THE SELF IN SOCIAL JUDGMENT

Psychology Press The volume begins with a historical overview of the self in social judgment and outlines the major issues. Subsequent chapters, all written by leading experts in their respective areas, identify and elaborate four major themes regarding the self in social judgment: · the role of the self as an information source for evaluating others, or what has been called 'social projection' · the assumption of personal superiority as reflected in the pervasive tendency for people to view their characteristics more favorably than those of others · the role of the self as a comparison standard from or toward which other people's behaviors and attributes are assimilated or contrasted · the relative weight people place on the individual and collective selves in defining their attributes and comparing them to those of other people

HANDBOOK OF SELF AND IDENTITY

Guilford Press Widely regarded as the authoritative reference in the field, this volume comprehensively reviews theory and research on the self. Leading investigators address this essential construct at multiple levels of analysis, from neural pathways to complex social and cultural dynamics. Coverage includes how individuals gain self-awareness, agency, and a sense of identity; self-related motivation and emotion; the role of the self in interpersonal behavior; and self-development across evolutionary time and the lifespan. Connections between self-processes and psychological problems are also addressed. **New to This Edition** *Incorporates significant theoretical and empirical advances. *Nine entirely new chapters. *Coverage of the social and cognitive neuroscience of self-processes; self-regulation and health; self and emotion; and hypoegeic states, such as mindfulness.

AN INTERNATIONAL APPROACH

THE PSYCHOLOGY OF THE SOCIAL SELF

Psychology Press Leading theoreticians and researchers present current thinking about the role played by group memberships in people's sense of who they are and what they are worth. The chapters build on the assumption, developed out of social identity theory, that people create a social self that both defines them and shapes their

attitudes and behaviors. The authors address new developments in the theoretical frameworks through which we understand the social self, recent research on the nature of the social self, and recent findings about the influence of social context upon the development and maintenance of the social self.

DEVELOPING THE VIRTUES

INTEGRATING PERSPECTIVES

Oxford University Press Ethicists and psychologists have become increasingly interested in the development of virtue in recent years, approaching the topic from the perspectives of virtue ethics and developmental psychology respectively. Such interest in virtue development has spread beyond academia, as teachers and parents have increasingly striven to cultivate virtue as part of education and child-rearing. Looking at these parallel trends in the study and practice of virtue development, the essays in this volume explore such questions as: How can philosophical work on virtue development inform psychological work on it, and vice versa? How should we understand virtue as a dimension of human personality? What is the developmental foundation of virtue? What are the evolutionary aspects of virtue and its development? How is virtue fostered? How is virtue exemplified in behavior and action? How is our conception of virtue influenced by context and by developmental and social experiences? What are the tensions, impediments and prospects for an integrative field of virtue study? Rather than centering on each discipline, the essays in this volume are organized around themes and engage each other in a broader dialogue. The volume begins with an introductory essay from the editors that a wide-angle view of the fuller range of philosophical and empirical issues that have surrounded the notion of virtue in recent years.

THE SOCIAL SELF

COGNITIVE, INTERPERSONAL AND INTERGROUP PERSPECTIVES

Psychology Press What is the nature of the 'self', how do everyday experiences shape it, and how does it influence our thinking, judgements and behaviors? Such questions constitute enduring puzzles in psychology, and are also of critical practical importance for applied domains such as clinical, counseling, educational and organizational psychology. In this book a select group of eminent international researchers survey the most recent advances in research of the self. In particular, they discuss the influence of cognitive and intra-psychic processes (Part 1), interpersonal and relational variables (Part 2), and inter-group phenomena on the self (Part 3).

