## Family-Focused Nursing Care

F.A. Davis Nurses have a unique role in redefining the way we view partnerships in healthcare— Transitioning from individualized to family-focused care is not only advocated by the Institute of Medicine; it's becoming a way of life. Families want their perspectives and choices for their loved ones to be heard.

## Palliative Nursing

## Community & Public Health Nursing: Promoting the Public's Health

Lippincott Williams & Wilkins Community & Public Health Nursing is designed to provide students a basic grounding in public health nursing principles while emphasizing aggregate-level nursing. While weaving in meaningful examples from practice throughout the text, the authors coach students on how to navigate between conceptualizing about a population-focus while also continuing to advocate and care for individuals, families, and aggregates. This student-friendly, highly illustrated text engages students, and by doing so, eases students into readily applying public health principles along with evidence-based practice, nursing science, and skills that promote health, prevent disease, as well as protect at-risk populations! What the 8th edition of this text does best is assist students in broadening the base of their knowledge and skills that they can employ in both the community and acute care settings, while the newly enhanced ancillary resources offers interactive tools that allow students of all learning styles to master public health nursing.

## The Future of Nursing

## Leading Change, Advancing Health

**National Academies Press** *The Future of Nursing* explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

## Core Curriculum for Critical Care Nursing - E-Book

**Elsevier Health Sciences** From the experts at the American Association of Critical-Care Nurses (AACN), comes the definitive resource on administering quality nursing care to critically ill patients. The 6th edition has been updated to reflect the current state of critical care nursing practice and includes new content on the AACN Synergy Model, professional care and ethical practice, and critical care patients with special needs, as well as the most current literature and clinical studies. The clear and logical format makes this book an ideal study tool for critical care nursing orientation and continuing education programs. By covering the newest content on the CCRN exam, it also serves as an important resource for nurses preparing for critical care certification. Authored by the experts at the American Association of Critical-Care Nurses. Reflects the most recent blueprint of the CCRN examination. Content spans basic to advanced levels with an emphasis on nursing practice. Organized by body system and written in a concise outline format for ease of use. Coverage of the AACN Synergy Model is featured in the new opening chapter. Professional Care and Ethical Practice is integrated into the Core Curriculum series framework. A new chapter on Critical Care Patients with Special Needs includes bariatric and geriatric patients in critical care, as well as high-risk obstetric patients. Features new content on chest tubes, liver transplantation for acute liver failure, spirituality, and spiritual aspects of care. Integrates pain as the 5th vital sign and includes JCAHO, HCFA, and AHCPH guidelines relating to pain management. Features AHRQ evidence-based practice guidelines as reference sources for practice interventions. New organization for Patient Care presents patient problems, needs, etc. in order of clinical priority. Expanded Nursing Interventions includes considerations related to patient/family education, patient transfer, and discharge planning. Web-based resources for CDC, AHA, NINR, National Guideline Clearinghouse, NIH Consensus Conference Proceedings, ADA.

## The Mental Health and Substance Use Workforce for Older Adults

### In Whose Hands?

**National Academies Press** At least 5.6 million to 8 million--nearly one in five--older adults in America have one or more mental health and substance use conditions, which present unique challenges for their care. With the number of adults age 65 and older projected to soar from 40.3 million in 2010 to 72.1 million by 2030, the aging of America holds profound consequences for the nation. For decades, policymakers have been warned that the nation's health care workforce is ill-equipped to care for a rapidly growing and increasingly diverse population. In the specific disciplines of mental health and substance use, there have been similar warnings about serious workforce shortages, insufficient workforce diversity, and lack of basic competence and core knowledge in key areas. Following its 2008 report highlighting the urgency of expanding and strengthening the geriatric health care workforce, the IOM was asked by the Department of Health and Human Services to undertake a complementary study on the geriatric mental health and substance use workforce. *The Mental Health and Substance Use Workforce for Older Adults: In Whose Hands?* assesses the needs of this population and the workforce that serves it. The breadth and magnitude of inadequate workforce training and personnel shortages have grown to such proportions, says the committee, that no single approach, nor a few isolated changes in disparate federal agencies or programs, can adequately address the issue. Overcoming these challenges will require focused and coordinated action by all.

