TRANSFORMING US INTELLIGENCE FOR IRREGULAR WAR

TASK FORCE 714 IN IRAQ

Georgetown University Press When Joint Special Operations Command deployed Task Force 714 to Iraq in 2003, it faced an adversary unlike any it had previously encountered: al-Qaeda in Iraq (AQI). AQI's organization into multiple, independent networks and its application of Information Age technologies allowed it to wage war across a vast landscape. To meet this unique threat, TF 714 developed the intelligence capacity to operate inside those networks, and in the words of commander Gen. Stanley McChrystal, USA (Ret.) "claw the guts out of AQI." In *Transforming US Intelligence for Irregular War*, Richard H. Shultz Jr. provides a broad discussion of the role of intelligence in combatting nonstate militants and revisits this moment of innovation during the Iraq War, showing how the defense and intelligence communities can adapt to new and evolving foes. Shultz tells the story of how TF 714 partnered with US intelligence agencies to dismantle AQI's secret networks by eliminating many of its key leaders. He also reveals how TF 714 altered its methods and practices of intelligence collection, intelligence analysis, and covert paramilitary operations to suppress AQI's growing insurgency and, ultimately, destroy its networked infrastructure. TF 714 remains an exemplar of successful organizational learning and adaptation in the midst of modern warfare. By examining its innovations, Shultz makes a compelling case for intelligence leading the way in future campaigns against nonstate armed groups.

MORAL AGENCY WITHIN SOCIAL STRUCTURES AND CULTURE

A PRIMER ON CRITICAL REALISM FOR CHRISTIAN ETHICS

Georgetown University Press Christian ethics has addressed moral agency and culture from the start, and Christian social ethics increasingly acknowledges the power of social structures. However, neither has made sufficient use of the discipline that specializes in understanding structures and culture: sociology. In *Moral Agency within Social Structures and Culture*, editor and contributor Daniel K. Finn proposes a field-changing critical realist sociology that puts Christian ethics into conversation with modern discourses on human agency and social transformation. Catholic social teaching mischaracterizes social evil as being little more than the sum of individual choices, remedied through individual conversion. Liberation theology points to the power of social structures but without specifying how structures affect moral agency. Critical realist sociology provides a solution to both shortcomings. This collection shows how sociological insights can deepen and extend Catholic social thought by enabling ethicists to analyze more precisely how structures and culture impact human decisions. The book demonstrates how this sociological framework has applications for the study of the ecological crisis, economic life, and virtue ethics. *Moral Agency within Social Structures and Culture* is a valuable tool for Christian ethicists who seek systemic change in accord with the Gospel.

INTERNATIONAL INSTITUTIONS AND POWER POLITICS

BRIDGING THE DIVIDE

Georgetown University Press This book moves scholarly debates beyond the old question of whether or not international institutions matter in order to examine how they matter, even in a world of power politics. Power politics and international institutions are often studied as two separate domains, but this is in need of rethinking because today most states strategically use institutions to further their interests. Anders Wivel, T.V. Paul, and the international group of contributing authors update our understanding of how institutions are viewed among the major theoretical paradigms in international relations, and they seek to bridge the divides. Empirical chapters examine specific institutions in practice, including the United Nations, International Atomic Energy Agency, and the European Union. The book also points the way to future research. *International Institutions and Power Politics* provides insights for both international relations theory and practical matters of foreign affairs, and it will be essential reading for all international relations scholars and advanced students.

RUSSIA ABROAD

DRIVING REGIONAL FRACTURE IN POST-COMMUNIST EURASIA AND BEYOND

Georgetown University Press While we know a great deal about the benefits of regional integration, there is a knowledge gap when it comes to areas with weak, dysfunctional, or nonexistent regional fabric in political and economic life. Further, deliberate "un-regioning," applied by actors external as well as internal to a region, has also gone unnoticed despite its increasingly sophisticated modern application by Russia in its peripheries. This volume helps us understand what Anna Ohanyan calls "fractured regions" and their consequences for contemporary global security. Ohanyan introduces a theory of regional fracture to explain how and why regions come apart, consolidate dysfunctional ties within the region, and foster weak states. Russia Abroad specifically examines how Russia employs regional fracture as a strategy to keep states on its periphery in Eurasia and the Middle East weak and in Russia's orbit. It argues that the level of regional maturity in Russia's vast vicinities is an important determinant of Russian foreign policy in the emergent multipolar world order. Many of these fractured regions become global security threats because weak states are more likely to be hubs of transnational crime, havens for militants, or sites of protracted conflict. The regional fracture theory is offered as a fresh perspective about the post-American world and a way to broaden international relations scholarship on comparative regionalism.

