice of travel within a safe and sustainable transport framework. It had a strong focus on safety including provision on the highway, including road design and maintenance; encouraging safer bike design; promoting correct helmet fitting; and improving rider training. This inquiry looks at the progress in implementing the strategy. In addition it also considers changes to motorcycle licensing arrangements and action that might be taken to reduce the risk posed by mini-motos and go-peds.

PEOPLE'S REPUBLIC OF CHINA: 2021 ARTICLE IV CONSULTATION-PRESS RELEASE; STAFF REPORT; AND STATEMENT BY THE EXECUTIVE DIRECTOR FOR THE PEOPLE'S REPUBLIC OF CHINA

International Monetary Fund China's recovery is well advanced—but it lacks balance and momentum has slowed, reflecting the rapid withdrawal of fiscal support, lagging consumption amid recurrent COVID-19 outbreaks despite a successful vaccination campaign, and slowing real estate investment following policy efforts to reduce leverage in the property sector. Regulatory measures targeting the technology sector, intended to enhance competition, consumer privacy, and data governance, have increased policy uncertainty. China's climate strategy has begun to take shape with the release of detailed action plans. Productivity growth is declining as decoupling pressures are increasing, while a stalling of key structural reforms and rebalancing are delaying the transition to "high-quality"—balanced, inclusive and green—growth.

MODERNIZING THE FRAMEWORK FOR FISCAL POLICY AND PUBLIC DEBT SUSTAINABILITY ANALYSIS

International Monetary Fund Modernizing the framework for fiscal policy and public debt sustainability analysis (DSA) has become necessary, particularly in light of the recent crisis and rising sustainability concerns in some advanced economies. While recognizing the inherently challenging nature of such analysis, this paper highlights areas where improvements are needed and makes both general and specific proposals on how this could be achieved. It also proposes to move to a risk-based approach to DSAs for all market-access countries, where the depth and extent of analysis would be commensurate with concerns regarding sustainability, while a reasonable level of standardization would be maintained.

LOWE'S TRANSPORT MANAGER'S AND OPERATOR'S HANDBOOK 2014
