Life Without Air

Granta Books "Whip-smart, sonically gorgeous" - Rae Armantrout, author of the Pulitzer Prize winning *Versed* When Louis Pasteur observed the process of fermentation, he noted that, while most organisms perished from lack of oxygen, some were able to thrive as 'life without air'. In this capricious, dreamlike collection, characters and scenes traverse states of airlessness, from suffocating relationships and institutions, to toxic environments and ecstatic asphyxiations. Both compassionate and ecologically nuanced, this innovative collection bridges poetry and prose to interrogate the conditions necessary for survival.

Ceremony of Innocence

Granta Books A Cambridge PhD student called Reem has gone missing in Egypt. Those close to her fear that her investigation into her family's history in the Gulf has put her in danger. The trail leads back to Tehran in 1969, when diplomat Martin Wilcox Smith, frustrated by his career at the Foreign Office, looked for more lucrative opportunities in the region. Decades later, decisions taken by Martin and his charismatic wife Phoebe unexpectedly come home to roost: their niece takes in a Bahraini lodger who has reasons to question the immense wealth of the Wilcox Smiths, a quest shared with their daughter-in-law, a journalist who is determined to piece together what has happened to Reem. An evocative and engrossing story that travels between the Shah's Iran, modern Bahrain, London and the English countryside, *Ceremony of Innocence* explores one family's ambition in the aftermath of empire and the establishment's ruthless pursuit of power in the new world order.

Law and the New Developmental State

The Brazilian Experience in Latin American Context

Cambridge University Press This book explores the emergence of a new developmental state in Latin America and its significance for law and development theory. In Brazil since 2000, emerging forms of state activism, including a new industrial policy and a robust social policy, differ from both classic developmental state and neoliberal approaches. They favor a strong state and a strong market, employ public-private partnerships, seek to reduce inequality, and embrace the global economy. Case studies of state activism and law in Brazil show new roles emerging for legal institutions. They describe how the national development bank uses law in innovation promotion, trade law strengthens new developmental policies in export promotion and public health, and social law frames innovative poverty-relief programs that reduce inequality and stimulate demand. Contrasting Brazilian experience with Colombia and Mexico, the book underscores the unique features of Brazil's trajectory and the importance of this experience for understanding the role of law in development today.

The Mission House

Granta Books Fleeing his demons and the dark undercurrents of life in Britain, Hilary Byrd takes refuge in a south Indian mission house next door to the presbytery where the Padre and his adoptive daughter, Priscilla, live. As Hilary's friendship with Priscilla grows, so too do the religious and nationalist tensions around them, and the mission house may not be the safe haven it seems. Meticulously crafted and tenderly subversive, *The Mission House* is a deeply human story of the wonders and terrors of connection in a modern world.

Terror and Consent

The Wars for the Twenty-first Century

Penguin UK The wars against terror have begun, but it will take some time before the nature and composition of these wars is widely understood. The objective of these wars is not the conquest of territory, or the silencing of any particular ideology, but rather to secure the necessary environment for states to operate according to principles of consent and make it impossible for our enemies to impose or induce states of terror. *Terror and Consent* argues that, like so many states and civilizations in the past that suffered defeat, we are fighting the last war, with weapons and concepts that were useful to us then but have now been superseded. Philip Bobbitt argues that we need to reforge links that previous societies have made between law and strategy; to realize how the evolution of modern states has now produced a globally networked terrorism that will change as fast as we can identify it; to combine humanitarian interests with strategies of intervention; and, above all, to rethink what 'victory' in such a war, if it is a war, might look like - no occupied capitals, no treaties, no victory parades, but the preservation, protection and defence of states of consent. This is one of the most challenging and wide-ranging books of any kind about our modern world.

Labours of Love

The Crisis of Care

Granta Books We're facing a crisis in care likely to affect every one of us over the course of our lives. Care-work is underpaid; its values disregarded. Britain's society lauds economic growth, productivity and profit over compassion, kindness and empathy. For centuries the caring labours of women have been taken for granted, but with more women now in work, with increasing numbers of elderly and with austerity dismantling the welfare state, care is under pressure as never before. Over five years, Madeleine Bunting travelled the country, speaking to charity workers, doctors, social workers, in-home carers, nurses, palliative care teams and parents, to explore the value of care, the hidden glue that binds us together. She finds remarkable stories, in GP surgeries, in work undertaken by parents for their disabled children and in end-of-life teams, that conjure a different way of imagining our society and the connections between us. Blending these revelatory testimonies with a history and language of care, and with Bunting's own experiences of caring for the young and old in her family, *Labours of Love* is a hugely important portrait of our nation today - and of how it might be - which raises a clarion call for change.

The Godless Gospel

Was Jesus A Great Moral Teacher?

Granta Books Even if we don't believe that Jesus was the son of God, we tend to think he was a great moral teacher. But was he? And how closely do idealised values such as our love of the family, helping the needy, and the importance of kindness, match Jesus's original tenets? Julian Baggini challenges our assumptions about Christian values - and about Jesus - by focusing on Jesus's teachings in the Gospels, stripping away the religious elements such as the accounts of miracles or the resurrection of Christ. Reading closely this new 'godless' Gospel, included as an appendix, Baggini asks how we should understand Jesus's attitude to the renunciation of the self, to politics, or to sexuality, as expressed in Jesus's often elusive words. An atheist from a Catholic background, Baggini introduces us to a more radical Jesus than popular culture depicts. And as he journeys deeper into Jesus's worldview, and grapples with Jesus's sometimes contradictory messages, against his scepticism he finds that Jesus's words amount to a purposeful and powerful philosophy, which has much to teach us today.

Truth and Efficiency in Civil Litigation

Fundamental Aspects of Fact-finding and Evidence-taking in a Comparative Context

Intersentia Uitgevers N V In the pursuit of justice, truth always plays a prominent role. Few, if any, legal systems are willing to waive the right to claim that the results of their legal processes are fair, just, and, above all, based on the truth. In most legal systems, elaborate rules on the taking of evidence try to guarantee that an accurate factual basis is used for the application of the law. Such rules are the core of most methods of adjudication and they are the main theme of this book, which focuses specifically on the rules of evidence within the context of efficiency in civil proceedings. Apart from the fact that a link between the pursuit of truth and efficiency has been emphasized since the time of ancient Rome, all legal systems must find the right balance between the amount of time and money invested in the civil trial and the thoroughness of the proof-taking stage in litigation. Obviously, a system of proof that can produce trustworthy results is in need of considerable investment of time and resources, but the amount of time and resources available is not without its limits. If a proper balance between truth and the necessary time and resources cannot be found, the whole process of litigation may be endangered. (Series: Ius Commune Europaeum - Vol. 111)
