Power System** **Oscillations** *Springer Science & Business Media* **Power System Oscillations deals with the analysis and control of low frequency oscillations in the 0.2-3 Hz range, which are a characteristic of**

interconnected power systems. Small variations in system load excite the oscillations, which must be damped effectively to maintain secure and stable system operation. No warning is given for the occurrence of growing oscillations caused by oscillatory instability, since a change in the system's operating condition may cause the transition from stable to unstable. If not limited by nonlinearities, unstable oscillations may lead to rapid system collapse. Thus, it is difficult for operators to intervene manually to restore the system's stability. It follows that it is important to analyze a system's oscillatory behavior in order to understand the system's limits. If the limits imposed by oscillatory instability are too low, they may be increased by the installation of special stabilizing controls. Since the late 60s when this phenomena was first observed in North American systems, intensive research has resulted in design and installation of stabilizing controls known as power system stabilizers (PSS). The design, location and tuning of PSS require special analytical tools. This book addresses these questions in a modal analysis framework, with transient simulation as a measure of controlled system performance. After discussing the nature of the oscillations, the design of the PSS is discussed extensively using modal analysis and frequency response. In the scenario of the restructured power system, the performance of power system damping controls must be insensitive to parameter uncertainties. Power system stabilizers, when well tuned, are shown to be robust using the techniques of modern control theory. The design of damping controls, which operate through electronic power system devices (FACTS), is also discussed. There are many worked examples throughout the text. The Power System Toolbox[©] for use with MATLAB[®] is used to perform all of the analyses used in this book. The text is based on the author's experience of over 40 years as an engineer in the power industry and as an educator.

Law, Rights and Ideology in Russia Landmarks in the Destiny of a Great Power *Routledge* Law, Rights and Ideology in Russia: Landmarks in the destiny of a great power brings into sharp focus several key episodes in Russia's vividly ideological engagement with law and rights. Drawing on 30 years of experience of consultancy and teaching in many regions of Russia and on library research in Russian-language texts, Bill Bowring provides unique insights into people, events and ideas. The book starts with the surprising role of the Scottish Enlightenment in the origins of law as an academic discipline in Russia in the eighteenth century. The Great Reforms of Tsar Aleksandr II, abolishing serfdom in 1861 and introducing jury trial in 1864, are then examined and debated as genuine reforms or the response to a revolutionary situation. A new interpretation of the life and work of the Soviet legal theorist Yevgeniy Pashukanis leads to an analysis of the conflicted attitude of the USSR to international law and human rights, especially the right of peoples to self-determination. The complex history of autonomy in Tsarist and Soviet Russia is considered, alongside the collapse of the USSR in 1991. An examination of Russia's plunge into the European human rights system under Yeltsin is followed by the history of the death penalty in Russia. Finally, the secrets of the ideology of 'sovereignty' in the Putin era and their impact on law and rights are revealed. Throughout, the constant theme is the centuries long hegemonic struggle between Westernisers and Slavophiles, against the backdrop of the Messianism that proclaimed Russia to be the Third Rome, was revived in the mission of Soviet Russia to change the world and which has echoes in contemporary Eurasianism and the ideology of sovereignty.

Life in Public Schools (RLE Edu L) *Routledge* Britain's public (that is, its major independent) schools have a conspicuous role in the country's social system, and as a result are the subject of a long-standing political debate. The discussion is generally founded on a stereotyped image of what these school may have been like in the 1950s - this books shows how they were

in the late 1980s. It is based on fieldwork in two major public boarding schools which the author conducted over an extended period, and draws on interviews, observation and documentary sources to establish a picture of what public school life is actually like for pupils and staff. Since the schools were predominantly male preserves, the major part of the book describes the social world and experiences of boys and school-masters. An important section of the book, however, discusses the introduction of girl pupils, the experiences of female teachers and the way schoolmasters' wives tend to be drawn into their husbands' work. Geoffrey Walford's conclusions about life in public schools differ considerably from traditional expectations. At the same time he asks whether there really has been a 'public school revolution'. His book makes an important contribution to our knowledge of public schools, to debates in the sociology of education and to the issues of abolishing or extending the independent sector.

Mediating Ideology in Text and Image Ten Critical Studies *John Benjamins Publishing* While ideology has been treated widely in CDA-literature, the role played by the interaction of text and image in multiplying meaning and furthering ideological stances has not so far received a lot of attention. **Mediating Ideology in Text and Image** offers a number of approaches to such analysis, offering students and academics valuable tools for identifying possible discrepancies between the world and the way it is represented through various mediational means. The authors' common aim is one of assisting the audience in reading between the lines, thus offering a variety of approaches that may contribute to a better understanding of how ideologies possibly work and how they may be denaturalised from text and image. The articles in part I look at rhetorical strategies used in meaning construction processes unfolding in various kinds of mass media. Part II focuses on the re-semiotization of meaning and looks at how analysing the combination of text and image may contribute to a better understanding of ideological processes brought about by multimodal resources. Foreword by Ruth Wodak.

Micro Markets A Market Structure Approach to Microeconomic Analysis *John Wiley & Sons* A timely guide that bridges the gap between microeconomic theory and practice through real-world application in the marketplace

Understanding how microeconomics affects the marketplace is essential for any investment professional, however most books simply address microeconomics in its pure theory-based form. **Micro Markets** helps bridge the gap between theory and practice by defining microeconomics in terms of real-world, market applications. This timely guide elucidates basic microeconomic concepts with an emphasis on applicability. It establishes a common application for all of the basic economic concepts that are reviewed, and provides in-depth insights into an industry that is of major economic importance in aggregate, and to most individuals. The change in focus of current research to studies of chronic repair rather than acute responses, and deeper mucosal elements rather than surface phenomena, is apparent. Many of the chapters contain previously unpublished findings. **Learning Not Schooling Reimagining the Purpose of Education** *R&L Education Learning Not Schooling: Reimagining the Purpose of Education* examines how both the curiosity and the initiative of students in their formative years can be stimulated by partnering local schools with the world of adult work and professional expertise. This tactic addresses some of the issues that seem to continually plague us, such as how to help students learn more effectively in the modern age, or how to more fully address some of the perpetual inequities between different socioeconomic groupings. Drawing on his experiences from founding and directing a private school for students age six to fourteen, Lyn Lesch presents a new model for education in which learning for students increasingly occurs in the world of adult expertise, with classroom teachers taking on the role of conduits that not only prepare students to learn from professionals working in various fields but also assist them in absorbing the advanced information and knowledge they will be acquiring. **Life After High School God's Advice for Grads** *Navpress Publishing Group* Promises from The Message accompany prayers and thoughts on relevant topics to offer grads real life--and fuel for whatever's next. **Mosby's Guide to Nursing Diagnosis** *Elsevier Health Sciences* This pocket-sized reference is ideal for use in clinicals, in class and at the bedside!
