Counseling Persons of African Descent

Raising the Bar of Practitioner Competence

SAGE Publications Though important strides have been made in the last three decades in the research efforts on African Americans, there continues to be a lack of significant new understanding about the impact of the African American culture on the therapy process and dynamics. This volume provides an in-depth analysis of the counseling literature pertaining to African American clients. Specifically, the analysis includes a review of the different variables (client, counselor, counseling process, and assessment) that have received the bulk of research attention. This sets the stage for the presentation of a counseling model for African American clients. The authors discuss philosophical premises upon which the model is based and suggest specific counseling strategies and interventions related to the model. Case study material is integrated throughout the chapters, focusing on individual and group approaches. This volume is an important work for counseling professionals as well as for students in social work and counseling programs.

Crime and Racial Constructions

Cultural Misinformation about African Americans in Media and Academia

Lexington Books Crime and Racial Constructions: Cultural Misinformation about African Americans in Media and Academia critically examines how the film industry and criminologists have constructed African Americans in their effort to explain observed race differences in crime. Of particular concern is how the images they paint of violent, out-of-control blacks result in hardline criminal justice policies.

The second edition features an increased emphasis on: the historical issues confronting African descended fathers the impact of health issues on Black fathers and their children the need for therapeutic interventions to aid in the healing of fathers and their children the impact of an Afrikan-centered fathering approach and the need for research which considers systemic problems confronting African American fathers community focused models that provide new ideas for (re)connecting absent fathers learning tools including reflective questions and a conclusion in each chapter and more theory and research throughout the book. Part I provides a historical overview of African descended fathers including their strengths and shortcomings over the years. Next, contributors share their personal stories including one from a communal father working with underserved youth and two others that highlight the impact of absent fathers. Then, the research on father-daughter relationships is examined including the impact of father absence on daughters and on gender identity. African American Adult Male Head of Households

Where Are They?

Christian Faith Publishing, Inc. The African American adult male's role as a provider and protector has not changed over the years. African American families are facing increasing fatherlessness and a decline in the continuity of the African American home. The African American male adult, because of the moral decay within the African American community, has changed his view of himself as the head of the household. This is the first book in a series by Dr. Jim H. Copeland Jr. designed to highlight the opinions of African American males who currently do not hold the position of head of households. Dr. Copeland is a behavioral psychologist with over fifteen years of counseling and therapy experience. The origins of his counseling experience began while serving in the military as a commanding officer, years before he earned his doctor of psychology degree. During his military career, Dr. Copeland experienced firsthand the challenges men face when navigating major relationship issues.

Counseling Fathers

Taylor & Francis Men do not often come for counseling because they are having difficulties with being a father, but many of the presenting problems and reasons for seeking help can be related to the roles and responsibilities of fathering. The dramatic shift in societal expectations of being a father can often leave men confused as they navigate conflicting views, demands, and responsibilities. Counseling Fathers is designed to bridge the gap between fathers and professional helpers. This book provides the mental health practitioners with a guide for working with fathers in therapy, whether the issues of fathering are at the center of the discussions or in the background. The organization of the book speaks to the variety of today's fathers and the issues that they face. Part I provides an historical overview of the fathering movement, a strength-based approach to working with fathers, and an assessment paradigm using gender role conflict theory. Part II takes a cross-cultural approach, with a series of chapters that look at counseling with Latino, Asian, Black, and Caucasian fathers. Part III looks at specific populations of fathers, including first time fathers, teen fathers, stay-at-home fathers, gay fathers, and older fathers. Counseling Fathers provides the most up-to-date and comprehensive resource for family and individual practitioners who work with men who father.

Black Fathers

An Invisible Presence in America

Routledge In the parlance of social psychology, social work, and urban social scientists, African American fathers have often been described as "absent," "missing," "non-residential," "non-custodial," "unavailable," "non-married," "irresponsible," and "immature." It is wondered why it is/was so difficult to find literature, research, and comments regarding positive attributes of African American families in general and African American fathers in particular. This book fills a void in attempting to offer a broader picture regarding the status of African American males in a father role. The purpose is to get beyond the African American father "invisibility" syndrome and gloom and doom pathology oriented labels and tell another side of the story about the power of fathering in the African American experience. The book brings these "invisible" social and biological fathers to life by telling their stories and letting the reader hear and feel the vibrancy of their voices as they struggle to meet the challenges of being fathers and Black men in America. *Black Fathers: An Invisible Presence in America* is divided into four sections: *Part I offers some research and theory regarding the impact of fathers on the lives of their children. *In Part II, reactions and experiences from those men who had active, involved, and committed Black men in their lives as they were growing up are shared. *In Part III, stories are shared from African American men who had problematic relationships with their fathers, but who put forth the time, energy, and effort to work through the issues. *The primary focus of Part IV is on how to strengthen the role of Black fathers, father figures, and social fathers in family life and child rearing by discovering and internalizing psychological strengths anchored in African American psychological themes, African values, and spirituality. This book will appeal to scholars and researchers in the fields of race/ethnic relations, family studies, and Black studies.