BRIDGING THE THEORY-PRACTICE DIVIDE IN INTERNATIONAL RELATIONS

Georgetown University Press There is a widening divide between the data, tools, and knowledge that international relations scholars produce and what policy practitioners find relevant for their work. In this first-of-its-kind conversation, leading academics and practitioners reflect on the nature and size of the theory-practice divide. They find the gap varies by issue area and over time. The essays in this volume use data gathered by the Teaching, Research, and International Policy (TRIP) Project over a fifteen-year period. As a whole, the volume analyzes the structural factors that affect the academy's ability to influence policy across issue areas and the professional incentives that affect scholars' willingness to attempt to do so. Individual chapters explore these questions in the areas of trade, finance, human rights, development, environment, nuclear weapons and strategy, interstate war, and intrastate conflict. Each substantive chapter is followed by a response from a policy practitioner, providing their perspective on the gap and the possibility for academic work to have an impact. Bridging the Theory-Practice Divide in International Relations provides concrete answers and guidance about how and when scholarship can be policy relevant.

EBOOK: CRITICALLY ENGAGING CBT

McGraw-Hill Education (UK) In recent years, Cognitive Behaviour Therapy (CBT) has become an increasingly popular therapy and is now widely recommended by GPs and a range of other health professionals. Part of CBT's appeal lies in the fact that it is time-limited and cheaper than most alternatives. The editors of this book argue that in the rush to embrace CBT there has not been sufficient attention paid to the potential drawbacks of such a therapy. This book redresses the balance by taking a critical look at CBT through the lens of various standard psychotherapy approaches, considering those areas where CBT is appropriate as well as those where it might not be. Leading figures associated with particular approaches (including Jungian, Systemic, Lacanian and Rogerian practitioners) examine the role of CBT and how it fits within their approach, exploring a synthesis of the two. Responses from three leading international CBT authorities enable readers to engage with both sides of the emerging global debate about CBT, and to consider what CBT therapists and other psychotherapists might learn from one another. Critically Engaging CBT is key reading for training and practising counsellors and psychotherapists as well as other health professionals who deal with CBT and/or other psychological interventions. Contributors: Ann Casement, Windy Dryden, John Heaton, Jeremy Holmes, Richard House, Del Loewenthal, Stacey Millichamp, Ian Parker, Howard A. Paul, Michael Proeve, Anthony Ryle, Peter Stratton and Keith Tudor.

UNDERSTANDING GLOBAL SEXUALITIES

NEW FRONTIERS

Routledge Over the course of the past thirty years, there has been an explosion of work on sexuality, both conceptually and methodologically. From a relatively limited, specialist field, the study of sexuality has expanded across a wide range of social sciences. Yet as the field has grown, it has become apparent that a number of leading edge critical issues remain. This theory-building book explores some of the areas in which there is major and continuing debate, for example, about the relationship between sexuality and gender; about the nature and status of heterosexuality; about hetero- and homo-normativity; about the influence and intersection of class, race, age and other factors in sexual trajectories, identities and lifestyles; and about how best to understand the new forms of sexuality that are emerging in both rich world and developing world contexts. With contributions from leading and new scholars and activists from across the globe, this book highlights tensions or 'flash-points' in contemporary debate, and offers some innovative ways forward in terms of thinking about sexuality - both theoretically and with respect to policy and programme development. An extended essay by Henrietta Moore introduces the volume, and an afterword by Jeffrey Weeks offers pointers for the future. The contributors bring together a range of experiences and a variety of disciplinary perspectives in engaging with three key themes of sexual subjectivity and global transformations, sexualities in practice, and advancing new thinking on sexuality in policy and programmatic contexts. It is of interest to students, researchers and activists in sexuality, sexual health and gender studies, especially those working from

public health, sociological and anthropological perspectives.

THE MILITARY REVOLUTION

MILITARY INNOVATION AND THE RISE OF THE WEST, 1500-1800

Cambridge University Press This is a new edition of Geoffrey Parker's much-admired illustrated account of how the West, so small and so deficient in natural resources in 1500, had by 1800 come to control over one-third of the world. Parker argues that the rapid development of military practice in the West constituted a 'military revolution' which gave Westerners an insurmountable advantage over the peoples of other continents. This edition incorporates new material, including a substantial 'Afterword' which summarises the debate which developed after the book's first publication.

STRATEGIC CHALLENGES IN THE BALTIC SEA REGION

RUSSIA, DETERRENCE, AND REASSURANCE

Georgetown University Press This book is about security challenges in the Baltic Sea region caused by Russia's resurgence. NATO and neutral states in the region are now concerned about an external threat for the first time since the demise of the Soviet Union. Russia has been probing air space, maritime boundaries, and even land borders from the Baltic republics to Sweden; the example of Russia's undermining of Ukraine and annexation of Crimea worries former Soviet republics with Russian minority populations; neutral Sweden and Finland may consider joining NATO; and the Trump presidency has created some doubt about America's willingness to follow through on NATO's collective defense commitment. This volume brings together an international group of contributors to examine Baltic security issues on a state-by-state basis and to contemplate what is needed to deter Russia in the region.

