The World History of Beekeeping and Honey Hunting

Routledge *This definitive work by world-renowned bee authority Eva Crane offers a fascinating account of bees and their complex relations with both humans and animals. Comprehensive, absorbing, and lavishly illustrated, this scholarly, yet accessible volume explores how bees, honey and other bee products have been gathered and utilized throughout the world. Beginning with the rock paintings of the Mesolithic cave dwellers, readers will learn about the variety of methods used by human beekeepers, the stratagems used by animal honey-hunters, and the multitude of products humans have derived from bees. The first in-depth book on the subject, the World History of Beekeeping and Honey-Hunting is the ultimate work on bees for scholars in biology and the life sciences, professional and amateur beekeepers, and anyone who is interested in bees or the collection of honey.*

An Anthology of Classic Australian Folklore

Lonely because he is the only mouse in the church, Arthur asks all the town mice to join him. Unfortunately the congregation aren't so welcoming. But all is not lost when a robber tries to steal the church candlesticks, the mice foil his plans and win back their home.

Newnes Mechanical Engineer's Pocket Book

Newnes *Newnes Mechanical Engineer's Pocket Book is an easy to use pocket book intended to aid mechanical engineers engaged in design and manufacture and others who require a quick, day-to-day reference for useful workshop information. The book is a compilation of useful data, providing abstracts of many technical materials in various technical areas. The text is divided into five main parts: Engineering Mathematics and Science, Engineering Design Data, Engineering Materials, Computer Aided Engineering, and Cutting Tools. These main sections are further subdivided into topic areas that discuss such topics as engineering mathematics, power transmission and fasteners, mechanical properties, and polymeric materials. Mechanical engineers and those into mechanical design and shop work will find the book very useful.*

The Hitchhiker's Guide to Python

Best Practices for Development

"O'Reilly Media, Inc." *The Hitchhiker's Guide to Python takes the journeyman Pythonista to true expertise. More than any other language, Python was created with the philosophy of simplicity and parsimony. Now 25 years old, Python has become the primary or secondary language (after SQL) for many business users. With popularity comes diversity—and possibly dilution. This guide, collaboratively written by over a hundred members of the Python community, describes best practices currently used by package and application developers. Unlike other books for this audience, The Hitchhiker's Guide is light on reusable code and heavier on design philosophy, directing the reader to excellent sources that already exist.*

Controlled Release Pesticides Formulations

CRC Press *The main goal of this book is to present a summary of the state of the art historical background. Conventional chemical pest control methods are mentioned only as a means of comparison to controlled release. Research endeavour with biological weapons, potential usage of such controls, and the few instances of success are likewise brought into focus with the same motive. Formulations and methods or preparing controlled release pesticides are discussed in some detail as concerns the antifouling and molluscicide areas, where the compounding methodology has been well developed. The mathematical basis of controlled release has been developed to an extent and is presented in an abbreviated form.*

Encyclopedia of Medieval Philosophy

Philosophy Between 500 and 1500

Springer Science & Business Media *This is the first reference ever devoted to medieval philosophy. It covers all areas of the field from 500-1500 including philosophers, philosophies, key terms and concepts. It also provides analyses of particular theories plus cultural and social contexts.*

Weber Carburetor Manual

Including Zenith, Stromberg and SU Carburetors

Haynes Manuals N. America, Incorporated *This series of comprehensive manuals gives the home mechanic an in-depth look at specific areas of auto repair.*

Just One Cookbook

Mama Loves You So

Simon and Schuster With lilting lullaby text and lovely illustrations, the New Books for Newborns stories are the perfect first books for new parents to share with their little ones right from the start! Start here. If only raising a child was that easy. It can be difficult in the first year to figure out what's just right for your baby. But with this new line of books—New Books for Newborns— story time is really that simple. Designed as the first books to start reading with your baby, these just-right stories hit all the right notes with soothing texts, lovely art, and, most importantly, stories meant for sharing any time of the day. Start here. Snuggle up. It's story time! This book celebrates a mother's love trumping even majestic mother nature...a mama's love is higher than a mountain and deeper than any stream.

