### Expert Laws of War

### Restating and Making Law in Expert Processes

Edward Elgar Publishing Over recent decades, international humanitarian law has been shaped by the omnipresence of so-called expert manuals. Astute and engaging, this discerning book provides a comprehensive account of these black letter rules and commentaries produced by private expert groups and demonstrates why the general acceptance of these expert manuals is largely unjustified. The author innovatively links interdisciplinary insights to the needs of military lawyers in practice, showing the pitfalls of relying on private manuals as arguable restatements and interpretations of the law 'as it is'.

### Restating and Making Law in Expert Processes

Edward Elgar Publishing Over recent decades, international humanitarian law has been shaped by the omnipresence of so-called expert manuals. Astute and engaging, this discerning book provides a comprehensive account of these black letter rules and commentaries produced by private expert groups and demonstrates why the general acceptance of these expert manuals is largely unjustified. This theoretically grounded book bridges the divide between theory and practice by linking legal theory to the doctrinal and practical concerns of the laws of war. The author innovatively links interdisciplinary insights to the needs of military lawyers in practice, showing the pitfalls of relying on private manuals as arguable restatements and interpretations of the law 'as it is'. At the same time, he explains why expert processes are so successful and why this should be of concern to all of us. Stimulating and challenging, this book will prove essential reading for students and scholars of public international law, legal theory, and those focussing on the laws of war more specifically. Its practical approach will also greatly benefit legal practitioners working in the field of military law.

## Yeowart and Parsons on the Law of Financial Collateral

Edward Elgar Publishing As the volume of transactions in European financial markets continues to grow, the use of financial collateral, be it in the form of cash, shares, bonds or credit claims, has become a critical tool in supporting and managing risk in financial transactions. ## International Perspectives on Consumers' Access to Justice

Cambridge University Press Consumer protection law in the age of globalisation poses new challenges for policy-makers. This book highlights the difficulties of framing regulatory responses to the problem of consumers' access to justice in the new international economy. The growth of international consumer transactions in the wake of technological change and the globalisation of markets suggests that governments can no longer develop consumer protection law in isolation from the international legal arena. Leading scholars consider the broader theme of access to justice from socio-legal, law and economics perspectives. Topics include standard form contracts, the legal challenges posed by mass infections (such as mad-cow disease and CJD), ombudsman schemes, class actions, alternative dispute resolution, consumer bankruptcy, conflict of laws, and cross-border transactions. This book demonstrates that advancing and achieving access to justice for consumers proves to be a challenging, and sometimes elusive, task.

## The Single Forum Method and the Unification of International Private Air Law (article 20 of the Rome Convention 1952).

"The liability for damage caused by aircraft to third parties on the ground is regulated very differently by the various national laws. Some laws are based solely on the principle of fault liability, whereas, others on that of absolute liability. In some states the operator's liability is limited to a certain amount of damage, in others, the operator may be held liable for unlimited damage. There are also considerable differences in the national laws regarding the securities required in respect of the operator's liability." --

In the book the provisions in EU Maintenance Regulation no 4/2009 and the Hague Maintenance Convention of 2007 are analysed in order to discover what developments and therefore potential improvements have been made in relation to the recovery of maintenance from abroad. The book also includes an empirical study on the first year of operation of the Maintenance Regulation. Data collected has been analysed in order to supplement the critique of the instruments. ### Clawback Law in the Context of Succession

Bloomsbury Publishing This book offers a global solution for determining the law applicable to a claim to clawback an inter vivos gift from a third party within the context of a succession. The book aims to identify an appropriate and applicable legal framework which supports legal certainty for cross-border estate planning and protects the legitimate expectations of the relevant parties. This is an area of private international law that has yet to be handled satisfactorily - as can be seen by the inadequate treatment of clawback from third parties in the 1989 Hague Convention on the Law Applicable to Succession to the Estates of Deceased Persons, and the 2012 EU Succession Regulation.

## Comparative Law Yearbook of International Business 2004

Kluwer Law International B.V. The 2004 volume of the Comparative Law Yearbook of International Business contains a wide variety of topics of interest to international commercial lawyers and their clients. Various areas of company law are discussed, including mergers and acquisitions, piercing the corporate veil and the financing of share acquisitions. The Yearbook also contains several chapters on investments and securities, including the need for corporate governance in this area and the role of collective investment schemes in Bermuda. Some chapters deal with the introduction of new technology into the competition law issues encountered by the telecommunications industry. The introduction and effects of new legislation generally are also addressed, including the new Ukrainian Commercial Code and Brazilian Civil Code. In addition to discussions on intellectual property, arbitration and asset protection, the Yearbook contains a section on real property rights, including a very interesting comparison between the way in which China and Indonesia view property rights and the treatment received by such rights in Western society. Various areas of law also are looked at from a European point of view, such as the increase in American-style asbestos litigation in Europe, the hiring out of workers within Europe and the effect of the European Convention on Human Rights upon business. With the ever-increasing introduction of new technology, the expansion of global communications, new attitudes towards business and commerce and increased awareness of personal and property rights, there is a constant need for the law to develop in order to adequately deal with these issues. The yearbook branches out into some of the innovative and topical areas of contemporary law, and should be of great interest to anyone involved in modern-day business.

## Legal Aspects of Privatisation

### A Comparative Study of European Implementations

Universal-Publishers The main aims of this thesis are as follows: (a) To present a comprehensive analysis of the concept of privatisation its origins and limits, (b) To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective; (c) To define and analyse particularly legal issues which arise during the privatisation transactions: e.g. labour law, competition law etc.; (d) To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises. This work found out that there is no simple, internationally applicable recipe for privatisation; various legal methods and techniques can be used to privatise state owned enterprises. Because each country has different circumstances, it is impossible to provide a unique model for privatisation; each country needs to design its own model according to its circumstances. Privatisation is an essential but insufficient element for structural economic reform in the economy and society. Privatisation is not a panacea, it is not the solution to every economic and administrative problem; selling an enterprise to the private sector does not mean an end to all problems. Also privatisation is not an overnight process or a magic touch; it will be a lengthy process. Furthermore, a decision that something can be privatised does not mean that it should be privatised. In that context, privatisation is not good or bad; it is an economic and social instrument. If it is well designed it may bring substantial benefits to the economy and society. In many countries, many state owned enterprises, particularly the ones which are financially weak, have still not been privatised. This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades.

### Forum (Non) Conveniens in England

#### Past, Present, and Future

Bloomsbury Publishing The forum (non) conveniens doctrine provides the basis for the discretionary exercise of jurisdiction by English courts in private international law disputes. London's pre-eminence as a centre for international commercial litigation has led to its frequent deployment in proceedings where parties disagree over where a case should be heard. The doctrine's significance is not limited to England but extends to many Commonwealth jurisdictions which have embraced it. This is the first book-length study devoted entirely to examining the forum (non) conveniens doctrine's past, present, and future from the perspective of the law in England. By offering a meticulous and critical analysis of relevant historical and contemporary sources in England and elsewhere, it seeks to fill gaps in relevant knowledge of the English forum (non) conveniens doctrine, and challenge certain views concerning its operation that have come to be regarded as representing the orthodoxy. In this respect, the book attempts to refine our understanding of the doctrine's historical development, evaluate its application in the years following its formal recognition in England, and examine the case for revising it, given the changing nature of international commercial litigation in recent decades. The book's ultimate objective is to act as an authoritative and comprehensive reference point for those with an interest in the forum (non) conveniens doctrine, more specifically, and cross-border private litigation, more generally.
