LANGUAGE FUNCTIONS REVISITED

THEORETICAL AND EMPIRICAL BASES FOR LANGUAGE CONSTRUCT DEFINITION ACROSS THE ABILITY RANGE

Cambridge University Press This book introduces the theoretical and empirical bases for the definition of language learning level in functional 'Can Do' terms for the English Profile Programme, setting out the ambitions of the Programme and presenting emerging findings. The English Profile Programme is an elaboration of the performance level descriptions of the Common European Framework of Reference for Languages (CEFR) that is concerned specifically with the English language. The CEFR has become influential in building a shared understanding of performance levels for foreign language learners. However, there is a considerable gap between the broad descriptions of levels provided, which covers a range of languages and learning contexts, and the level of detail required for applications such as syllabus or test design, which this volume addresses. With its combination of theoretical insights and practical advice, this is a useful work for academics, policy-makers, curriculum designers, textbook writers, postgraduate students and examination board staff.

EXAMINING LISTENING

RESEARCH AND PRACTICE IN ASSESSING SECOND LANGUAGE LISTENING

Cambridge University Press This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

THE CAMBRIDGE HISTORY OF THE ENGLISH LANGUAGE:

Cambridge University Press Volume II deals with the Middle English period, approximately 1066-1476, and describes and analyzes developments in the language from the Norman Conquest to the introduction of printing. This period witnessed important features such as the assimilation of French and the emergence of a standard variety of English. There are chapters on phonology and morphology, syntax, dialectology, lexis and semantics, literary language, and onomastics. Each chapter concludes with a section on further reading; and the volume as a whole is supported by an extensive glossary of linguistic terms and a comprehensive bibliography. The chapters are written by specialists who are familiar with modern approaches to the study of historical linguistics.

DISCOURSES WE LIVE BY: NARRATIVES OF EDUCATIONAL AND SOCIAL ENDEAVOUR

Open Book Publishers What are the influences that govern how people view their worlds? What are the embedded values and practices that underpin the ways people think and act? Discourses We Live By approaches these questions through narrative research, in a process that uses words, images, activities or artefacts to ask people - either individually or collectively within social groupings - to examine, discuss, portray or otherwise make public their place in the world, their sense of belonging to (and identity within) the physical and cultural space they inhabit. This book is a rich and multifaceted collection of twenty-eight chapters that use varied lenses to examine the discourses that shape people's lives. The contributors are themselves from many backgrounds - different academic disciplines within the humanities and social sciences, diverse professional practices and a range of countries and cultures. They represent a broad spectrum of age, status and outlook, and variously apply their research methods - but share a common interest in people, their lives, thoughts and actions. Gathering such eclectic experiences as those of student-teachers in Kenya, a released prisoner in Denmark, academics in Colombia, a group of migrants learning English, and gambling addiction support-workers in Italy, alongside more mainstream educational themes, the book presents a fascinating array of insights. Discourses We Live By will be essential reading for adult educators and practitioners, those involved with

educational and professional practice, narrative researchers, and many sociologists. It will appeal to all who want to know how narratives shape the way we live and the way we talk about our lives.

KNOWLEDGE DISSEMINATION IN THE LONG NINETEENTH CENTURY

EUROPEAN AND TRANSATLANTIC PERSPECTIVES

Cambridge Scholars Publishing **Distinctive in its markedly interdisciplinary approach, this book presents studies dealing with literary, cultural and linguistic history both in Europe and in the US, bringing together scholars from different fields, while highlighting features that are shared among their contributions. It offers new insights into phenomena which have generally been under-investigated, such as the role played by popular culture, music, and the arts in the circulation of information, in the construction of popular taste, and even in scientific popularisation on both sides of the Atlantic. As for the choice to focus on the nineteenth century, this is dictated by the fact that, in those decades, for the first time in history, scientific, technological, and social developments accelerated simultaneously. It is, therefore, important to see how such new knowledge was circulated among an ever-growing audience by means of different genres and text types, bearing in mind that divisions between the literary and non-literary were hardly as sharp as they are today. The book presents contributions by Robert-Louis Abrahamson, Nicholas Brownlees, Bruno Cartosio, Sonia Di Loreto, Aileen Dillane, Marina Dossena, Kirsten Lawson, Angela Locatelli, William H. Mulligan, Jr., Stefano Rosso, and Polina Shvanyukova.**

