Harlem Jazz Adventures

A European Baron's Memoir, 1934-1969

Scarecrow Press **Timme Rosenkrantz (1911-1969)** was a Danish journalist, author, concert and record producer, radio show host, and entrepreneur with a consuming passion for jazz and little head for business. Known in Denmark and New York as the "Jazz Baron" because of his noble lineage, he was the first European journalist to cover the jazz scene in Harlem. **Harlem Jazz Adventures: A European Baron's Memoir, 1934-1969** recounts Rosenkrantz's happy years in New York City, where he would produce jazz concerts, record top musicians and bands in his midtown apartment, organize a "dream band" for Timme Rosenkrantz and His Barrelhouse

Barons, a 1938 RCA Victor recording, (DL) live in Harlem and run a record shop with his life companion, journalist and singer Inez Cavanaugh. A good friend of jazz impresario John Hammond, Rosenkrantz would become the James Boswell of the Harlem jazz scene. Duke Ellington, Art Tatum, Coleman Hawkins, Billie Holiday—there wasn't a New York jazz musician unknown to "Honeysuckle Rosenkrantz," as christened by Fats Waller. Drawing on the published Danish-language original *Dus med Jazzen*, and an unpublished English free translation (DL) by Rosenkrantz and Cavanaugh, translator-adaptor Fradley Hamilton Garner gives polish and context to Rosenkrantz's stories of meetings with Cecile and Louis Armstrong, Benny Carter, Willie "The Lion" Smith, Eddie Condon, Erroll Garner—whom Rosenkrantz discovered and was first to record—and many others. This book is a must-have for jazz lovers. Social historians interested in the intersection of race and the music business will find in Rosenkrantz's memoir an invaluable primary source on Harlem's social scene and its musical legacy.

The Making of Modern Economics

The Lives and Ideas of the Great Thinkers

M.E. Sharpe Here is a bold history of economics - the dramatic story of how the great economic thinkers built today's rigorous social science. Noted financial writer and economist Mark Skousen has revised and updated this popular work to provide more material on Adam Smith and Karl Marx, and expanded coverage of Joseph Stiglitz, 'imperfect' markets, and behavioral economics. This comprehensive, yet accessible introduction to the major economic philosophers of the past 225 years begins with Adam Smith and continues through the present day. The text examines the contributions made by each individual to our understanding of the role of the economist, the science of economics, and economic theory. To make the work more engaging, boxes in each chapter highlight little-known - and often amusing - facts about the economists' personal lives that affected their work.

Horror Comics in Black and White

A History and Catalog, 1964–2004

McFarland In 1954, the comic book industry instituted the Comics Code, a set of self-regulatory guidelines imposed to placate public concern over gory and horrific comic book content, effectively banning genuine horror comics. Because the Code applied only to color comics, many artists and writers turned to black and white to circumvent the Code's narrow confines. With the 1964 Creepy #1 from Warren Publishing, black-and-white horror comics experienced a revival continuing into the early 21st century, an important step in the maturation of the horror genre within the comics field as a whole. This generously illustrated work offers a comprehensive history and retrospective of the black-and-white horror comics that flourished on the newsstands from 1964 to 2004. With a catalog of original magazines, complete credits and insightful analysis, it highlights an important but overlooked period in the history of comics.

The Elements of Statistical Learning

Data Mining, Inference, and Prediction

Springer Science & Business Media During the past decade there has been an explosion in computation and information technology. With it have come vast amounts of data in a variety of fields such as medicine, biology, finance, and marketing. The challenge of understanding these data has led to the development of new tools in the field of statistics, and spawned new areas such as data mining, machine learning, and bioinformatics. Many of these tools have common underpinnings but are often expressed with different terminology. This book describes the important ideas in these areas in a common conceptual framework. While the approach is statistical, the emphasis is on concepts rather than mathematics. Many examples are given, with a liberal use of color graphics. It should be a valuable resource for statisticians and anyone interested in data mining in science or industry. The book's coverage is broad, from supervised learning (prediction) to unsupervised learning. The many topics include neural networks, support vector machines, classification trees and boosting---the first comprehensive treatment of this topic in any book. This major new edition features many topics not covered in the original, including graphical models, random forests, ensemble methods, least angle regression & path algorithms for the lasso, non-negative matrix factorization, and spectral clustering. There is also a chapter on methods for "wide" data (p bigger than n), including multiple testing and false discovery rates. Trevor Hastie, Robert Tibshirani, and Jerome Friedman are professors of statistics at Stanford University. They are prominent researchers in this area: Hastie and Tibshirani developed generalized additive models and wrote a popular book of that title. Hastie co-developed much of the statistical modeling software and environment in R/S-PLUS and invented principal curves and surfaces. Tibshirani proposed the lasso and is co-author of the very successful *An Introduction to the Bootstrap*. Friedman is the co-inventor of many data-mining tools including CART, MARS, projection pursuit and gradient boosting.

Using Mindfulness Skills in

Everyday Life

A practical guide

Taylor & Francis In the last decade, more mental health treatments have begun to incorporate mindfulness as a skill to help people with their problems. Despite this, not everyone is sure how to incorporate mindfulness effectively into their daily lives. Giving simple explanations, examples and exercises, **Using Mindfulness Skills in Everyday Life** shows clearly how this is done. The book, written by two NHS clinicians experienced in teaching mindfulness, takes a down-to-earth approach, providing straightforward answers to the most commonly asked questions. The authors give definitions of mindfulness and guide people through instructions on how to set up and evaluate simple practices. As each component is taught, they provide examples of real-life situations, so the reader can clearly see how to be more mindful as they face the ups and downs of modern living. This practical guide is essential reading for anyone who wants to learn mindfulness to help with difficulties and challenges. It is also the perfect book for therapists, coaches, teachers, social workers, nurses, psychiatrists and psychologists to recommend to their clients. The book is ideal for students on clinical training courses.
