Developmental Biology of Neoplastic Growth

[Springer Science & Business Media](#) In this book, tumour growth is perceived as a deviation from the normal development of the human organism. The molecular, cellular, and tissue determinants of different tumours are discussed showing that each is a different disease, often corresponding to a particular developmental stage. The natural history of several cancers illustrates how clinical incidence can be just the visible part of the iceberg, while the first changes at the tissue level sometimes occur several years before tumour growth becomes manifest. Several mechanisms are proposed to explain the distribution of cancers during the human life span and the decline of the incidence of cancers during human senescence.

Clusters in Automotive and Information & Communication Technology

Innovation, Multinationalization and Networking Dynamics

[Springer Science & Business Media](#) Information & communication technology (ICT) and the automotive sector are two of the most important industries in the EU and the US. The EU's eastern expansion and economic globalization have reinforced competition on the one hand; on the other hand the importance of outsourcing and off-shoring has increased. Against this background the intensification of innovation dynamics becomes crucial - and with them the role of regional innovation clusters. The analysis examines seven regions and six EU countries. The focus is on cluster and network dynamics in both industries, as regional ICT clusters are playing an increasingly central role in many European regions. Specialization and structural change in the automotive sector are highlighted, and new strategic approaches for multinational companies and changes in policy options are identified.

Beyond the Big Ditch

Politics, Ecology, and Infrastructure at the Panama Canal

[MIT Press](#) A historical and ethnographic study of the conflict between global transportation and rural development as the two intersect at the Panama Canal. In this innovative book, Ashley Carse traces the water that flows into and out from the Panama Canal to explain how global shipping is entangled with Panama's cultural and physical landscapes. By following container ships as they travel downstream along maritime routes and tracing rivers upstream across the populated watershed that feeds the canal, he explores the politics of environmental management around a waterway that links faraway ports and markets to nearby farms, forests, cities, and rural communities. Carse draws on a wide range of ethnographic and archival material to show the social and ecological implications of transportation across Panama. The Canal moves ships over an aquatic staircase of locks that demand an enormous amount of fresh water from the surrounding region. Each passing ship drains 52 million gallons out to sea—a volume comparable to the daily water use of half a million Panamanians. Infrastructures like the Panama Canal, Carse argues, do not simply conquer nature; they rework ecologies in ways that serve specific political and economic priorities. Interweaving histories that range from the depopulation of the U.S. Canal Zone a century ago to road construction conflicts and water hyacinth invasions in canal waters, the book illuminates the human and nonhuman actors that have come together at the margins of the famous trade route. 2014 marks the 100th anniversary of the Panama Canal. **Beyond the Big Ditch** calls us to consider how infrastructures are materially embedded in place, producing environments with winners and losers.

Developing Supervisors and Team Leaders

Business Secrets of the Trappist Monks

One CEO's Quest for Meaning and Authenticity

[Columbia University Press](#) August Turak is a successful entrepreneur, corporate executive, and award-winning author who attributes much of his success to living and working alongside the Trappist monks of Mepkin Abbey for seventeen years. As a frequent monastic guest, he learned firsthand from the monks as they grew an incredibly successful portfolio of businesses. Service and selflessness are at the heart of the 1,500-year-old monastic tradition's remarkable business success. It is an ancient though immensely relevant economic model that preserves what is positive and productive about capitalism while transcending its ethical limitations and internal contradictions. Combining vivid case studies from his thirty-year business career with intimate portraits of the monks at work, Turak shows how Trappist principles can be successfully applied to a variety of secular business settings and to our personal lives as well. He demonstrates that monks and people like Warren Buffett are wildly successful not despite their high principles but because of them. Turak also introduces other "transformational organizations" that share the crucial monastic business strategies so critical for success.

Mister Owita's Guide to Gardening

How I Learned the Unexpected Joy of a Green Thumb and an Open Heart

[Random House Australia](#) From the publisher of *The Help* comes a moving true story of a unique friendship between two people who had nothing-and ultimately everything-in common. Carol Wall was at a crossroads. Her children had flown the nest, her beloved parents were ageing and becoming increasingly reliant on her and she had overcome a serious illness. Her neglected garden was the least of her worries. Until one day she notices an African man working in her neighbour's garden and realises he is responsible for its spectacular transformation. His name is Giles Owita. He comes from Kenya. And he's very good at gardening. Before long Mr Owita is transforming not only Carol's neglected garden, but her life. Although they appear to have nothing in common, a powerful bond grows between them. But both hold long-buried secrets that will change their friendship forever. This is the story of a woman who at mid-life finds there is so much more to learn and a man whose grace in facing life's challenges is a lesson for us all. 'Deeply personal, poetic, and brimming with humanity, this is a book of lasting grace.' Steve Lopez, New York Times-bestselling author of *The Soloist*

Cyber Security and Accounting Information Systems

Stay Ahead of the Technology Curve

Createspace Independent Publishing Platform With fast growth in information technologies, as well as an increasing number of mobile and wireless devices and services, the need to address vulnerabilities has been highly prioritized by many large corporations, as well as small and medium companies. The value of financial data in an accounting information system is extremely high. Thus, cybersecurity has become a critical concern in managing accounting information systems. Accounting information systems (AIS) aim to support all accounting functions and activities, including financial reporting, auditing, taxation, and management accounting. The AIS is a core knowledge area for accounting professionals and is a critical requirement for accounting practice. This book provides the essential knowledge for the accounting professional to stay ahead of the technology curve. This includes the accounting information system's characteristics, accounting cycles, and accounting processes; reviews different types of information system designs and architectures; and discusses cyber security, vulnerabilities, cyber crime, cyber-attacks, and defense strategies.

Travel Guide To Europe, 1492

Ten Itineraries In The Old World

Holt Paperbacks On the eve of the five hundredth anniversary of the discovery of the Americas, it bears remembering that in 1492, as Columbus was making his historic voyage, Europe was flourishing, at the very height of the Renaissance that transformed a continent. In art, politics, commerce, and society, the medieval world had given way to the modern era. But what was Europe really like then? What did London, Paris, Rome, and the other great centers of culture actually look like, and what was it like to travel from one to the other when the horse and the sailing ship were the most expeditious means available? How long would a typical journey take? Where would one stay and what could one eat along the way? And whom might one expect to meet? Both kings and pilgrims, to be sure. In *Travel Guide to Europe 1492*, the noted Italian historian Lorenzo Camusso offers modern-day readers and would-be adventurers ten itineraries for trips commonly taken in both the near and far reaches of fifteenth-century Europe. Whether Camusso's wayfarer is an ambitious young banker on the road from Florence to Bruges; the great painter Albrecht Dürer on his way from Nuremberg to Venice, a shipbuilder whose highly prized craft takes him from Seville to Antwerp via Barcelona, Beaune, and Paris; or a lonely pilgrim wandering from Vézelay to far-off Santiago de Compostela, he offers a vivid account of what such a journey would be like--the sights, sounds, perils, and pleasures--and in so doing he renders the very fabric of day-to-day life during this momentous year in Europe's history.
