SAGO PALM

MULTIPLE CONTRIBUTIONS TO FOOD SECURITY AND SUSTAINABLE LIVELIHOODS

Springer This open access book addresses a wide variety of events and technologies concerning the sago palm, ranging from its botanical characteristics, culture and use to social conditions in the places where it is grown, in order to provide a record of research findings and to benefit society. It discusses various subjects, including the sago palm and related species; differentiation of species of starch-producing palm; habitat, morphological, physiological and growth characteristics; culture and management; productivity of carbon dioxide; starch extraction and manufacture; characteristics and utilization of starch; and cultural anthropological and folkloristic aspects. Problems such as food shortages due to increasing populations, global warming and climate change, and decreasing reserves of oil and other underground resources, have become more pressing in recent years. In the context of these problems, the book examines the role of the sago palm in sustainable food production, in the manufacture of other foodstuffs, as a raw material for ethanol and in the manufacture of biodegradable plastics. In addition to academics, this book will be useful to researchers and government officials working for international agencies, national governments, municipalities, and other research organizations; technicians, researchers, managers, entrepreneurs, and others working in industries such as agriculture, plant production, food production, manufacturing, chemical engineering, energy production, and distribution.

ENVIRONMENTAL CRIME AND SOCIAL CONFLICT

CONTEMPORARY AND EMERGING ISSUES

Routledge This impressive collection of original essays explores the relationship between social conflict and the environment - a topic that has received little

attention within criminology. The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments, as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems. Largely informed by green criminology perspectives, the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world. With a goal of creating a typology of environment-social conflict relationships useful for green criminological research, this study is essential reading for scholars and academics in criminology, as well as those interested in crime, law and justice.

LAYOUT ESSENTIALS

100 DESIGN PRINCIPLES FOR USING GRIDS

Fair Winds Press Adhering to certain layout and grids standards and principles is important for any job from brochures, to annual reports, to posters, to websites, to publications. However, knowing how to bend the rules and make certain grids work for the job at hand takes skill. This book outlines and demonstrates basic layout/grid guidelines and rules through 100 entries including choosing a typeface, striving for rhythm and balance with type, combining typefaces, using special characters and kerning and legibility. These essentials of grid design are critical to the success of any job.

LINEAR MODELS IN STATISTICS

John Wiley & Sons The essential introduction to the theory and application of linear models—now in a valuable new edition Since most advanced statistical tools are generalizations of the linear model, it is necessary to first master the linear model in order to move forward to more advanced concepts. The linear model remains the main tool of the applied statistician and is central to the training of any statistician regardless of whether the focus is applied or theoretical. This completely revised and updated new edition successfully develops the basic theory of linear models for regression, analysis of variance, analysis of covariance, and linear mixed models. Recent advances in the methodology related to linear mixed models, generalized linear models, and the Bayesian linear model are also addressed. *Linear Models in Statistics, Second Edition* includes full coverage of advanced topics, such as mixed and generalized linear models, Bayesian linear models, two-way models with empty cells, geometry of least squares, vector-matrix calculus, simultaneous inference, and logistic and nonlinear regression. Algebraic, geometrical, frequentist, and Bayesian approaches to both the inference of linear models and the analysis of variance are also illustrated. Through the expansion of relevant material and the inclusion of the latest technological developments in the field, this book provides readers with the theoretical foundation to correctly interpret computer software output as well as effectively use, customize, and understand linear models. This modern Second Edition features: New chapters on Bayesian linear models as well as random and

mixed linear models Expanded discussion of two-way models with empty cells
Additional sections on the geometry of least squares Updated coverage of
simultaneous inference The book is complemented with easy-to-read proofs, real
data sets, and an extensive bibliography. A thorough review of the requisite matrix
algebra has been added for transitional purposes, and numerous theoretical and
applied problems have been incorporated with selected answers provided at the end
of the book. A related Web site includes additional data sets and SAS® code for all
numerical examples. Linear Model in Statistics, Second Edition is a must-have book
for courses in statistics, biostatistics, and mathematics at the upper-undergraduate
and graduate levels. It is also an invaluable reference for researchers who need to
gain a better understanding of regression and analysis of variance.

CRAP CVS

Penguin UK Application for Employment I refer to the recent death of the Technical
Manager at your company and hereby apply for the replacement of the deceased
manager. Each time I apply for a job, I get a reply that there is no vacancy but in this
case I have caught you red-handed and you have no excuse because I even
attended the funeral to be sure that he was truly dead and buried before applying.
Attached to my letter is a copy of my CV and his death certificate. Crap CVs is a
hilarious compilation of the worst job applications imaginable, including overly-
honest cover letters, embarrassing typos, mortifying personal revelations, awkward
interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant
truth-twisting and, of course, outright lies.

RARE DISEASES EPIDEMIOLOGY: UPDATE AND OVERVIEW

Springer The fields of rare diseases research and orphan products development
continue to expand with more products in research and development status. In
recent years, the role of the patient advocacy groups has evolved into a research
partner with the academic research community and the bio-pharmaceutical industry.
Unique approaches to research and development require epidemiological data not
previously available to assist in protocol study design and patient recruitment for
clinical trials required by regulatory agencies prior to approval for access by patents
and practicing physicians.

