The Intelligibility of Native and Non-Native English Speech Cuvillier Verlag The purpose**

of this study is to measure the intelligibility of Cameroon English speech to British and American English speakers and vice versa, and to analyse the major causes of intelligibility failure when speakers of these varieties of English interact. Focus is on segmental and supra-segmental phonology. The study was motivated by a number of concerns: the trepidation nursed by some scholars that the emergence of non-native varieties around the world would cause English to disintegrate into mutually unintelligible varieties in the way Romance languages devolved from their Latin ancestors; the fact that previous studies on intelligibility were centred on the traditional approach which considers non-native varieties of English to be deficient, and not different from native varieties and the debate on the level of phonological analysis that is considered the greatest threat to intelligibility between native and non-native speakers. Five tests were designed for the study, namely Test I (connected speech), Test II (reading passage), Test III (phonemic contrast elicitation), Test IV (nucleus placement in words) and Test V (nucleus placement in sentences)

**Building Cultural Competence Innovative Activities and Models Stylus Publishing, LLC** For HR directors, corporate trainers, college administrators, diversity trainers and study abroad educators, this book provides a cutting-edge framework and an innovative collection of ready-to-use tools and activities to help build cultural competence—from the basics of understanding core concepts of culture to the complex work of negotiating identity and resolving cultural differences. Building Cultural Competence presents the latest work in the intercultural field and provides step-by-step instructions for how to effectively work with the new models, frameworks, and exercises for building learners' cultural competence. Featuring fresh activities and tools from experienced coaches, trainers, and facilitators from around the globe, this collection of over 50 easy-to-use activities and models has been used successfully worldwide in settings that range from Fortune 500 corporations to the World Bank, non-profits, and universities. Learn updates on classic models like the DIE (Description, Interpretation, Evaluation) framework and the U-Curve model of adjustment. Engage in new exercises to help build intercultural competence, using the practical step-by-step guidance on how to effectively facilitate these activities. Stay relevant and have positive impact with clients, organizations, and students with these well-organized, easy-to-implement, and high impact collection of frameworks, models, and activities. The new, research-based models work for developing cultural competence in any environment, and for designing effective cultural competence courses. Education abroad administrators will be able to use these activities in their pre-departure orientations for students going abroad. Corporate human resource professionals will find these activities invaluable in cultural competence building programs.

**How to Use Corpora in Language Teaching John Benjamins Publishing** After decades of being overlooked, corpus evidence is becoming an important component of the teaching and learning of languages. Above all, the profession needs guidance in the practicalities of using corpora, interpreting the results and applying them to the problems and opportunities of the classroom. This book is intensely practical, written mainly by a new generation of language teachers who are acknowledged experts in central aspects of the discipline. It offers advice on what to do in the classroom, how to cope with teachers' queries about language, what corpora to use including learner corpora and spoken corpora and how to handle the variability of language; it reports on some current research and explains how the access software is constructed, including an opportunity for the practitioner to write small but useful programs; and it takes a look into the future of corpora in language teaching.

**Modeling, Learning, and Processing of Text-Technological Data Structures Springer Science & Business Media** Researchers in many disciplines have been concerned with modeling textual data in order to account for texts as the primary information unit of written communication. The book "Modelling, Learning and Processing of Text-Technological Data Structures" deals with this challenging information unit. It focuses on theoretical foundations of representing natural language texts as well as on concrete operations of automatic text processing. Following this integrated approach, the present volume includes contributions to a wide range of topics in the context of processing of textual data. This relates to the learning of ontologies from natural language texts, the annotation and automatic parsing of texts as well as the detection and tracking of topics in texts and hypertexts. In this way, the book brings together a wide range of approaches to procedural aspects of text technology as an emerging scientific discipline.

**Bavarian Syntax Contributions to the theory of syntax John Benjamins Publishing Company** Dialect syntax has proven to be an invaluable data source for theoretical syntax, and theoretical syntax has provided useful analytical tools for uncovering fascinating grammatical properties of dialects. In the 1980s, the assumption that there must be more than one structural position in the left periphery of the clause was confirmed (among others) by so-called "doubly filled COMPs" in Bavarian (e.g. the co-occurrence of a wh-phrase and a complementizer), and in the 1990s, Northern Italian dialects provided the main empirical evidence for Rizzi's extended theory of the left clausal periphery (the so-called "Split-C-hypothesis"). Among German dialects, Bavarian played a prominent role from the beginning: in addition to doubly-filled COMPs we find phenomena such as complementizer

agreement, partial pro-drop, pronominal clitics, extractions from finite clauses introduced by complementizers, negative concord, parasitic gaps, or double possessors, all of which are fascinating and highly relevant for theoretical syntax. The contributions in this volume investigate and analyze a wide range of topics from Bavarian syntax with the focus on implications for general theoretical questions. This volume is of interest for any linguist interested in syntactic theory and dialect syntax.