Fish Physiology: Organic Chemical Toxicology of Fishes

Academic Press *Fish Physiology: Organic Chemical Toxicology of Fishes* discusses the different types of organic chemical contaminants and their respective toxic effects in fish. The book also covers the detection of dissolved organic compounds and methods to assess organic toxicity. Substances addressed in this book include organometallics, hydrocarbons, endocrine disrupting compounds (EDCs), insecticides, herbicides, and pharmaceuticals. Fish are exposed to an ever-increasing array of organic chemicals that find their way into rivers and oceans. Some of these compounds are no longer being produced but nonetheless persist within the environment (persistent organic pollutants, or POPs). The exposure of fish to toxic organic compounds has potential impact on human, fish, and ecosystem health. Yet the regulations that govern environmental water quality vary worldwide, and compliance is never complete. This book provides a crucial resource on these issues for researchers in zoology, fish physiology, and related fields; applied researchers in environmental monitoring, conservation biology, and toxicology; and university-level students and instructors in these areas. Organized by type of toxic organic chemicals Includes metals, POPs, EDCs, herbicides, insecticides, and pharmaceuticals Measures toxicity in a variety of ways aside from lethality Probes the toxic effects of compound mixtures as well as single pollutants

Advances in Material Sciences and Engineering

Springer This book presents selected papers from the 4th International Conference on Mechanical, Manufacturing and Plant Engineering (ICMMPE 2018), which was held in Melaka, Malaysia from the 14th to the 15th of November 2018. The proceedings discuss genuine problems concerning joining technologies that are at the heart of various manufacturing sectors. In addition, they present the outcomes of experimental and numerical works addressing current problems in soldering, arc welding and solid-state joining technologies.

Modular Design for Machine Tools

McGraw Hill Professional *Harness the Latest Modular Design Methods to Increase Productivity, Save Time, and Reduce Costs in Manufacturing* Machine designers and toolmakers can turn to *Modular Design for Machine Tools* for a complete guide to designing and building machines using modular design methods. The information and techniques presented in this skills-building book will enable readers to shorten machine design time...improve reliability...reduce costs...and simplify service and repair. Packed with over 100 detailed illustrations, this essential resource explores the basics of modular design...the methodology of machine tools... the description and application of machine tools...interfacial structural configuration in modular design...stationary and sliding joints...model theory and testing...and much more. Comprehensive and easy-to-use, *Modular Design for Machine Tools* includes: Expert classification of machine tool joints Concise definitions of machine tool joints and characteristics Similarity evaluations of structural configurations Design formulas and features of single flat joints under dynamic loading Solved examples that illustrate and prove formulas Hard-to-find graphs for gear design, comparative tables for machine tool drives, and simplified electrical circuit designs *Inside This Cutting-Edge Modular Design Guide* • Part 1: Engineering Guide to Modular Design and Description/Methodology of Machine Tools • What Is Modular Design? • Engineering Guide to and Future Perspectives on Modular Design • Description of Machine Tools • Application of Machine Tools to Engineering Design • Part 2: Engineering Design for Machine Tool Joints-Interfacial Structural Configuration in Modular Design • Machine Tool Joints • Engineering Design Fundamentals • Practice and First-Hand Views of Related Engineering Developments: Stationary Joints and Sliding Joints • Engineering Knowledge of Other Joints • Measurement of Interface Pressure by Means of Ultrasonic Waves • Model Theory and Testing

Problematic Wildlife II

New Conservation and Management Challenges in the Human-Wildlife Interactions

Springer Nature In a world where habitats are constantly changing and the impact of anthropization on the environment is increasingly intense, interactions between human and wildlife are becoming more and more complex. Some species pose problems for human activities while many others need to be helped in order to continue to exist. This book follows the first volume called 'Problematic Wildlife', edited by F.M. Angelici and published by Springer in 2016, which has had considerable success with readers and critics. The volume includes 21 chapters divided into 7 parts devoted specific topics which are approached in a multidisciplinary way. There are both review chapters and specific cases, always bearing in mind the interest for an international audience. The book is useful both for scientists, wildlife specialists, conservationists, zoologists, ecologists, university students, nature managers, and for those who live in contact with wildlife and its problems, such as farmers, shepherds, hunters, urban planners, and staff of parks and nature reserves. Its ultimate goal is to offer scientific and pragmatic approaches to manage each categories of problematic species.

Homicide and Severe Mental Disorder

Understanding and Prevention

Routledge *Homicide and Severe Mental Disorder: Understanding and Prevention* provides a complete picture of how severe mental disorder can be assessed in cases of homicide, and how improved understanding can impact risk reduction and prevention. Michael Farrell brings together a wide range of material including theory, research, demographic data, case examples, enquiry reports, and practical strategies, providing clear examples throughout. Farrell draws on examples of homicide representing a great challenge to both comprehension and prevention - cases that have sometimes provoked media criticism of public policy and services and have aroused public anxiety. In seeking fuller understanding, the book takes an overview of severe mental disorder, homicide, and prevention, before introducing the approach of Situational Crime Prevention and related theory and discussing demographic features of perpetrators and victims. Turning to prevention, the text examines examples of research into homicides perpetrated by individuals with severe mental disorder. Insights from Situational Crime Prevention are applied to selected cases, and a wider view is then taken looking at the criminological features of means, motive, opportunity, and location. Organisational constraints and limitations of communication in services are considered, and cases illuminating the issues and challenges throughout the book are summarised in a structured end of volume glossary. As evidence and insights accumulate and cohere, they more clearly indicate preventive strategies. *Homicide and Severe Mental Disorder* will be of great interest to students, researchers, and teachers in psychiatry, psychology, and criminology, health and mental health professionals, criminal justice personnel, and those working with individuals with severe mental disorder.

