THE GREAT DISRUPTION

HUMAN NATURE AND THE RECONSTITUTION OF SOCIAL ORDER

An exploration of the nature of social order discusses how the transformation from an industrial to an information society has disrupted moral standards, showing how the disruption will evolve into a Great Reconstruction as age-appropriate values instill themselves. 50,000 first printing.

TRUST

THE SOCIAL VIRTUES AND THE CREATION OF PROSPERITY

Free Press *In his bestselling *The End of History and the Last Man*, Francis Fukuyama argued that the end of the Cold War would also mean the beginning of a struggle for position in the rapidly emerging order of 21st-century capitalism. In *Trust*, a penetrating assessment of the emerging global economic order "after History," he explains the social principles of economic life and tells us what we need to know to win the coming struggle for world dominance. Challenging orthodoxies of both the left and right, Fukuyama examines a wide range of national cultures in order to divine the underlying principles that foster social and economic prosperity. Insisting that we cannot divorce economic life from cultural life, he contends that in an era when social capital may be as important as physical capital, only those societies with a high degree of social trust will be able to create the flexible, large-scale business organizations that are needed to compete in the new global economy.*

A brilliant study of the interconnectedness of economic life with cultural life, Trust is also an essential antidote to the increasing drift of American culture into extreme forms of individualism, which, if unchecked, will have dire consequences for the nation's economic health.

END OF HISTORY AND THE LAST MAN

Simon and Schuster *Ever since its first publication in 1992, The End of History and the Last Man has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, The End of History and the Last Man is a modern classic.*

IDENTITY

CONTEMPORARY IDENTITY POLITICS AND THE STRUGGLE FOR RECOGNITION

Profile Books *Currently in Bill Gates's bookbag and FT Books of 2018 Increasingly, the demands of identity direct the world's politics. Nation, religion, sect, race, ethnicity, gender: these categories have overtaken broader, inclusive ideas of who we are. We have built walls rather than bridges. The result: increasing in anti-immigrant sentiment, rioting on college campuses, and the return of open white supremacy to our politics. In 2014, Francis Fukuyama wrote that American and global institutions were in a state of decay, as the state was captured by powerful interest groups. Two years later, his predictions were borne out by the rise to power of a series of political outsiders whose economic nationalism and authoritarian tendencies threatens to destabilise the entire international order. These populist nationalists seek direct charismatic connection to 'the people', who are usually defined in narrow identity terms that offer an irresistible call to an in-group and exclude large parts of the population as a whole. Identity is an urgent and necessary book: a sharp warning that unless we forge a universal understanding of human dignity, we will doom ourselves to continual conflict.*

REBUILDING COMMUNITIES IN AN AGE OF INDIVIDUALISM

Taylor & Francis *As modern societies become increasingly individualistic, this fascinating book examines how we can maintain and revive local communities and community life. It demonstrates how the major developments and processes of our time, notably globalization, post-industrialism and de-traditionalization, contribute to this individualism to the detriment of community life. The author examines how community is a necessary and important component of human life and discusses possible ways in which to arrest its decline. In this regard, strategies geared to fostering trust and social capital are outlined as the basis for reinvigorating community life. The volume provides a coherent and distinct analysis of community as well as offering concrete policy prescriptions to counter the excessive individualism of our times. In both the nature and scope of its analysis, it offers a*

unique contribution to an extremely important issue in the contemporary period, one that increasingly preoccupies politicians, academics and ordinary citizens.

THE POST-SOVIET DECLINE OF CENTRAL ASIA

SUSTAINABLE DEVELOPMENT AND COMPREHENSIVE CAPITAL

Routledge Sievers draws on his experience of Central Asia to take on the task of explaining the remarkable economic declines of the post-Soviet Central Asian states (Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan) in the past decade, and the turn of these states towards despotism.

DISENCHANTED INDIA AND BEYOND

MUSINGS ON THE LOCKDOWN ALTERNATIVES

Rowman & Littlefield *Disenchanted India and Beyond: Musings on the Lockdown Alternatives* offers radical alternatives for democratic transformation of society to uphold the ideals and values of equality, liberty and justice in India.

