Economics

Co-written by Joseph Stiglitz, winner of the Nobel Prize for his research on imperfect markets, and Carl E. Walsh, one of the leading monetary economists in the field, *Economics* is the most modern and accurate text available.

International Science! Teacher's Guide 2

Hodder Education The teacher's guide to accompany the first book in a three-level series covering the lower secondary grades and designed for ESL students studying science in English.

Environmental Economics

Oxford University Press, USA *Environmental Economics*, has established itself as one of its field's most authoritative texts, as well as one of the more challenging. It distinguishes itself from other books by presupposing that readers already have an understanding of intermediate microeconomics. Thus, this book concentrates only on environmental economics - problems of pollution of earth, air, and water - with an emphasis on regulation and private-sector anti-pollution incentives, and coverage of international examples.

Practical Electrophysiology

Cardiotext Publishing About: *Practical Electrophysiology* is a detailed presentation of the fundamental aspects of electrophysiology written by an internationally recognized group of experts. To fully engage the reader and to help facilitate the learning process, 77 case studies covering ECGs, SVTs, atrial fibrillation, ventricular tachycardia and more are included not only with questions, but also with a full discussion of the answers. From the Preface: A plethora of significant new research and findings makes it difficult to keep up with the ever-changing field of electrophysiology. Despite these constant advances, there are fundamental aspects of the science that need to be understood by students of electrophysiology. This book was created to educate and uses cases and questions to keep the reader engaged. Chapter and case topics were chosen so that the information presented is useful for years to come. My associate editors and I are hopeful that this book will prove a useful tool for those interested in the field of electrophysiology. We also are very grateful to all the contributing authors for spending their time and effort to help create this handy but comprehensive and interesting work. Jasbir Sra, Milwaukee

Physics for scientists and engineers

Key Message: This book aims to explain physics in a readable and interesting manner that is accessible and clear, and to teach readers by anticipating their needs and difficulties without oversimplifying. Physics is a description of reality, and thus each topic begins with concrete observations and experiences that readers can directly relate to. We then move on to the generalizations and more formal treatment of the topic. Not only does this make the material more interesting and easier to understand, but it is closer to the way physics is actually practiced. **Key Topics:** ELECTRIC CHARGE AND ELECTRIC FIELD, GAUSS'S LAW, ELECTRIC POTENTIAL, CAPACITANCE, DIELECTRICS, ELECTRIC ENERGY STORAGE, ELECTRIC CURRENTS AND RESISTANCE, DC CIRCUITS, MAGNETISM, SOURCES OF MAGNETIC FIELD, ELECTROMAGNETIC INDUCTION AND FARADAY'S LAW, INDUCTANCE, ELECTROMAGNETIC OSCILLATIONS, AND AC CIRCUITS, MAXWELL'S EQUATIONS AND ELECTROMAGNETIC WAVES, LIGHT: REFLECTION AND REFRACTION, LENSES AND OPTICAL INSTRUMENTS, THE WAVE NATURE OF LIGHT; INTERFERENCE, DIFFRACTION AND POLARIZATION, **Market Description:** This book is written for readers interested in learning the basics of physics.