**Disaster Operations and Decision Making** John Wiley & Sons The only book to combine emergency management principles with proven military concepts Good disaster plans do not guarantee a good response. Any disaster plan rarely survives the first rain bands of a hurricane or the first tremors of an earthquake. While developing plans is essential, there must be systems in place to adapt these plans to the ever-changing operational environment of a disaster. Currently there is no set of standard disaster response principles to guide a community. The National Incident Management System (NIMS) and the Incident Command System (ICS) provide the framework to implement operational decisions, but they were never designed as operational concepts. The military has developed just such concepts and many of them can be adapted for civilian use. Disaster Operations and Decision Making adapts those military concepts and combines them with disaster lessons learned to create a new operational paradigm. Emphasizing team building, Emergency Operations Center operational systems, and situational awareness, the book details easily adopted methods. All of these methods are designed to be incorporated into the NIMS and ICS framework to enhance a community's response to any type of disaster. Disaster Operations and Decision Making is an essential resource for emergency managers, fire chiefs, law enforcement officers, homeland security professionals, public health officials, and anyone else involved or interested in crisis management.

**Non-native Speech A Corpus-based Analysis of Phonological and Phonetic Properties of L2 English and German** Peter Lang Based on an innovative corpus-based approach, this book offers a comprehensive survey of the phonological and phonetic properties of L2 speech in English and German. The first part of the book critically examines current theoretical models and research methodologies in the field of second language acquisition of phonology and describes the advances that have been made in corpus linguistics over the past few years - in particular, the development of phonological learner corpora. It furthermore presents the first learner corpus of L2 English and L2 German that is fully aligned and has extensive phonological annotations: the LeaP corpus. The second part of the book describes the results of the quantitative and qualitative corpus analyses in the following areas of non-native speech: fluency, final consonant cluster realisation, vowel reduction and speech rhythm, intonation and general foreign accent. In addition, the influence of many non-linguistic factors, including instruction and a stay abroad, on the phonological properties of non-native speech is explored.

**Flower, Fruit and Thorn Pieces Or, The Married Life, Death, and Wedding of the Advocate of the Poor,** Firmian Stanislaus Sibenkašlaus Sibenkaš Towards a General Theory of Translational Action Skopos Theory Explained Routledge This is the first English translation of the seminal book by Katharina Reiß and Hans Vermeer, *Grundlegung einer allgemeinen Translationstheorie*, first published in 1984. The first part of the book was written by Vermeer and explains the theoretical foundations and basic principles of skopos theory as a general theory of translation and interpreting or 'translational action', whereas the second part, penned by Katharina Reiß, seeks to integrate her text-typological approach, first presented in 1971, as a 'specific theory' that focuses on those cases in which the skopos requires equivalence of functions between the source and target texts. Almost 30 years after it first appeared, this key publication is now finally accessible to the next generations of translation scholars. In her translation, Christiane Nord attempts to put skopos theory and her own concept of 'function plus loyalty' to the test, by producing a comprehensible, acceptable text for a rather heterogeneous audience of English-speaking students and scholars all over the world, at the same time as acting as a loyal intermediary for the authors, to whom she feels deeply indebted as a former student and colleague.

**Four-Dimensional Education The Competencies Learners Need to Succeed** CreateSpace What should students learn to best prepare for the twenty-first century? In this book, the Center for Curriculum Redesign (CCR) describes a framework built to address this question, so that curriculum is redesigned for versatility and adaptability, to thrive in our volatile present and uncertain future. The framework focuses on knowledge (what to know and understand), skills (how to use that knowledge), character (how to behave and engage in the world), and meta-learning (how to reflect on and adapt by continuing to learn and grow). This book is essential for teachers, department heads, heads of schools, administrators, policymakers, standard setters, curriculum and assessment developers, and other thought leaders and influencers, who seek to develop a thorough understanding of the needs and challenges we all face, and to help devise innovative solutions.

**Beyond the Blue Border** Charlesbridge Publishing Hanna and Andreas will do anything to leave oppressive East Germany behind. There's one escape route open to them, but can they survive it? Hanna and Andreas have always been friends. When they're expelled from school for activism directly challenging the socialist state in East Germany, they end up doing factory work. But what kind of life do they have to look forward to without education or opportunity? Especially when they aren't allowed a voice? The choice to risk imprisonment or death by escaping to the democratic West seems like a risk worth taking. They set out to swim twenty-five hours across the choppy waters of the Baltic Sea. Linke's storytelling achieves a delicate balance between heightened moments of danger--searchlights, jellyfish, a Russian helicopter, a violent summer storm--and the monotony, ineffable fatigue, physical pain, cramping, fear, and hope that fill the rest of the journey. A memorable tale of two people risking all for a chance at freedom. So geht's zum DSD II (B2/C1) Neue Ausgabe. Übungsbuch Literacy Unbound: Multiliterate, Multilingual, Multimodal Springer This volume promotes a thought-provoking discussion on contemporary issues surrounding the teaching of language and literacy based on first

hand experiences and research. Drawing on the authors' experiences as teacher educators, language and literacy teachers, and researchers on literacy issues it brings together the multiple traditions. What makes the proposed volume unique is the common theme that runs through all the chapters: the examination of the term literacy, the complexity of this term and the importance of having a wide understanding of what it is before tackling educational issues of pedagogy, assessment and student engagement. What is more, as the editors argue, it is necessary to join up the dots and explore the commonalities that form the core of the literacy spectrum.