THEORIES OF THE INFORMATION SOCIETY

Routledge Information is regarded as a distinguishing feature of our world. Where once economies were built on industry and conquest, we are now part of a global information economy. Pervasive media, expanding information occupations and the development of the internet convince many that living in an Information Society is the destiny of us all. Coping in an era of information flows, of virtual relationships and breakneck change poses challenges to one and all. In *Theories of the Information Society* Frank Webster sets out to make sense of the information explosion, taking a sceptical look at what thinkers mean when they refer to the Information Society, and critically examining the major post-war approaches to informational development. The fourth edition of this classic study brings it up to date with new research and with social and technological changes - from the 'Twitter Revolutions' of North Africa, to financial crises that introduced the worst recession in a life time, to the emergence of social media and blogging - and reassesses the work of key theorists in the light of these changes. More outspoken than in previous editions, Webster urges abandonment of Information Society scenarios, preferring analysis of the informatization of long-established relationships. This interdisciplinary book is essential reading for those trying to make sense of social and technological change in the post-war era. It addresses issues of central concern to students of sociology, politics, geography, communications, information science, cultural studies, computing and librarianship.

A WORLD OF THREE CULTURES

HONOR, ACHIEVEMENT AND JOY

Oxford University Press *In this book, Miguel Basáñez presents a provocative look at the impact of culture on global development. Drawing on data from governments, NGOs, the World Values Survey and more addressing over one hundred countries, he argues that values, as the "building blocks" of culture, are directly related to the speed with which social, cultural and economic development occurs. Basáñez utilizes quantitative survey data to delineate three cultural hyperclusters across the globe: cultures of honor, which prioritize political authority; cultures of achievement, which emphasize economic advancement; and cultures of joy, which focus on social interactions. According to Basáñez, these cultures evolved chronologically, mirroring the development of agrarian, industrial and service societies. He argues that a country's developmental path is profoundly influenced by its people's values and culture, as crystallized through its formal and informal governing institutions. Culture is passed down over generations through families, schools, the media, religious institutions, leadership, and the law. Although culture and values are in a permanent state of evolution, leaders and policymakers can also push cultural change in order to promote desirable goals such as economic growth, democratization, and equality. Over the course of the book, Basáñez introduces two new measures of development: the Objective Development Index (which blends rubrics such as health, education, income, gender equality, political rights and civil liberties, and economic inequality) and the Subjective Development Index (which uses responses to the World Values Survey to classify countries according to their values).*

OUR POSTHUMAN FUTURE

CONSEQUENCES OF THE BIOTECHNOLOGY REVOLUTION

Profile Books *Is a baby whose personality has been chosen from a gene supermarket still a human? If we choose what we create what happens to morality? Is this the end of human nature? The dramatic advances in DNA technology over the last few years are the stuff of science fiction. It is now not only possible to clone human beings it is happening. For the first time since the creation of the earth four billion years ago, or the emergence of mankind 10 million years ago, people will be able to choose their children's' sex, height, colour, personality traits and intelligence. It will even be possible to create 'superhumans' by mixing human genes with those of other animals for extra strength or longevity. But is this desirable? What are the moral and political consequences? Will it mean anything to talk about 'human nature' any more? Is this the end of human beings? Our Posthuman Future is a passionate analysis of the greatest political and moral problem ever to face the human race.*

THE CULTURE OF ACCOUNTABILITY

A DEMOCRATIC VIRTUE

Taylor & Francis *This important book explores the cultural conditions that favour political accountability. It examines the channels through which accountability can be secured and the role that accountability plays in ensuring good governance. In addition to problematizing the notion of accountability, the book suggests that it is the product of three different—albeit, related—processes: taking account of voters' preferences, keeping account of voters' preferences, and giving account of one's performance in office. It further explores the relationship between accountability and political culture by analyzing the relationship between accountability and religion, religious denomination, familism, civicness, secularism and postmaterialism, revealing that the level of accountability is influenced by the diffusion of post-material values and by the level of civicness in a given country. This book will be of key interest to scholars, students, and practitioners in governance, the political economy of institutions and development, democracy, and more broadly to political science, international relations, political theory, comparative politics, sociology, and cultural studies.*

RICH, FREE, AND MISERABLE

THE FAILURE OF SUCCESS IN AMERICA

Rowman & Littlefield Publishers *Compared to much of the rest of the world, America and its citizens are rich. But many people are also deeply miserable—at work, at home, or both. In this provocative book, author John Brueggemann unpacks why so many people are struggling, both emotionally and financially, in a nation that looks so prosperous on the surface. From a hospital patient reduced to a balance sheet to a parent working such long hours that he misses dinner, Brueggemann argues that market thinking has permeated every corner of our lives. In the pursuit of more and better, relationships erode, to the detriment of individuals, communities, and the nation as a whole. Rich, Free, and Miserable not only outlines these pressing social problems, but also offers practical suggestions for people looking to make a positive change.*

