**CONTEXTUALISING ISLAM IN PSYCHOLOGICAL RESEARCH** IJUM PRESS This book is intended to present a compilation of research that has incorporated the Islamic philosophical, theoretical, and historical perspective with the concepts, theories, and methods in psychology. While the relationship between Islam, research, and psychology has been studied previously, the effort to incorporate, integrate, and use Islamic resources to examine phenomena related to psychology through rigorous scientific methods has been found to be lacking among Muslim researchers. The present book, therefore, is an attempt to meet this need by incorporating the Islamic perspective in the conduct of research in psychology. It is also an attempt to contextualize Islam in the current efforts in research on psychology so that we can better understand the religion, both as an established way of life and as a model of scientific inquiry. Finally, the remaining chapters are dedicated to the discussion of the conceptual and strategic way forward for research in specific areas of psychology. In doing so, both the rationale and practicalities of incorporating, integrating, and utilizing Islamic resources in research on psychology have been provided. **Bangladesh BRILL** This study, done within the comprehensive Weberian framework, focuses on religion and social change in Bangladesh through an imaginative use of qualitative as well as quantitative methods of modern social research. It first provides a sociological interpretation of the origin and development of Islam in Bengal using historical and literary works on Bengal. The main contribution is based on two sample surveys conducted by Mrs. Banu in 20 villages of Bangladesh and in three areas in the metropolitan Dhaka city. Using these survey data, she gives a sociological analysis of Islamic religious beliefs and practices in contemporary Bangladesh, and more importantly, she studies the impact of the Islamic religious beliefs on the socio-economic development and political culture in present-day Bangladesh. She also shows how Islam compares with modern education in social 'transforming capacity'. This careful and rigorous work is a notable contribution to sociology of religion and helps to deepen our understanding of the interactions between religious and social changes common to many parts of the Third World.

**Daily Skill-Builders: Social Studies 4-5 Walch Publishing** Sharing and Hiding Religious Knowledge in Early Judaism, Christianity, and Islam Walter de Gruyter GmbH & Co KG Few studies focus on the modes of knowledge transmission (or concealment), or the trends of continuity or change from the Ancient to the Late Antique worlds. In Antiquity, knowledge was cherished as a scarce good, cultivated through the close teacher-student relationship and often preserved in the closed circle of the initiated. From Assyrian and Babylonian cuneiform texts to a Shi'ite Islamic tradition, this volume explores how and why knowledge was shared or concealed by diverse communities in a range of Ancient and Late Antique cultural contexts. From caves by the Dead Sea to Alexandria, both normative and heterodox approaches to knowledge in Jewish, Christian and Muslim communities are explored. Biblical and qur'anic passages, as well as gnostic, rabbinic and esoteric Islamic approaches are discussed. In this volume, a range of scholars from Assyrian studies to Jewish, Christian and Islamic studies examine diverse approaches to, and modes of, knowledge transmission and concealment, shedding new light on both the interconnectedness, as well as the unique aspects, of the monotheistic faiths, and their relationship to the ancient civilisations of the Fertile Crescent. U.S. Geological Survey Bulletin Drawing Louisiana's New Map Addressing Land Loss in Coastal Louisiana [National Academies Press](#) During the past 50 years, coastal Louisiana has suffered catastrophic land loss due to both natural and human causes. This loss has increased storm vulnerability and amplified risks to lives, property, and economies--a fact underscored by Hurricanes Katrina and Rita. Drawing Louisiana's New Map reviews a restoration plan proposed by the U.S. Army Corps of Engineers and the State of Louisiana, finding that, although the individual projects in the study are scientifically sound, there should be more and larger scale projects that provide a comprehensive approach to addressing land loss over such a large area. More importantly, the study should be guided by a detailed map of the expected future landscape of coastal Louisiana that is developed from agreed upon goals for the region and the nation.