THE PRICE OF FAME

THE BIOGRAPHY OF DENNIS PRICE

Fonthill Media Charming, erudite, and the very personification of the English gentleman, Dennis Price was without doubt also one of the most promising and talented newcomers to the world of theatre and film in the late 1930s, and he arguably reached his screen best in the classic Ealing comedy 'Kind Hearts and Coronets'. Huge praise was lavished upon him and he was compared alongside theatrical contemporaries Laurence Olivier, John Gielgud and Ralph Richardson as being destined for great things. Scene-stealing performances followed over the next few decades in such differing films as 'The Dancing Years', 'The Intruder', 'Private's Progress', 'The Naked Truth', 'Tunes of Glory', 'Tamahine' and 'Theatre of Blood', to name but a few. Though whilst his career was blossoming his private life was going through turmoil when, after one of his several affairs was discovered by his wife, he faced the shame of divorce, separation from his two children and when coupled with significant tax bills, it all proved too much and the actor attempted suicide. Eventually bouncing back, he reinvented himself as a character actor and appeared in scores of notable films-and was often the best thing in them!

ANGER, RAGE AND RELATIONSHIP

AN EMPATHIC APPROACH TO ANGER MANAGEMENT

Routledge Anger, Rage and Relationship presents a radically new way to understand and work with anger and rage issues. Taking a relational approach to anger and rage, the book presents a positive view of human nature, supported by recent research findings and illustrated with case studies, with individuals trusted to be essentially pro-social. Rather than promoting strategies and techniques for eradicating anger, Sue Parker Hall, puts forward an approach which seeks to not only work with, but to differentiate between, anger and rage. Anger and rage are constructed as

entirely different phenomena, originating at different developmental stages, having different functions and relational needs and requiring different aspects of relationship in the therapeutic process. Further areas of discussion include: the positive aspects of anger practitioner protection the therapeutic implications of working with both anger and rage This book will provide invaluable reading for practitioners dealing with anger and rage in the therapeutic setting, as well as being of great interest to all counsellors and therapists in the related field.

JAPANESE FOREIGN INTELLIGENCE AND GRAND STRATEGY

FROM THE COLD WAR TO THE ABE ERA

Georgetown University Press Incisive insights into the distinctive nature of Japanese foreign intelligence and grand strategy, its underlying norms, and how they have changed over time Japanese foreign intelligence is an outlier in many ways. Unlike many states, Japan does not possess a centralized foreign intelligence agency that dispatches agents abroad to engage in espionage. Japan is also notable for civilian control over key capabilities in human and signals intelligence. Japanese Foreign Intelligence and Grand Strategy probes the unique makeup of Japan's foreign intelligence institutions, practices, and capabilities across the economic, political, and military domains and shows how they have changed over time. Brad Williams begins by exploring how Japan's experiences of the Second World War and its new role as a major US ally influenced its adoption of bilateralism, developmentalism, technonationalism, and antimilitarism as key norms. As a result, Japanese intelligence-gathering resources centered primarily around improving its position in the global economy throughout the Cold War. Williams then brings his analysis up to the Abe Era, examining how shifts in the international, regional, and domestic policy environments in the twenty-first century have caused a gradual reassessment of national security strategy under former prime minister Shinzo Abe. As Japan reevaluates its old norms in light of regional security challenges, the book concludes by detailing how the country is beginning to rethink the size, shape, and purpose of its intelligence community. Anyone interested in Japanese intelligence, security, or international relations will welcome this important contribution to our understanding of the country's intelligence capabilities and strategy.

Penguin A queer tale about kid werewolves, big bad mistakes, and terrifying creatures in Natalie C. Parker's exciting middle grade debut. Little wolf, little wolf, here I come. They say that the Devouring Wolf isn't real, just an old legend, a giant creature who consumes the magic inside young werewolves. The elders tell the tale to scare young pups into obedience. It's a spooky campfire story for fledging wolves. Or is it? It's the eve of the first full moon of summer, and twelve-year-old Riley Callahan is ready. This is the year she will finally turn into a wolf. She has to--no one transforms after twelve. Nothing can ruin her mood: not her little brother Milo's teasing, not mama N's smothering, and not even her other mom C's absence from their pack's ceremony. But then the unthinkable happens--something that violates every rule of wolf magic: Riley doesn't shift. Along with the four other kids who somehow didn't transform, Riley is left with questions that even the pack leaders don't have answers to. And to make matters far worse, it appears something was awoken in the woods that same night. A creature with an insatiable hunger . . . has the Devouring Wolf been awakened?

More than simply learning about key topics, this collection invites readers to think through some of the most relevant, dynamic, and challenging questions animating social studies education today. With 12 new chapters highlighting recent developments in the field, the second edition features the work of major scholars such as James Banks, Diana Hess, Joel Westheimer, Meira Levinson, Sam Wineburg, Beth Rubin, Keith Barton, Margaret Crocco, and more. Each chapter tackles a specific question on issues such as the difficulties of teaching historical thinking in the classroom, responding to high-stakes testing, teaching patriotism, judging the credibility of Internet sources, and teaching with film and geospatial technologies. Accessible, compelling, and practical, these chapters—full of rich examples and illustrations—showcase some of the most original thinking in the field, and offer pre- and in-service teachers alike a panoramic window on social studies curricula and instruction and new ways to improve them. Walter C. Parker is Professor and Chair of Social Studies Education and (by courtesy) Professor of Political Science at the University of Washington, Seattle.
