## WHO Guidelines for Indoor Air Quality

### Dampness and Mould

**WHO Regional Office Europe Microbial pollution is a key element of indoor air pollution. It is caused by hundreds of species of bacteria and fungi, in particular filamentous fungi (mould), growing indoors when sufficient moisture is available. This document provides a comprehensive review of the scientific evidence on health problems associated with building moisture and biological agents. The review concludes that the most important effects are increased prevalences of respiratory symptoms, allergies and asthma as well as perturbation of the immunological system. The document also summarizes the available information on the conditions that determine the presence of mould and measures to control their growth indoors. WHO guidelines for protecting public health are formulated on the basis of the review. The most important means for avoiding adverse health effects is the prevention (or minimization) of persistent dampness and microbial growth on interior surfaces and in building structures. [Ed.]**

## The Biology and Behavioral Basis for Smoking-attributable Disease : a Report of the Surgeon General

**U.S. Government Printing Office This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes**

diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

## Research and Indigenous Peoples

**Bloomsbury Publishing 'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. The star of his college's basketball team and now gone pro, he's more concerned with the dirt on his shoe than on me. I saw him. I heard him. The things that he did, and the deeds that he hid. For years, I bit my nails, unable to look away. Now, I've graduated high school and moved on to college, but I haven't stopped watching Michael. He's back, and the dirt I've seen isn't content to stay in my head anymore...Michael. Her name is Erika Fane, but everyone calls her Rika. My brother's girlfriend grew up hanging