Polarized Families, Polarized Parties

Contesting Values and Economics in American Politics

University of Pennsylvania Press Struggles to define the soul of America roil the nation's politics. Debates over the roles of gays, lesbians, women, immigrants, racial and religious minorities, and disputes over reproductive and abortion rights serve as rallying points for significant electoral groups and their representatives in government. Although the American family lies at the core of these fierce battles, the alignment of family with social or cultural issues is only a partial picture—a manifestation of the new right's late twentieth-century success in elevating "family values" over family economics. Gwendoline Alphonso makes a significant contribution to the prevailing understanding of party evolution, contemporary political polarization, and the role of the family in American political development by placing family at the center of political and cultural clashes. She demonstrates how regional ideas about family in the twentieth century have continually shaped not only Republican and Democratic policy and ideological positions concerning race and gender but also their ideals concerning the economy and the state. Drawing on extensive data from congressional committee hearings, political party platforms, legislation sponsorship, and demographic data from the Progressive, post-World War II, and late twentieth-century periods in the United States, *Polarized Families, Polarized Parties* offers an intricate and sophisticated analysis of how deliberations around the ideal family became critical to characterizations of party politics. By revealing the deep historical interconnections between family and the two parties' ideologies and policy preferences, Alphonso reveals that American party development is more than a story of the state and its role in the economy but also, at its core, a debate over the political values of family and the social fabric it embodies.

Black Woman Redefined

Dispelling Myths and Discovering Fulfillment in the Age of Michelle Obama

BenBella Books, Inc. It's time for a REDEFINITION among black women in America. In its 2011 hardcover release, Black Woman Redefined was a top-selling book and took home a 2011 Best Non-Fiction Book of the Year Award from the African American Literary Awards. Author Sophia A. Nelson won the 2012 Champions of Diversity Award, given each year by diversity business executives in Fortune 100 companies. Black Woman Redefined was inspired in part by what Nelson calls "open season on accomplished black women": from Don Imus's name-calling of black female basketball players in 2007 and a 2009 Yale University study titled "Marriage Eludes High-Achieving Black Women," to the more recent revelation that First Lady Michelle Obama is concerned about being painted as an "angry, black woman." In Black Woman Redefined, Nelson sets out to change this cultural perception, taking readers on a no-holds-barred journey into the hearts and minds of accomplished black women to reveal truths, tribulations, and insights like never before. This groundbreaking book provides black women of a new generation with essential career and life-coaching advice. Based on never-before-done

research on college-educated, career-driven black women, Nelson offers her fellow "sisters"—and those who know, love, and work with them—a feel-good volume for personal and professional success that empowers them without tearing others down.

Sensational Flesh

Race, Power, and Masochism

NYU Press In everyday language, masochism is usually understood as the desire to abdicate control in exchange for sensation—pleasure, pain, or a combination thereof. Yet at its core, masochism is a site where power, bodies, and society come together. Sensational Flesh uses masochism as a lens to examine how power structures race, gender, and embodiment in different contexts. Drawing on rich and varied sources—from 19th century sexology, psychoanalysis, and critical theory to literary texts and performance art—Amber Jamilla Musser employs masochism as a powerful diagnostic tool for probing relationships between power and subjectivity. Engaging with a range of debates about lesbian S&M, racialization, femininity, and disability, as well as key texts such as Sacher-Masoch's Venus in Furs, Pauline R(r)age's The Story of O, and Michel Foucault's History of Sexuality, Musser renders legible the complex ways that masochism has been taken up by queer, feminist, and critical race theories. Furthering queer theory's investment in affect and materiality, she proposes sensation as an analytical tool for illustrating what it feels like to be embedded in structures of domination such as patriarchy, colonialism, and racism and what it means to embody femininity, blackness, and pain. Sensational Flesh is ultimately about the ways in which difference is made material through race, gender, and sexuality and how that materiality is experienced."

Corridors of Death

Struggling to exist in historically white institutions

Blackbird Books The post-apartheid dispensation that has seen Black people continue to be hurled at the margins of existence has crystallised mental pathologies that have their roots in our violent and amoral past. Millions of Black people in South Africa are battling with a range of mental health challenges resulting from a complex interplay between biological, psychological, social and environmental factors. In Corridors of Death, the lived experiences of Black students in historically White universities is explored, exposing how structural violence, racism and a culture of alienation are pushing them to the edge of depression and increasingly, suicide. The book contends that urgent structural and institutional interventions need to be made, the centre of which must be transformation that reflects the demographic and socio-political construct of the South African society. Unless and until this happens, Black students will increasingly reach an unendurable level of invisible agony, and die in universities.

Black Rage in the American Prison System

Lfb Scholarly Pub Llc Noble shows how "black rage" grows out of inmate subculture and prison culture to increase violence in prisons. Noble's thesis is that African-American inmates transport "black rage" into the prison subculture, which significantly affects prison violence rates. He finds previous studies superficial and raises the bar for future examinations by proposing a sensitive and taboo theory to explain the strong racial patterns observed in prison victimization. Noble's work supports the importation theory of the inmate subculture proposed by Irwin and Cressey. He builds on their theory by advocating for the inclusion of race and other cultural factors concerning the inmate and staff populations into predicative models. He concludes that prisons with greater racial disparities between the inmate and staff populations experience higher staff assault rates.

Adolescence and Education

General Issues in the Education of Adolescents

IAP In this inaugural volume, we solicited chapters from leading scholars in a variety of fields related to education. Our aim was to provide a broad overview of several of the most pressing concerns regarding the education of adolescent students. The volume begins with an historical perspective from Barbara Finklestein, who provides background regarding America's changing perceptions of adolescence as a developmental period and how American society has approached the task of educating this age group over time. This is followed by chapters from Carol Midgley and from Sanford Dornbusch and Jeanne Kaufman regarding the organization, purpose, and function of schools designed to serve early and late adolescents. Midgley uses an achievement goal theory lens to analyze middle level schools; Dornbusch and Kaufman consider senior high schools, adopting a more sociological perspective.