RESEARCH ON JUDGMENT AND DECISION MAKING

CURRENTS, CONNECTIONS, AND CONTROVERSIES

Cambridge University Press This book offers an overview of recent research on the psychology of judgment and decision making, the field that investigates the processes by which people draw conclusions, reach evaluations, and make choices. An introductory, historically oriented chapter provides a way of viewing the overall structure of the field, its recent trends, and its possible directions. Subsequent sections present significant recent papers by prominent researchers, organized to reveal the currents, connections, and controversies that animate the field. Current trends in the field are illustrated with papers from ongoing streams of research. The papers on "connections" explore memory, explanation and argument, affect, attitudes, and motivation. Finally, a section on "controversies" presents problem representation, domain knowledge, content specificity, rule-governed versus rule-described behavior, and proposals for radical departures and new beginnings in the field. Students and researchers in psychology who have an interest in cognitive processes will find this text to be rewarding reading.

HANDBOOK OF BRAND RELATIONSHIPS

Routledge Brand relationships are critical because they can enhance company profitability by lowering customer acquisition and retention costs. This is the first serious academic book to offer a psychological perspective on the meaning of and basis for brand relationships, as well as their effects. "The Handbook of Brand Relationships" includes chapters by well-known marketing and psychology scholars on topics related to the meaning, significance, and measurement of brand relationships; the critical connections between consumers and the brand; how brand relationships are formed through both thoughtful and non-thoughtful processes; and how they are built, repaired, and leveraged through brand extensions. An integrative framework introduces the book and summarizes the chapters' key ideas. The handbook also identifies several novel metrics for measuring various aspects of brand relationships, and it includes recommendations for further research.

RESOURCES IN EDUCATION

ASSESSMENT, LEARNING AND JUDGEMENT IN HIGHER EDUCATION

Springer Science & Business Media There has been a remarkable growth of interest in the assessment of student learning and its relation to the process of learning in higher education over the past ten years. This interest has been expressed in various ways - through large scale research projects, international conferences, the development of principles of assessment that supports learning, a growing awareness of the role of feedback as an integral part of the learning process, and the publication of exemplary assessment practices. At the same time, more limited attention has been given to the underlying nature of assessment, to the concerns that arise when assessment is construed as a measurement process, and to the role of judgement in evaluating the quality of students' work. It is now timely to take stock of some of the critical concepts that underpin our understanding of the multifarious relationships between

assessment and learning, and to explicate the nature of assessment as judgement. Despite the recent growth in interest noted above, assessment in higher education remains under-conceptualized. This book seeks to make a significant contribution to conceptualizing key aspects of assessment, learning and judgement.

STUDIES IN SOCIAL IDENTITY

Greenwood

THE SOCIAL DEVELOPMENTAL CONSTRUCTION OF VIOLENCE AND INTERGROUP CONFLICT

Springer This book describes how the violent dimension of intergroup relations can be better understood if the interplay between psychological and social-developmental factors is taken into account. Ten unique, innovative and original chapters by international scholars of social and developmental psychology address the way how social reality is constructed as a hierarchical order, and how social norms, beliefs and cognitive-behavioral patterns are learned,

shared and repeatedly processed on how to uphold or challenge this social order. The volume covers diverse issues such as the effects (or lack thereof) of power and violent video games on people's thinking and behavior, the acquisition of social norms and attitudes during childhood, minorities' identity management strategies, the role of mothers' educational beliefs and the impact of ideologies. This volume is inspired by the oeuvre of Maria Benedicta Monteiro, emphasizing the psychogenetic and sociogenic diacronies that are too often neglected by the predominantly synchronic paradigm of social psychology. It is therefore an indispensable reading for researchers and advanced students in social, community and developmental psychology, for scientifically interested practitioners working with families, school contexts or intergroup conflict, and for everyone interested in the expanding field of the social developmental approaches to attitudes and behaviour.

THE POLITICS OF JUDGMENT

AESTHETICS, IDENTITY, AND POLITICAL THEORY

Lexington Books This innovative and theoretically sophisticated book investigates how aesthetic judgment forms the groundwork for understanding political identities. It posits aesthetics as central to conceptions of politics that are based on how people understand the relationship between themselves and larger communities. Ferguson focuses not only on how different theoretical conceptions of political judgment relate to one another, but also on their historical development and potential meaning for contemporary scholarship across the humanities and social sciences. Drawing on recent contributions to philosophy, economics, cultural studies, feminism, psychology, and anthropology, *The Politics of Judgment* demonstrates how modern political identities depend upon and are formed by aesthetic judgment. Political theorists, social scientists, philosophers and cultural critics will find this book especially useful, though general readers will also be attracted by the author's keen insight into contemporary political questions.