THE SAGO PALM

THE FOOD AND ENVIRONMENTAL CHALLENGES OF THE 21ST CENTURY

Government Printing Office In order to produce sufficient quantities of food to feed the world's growing population, we need to increase the food producing capacities of crops and to protect the environments in which they grow. Discovering untapped plant resources is an important challenge, but a haphazard increase in food production may cause environmental damage. We need foresight and must take sound appropriate actions. The sago palm is a plant that might fulfill all of these requirements. The sago palm accumulates more starch than any other plant in the world, yet, in global terms, it continues to languish in relative obscurity. The Japanese Society of Sago Palm Studies was formed in the hope of raising its profile by hosting seminars and symposiums in Japan and overseas to help it achieve the recognition it deserves. To this end, the Society's members have worked together to produce this volume, written in an easy-to-read style. [Subject: Botany, Agriculture, Conservation, Environmental Studies]

ENVIRONMENTAL HARM

AN ECO-JUSTICE PERSPECTIVE

Policy Press This unique study of social harm offers a systematic and critical discussion of the nature of environmental harm from an eco-justice perspective, challenging conventional criminological definitions of environmental harm. The book

evaluates three interconnected justice-related approaches to environmental harm: environmental justice (humans), ecological justice (the environment) and species justice (non-human animals). It provides a critical assessment of environmental harm by interrogating key concepts and exploring how activists and social movements engage in the pursuit of justice. It concludes by describing the tensions between the different approaches and the importance of developing an eco-justice framework that to some extent can reconcile these differences. Using empirical evidence built on theoretical foundations with examples and illustrations from many national contexts, 'Environmental harm' will be of interest to students and academics in criminology, sociology, law, geography, environmental studies, philosophy and social policy all over the world.

POLICING THE RURAL CRISIS

Federation Press There is a growing sense of crisis in rural ways of life, which manifests itself in economic decline, depopulation, depleted environments, and a crisis of rural identities. Crime is one potent marker of crisis, the more so as it spoils the image of healthy, cohesive community. The social reaction it elicits, the policing of this 'other rural', is also a guide to the dimensions of crisis. The social sciences have witnessed a renewed international interest in the study of 'other rurals': the neglected, invisible or excluded aspects of country life. This book brings a fresh approach to the study of crime that challenges the urban-centric assumptions of much western criminology and sociology. It explores rural crime and social reactions to it, in relation to processes and patterns of community formation and change in rural Australia, including the social, economic, cultural and political forces shaping the history, structure and everyday life of rural communities. Policing the Rural Crisis is based on five years of extensive original empirical research in rural and regional Australia. It draws on ideas and debates in contemporary social theory across several disciplines, making the analysis relevant to the study of crime and social change elsewhere.

ENVIRONMENTAL CRIME AND ITS VICTIMS

PERSPECTIVES WITHIN GREEN CRIMINOLOGY

Ashgate Publishing, Ltd. Environmental crime is one of the most profitable and fastest growing areas of international criminal activity. These types of crime, however, do not always produce an immediate consequence, and the harm may be diffused. As such, the complexity of victimization - in terms of time, space, impact, and who or what is victimized - is one of the reasons why governments and the enforcement community have trouble in finding suitable and effective responses. This book provides a diverse and provocative array of arguments, critiques and recommendations from leading researchers and scholars in the field of green criminology. The chapters are divided into three main sections: the first part deals with specific characteristics of some of the major types of environmental crime and its perpetrators; the second focuses explicitly on the problem of victimization in cases of environmental crime; and the third addresses the question of how to tackle this problem. Discussing these topics from the point of view of green criminological theory, sociology, law enforcement, community wellbeing, environmental activism and victimology, this book will be of great interest to all those concerned about crime and the environment.

EXPLORING GREEN CRIMINOLOGY

TOWARD A GREEN CRIMINOLOGICAL REVOLUTION

Routledge Few criminologists have drawn attention to the fact that widespread and significant forms of harm such as green or environmental crimes are neglected by criminology. Others have suggested that green crimes present the most important challenge to criminology as a discipline. This book argues that criminology needs to take green harms more seriously and to be revolutionized so that it forms part of the solution to the large environmental problems currently faced across the world. It asks how criminology should be redesigned to consider green/environmental harm as a key area of study in an era where destruction of the earth and the world's

ecosystem is a major concern and examines why this has remained unaccomplished so far. The chapters in this book apply an environmental frame of reference underlying a green approach to issues which can be addressed from within criminology and which can encourage criminologists and environmentalists to respond and react differently to environmental crime.

DAMNATION MARKED

AN URBAN FANTASY NOVEL

SM Reine There's something in the earth deep below Elise Kavanagh's territory. A shadow is falling upon local demons to devour their flesh and harvest their souls. And it's coming for Elise next. ANIMAL HARM

PERSPECTIVES ON WHY PEOPLE HARM AND KILL ANIMALS

Routledge Why do people harm, injure, torture and kill animals? This book evaluates the reasons why these crimes are committed and outlines the characteristics of the animal offender. It considers ethical and value judgements made about animals and the tacit acknowledgement and justification of unacceptable criminal behaviour towards the harming of animals made by offenders. Situating animal abuse, wildlife crime, illegal wildlife trading and other unlawful activities directed at animals firmly within Green Criminology, the book contends that this is a distinct, multi-dimensional type of criminality which persists despite the introduction of relevant legislation. Taking a broad approach, the book considers the killing and harming of animals in an international context and examines the

effectiveness of current legislation, policy and sentencing. Including a section on further reading and useful organizations, this book is a valuable exploration into perspectives on the responsibility owed by man to animals as part of broader ecological and legal concerns. It will interest criminologists, ecologists, animal protectionists and those interested in law and society and law and the environment.