THE RISE OF COMMON-SENSE CONSERVATISM

THE AMERICAN RIGHT AND THE REINVENTION OF THE SCOTTISH ENLIGHTENMENT

University of Chicago Press *"In considering the lodestars of American neoconservative thought—among them Irving Kristol, Gertrude Himmelfarb, James Q. Wilson, and Francis Fukuyama—Antti Lepistö makes a compelling case for the centrality of their conception of "the common man" in accounting for the enduring power and influence of their thought. Lepistö locates the roots of this conception in the eighteenth-century Scottish Enlightenment. Subsequently, the neoconservatives weaponized the ideas of Adam Smith, Thomas Reid, and David Hume to denounce*

postwar liberal elites, educational authorities, and social reformers-ultimately giving rise to a defining force in American politics: the "common sense" of "the common man."--

DIMENSIONS OF SUSTAINABLE DEVELOPMENT - VOLUME I

EOLSS Publications *Dimensions of Sustainable Development* is the component of *Encyclopedia of Development and Economic Sciences* in the global *Encyclopedia of Life Support Systems (EOLSS)*, which is an integrated compendium of twenty one *Encyclopedias*. The Theme on *Dimensions of Sustainable Development*, in two volumes, deals with the diversity of points of view on this complex subject. The chapters in these volumes are organized into five groups. The first starts with chapters introducing the general concepts underlying sustainable development. The second treats current and emerging understandings of the general biophysical limits of economic growth and development. The third focuses on the human and social capital requirements for sustainability. The fourth deals with a particular aspect of the organization of human economic and technological activity. The final group discusses something of the diversity of possible approaches to the management of sustainability. These two volumes are aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

DISRUPTION

SUNY Press This book is about the disruption of the intellect that awakens consciousness to its wholeness and purpose. When consciousness is fractured, its world-making powers are momentarily disrupted. In the gap, during which spatio-temporal categories of thought cease to apply, consciousness realigns with that which it is meant to serve. The moment of self-remembering--shocking, unique, and truthful--leaves a call to obedience in its wake. To refuse to respond is to cease to be human.

THE CHALLENGES OF SUSTAINED DEVELOPMENT

THE ROLE OF SOCIO-CULTURAL FACTORS IN EAST-CENTRAL EUROPE

MILLENNIAL CAPITALISM AND THE CULTURE OF NEOLIBERALISM

Duke University Press *The essays in Millennial Capitalism and the Culture of Neoliberalism pose a series of related questions: How are we to understand capitalism at the millennium? Is it a singular or polythetic creature? What are we to make of the culture of neoliberalism that appears to accompany it, taking on simultaneously local and translocal forms? To what extent does it make sense to describe the present juncture in world history as an “age of revolution,” one not unlike 1789–1848 in its transformative potential? In exploring the material and cultural dimensions of the Age of Millennial Capitalism, the contributors interrogate the so-called crisis of the nation-state, how the triumph of the free market obscures rising tides of violence and cultures of exclusion, and the growth of new forms of identity politics. The collection also investigates the tendency of neoliberal capitalism to produce a world of increasing differences in wealth, environmental catastrophes, heightened flows of people and value across space and time, moral panics and social impossibilities, bitter generational antagonisms and gender conflicts, invisible class distinction, and “pariah” forms of economic activity. In the process, the volume opens up an empirically grounded, conceptual discussion about the world-at-large at a particularly momentous historical time—when the social sciences and humanities are in danger of ceding intellectual initiative to the masters of the market and the media. In addition to its crossdisciplinary essays, Millennial Capitalism and the Culture of Neoliberalism—originally the third installment of the journal Public Culture’s “Millennial Quartet”—features several photographic essays. The book will interest anthropologists, political geographers, economists, sociologists, and political theorists. Contributors. Scott Bradwell, Jean Comaroff, John L. Comaroff, Fernando Coronil, Peter Geschiere, David Harvey, Luiz Paulo Lima, Caitrin Lynch, Rosalind C. Morris, David G. Nicholls, Francis Nyamnjoh, Elizabeth A. HENRY KISSINGER AND THE AMERICAN CENTURY

Harvard University Press *What made Henry Kissinger the kind of diplomat he was? What experiences and influences shaped his worldview and provided the*

framework for his approach to international relations? Suri offers a thought-provoking, interpretive study of one of the most influential and controversial political figures of the twentieth century.