Job Shop Lean

An Industrial Engineering Approach to Implementing Lean in High-Mix Low-Volume Production Systems

CRC Press In the 1950's, the design and implementation of the Toyota Production System (TPS) within Toyota had begun. In the 1960's, Group Technology (GT) and Cellular Manufacturing (CM) were used by Serck Audco Valves, a high-mix low-volume (HMLV) manufacturer in the United Kingdom, to guide enterprise-wide transformation. In 1996, the publication of the book Lean Thinking introduced the entire world to Lean. Job Shop Lean integrates Lean with GT and CM by using the five Principles of Lean to guide its implementation: (1) identify value, (2) map the value stream, (3) create flow, (4) establish pull, and (5) seek perfection. Unfortunately, the tools typically used to implement the Principles of Lean are incapable of solving the three Industrial Engineering problems that HMLV manufacturers face when implementing Lean: (1) finding the product families in a product mix with hundreds of different products, (2) designing a flexible factory layout that "fits" hundreds of different product routings, and (3) scheduling a multi-product multi-machine production system subject to finite capacity constraints. Based on the Author's 20+ years of learning, teaching, researching, and implementing Job Shop Lean since 1999, this book Describes the concepts, tools, software, implementation methodology, and barriers to successful implementation of Lean in HMLV production systems Utilizes Production Flow Analysis instead of Value Stream Mapping to eliminate waste in different levels of any HMLV manufacturing enterprise Solves the three Industrial Engineering problems that were mentioned earlier using software like PFAST (Production Flow Analysis and Simplification Toolkit), Sgetti and Schedlyzer Explains how the one-at-a-time implementation of manufacturing cells constitutes a long-term strategy for Continuous Improvement Explains how product families and manufacturing cells are the basis for implementing flexible automation, machine monitoring, virtual cells, Manufacturing Execution Systems, and other elements of Industry 4.0 Teaches a new method, Value Network Mapping, to visualize large multi-product multi-machine production systems whose Value Streams share many processes Includes real success stories of Job Shop Lean implementation in a variety of production systems such as a forge shop, a machine shop, a fabrication facility and a shipping department Encourages any HMLV manufacturer planning to implement Job Shop Lean to leverage the co-curricular and extracurricular programs of an Industrial Engineering department

Progress in Precision Engineering

Proceedings of the 6th International Precision Engineering Seminar (IPES 6)/2nd International Conference on Ultraprecision in Manufacturing Engineering (UME 2), May, 1991 Braunschweig, Germany

Springer Science & Business Media by Professor Pat McKeown Cranfield Precision Engineering, UK Member of Joint Organising Committee IPES6/UME2 PROGRESS IN PRECISION ENGINEERING Metal working companies in tool making, prototype manufacture and subcontract machining often use the label "precision engineering" to indicate that they are accustomed to working to finer tolerances than is normally expected in series production. But what we are concerned with in this and our preceding international conferences is much wider and deeper than this. Precision engineering is a grouping of multidisciplinary scientific and engineering skills and techniques, firmly based on dimensional metrology, by which a wide range of new advanced technology products is made possible. In the last 5 - 10 years we have witnessed dramatic progress in precision engineering, particularly by the rapid development of its important sub-sets, micro-engineering and nanotechnology. It is a particular pleasure for me and my colleagues on the Organising Committee to welcome you to Braunschweig on the occasion of this the first joint international meeting in high precision manufacturing/precision engineering to be held in Germany. Our aim is to bring together the world's leading precision engineering practitioners from areas of application as diverse as optics for astronomy, micro and nano machining process research, design and development of ultra precision machine tools and metrology equipment, advanced materials, bio medical research and new sensor/transducer systems.