SOCIO LINGUISTICS

Scientific e-Resources **Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and society's effect on language. It differs from sociology of language, which focuses on the effect of language on society. Sociolinguistics overlaps considerably with pragmatics. It is historically closely related to linguistic anthropology, and the distinction between the two fields has been questioned. This book deals with the social life of language. The field ranges from micro-analyses to broadly-based policy and planning undertakings. As such, this book draws from sociolinguistics, the sociology of language, and psycholinguistics. The relationship between language and identity - whether of an individual or a group - is a strong thread linking all the topics covered in the book. For researchers and advanced students, it gives access to the field's most pressing issues and debates, as well as providing a platform for new initiatives in sociolinguistic research.**

PRINCIPLES AND PRACTICES FOR RESPONSE IN SECOND LANGUAGE WRITING

DEVELOPING SELF-REGULATED LEARNERS

Routledge **Based on the assumptions that students expect feedback and want to improve, and that improvement is possible, this book introduces a framework that applies the theory of self-regulated learning to guide second language writing teachers' response to learners at all stages of the writing process. This approach provides teachers with principles and activities for helping students to take more responsibility for their own learning. By using self-regulated learning strategies, students can increase their independence from the teacher, improve their writing skills, and continue to make progress once the course ends, with or without teacher guidance. The book focuses on the six dimensions of self-regulated learning —motive, methods of learning, time, physical environment, social environment, and performance. Each chapter offers practical activities and suggestions for implementing the principles and guidelines, including tools and materials that teachers can immediately use.**

ENGLISH-MEDIUM INSTRUCTION AT UNIVERSITIES

GLOBAL CHALLENGES

Multilingual Matters **This book provides critical insights into the English-medium instruction (EMI) experiences which have been implemented at a number of universities in countries such as China, Finland, Israel, the Netherlands, South Africa, Spain and the USA, which are characterised by differing political, cultural and sociolinguistic situations. In particular, it reflects on the consequences of implementing EMI as an attempt to gain visibility and as a strategy in response to the need to become competitive in both national and international markets. The pitfalls and challenges specific to each setting are analysed, and the pedagogical issues and methodological implications that arise from the implementation of these programmes are also discussed. This volume will serve to advance our awareness about the strategies and tools needed to improve EMI at tertiary level.**

THE CHANGING FACES OF IRELAND

[Springer Science & Business Media](#) Before the economic boom of the 1990s, Ireland was known as a nation of emigrants. The past fifteen years, however, have seen the transformation of Ireland from a country of net emigration to one of net immigration, on a scale and at a pace unprecedented in comparative context. As a result, Irish society has become more diverse in terms of nationality, language, ethnicity and religious affiliation; and these changes are now clearly reflected in the composition of both primary and secondary schools, presenting these with challenges as well as opportunities. Despite the increased number of ethnically-diverse immigrant children and young people in the Ireland, currently there is a paucity of information about aspects of their lives in Ireland. This book is aimed at contributing to this gap in knowledge. This edited collection will be of interest to researchers in the fields of migration studies,

childhood studies, education studies, human geography, sociology, applied social studies, social work, health studies and psychology. It will also be a useful resource to educators, social workers, youth workers and community members working with (or preparing to work with) children with immigrant and ethnic minority backgrounds in Ireland.

NEOLIBERALISM AND APPLIED LINGUISTICS

Routledge This book explores neoliberalism - a view of the world that puts the market at its centre- from the perspective of applied linguistics. **Neoliberalism and Applied Linguistics** argues that while applied linguistics has become more interdisciplinary in orientation, it has ignored or downplayed the role of political economy, namely the way in which social, political and economic factors relate to one another within the context of a capitalist economy. The authors take the view that engagement with political economy is central to any fully rounded analysis of language and language-related issues in the world today and their collaboration in this volume represents an initial attempt to redress what they perceive to be an imbalance in the field. The book begins with a discussion of neoliberalism and an analysis of the ways in which neoliberal ideology impacts on language. This is followed by a discussion of how globalization and identity have been conceptualised in applied linguistics in ways which have ignored the political centrality of class - a concept which the authors see as integral to their perspective. The book concludes with an analysis of the ways in which neoliberal ideology plays out in two key areas of applied linguistics - language teaching and language teacher education. **Neoliberalism and Applied Linguistics** is essential reading for advanced undergraduates, postgraduates and researchers in applied linguistics.