## Research Grants Index

### Emergency and Trauma Care for Nurses and Paramedics

Elsevier Health Sciences **Emergency and Trauma Care** is written for Australian emergency care providers including paramedics, emergency nurses, pre-hospital care providers, nurse practitioners, general practice nurses and allied health practitioners including occupational therapists and physiotherapists who are caring for trauma patients. This book follows the patient journey from pre-hospital to definitive care. Using a body systems approach, each chapter provides comprehensive coverage of all aspects of adult and paediatric emergencies. Implications for clinical practice is supported by chapters of professional practice, clinical skills, research, evidence-based practice, and legal, ethical and cultural issues. Clinical assessment, physiology, management and rationale for intervention of common and not so common emergency presentations are provided, with each chapter providing clear and relevant examples for both Paramedics and Nurses. Emergency and Trauma Care brings together a team of highly respected clinical practitioners and academics to deliver the most up-to-date text dealing with the practical procedures and evidence experienced by emergency and trauma care providers every day. Chapter 2 Pre-hospital care overview in Australia and NZ Chapter 10 Scene assessment, management and rescue Chapter 11 Pre-Hospital Clinical Reasoning, Triage and Communication Pre-hospital and emergency nursing considerations included in all relevant chapters Chapter 5 Cultural Considerations in Emergency Care addresses cultural diversity, beliefs and values and focuses on Aboriginal and Torres Strait Islander health and Maori health Chapter 19 Resuscitation includes advanced life support, airway management and incorporates the 2010 Australian Resuscitation Council guidelines Chapter 37 People with disabilities provides assessment, examination and communication strategies for working with clients with intellectual and physical disabilities Section 5 focuses on examination and communication strategies for working with unique population groups, including the elderly, disabled, obstetric and paediatric patients Section 6 details major trauma assessment and management, blast injury, and trauma to specific body regions Essentials outline the main points addressed in each chapter Practice tips assist with communication skills, procedures and assessment Case studies supported by questions throughout Summaries and Key points, review questions, web links and references provide for consolidation and further research. Evolve resources include Power point slides, 30 additional Case studies, image bank, web links Three paramedic specific chapters (including scene assessment and management)

Issues in Nursing Research, Training, and Practice: 2013 Edition

ScholarlyEditions Issues in Nursing Research, Training, and Practice: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Nurse Practitioners. The editors have built Issues in Nursing Research, Training, and Practice: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Nurse Practitioners in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Nursing Research, Training, and Practice: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Critical Care Nursing

Elsevier Health Sciences Endorsed by the Australian College of Critical Care Nurses (ACCCN) ACCCN is the peak professional organisation representing critical care nurses in Australia. Written by leading critical care nursing clinicians, Leanne Aitken, Andrea Marshall and Wendy Chaboyer, the 4th edition of Critical Care Nursing continues to encourage and challenge critical care nurses and students to develop world-class practice and ensure the delivery of the highest quality care. The text addresses all aspects of critical care nursing and is divided into three sections: scope of practice, core components and specialty practice, providing the most recent research, data, procedures and guidelines from expert local and international critical care nursing academics and clinicians. Alongside its strong focus on critical care nursing practice within Australia and New Zealand, the 4th edition brings a stronger emphasis on international practice and expertise to ensure students and clinicians have access to the most contemporary practice insights from around the world. Increased emphasis on practice tips to help nurses care for patients within critical care Updated case studies, research vignettes and learning activities to support further learning Highlights the role of the critical care nurse within a multidisciplinary environment and how they work together Increased global considerations relevant to international context of critical care nursing alongside its key focus within the ANZ context Aligned to update NMBA RN Standards for Practice and NSQHS Standards

## Families in the Intensive Care Unit

### A Guide to Understanding, Engaging, and Supporting at the Bedside

**Springer** This text is one of the first comprehensive resources on understanding and working with families in the intensive care unit. The text provides a conceptual overview of the **Family ICU Syndrome**, a constellation of physical morbidity, psychopathology, cognitive deficits, and conflict. Outlining its mechanisms, the book presents a guide to combating the syndrome with an interdisciplinary team. The text represents the full array of the interdisciplinary team by also spotlighting administrative considerations for health care management and approaches to training different members of the health care team. Family voices are featured prominently in the text as well. The book also addresses the complete trajectory of needs of care, including survivorship and end-of-life care. Written by experts in the field, **Families in the Intensive Care Unit: A Guide to Understanding, Engaging and Supporting at the Bedside** is a state-of-the-art reference for all clinicians who work with families in the ICU.

## Advanced Practice Nursing Leadership: A Global Perspective

**Springer Nature** This book is distinctive in its focus on Advanced Practice Nursing leadership globally. It has a unique structure, first highlighting global APN leadership and then including case studies on leadership from various regions around the world. This beneficial and practical book has a specific emphasis on academic, clinical and policy leadership and is relevant for all readers. Finally, a section on leadership development focuses on coaching and mentoring, business acumen, collaboration and patient advocacy provides an important contribution. Authors are distinguished APN leaders from around the world along with junior authors who are emerging leaders being mentored by these leaders. This book will appeal to APN clinicians, students and emerging leaders who want to bring important global lessons to their work. The book will become an indispensable part of the libraries of all APN leaders at all stages in their development worldwide.

