Centrifugal Pumps: Design and Application

Elsevier *Centrifugal Pumps: Design and Application, Second Edition* focuses on the design of chemical pumps, composite materials, manufacturing techniques employed in nonmetallic pump applications, mechanical seals, and hydraulic design. The publication first offers information on the elements of pump design, specific speed and modeling laws, and impeller design. Discussions focus on shape of head capacity curve, pump speed, viscosity, specific gravity, correction for impeller trim, model law, and design suggestions. The book then takes a look at general pump design, volute design, and design of multi-stage casing. The manuscript examines double-suction pumps and side-suction design, net positive suction head, and vertical pumps. Topics include configurations, design features, pump vibration, effect of viscosity, suction piping, high speed pumps, and side suction and suction nozzle layout. The publication also ponders on high speed pumps, double-case pumps, hydraulic power recovery turbines, and shaft design and axial thrust. The book is a valuable source of data for pump designers, students, and rotating equipment engineers.

International Finance

A Survey

Oxford University Press *Understanding the current state of affairs and tools available in the study of international finance is increasingly important as few areas in finance can be divorced completely from international issues. International Finance reflects the new diversity of interest in international finance by bringing together a set of chapters that summarizes and synthesizes developments to date in the many and varied areas that are now viewed as having international content. The book attempts to differentiate between what is known, what is believed, and what is still being debated about international finance. The survey nature of this book involves tradeoffs that inevitably had to be made in the process given the vast footprint that constitutes international finance. No single book can cover everything. This book, however, tries to maintain a balance between the micro and macro aspects of international finance. Although each chapter is self-contained, the chapters form a logical whole that follows a logical sequence. The book is organized into five broad categories of interest: (1) exchange rates and risk management, (2) international financial markets and institutions, (3) international investing, (4) international financial management, and (5) special topics. The chapters cover*

market integration, financial crisis, and the links between financial markets and development in some detail as they relate to these areas. In each instance, the contributors to this book discuss developments in the field to date and explain the importance of each area to finance as a field of study. Consequently, the strategic focus of the book is both broad and narrow, depending on the reader's needs. The entire book provides a broad picture of the current state of international finance, but a reader with more focused interests will find individual chapters illuminating on specific topics.

Raid!

The Untold Story of Patton's Secret Mission

Dell *The orders came from Patton himself: Take a strike force behind enemy lines--with no air or ground support--and liberate a POW camp at Hammelburg, where Patton's son-in-law was held. With the German army closing in around them, the raiders kept going, until they had liberated 1,500 prisoners of war. Baum's Raiders had just achieved an impossible objective. Now they had to get back out....RAID! Written by the men who were there, Raid! is the gripping real-life story of a controversial mission in the heart of World War II. From the belly of a Sherman Tank pelted with enemy fire to the POWs waiting behind barbed wire, this is a thrilling, you-are-there chronicle of human courage--in the face of impossible odds.*

Access Chinese

McGraw-Hill Education *Access Chinese* gives a new perspective to teaching and learning Chinese by harmonizing 3 key elements of learning a second language creatively: Intertwining language with culture Balancing focus on forms and meaning Developing literacy skills through both oral and written Chinese. This book treats culture as the glue that connects the units by following the story lines of a twin brother and sister learning Chinese in two contexts (China vs. US). *Access Chinese* provides essential tools for communication throughout the story development while at the same time engaging learners in acquiring additional vocabulary and grammar by contextualizing these elements in further communicative tasks. Also, *Access Chinese* uses colloquial Chinese as a starting point for engaging the learner while also introducing the nuance of Chinese philosophy and deeply imbedded Chinese etiquettes and rituals in communication to bring about the curiosity and appreciation of the language and culture.

Panzer III

Panzerkampfwagen III Ausf. A to N (SdKfz 141)

Haynes Publishing UK When Hitler unleashed Operation Barbarossa against the Soviet Union in June 1941, the 23-tonne Panzer III was in the vanguard of the German assault. The German Panzer III tank (official designation Panzerkampfwagen III, Sd Kfz 141, abbreviated to PzKpfw III) saw widespread use during the Second World War campaigns in Poland, France, the Soviet Union and the Balkans, and in North Africa with the famous Afrika Korps. A small number were still in use in Normandy (1944), at Anzio (1943), in Norway and Finland and in Operation Market Garden (1944). Some 5,774 were built between 1937 and 1943. Although the Panzer III was conceived to operate alongside the infantry-supporting Panzer IV to fight other tanks and armoured fighting vehicles, the roles were reversed when the German Army came up against the formidable Soviet T-34 tank. A tank with a more powerful anti-tank gun was needed so the Panzer IV with its larger turret ring and long-barrelled 7.5cm KwK 40 gun was used in tank-versus-tank battles, with the Panzer III being redeployed in the infantry support role. Production of the Panzer III ended in 1943, although its dependable chassis provided hulls for the Sturmgeschutz III (StuG III) assault gun, one of the most successful of the war, until the end of the war.

Centrepiece of the Haynes Panzer III Tank Manual is the Bovington Tank Museum's PzKpfw III Ausf L, which has been restored to running condition. This tank belonged to the same battalion as the museum's famous Tiger I (the 501st (Heavy) Panzer Abteilung) and is an early production Ausf L, modified for tropical service. It was shipped via Naples to Benghazi in Libya in July 1942 and was issued to the 8th Panzer Regiment, part of the 15th Panzer Division and probably fought in the Battle of Alam Halfa. It was subsequently captured by the British Army and shipped to the UK. The Tank Museum has restored the tank to running order, has repainted it in its original camouflage and markings and is currently replacing many of the ancillary tools and equipment that it carried.