EXPERIMENTAL APPROACHES TO THE STUDY OF CHARITY

Psychology Press Americans donate over 300 billion dollars a year to charity, but the psychological factors that govern whether to give, and how much to give, are still not well understood. Our understanding of charitable giving is based primarily upon the intuitions of fundraisers or correlational data which cannot establish causal relationships. By contrast, the chapters in this book study charity using experimental methods in which the variables of interest are experimentally manipulated. As a result, it becomes possible to identify the causal factors that underlie giving, and to design effective intervention programs that can help increase the likelihood and amount that people contribute to a cause. For charitable organizations, this book examines the efficacy of fundraising strategies commonly used by nonprofits and makes concrete recommendations about how to make capital campaigns more efficient and effective. Moreover, a number of novel factors that influence giving are identified and explored, opening the door to exciting new avenues in fundraising. For researchers, this book breaks novel theoretical ground in our understanding of how charitable decisions are made. While the chapters focus on applications to charity, the emotional, social, and cognitive

mechanisms explored herein all have more general implications for the study of psychology and behavioral economics. This book highlights some of the most intriguing, surprising, and enlightening experimental studies on the topic of donation behavior, opening up exciting pathways to cross-cutting the divide between theory and practice.

GARDENS AND THE PASSION FOR THE INFINITE

Springer Science & Business Media What essentially is a garden? Is it a small plot of land that we put aside to cultivate our favorite vegetables or to grow flowers for our personal enjoyment? Or is it a symbol, a mirror, a reflection of our human passions? The topic of the present volume is the mysterious ways in which Imaginatio Creatix plays within the human ingrownness in natural life, transposing dreams, nostalgias, and enchantments.

CONSUMING KNOWLEDGE: STUDYING KNOWLEDGE USE IN LEISURE AND WORK ACTIVITIES

Springer Science & Business Media It is difficult to overstate the importance of personal consumption both to individual consumers and to the economy. While consumers are recognized as valuing market goods and services for the activities they can construct from them in the frameworks of several disciplines, consequences of the characteristics of goods and services they use in these activities have not been well studied. In the discourse to follow, I will contrast knowledge-yielding and conventional goods and services as factors in the construction of activities that consumers engage in when they are not in the workplace. Consumers will be seen as deciding on non-work activities and the inputs to these activities according to their objectives, and the values and cumulated skills they hold. I will suggest that knowledge content in these activities can be efficient for consumer objectives and also have important externalities through its effect on productivity at work and economic growth. The exposition will seek to elaborate these points and contribute to multi disciplinary dialogue on consumption. It takes as its starting point the contention that consumption is simultaneously an economic and social psychological process and that integration of content can contribute to explanation.

THE STUDENT'S GUIDE TO SOCIAL NEUROSCIENCE

Psychology Press Social neuroscience is a rapidly growing field which explains, using neural mechanisms, our ability to recognize, understand, and interact with others. Concepts such as trust, revenge, empathy, prejudice, and love are now being explored and unravelled by neuroscientists. This engaging and cutting-edge text provides an accessible introduction to the complex methods and concepts of social neuroscience, with examples from contemporary research and a blend of different pedagogical features helping students to engage with the material, including essay questions, summary and key points, and further reading suggestions. The second edition of this ground-breaking text has been thoroughly revised and expanded to reflect the growing volume of evidence and theories in the field. Notable additions include a greater emphasis on genetics and hormones, and the expansion of topics such as cultural neuroscience, emotion regulation, biological markers of autism, power and status, social categorization, and new accounts of mirror neuron functioning. The book is supported by a fully updated companion website, featuring student resources including lecture recordings, multiple choice questions and useful web links, as well as PowerPoint slides for lecturers. Richly illustrated in attractive full-color, with figures, boxes, and 'real-world' implications of research, this text is the ideal introduction to the field for both undergraduate and postgraduate students in fields such as psychology and neuroscience.