## The Formation of the Swiss Hospital System (1840–1960) An Analysis of Surgeon-Modernisers in the Canton of Vaud

**Springer Nature** This book offers an analysis of the formation of contemporary hospital systems between the mid-19th century and the mid-20th century. Based on extensive archival material and a broad international literature review, it focuses on the case of the canton of Vaud, Switzerland, and uses a triple approach that discusses technological innovations, hospital management, and health policy. This research is a major contribution to the history of medicine which gives a unique overview of the formation of contemporary hospital systems.

## Science of Caring

## Families Caring for an Aging America

**National Academies Press** Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

## Catalog of Federal Domestic Assistance

Identifies and describes specific government assistance opportunities such as loans, grants, counseling, and procurement contracts available under many agencies and programs.

## Patient and Family Experience in the ICU, An Issue of Critical Care Nursing Clinics of North America

**Elsevier Health Sciences** In collaboration with Consulting Editor, Dr. Cynthia Bautista, Dr. Judy Davidson has put together a comprehensive issue on family and patient experience in the ICU. Expert authors have contributed clinical review articles on the following topics: Humanizing Intensive Care: From Theory to Practice; FiCare; Patient's Own Pets in the ICU; Sleep in the ICU; Implementation of a Patient and Family-Centered ICU Peer Support Program at a Veterans Affairs Hospital; Understanding the Experiences of Patients and Families in the ICU: More than Engagement; Implementing a Patient and Family Communication Bundle in the ICU; Integrating Primary Palliative Care into the ICU: The Critical Care Nurse Communicator Program; Bereavement Care in the Adult ICU: Directions for Practice; A review on the Use of Diaries; Supporting Families of Patients with Rare or Unusual Critical Illnesses; and Meeting the Special Needs of Families of CTICU patients. Readers will come away with the information they need to improve family and patients experiences in the ICU.

## Patient Safety and Quality

### An Evidence-based Handbook for Nurses

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, <http://www.ahrq.gov/qual/nurseshdbk>.

### Family Care and Social Capital: Transitions in Informal Care

Springer Science & Business Media **Becoming a caregiver is increasingly an inevitable experience for many people and, therefore, a likely life transition. Drawing on research and personal experiences of working with family caregivers, this book examines a range of family caregiving situations from across the life course. It seeks to capture the dynamics of caregiving in a number of common situations: caregiving during infancy, for adults who acquire a disability through accidents or illness, for older people with age-related issues, and caregiving by children and adolescent carers and grandparent carers. In drawing attention to key moments of vulnerability faced by family and informal caregivers, and by suggesting how to assist 'reconnection' at these moments, the book provides a guide for those working in the area of health, disability and care. Informal care is conceptualised as occurring with the context of personal interrelationships, these being nested within wider kin networks and linked with wider professional formal care networks. Informal care is seen both as an expression of social capital and as an activity that builds social capital. It is an indicator of resources of mutual support within social networks, and it has the effect of adding to the stock of social resources. The book makes a case, therefore, for facilitating the development of social capital by strengthening the capacity of informal caregivers and caregiver groups, and by improving the linkages with formal care organisations.**

### Holland-Frei Cancer Medicine Cloth

John Wiley & Sons **The original reference resource for medical oncologists, radiation oncologists, internists, and allied specialties involved in the treatment of cancer patients, Holland-Frei Cancer Medicine covers the ever-expanding field of current cancer science and clinical oncology practice. In this new ninth edition an outstanding editorial team from world-renowned medical centers continue to hone the leading edge forged in previous editions, with timely information on biology, immunology, etiology, epidemiology, prevention, screening, pathology, imaging, and therapy. Holland-Frei Cancer Medicine, Ninth Edition, brings scientific principles into clinical practice and is a testament to the ethos that innovative, comprehensive, multidisciplinary treatment of cancer patients must be grounded in a fundamental understanding of cancer biology. This ninth edition features hundreds of full color illustrations, photographs, tables, graphs and algorithms that enhance understanding of complex topics and make this text an invaluable clinical tool. Over 15 brand new chapters covering the latest advances, including chapters Cancer Metabolism, Bioinformatics, Biomarker Based Clinical Trial Design, Health Services Research and Survivorship**

