LITERACY IN PRACTICE

WRITING IN PRIVATE, PUBLIC, AND WORKING LIVES

Routledge The rise of New Literacy Studies and the shift from studying reading and writing as a technical process to examining situated literacies—what people do with literacy in particular social situations—has focused attention toward understanding the connections between reading and writing practices and the broader social goals and cultural practices these literacy practices help to shape. This collection brings together situated research studies of literacy across a range of specific contexts, covering everyday, educational, and workplace domains. Its contribution is to provide, through an empirical framework, a larger cumulative understanding of literacy across diverse contexts.

TEACHING EMERGENT BILINGUAL STUDENTS

FLEXIBLE APPROACHES IN AN ERA OF NEW STANDARDS

Guilford Publications Recent educational reform initiatives such as the Common Core State Standards (CCSS) largely fail to address the needs--or tap into the unique resources--of students who are developing literacy skills in both English and a home language. This book discusses ways to meet the challenges that current standards pose for teaching emergent bilingual students in grades K-8. Leading experts describe effective, standards-aligned instructional approaches and programs expressly developed to promote bilingual learners' academic vocabulary, comprehension, speaking, writing, and content learning. Innovative policy recommendations and professional development approaches are also presented.

INTERPERSONAL RELATIONSHIPS IN EDUCATION: FROM THEORY TO PRACTICE

Springer This book brings together recent research on interpersonal relationships in education from a variety of perspectives including research from Europe, North America and Australia. The work clearly demonstrates that positive teacher-student relationships can contribute to student learning in classrooms of various types. Productive learning environments are characterized by supportive and warm interactions throughout the class: teacher-student and student-student. Similarly, at the school level, teacher learning thrives when there are positive and mentoring interrelationships among professional colleagues. Work on this book began with a series of formative presentations at the second International Conference on Interpersonal Relationships in Education (ICIRE 2012) held in Vancouver, Canada, an

event that included among others, keynote addresses by David Berliner, Andrew Martin and Mieke Brekelmans. Further collaboration and peer review by the editorial team resulted in the collection of original research that this book comprises. The volume (while eclectic) demonstrates how constructive learning environment relationships can be developed and sustained in a variety of settings. Chapter contributions come from a range of fields including educational and social psychology, teacher and school effectiveness research, communication and language studies, and a variety of related fields. Together, they cover the important influence of the relationships of teachers with individual students, relationships among peers, and the relationships between teachers and their professional colleagues.

IPRACTICE

TECHNOLOGY IN THE 21ST CENTURY MUSIC PRACTICE ROOM

Essential Music Technology: Th This book provides new practical tools that bridge the gap between familiar, easy-to-use technology and musical practice to enhance musicianship and motivate students. Authors Jennifer Mishra and Barbara Fast provide ideas for use with students of all levels, from beginners to musicians performing advanced repertoire. This book is written for teachers (both studio teachers and ensemble directors), but can be read by performers to help give new guidance to their own practice sessions. Some strategies in this book would not have been possible without advances in technology; others expand tried-and-true practice strategies with the use of technology. Most of the technologies discussed are free or inexpensive and don't require extensive specialist equipment or learning. Rather than replacing quality practice strategies, technology brings new tools to the practicing tool box. The strategies lay the foundation for how technology can be used in the practice room and are intended to spark creativity. The book encourages teachers and students to vary the integration of practice strategies with technology in personal ways to fit their own studios or practice routines. This book is all about exploring our musical practice through technology. The ideas in this book will invigorate your musical practice and lead to even more creativity between you and your students