THE PALGRAVE HANDBOOK OF SOCIAL CREATIVITY RESEARCH

Springer This Handbook brings together an international cast of experts to explore the social nature and context of creativity studies, focusing on methodology as a key component in advancing the social study of creativity. Two decades on from the pioneering work of Alfonso Montuori and Ronald E. Purser, the authors present a timely appraisal of past and present work in social creativity studies, and look ahead to future developments within this field. The authors collectively offer a rigorous examination of the methodological and empirical issues and techniques involved in studying social creativity. They examine the phenomenon as a form of communication and interaction within collaborative relationships; contending that creativity happens not within a vacuum but instead from a nexus of personal, social and contextual influences. This comprehensive work is organized in three parts, focusing first on the various methodological approaches applicable to the social in creativity studies. It secondly turns to empirical findings and approaches relating to the social nature of creativity. In the book's final part, the authors offer reflections on the state of social research into creativity, pinpointing areas requiring further methodological scrutiny and empirical verification, and areas that may inspire further theoretical or applied work. Combining classic ideas with cutting-edge, emerging methods, this work provides a vital methodological 'toolbox' for investigators within social creativity.

THE SOCIALLY RESPONSIVE SELF

SOCIAL THEORY AND PROFESSIONAL ETHICS

University of Chicago Press Larry May argues that socially responsive individuals need not be self-sacrificing or overly conscientious. According to May, a person's integrity and moral responsibility are shaped and limited not just by conscience but also by socialization and moral support from the communities to which he or she belongs. Applying his theory of responsibility to professional ethics, May contends that current methods of professional socialization should be changed so that professionals are not expected to ignore considerations of personal well-being, family, or community. For instance, lawyers should not place client loyalty above concerns for the common good; doctors should not place the physical well-being of patients above their mental and spiritual well-being; scientists and engineers should not feel obliged to blow the whistle on fraud and corruption unless their professional groups protect them from retaliation. This book should prove provocative reading for philosophers, political scientists, social theorists, professionals of many stripes, and ethicists.

ADVANCES IN IDENTITY THEORY AND RESEARCH

Springer Science & Business Media This volume is presented in four sections based on recent research in the field: the sources of identity, the tie between identity and the social structure, the non-cognitive outcomes - such as emotional - of identity processes, and the idea that individuals have multiple identities. This timely work will be of interest to social psychologists in sociology and psychology, behavioral scientists, and political scientists.

HANDBOOK OF SOCIAL COMPARISON

THEORY AND RESEARCH

Springer Science & Business Media Comparison of objects, events, and situations is integral to judgment; comparisons of the self with other people comprise one of the building blocks of human conduct and experience. After four decades of research, the topic of social comparison is more popular than ever. In this timely handbook a distinguished roster of researchers and theoreticians describe where the field has been since its development in the early 1950s and where it is likely to go next.

NEUROSCIENCE AND PHILOSOPHY

MIT Press Philosophers and neuroscientists address central issues in both fields, including morality, action, mental illness, consciousness, perception, and memory. Philosophers and neuroscientists grapple with the same profound questions involving consciousness, perception, behavior, and moral judgment, but only recently have the two disciplines begun to work together. This volume offers fourteen original chapters that address these issues, each written by a team that includes at least one philosopher and one neuroscientist who integrate disciplinary perspectives and reflect the latest research in both fields. Topics include morality, empathy, agency, the self, mental illness, neuroprediction, optogenetics, pain, vision, consciousness, memory, concepts, mind wandering, and the neural basis of psychological categories. The chapters first address basic issues about our social and moral lives: how we decide to act and ought to act toward each other, how we understand each other's mental states and selves, and how we deal with pressing social problems regarding crime and mental or brain health. The following chapters consider basic issues about our mental lives: how we classify and recall what we experience, how we see and feel objects in the world, how we ponder plans and alternatives, and how our brains make us conscious and create specific mental states.
