MORAL HAZARD IN HEALTH INSURANCE

Columbia University Press Addressing the challenge of covering health care expenses—while minimizing economic risks. Moral hazard—the tendency to change behavior when the cost of that behavior will be borne by others—is a particularly tricky question when considering health care. Kenneth J. Arrow’s seminal 1963 paper on this topic (included in this volume) was one of the first to explore the implication of moral hazard for health care, and Amy Finkelstein—recognized as one of the world’s foremost experts on the topic—here examines this issue in the context of contemporary American health care policy. Drawing on research from both the original RAND Health Insurance Experiment and her own research, including a 2008 Health Insurance Experiment in Oregon, Finkelstein presents compelling evidence that health insurance does indeed affect medical spending and encourages policy solutions that acknowledge and account for this. The volume also features commentaries and insights from other renowned economists, including an introduction by Joseph P. Newhouse that provides context for the discussion, a commentary from Jonathan Gruber that considers provider-side moral hazard, and reflections from Joseph E. Stiglitz and Kenneth J. Arrow. “Reads like a fireside chat among a group of distinguished, articulate health economists.” —Choice

A COLLECTION OF THE STATE PAPERS OF JOHN THURLOE ...: DECEMBER 1654 TO SEPTEMBER 1655

MANUAL OF TESTS AND CRITERIA

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements

also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".

BLACKBOARD DRAWINGS 1919-1924

Rudolf Steiner Press "Did Rudolf Steiner dream these things? Did he dream them as they once occurred, at the beginning of all time? They are, for sure, far more astonishing than the demiurges and serpents and bulls found in other cosmogonies." -- Jorge Luis Borges Rudolf Steiner recorded his view of the world in numerous books. He also gave more than 5,000 lectures, in which he explained his ideas, using only minimal notes. When describing especially difficult subjects, Steiner frequently resorted to illustrating what he was saying with colored chalk on a large blackboard. After his earlier lectures, the drawings were erased and irretrievably lost. After the autumn of 1919, however, thick black paper was used to cover the blackboards so that the drawings could be rolled up and saved. The Trustees of Rudolf Steiner's Estate in Dornach, Switzerland, possess more than a thousand such drawings. A selection of these drawings was first shown to the general public in 1992, and since then, exhibitions in Europe, America, and Japan have generated much interest in Steiner's works.

THE GENERAL THEORY OF EMPLOYMENT, INTEREST AND MONEY

This new edition, published 70 years after the original, features a new introduction by Paul Krugman which discusses the significance and continued relevance of The General Theory.

ARCHITECTURE AND ALLEGORY

Academy Press **Peter Greenaway Architecture and Allegory Bridget Elliott and Anthony Purdy A painter by training, Peter Greenaway is undoubtedly one of the most interesting and controversial of contemporary British film-makers. He is also a much sought-after curator of exhibitions and installations internationally. Greenaway's fascination for architecture is well known and this monograph emphasises his use of architecture as a structuring device as well as a metaphor and vehicle for the exploration of artistic practice in general. Looking at all his best known movies - The Draughtsman's Contract, A Zed and Two Noughts, The Belly of an Architect, Drowning by Numbers, The Cook, the Thief, His Wife and Her Lover, Prospero's Books, The Baby of Mâcon and The Pillow Book - the study discusses both curatorial work and films in relation to current debates in architecture, art history and cultural theory. Lavishly illustrated with his own art work and numerous stunning film stills, this is a highly visual as well as critical examination**

of the many issues surrounding Greenaway's idiosyncratic work. Art & Design Monographs are a series of publications concentrating on artists and designers of lasting interest and importance.