NETWORKED INFORMATION TECHNOLOGIES, ELECTIONS, AND POLITICS

KOREA AND THE UNITED STATES

Lexington Books Jongwoo Han's *Networked Information Technologies, Elections, and Politics: Korea and the United States* is a study on the changes that have been occurring in elections, politics, and democratic movements over the past decade. These changes show a paradigm shift in political discourse, from the industrial age mass media-based public sphere to new networked information technologies (NNITs)-based cyber sphere. Han reveals the impacts of NNITs, and discusses how previously apolitical young generations have transformed themselves into a cohesive voting bloc and formidable constituency.

STRATEGY, STRUCTURE AND PERFORMANCE IN A TRANSITION ECONOMY

AN INSTITUTIONAL PERSPECTIVE ON CONFIGURATIONS IN RUSSIA

Springer Science & Business Media Based on the results of 177 survey responses, Tobias Weigl shows that the simple transfer of managerial and organizational skills, techniques, values and culture from developed countries to Russia is a false assumption among academics and practitioners.

CULTURAL POL & ASIAN VALUES

Routledge *Cultural Politics and Asian Values* looks at the political, cultural and religious background of East and Southeast Asian societies and those of 'the West', with a view to seeing how they are affecting contemporary national and international politics: democratization, the international human rights discourse, NGOs and globalization. The book surveys the political history and pre-history of the 'Asian values' debate, taking it up to the era of Megawati Sukarnoputri, Chen Shui-bian and Kim Dae-jung. In chapters on Confucianism, Buddhism, Islam, Christianity and liberalism, Barr explores the histories and conceptual essences of the world religions involved in or affected by the debate.

MARX, CRITICAL THEORY, AND RELIGION

A CRITIQUE OF RATIONAL CHOICE

BRILL *This collection of essays brings together scholars who use frameworks provided by Marx and Critical Theory in analyzing religion. Its goal is to establish a critical theory of religion within sociology of religion as an alternative to rational choice.*

CRIME AND PUBLIC POLICY

Oxford University Press on Demand *Crime and Public Policy* accessibly presents the latest scientific information on the causes of crime and evidence about what does and does not work to control it. With contributions from trusted, leading scholars, on topics such as changing crime rates, sex offenders, sentencing, gangs, and more, James Q. Wilson and Joan Petersilia continue to offer the most comprehensive and balanced guide to how the latest and best social science research informs the understanding of crime and its control for policymakers, community leaders, and students of crime and criminal justice.

ADVANCING SOCIO-ECONOMICS

AN INSTITUTIONALIST PERSPECTIVE

Rowman & Littlefield *This landmark volume takes a first step towards imposing order on the increasingly diverse field of socio-economics by embedding the various disciplines and sub-disciplines in a common core. The distinguished contributors in this volume show how institutions, governance arrangements, societal sectors, organizations, individual actors, and innovativeness are intertwined and, ultimately, how individuals and firms have a high degree of autonomy.*

THE THIRD WAY

GLOBALISATION'S LEGACY

Troubador Publishing Ltd *The Third Way was a phenomenon of the early-mid nineties and was considered to be at the heart of the New Labour strategy that brought the Party to power in 1997. As the Party's popularity begins to wane - albeit after three historical victories - several questions can now be asked: What was the Third Way and where did it come from in terms of its wider historical context? How did it develop as both a political ideology and an electoral strategy? Perhaps more importantly - where did it go and what are the current prospects for any progressive political movement?*

THE [OXFORD] HANDBOOK OF CRIMINOLOGICAL THEORY

Oxford University Press *Criminological theory texts typically follow a conventional format. Diverse writings are neatly packaged into schools of thought, which are given clear labels and conveyed a chapter at a time, with topics like control theory in one chapter and strain theory in another. The Oxford Handbook of Criminological Theory takes a different approach across the criminological landscape. The volume is organized not around schools of thought but around themes that shape much thinking about and research on crime. This more unconventional approach seeks to show that criminological theory is not static but dynamic. In fact, most prominent scholars do not spend their time commenting upon and retesting theoretical propositions that have existed for many years. Rather, they move into more novel areas--areas often located in the interstitial junctures between more traditional theories. This Oxford Handbook presents a series of essays that captures not the past of criminology, but where theoretical explanation is headed. As a result, the volume is replete with new ideas, discussions of substantive topics with salient theoretical implications, and reviews and interpretations of literatures that illuminate promising avenues along which theory and research should evolve. Special attention is paid to how criminal participation is shaped intimately by individual traits, diverse social contexts, the situations in which the choice of crime is made, and exposure to coercive experiences. Each chapter can be read on its own--as furnishing an important analysis of a given theoretical issue--yet read as a whole, The Oxford Handbook of Criminological Theory offers a unique and deep understanding of criminology at its cutting edge.*