To Live as Long as Heaven and Earth

A Translation and Study of Ge Hong's Traditions of Divine Transcendents

Univ of California Press *"This book marks a new milestone in the study of Chinese religious history. Only a scholar as intelligent and dedicated as Campany would dare tackle and so eloquently translate one of the most important and difficult works of early Chinese religious history."*—Paul Katz, author of *Images of the Immortal: The Cult of Lu Dongbin at the Palace of Eternal Joy* *"This is a pathbreaking work of lasting significance to the field of Chinese religious history. The scholarship is solid and current, drawing upon the best research from America, Europe, China, and Japan. The translation is accurate, clear, and elegant, based upon an innovative analysis of surviving sources."*—Terry Kleeman, author of *Great Perfection: Religion and Ethnicity in a Chinese Millennial Kingdom* *"A competent translation of Ge Hong's hagiographies, with close attention paid to sources and editions, would already have constituted a major contribution to the field of Taoist studies. But Campany provides as well a survey of religious practices in Ge Hong's writings and a reading of the hagiographies which enables us to see the social practices that lie behind them. Together, these two works-in-one constitute the best available portrait of religion and society in early fourth-century China."*—John Lagerwey, author of *Taoist Ritual in Chinese Society and History* *"Campany's annotated translation of Ge Hong's (283-343) classic, the first in English, admirably captures the book's rich evocation of the religious culture of Southern China in the fourth century. Ge Hong here offers a series of case studies of what he regarded as the historical and exemplary evidence for the existence of immortals. This translation of Traditions of Divine Transcendents conveys a lively and multifaceted vision of the Taoist conception of physical immortality. The book's emphasis on practices related to the cult of the immortals and the hope for transcendence squarely places its subject in the religious life of traditional Chinese society."*—Franciscus Verellen, co-editor of *The Taoist Canon: A Historical Guide*

Pediatric Nephrology

JP Medical Ltd *This book fifth edition of Pediatric Nephrology has been important advances of the mechanisms and management of various renal disorders in children have taken place since the previous edition of this book. These have been incorporated and the contents extensively revised. Several new authors, having many years of clinical and investigative experience in the area of their expertise, have contributed. The chapters on electrolyte and acid-base disorders, nephrotic syndrome, acute kidney injury, urinary tract infection, tubulopathies, chronic kidney disease, renal replacement therapy, voiding disorders and neonatal renal problems have been expanded and provide most recent information, particularly concerning management of related diseases. A small section on prevention of kidney diseases has been added. The emphasis remains on renal function and its derangement, diagnostic evaluation and treatment of important conditions.*

Are you a B-Boy? Do you love break dancing? Then this awesome, ruled composition notebook is perfect for you! Keep the notebook with you at all times and write down your dancing ideas, moves, thoughts and notes. With 110 pages, the notebook offers plenty of space for your notes at school, university or at work. Features: -110 ruled lined pages -6x9 inches -College book / school book -Personal Notebook -Diary - Perfect for many occasions as well, such as: -Birthday gifts -Graduation gifts -Gifts for pupils and students -Dream journals -School activity notebook -Vacation travel Journal -Home school notebook -Boys write journal -Girls write journal- For dancers; Choreographers; Hip Hop dancing teachers; break dancer; street artists; breaker; dance lovers.

Parallel and Distributed Processing

15 IPDPS 2000 Workshops Cancun, Mexico, May 1-5, 2000 Proceedings

Springer Science & Business Media This volume contains the proceedings from the workshops held in conjunction with the IEEE International Parallel and Distributed Processing Symposium, IPDPS 2000, on 1-5 May 2000 in Cancun, Mexico. The workshops provide a forum for bringing together researchers, practitioners, and designers from various backgrounds to discuss the state of the art in parallelism. They focus on different aspects of parallelism, from runtime systems to formal methods, from optics to irregular problems, from biology to networks of personal computers, from embedded systems to programming environments; the following workshops are represented in this volume: { Workshop on Personal Computer Based Networks of Workstations { Workshop on Advances in Parallel and Distributed Computational Models { Workshop on Par. and Dist. Comp. in Image, Video, and Multimedia { Workshop on High-Level Parallel Prog. Models and Supportive Env. { Workshop on High Performance Data Mining { Workshop on Solving Irregularly Structured Problems in Parallel { Workshop on Java for Parallel and Distributed Computing { Workshop on Biologically Inspired Solutions to Parallel Processing Problems { Workshop on Parallel and Distributed Real-Time Systems { Workshop on Embedded HPC Systems and Applications { Reconfigurable Architectures Workshop { Workshop on Formal Methods for Parallel Programming { Workshop on Optics and Computer Science { Workshop on Run-Time Systems for Parallel Programming { Workshop on Fault-Tolerant Parallel and Distributed Systems All papers published in the workshops proceedings were selected by the program committee on the basis of referee reports. Each paper was reviewed by independent referees who judged the papers for originality, quality, and consistency with the themes of the workshops.
