Navigating Public Opinion

Polls, Policy, and the Future of American Democracy

Oxford University Press Do politicians listen to the public? How often and when? Or are the views of the public manipulated or used strategically by political and economic elites? Navigating Public Opinion brings together leading scholars of American politics to assess and debate these questions. It describes how the relationship between opinion and policy has changed over time; how key political actors use public opinion to formulate domestic and foreign policy; and how new measurement techniques might improve our understanding of public opinion in contemporary polling and survey research. The distinguished contributors shed new light on several long-standing controversies over policy responsiveness to public opinion. Featuring a new analysis by Robert Erikson, Michael MacKuen, and James Stimson that builds from their pathbreaking work on how public mood moves policy in a macro-model of policymaking, the volume also includes several critiques of this model by Lawrence Jacobs and Robert Shapiro, another critique by G. William Domhoff, and a rejoinder by Erikson and his coauthors. Other highlights include discussions of how political elites, including state-level policymakers, presidents, and makers of foreign policy, use (or shape) public opinion; and analyses of new methods for measuring public opinion such as survey-based experiments, probabilistic polling methods, non-survey-based measures of public opinion, and the potential and limitations of Internet polls and surveys. Introductory and concluding essays provide useful background context and offer an authoritative summary of what is known about how public opinion influences public policy. A must-have for all students of American politics, public opinion, and polling, this state-of-the-art collection addresses issues that lie at the heart of democratic governance today.

Japan and the Global Automotive Industry

Cambridge University Press The Japanese automotive industry enjoyed spectacular success in the 1980s. This was largely due to the so-called 'Lean Production System' - the combination of an efficient production system, an effective supplier system, and a product development system. In the 1990s the industry fell on hard times because of the Japanese asset price bubble and extreme currency appreciation. In this book, eminent industry specialist Koichi Shimokawa draws on his thirty years of research and fieldwork with Japanese and American firms, to show how the Japanese automotive industry has managed to recover from this difficult period. He shows how firms like Toyota were able to transfer Japanese systems to overseas plants and how they have changed in order to compete in increasingly globalized markets. In addition, the book also addresses the two major challenges to the current industry model: the rise of China and the environmental and energy supply situation.

M.i.a. Angels

Createspace Independent Publishing Platform Each "Missing In Action (M.I.A.) Angel" assignment is to be with someone who is willing to give their life in combat to protect or save others. Some just need that additional bit of help to survive, while others need the presence of an "M.I.A. Angel" as they approach death. It's not easy being an "M.I.A. Angel" although it is many times rewarding. The downside it that sometimes there is nothing that can be done to help, other than the assignment knowing that an angel is with them when they die.
