Beginning with Braille

Firsthand Experiences with a Balanced Approach to Literacy

American Foundation for the Blind **Beginning with braille provides a wealth of effective activities for promoting literacy at the early stages of braille instruction. The text includes creative and practical strategies for designing and delivering quality braille instruction and teacher-friendly suggestions for many areas such as reading aloud to young children, selecting and making early tactile books, and teaching tactile and hand movement skills. This book also includes tips on designing worksheets, introducing braille contractions, teaching the use of the braillewriter, and facilitating the writing process in braille. Chapters also address guidelines for individualizing instruction, the literacy needs of students with additional disabilities, and assessment of student progress in developing literacy skills.**

Dicyemida

This manual treats the six species of dicyemid mesozoans that have been reported in three species of hosts (*Octopus vulgaris*, *O. joubini*, and *O. briaeus*) from the eastern coast of North America and the Gulf of Mexico, including the Florida Keys. All are parasites of species of *Octopus* and are in the genus *Dicyema*, family *Dicyemidae*. In the introduction, the life cycle, as known, and the general morphology of dicyemids are briefly described, and methods are given for collecting and preparing material for study. These are followed by a key to species and by an annotated checklist, which includes data, some hitherto unpublished, on their known prevalence in hosts from various localities including Bimini and Bermuda.