TRUST

SELF-INTEREST AND THE COMMON GOOD

Oxford University Press *Trust lies at the very heart of our relationships, our society, and our everyday lives. Kohn's essay consider its connections to a wider complex of factors, including equality, social capital, community, democracy, and health.*

MODERN TECHNOLOGY AND THE HUMAN FUTURE

A CHRISTIAN APPRAISAL

InterVarsity Press *Technology has always shaped human life and our understanding of what it means to be human. But does it actually encourage human flourishing? By exploring the doctrine of the incarnation and what it means for our embodiment, Craig Gay raises concerns about the theological implications of modern technologies and movements such as transhumanism, offering an alternative vision to the path of modern technology.*

THE POLITICS OF DIALOGUE

LIVING UNDER THE GEOPOLITICAL HISTORIES OF WAR AND PEACE

Taylor & Francis *Offering a detailed analysis of post-colonial South Asia, The Politics of Dialogue discusses the creation and impact of borders and the pervasive tension between the new nations. Neither all-out war nor complete peace, this fragile condition makes political leaders and strategists feel claustrophobic - a war produces an end result but peace allows the rulers to carry out their policies for governing along their preferred path of development. The book shows how cartographic, communal and political lines are not only dividing countries, but that they are being replicated within countries, creating new visible and invisible internal frontiers. It argues that, in a situation where geopolitics constrains democracy, the political class becomes incapable of coping with the tension between the inside/outside, eg democracy appears as an internal problem and geopolitics appears as a problem related to the 'outside'.*

BETWEEN ENTERPRISE AND ETHICS

BUSINESS AND MANAGEMENT IN A BIMORAL SOCIETY

Oxford University Press *The author explores the phenomenon of 'bimorality', whereby we live our lives by two contrasting sets of principles, one set by traditional modernity, the other by the modern emphasis on entrepreneurial self-interest. This book sets business within the context of this moral culture.*

A FEMINIST VOYAGE THROUGH INTERNATIONAL RELATIONS

Oxford University Press, USA *J. Ann Tickner is ranked among the most influential scholars of international relations. As one of the founders of the field of feminist international relations, she is also among the most pioneering. 'A Feminist Voyage through International Relations' provides a compendium of Tickner's work as a feminist IR scholar, from the late 1980s through to present day.*

WE ANSWER TO ANOTHER

AUTHORITY, OFFICE, AND THE IMAGE OF GOD

Wipf and Stock Publishers *The quest to escape authority has been a persistent feature of the modern world, animating liberals and Marxists, Westerners and non-Westerners alike. Yet what if it turns out that authority is intrinsic to humanity? What if authority is characteristic of everything we are and do as those created in God's image, even when we claim to be free of it? What if kings and commoners, teachers and students, employers and employees all possess authority? This book argues that authority cannot be identified with mere power, is not to be played off against freedom, and is not a mere social construction. Rather it is resident in an office given us by God himself at creation. This central office is in turn dispersed into a variety of offices relevant to our different life activities in a wide array of communal settings. Far from being a conservative bromide, the call to respect authority is foundational to respect for humanity itself.*

LAW IN EVERYDAY JAPAN

SEX, SUMO, SUICIDE, AND STATUTES

University of Chicago Press *Lawsuits are rare events in most people's lives. High-stakes cases are even less commonplace. Why is it, then, that scholarship about the Japanese legal system has focused almost exclusively on epic court battles, large-scale social issues, and corporate governance? Mark D. West's Law in Everyday Japan fills a void in our understanding of the relationship between law and social life in Japan by shifting the focus to cases more representative of everyday Japanese life. Compiling case studies based on seven fascinating themes—karaoke-based noise complaints, sumo wrestling, love hotels, post-Kobe earthquake condominium reconstruction, lost-and-found outcomes, working hours, and debt-induced suicide—Law in Everyday Japan offers a vibrant portrait of the way law intermingles with social norms, historically ingrained ideas, and cultural mores in Japan. Each example is informed by extensive fieldwork. West interviews all of the participants—from judges and lawyers to defendants, plaintiffs, and their families—to uncover an everyday Japan where law matters, albeit in very surprising ways.*
