Challenges to Military Spouse Employment and Education

Minnesota Historical Society This research confirms that, while many spouses of military service members work and seek education similar to their "look-alike" civilian counterparts, they often lag these equals in terms of finding jobs and receiving comparable pay. Based on the input of more than 1,100 military spouses concerning their employment and educational pursuits as well as other data analysis, the RAND researchers offer recommendations for the Department of Defense to improve quality-of-life issues for its members and spouses, which in the long run will help the department retain the qualified personnel it needs.

From Work-Family Balance to Work-Family Interaction

Changing the Metaphor

Routledge There are many lessons to be learned about work-family interaction. It is clear that some people have learned how to combine work and family in ways that are mutually supporting--at least much of the time--and some employers have created work environments and policies that make positive interdependence of these two spheres more likely to occur. This book discusses measures of work-family, conflict, policies designed to reduce conflict, comparisons with other industrialized nations, and reasons why family-friendly work-policies have not been adopted with enthusiasm. The purpose is to consider a broad range of topics that pertain to work and family with the goal of helping employers and working families understand the work-life options that are available so they can make choices that offer returns-on-investments to employers, families, and society at large that are consistent with personal and societal values. This book brings together a superb panel of experts from different disciplines to look at work and family issues and the way they interact. Part I is an overview--with a brief discussion by a psychologist, economist, and a political scientist--each of whom provide their own interpretation of how their discipline views this hybrid field. Part II considers the business case of the question of why employers should invest in family-friendly work policies, followed by a section on the employer response to work family interactions. Families are the focus of the Part IV, followed by a look at children--many of whom are at the heart of work and family interaction.

American Military Communities in West Germany

Life in the Cold War Badlands, 1945-1990

McFarland *On April 28, 1946, a small group of American wives and children arrived at the port of Bremerhaven, West Germany, the first of thousands of military family members to make the trans-Atlantic journey. They were the basis of a network of military communities--"Little Americas"--that would spread across the postwar German landscape. During a 45-year period which included some of the Cold War's tensest moments, their presence confirmed America's resolve to maintain Western democracy in the face of the Soviet threat. Drawing on archival sources and personal narratives, this book explores these enclaves of Americanism, from the U.S. government's perspective to the grassroots view of those who made their homes in Cold War Europe. These families faced many challenges in balancing their military missions with their daily lives during a period of dynamic global change. The author describes interaction in American communities that were sometimes separated, sometimes connected with their German neighbors.*