bring this comprehensive resource up-to-date. Each chapter contains overview boxes, select references and other pedagogic features, designed to make the content easy to access and absorb. The full list of references for each chapter are available on the free Wiley Companion Digital Edition. Inside this completely updated Ninth Edition you'll find: A translational perspective throughout, integrating cancer biology with cancer management providing an in depth understanding of the disease An emphasis on multidisciplinary, research-driven patient care to improve outcomes and optimal use of all appropriate therapies Cutting-edge coverage of personalized cancer care, including molecular diagnostics and therapeutics Concise, readable, clinically relevant text with algorithms, guidelines and insight into the use of both conventional and novel drugs Free access to the Wiley Companion Digital Edition providing search across the book, full reference list with web links, downloadable illustrations and photographs, and post publication updates to key chapters Edited and authored by an international group of some of the best-known oncologists, cancer researchers, surgeons, pathologists, and other associated specialists in the world, and endorsed by the American Association of Cancer Research Holland-Frei Cancer Medicine offers a genuinely international view of cancer research and clinical oncology practice. Endorsed by the American Association of Cancer Research

## Palliative Care Nursing as Mindfulness

### Embodying a Relational Ethic through Strong Emotion, Uncertainty and Death

Taylor & Francis As nurses, we hear about mindfulness all the time, but what does that actually mean in practice? In this book readers are invited into conversation to explore how mindfulness influences palliative care nurses' approaches to caring for themselves and others through experiences of living-dying. Under the guise of stress reduction and self-care, the assumption often made is that mindfulness can smooth out difficult experiences. Instead, the objective of this inquiry is not to bypass the practice of caring in those spaces that are really hard, but to understand how nurses are working directly within them. Calling out from the shadows—and our bodies—the intensity of palliative care nursing practice arises. In this text, a dialogue unfolds of nurses caring in deeply meaningful practice environments while searching for ground that is perpetually shifting, uncertain, and fraught with suffering and strong emotion. Integrating literature across nursing, sociology, and contemplative scholarship, evocative stories from palliative care nurses lead in this conversation—their words in italics—showing how they are guided into action through connection with-in their bodies. At other times, stories show how nurses are taking pause and drawing on various somatic practices to unravel entanglements that touch on their own humanity. These stories also offer insight into how systemic forces, across educational and organizational institutions, are either enhancing or constraining the way nurses engage mindfulness as a relationally embodied ethic of care. This insightful volume is not a how-to guide, rather it is a timely resource exploring approaches for palliative care nurses to care for themselves and others with mindfulness and compassion. Those seeking nuanced perspectives, particularly in relation to embodying mindfulness through suffering and strong emotion, will be drawn to this text. Qualitative researchers studying emotionally sensitive topics may also find inspiration in the narrative, arts-based, and embodied methods that shape this inquiry.

# Complexity and Values in Nurse Education Dialogues on Professional Education

Taylor & Francis This work explores the interplay of complexity and values in nurse education from a variety of vantages. Contributors, who come from a range of international and disciplinary backgrounds, critically engage important and problematic topics that are under investigated elsewhere. Taking an innovative approach each chapter is followed by one or more responses and, on occasion, a reply to responses. This novel dialogic feature of the work tests, animates, and enriches the arguments being presented. Thought-provoking, challenging, and occasionally rumbustious in tone, this volume has something to say to both nurse educators (who may find cherished practices questioned) and students. Given the breadth and nature of subjects covered the book will also appeal to anyone concerned about and interested in nursing's professional development/trajectory.

## Pediatric Neurocritical Care

Springer Publishing Company Optimal care of children with neurocritical illness often involves multi-specialty collaboration, and recent years have seen a substantial expansion in the availability of data to guide acute care. This book addresses overall approaches to children with neurocritical illness and the management of specific conditions. It offers up-to-date, concise, and clinically relevant guidance to clinicians providing acute care to children with neurologic disorders. Reflecting the spectrum of specialties involved in pediatric neurocritical care, contributors are drawn from the fields of critical care medicine, neurology, neurosurgery, rehabilitation medicine, and many affiliated specialties. The chapters in this book are authored by experts in each individual topic, and co-edited by a neurologist and intensivist to ensure all topics have been fully addressed from both perspectives. The initial chapters focus on assessment and management of common conditions such as coma, headache, and elevated intracranial pressure. The middle chapters cover assessment and management of specific conditions including traumatic brain injury, demyelinating disorders, stroke subtypes, central nervous system disorders, and more. The final chapters of the book address ethical and psychological aspects of acute neurocritical illness. The complete continuum of care is discussed, from assessment, monitoring, and condition-specific management of specific problems through rehabilitation and end of life considerations.
