**Someone Else's Garden** [HarperCollins UK](#) **A big, intensely involving and evocative Indian novel, with its story of a woman's fight for her place in the world, reminiscent of Khaled Hosseini's 'A Thousand Splendid Suns'. The Sentimental Life of International Law Literature, Language, and Longing in World Politics** [Oxford University Press](#) **The Sentimental Life of International Law is about our age-old longing for a decent international society and the ways of seeing, being, and speaking that might help us achieve that aim. This book asks how international lawyers might engage in a professional practice that has become, to adapt a title of Janet Malcolm's, both difficult and impossible. It suggests that international lawyers are disabled by the governing idioms of international lawyering, and proposes that they may be re-enabled by speaking different sorts of international law, or by speaking international law in different sorts of ways. In this methodologically diverse and unusually personal account, Gerry Simpson brings to the surface international law's hidden literary prose and offers a critical and redemptive account of the field. He does so in a series of chapters on international law's bathetic underpinnings, its friendly relations, the neurotic foundations of its underlying social order, its screened-off comic dispositions, its anti-method, and the life-worlds of its practitioners. Finally, the book closes with a chapter in which international law is re-envisioned through the practice of gardening. All of this is put forward as a contribution to the project of making international law, again, a compelling language for our times. **No One Gardens Alone A Life of Elizabeth Lawrence** [Beacon Press](#) **No One Gardens Alone** tells for the first time the story of Elizabeth Lawrence (1904-1985). Like classic biographies of Emily Dickinson and Edna St. Vincent Millay, this fascinating book reveals Lawrence in all her complexity and establishes her, at last, as one of the premier gardeners and gardening writers of the twentieth century. "In this first biography of the renowned gardening writer Elizabeth Lawrence, Emily Herring Wilson reminds us that even quiet lives hold unsuspected passions. Written with graceful clarity, sensitivity, and empathy, this life is a perennial."--Linda H. Davis, author of *Onward and Upward: A Biography of Katharine S. White*

**Elizabeth Lawrence (1904-1985)** lived a singular, often contradictory life. She was a traditional southerner; a successful, independent garden writer with her own newspaper column and numerous books to her credit; a dutiful daughter who cared for her elders and lived with her mother; a landscape architect; a passionate poet; a friend of literary figures like Eudora Welty and Joseph Mitchell; and a very private woman whose recently discovered letters illuminate aspects of her mystery. Lawrence earned many fans during her lifetime and gained even more after her death with the reissue of many of her classic books. When Emily Herring Wilson edited a collection of letters between Lawrence and famed New Yorker editor Katharine S. White in *Two Gardeners*, she found legions of readers who were eager to know more about the legendary Lawrence. Now, one hundred years after her birth, **No One Gardens Alone** tells for the first time the story of this fascinating woman. Like classic biographies of literary figures such as Emily Dickinson and Edna St. Vincent Millay, this book reveals Lawrence in all her complexity and establishes her, at last, as one of the premier gardeners and garden writers of the twentieth century.

It shows how gardens in each period were designed and cultivated. Evidence for garden art and horticulture is gathered from surviving examples of ancient art, literature, archaeology, actual period gardens that have survived the centuries and the wealth of garden myths associated with certain plants. These sources bring ancient gardens and their gardeners back to life, and provide information on which plants were chosen as garden worthy, their setting and the design and appearance of ancient gardens. Deities associated with aspects of gardens and the garden's fertility are featured - everyone wanted a fertile garden. Different forms of public and domestic gardens are explored, and the features that you would find there; whether paths, pools, arbors and arches, seating or decorative sculpture. The ideal garden could be like the Greek groves of the Academy in Athens, a garden so fine that it was comparable with that of the mythical king Alcinoos, the paradise contemplated by the Islamic world, or a personal version of a garden of Eden that Early Christians could create for themselves or in the forecourt of their churches. In general books on garden history cover all periods up to the present, often placing all ancient gardens in one chapter at the beginning. But there is so much of interest to be found in these early millennia. Generously illustrated with 150 images, with plant lists for each period, this is essential reading for everyone interested in garden history and ancient societies. **House & Garden A Garden of Fragrance** [ReganBooks](#) A lushly illustrated guide to garden fragrance puts the smell back into garden and landscape design, arguing that scent is as important as color in creating a "sensual" garden.
