The first edition of Leaves of Grass was published in 1855 and contained only twelve poems. Whitman kept revising his collection throughout his life; the final edition contains more than three hundred poems. This is an unabridged version of the poems from the final edition of Whitman's celebrated collection, published shortly before his death in 1892.** **Daemonologie (illustarted Edition)** [Independently Published](#) **In 1590 three hundred Scottish 'witches' were tried for plotting the murder of their King, James VI of Scotland (soon to be James I of England). James is known to have suffered from a morbid fear of violent death, and the trial heightened his anxiety over this apparently treasonous 'un-Christian' sect, and stimulated him to study the whole subject of witchcraft. 'Daemonologie' is the result of this royal research, detailing his opinions on the topic in the form of a Socratic dialogue between the sceptic Philomathes and witch-averse Epistemon, who reveals many aspects of witch-craft. The book consists of three sections, on magic, on sorcery and witchcraft, and on spirits and ghosts, and ends with a lurid account of the North Berwick witch trials, based on the evidence of Dr John Fian, the alleged head of the coven, whose 'confession' was obtained with the aid of thumbscrews, the Boot, and by the ripping out of his fingernails. The Group Mind [BoD - Books on Demand](#) Reproduction of the original: The Group Mind by William McDougall Registries for Evaluating Patient Outcomes A User's Guide [Government Printing Office](#) This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews. Resources in Education RIE.. Annual cumulation The Death and Life of Great American Cities [Random House](#) In this classic text, Jane Jacobs set out to produce an attack on current city planning and rebuilding and to introduce new principles by which these should be governed. The result is one of the most stimulating books on cities ever written. Throughout the post-war period, planners temperamentally unsympathetic to cities have been let loose on our urban environment. Inspired by the ideals of the Garden City or Le Corbusier's Radiant City, they have dreamt up ambitious projects based on self-contained neighbourhoods, super-blocks, rigid 'scientific' plans and endless acres of grass. Yet they seldom stop to look at what actually works on the ground. The real vitality of cities, argues Jacobs, lies in their diversity, architectural variety, teeming street life and human scale. It is only when we appreciate such fundamental realities that we can hope to create cities that are safe, interesting and economically viable, as well as places that people want to live in. 'Perhaps the most influential single work in the history of town planning... Jacobs has a powerful sense of narrative, a lively wit, a talent for surprise and the ability to touch the emotions as well as the mind' New York Times Book Review Saunders Comprehensive Review for NCLEX-PN This innovative book prepares students for the NCLEX-PN exam with thorough content review and 3,000 practice questions.
