Human-Earth System Dynamics

Implications to Civilizations

Springer This book explores the factors and mechanisms that may have influenced the dynamic behaviors of earliest civilizations, focusing on both environmental (geographic) factors on which traditional historic analyses are based and human (behavioral) factors on which anthropological analyses are usually based. It also resurrects a number of common ancestral terms to help readers understand the complicated process of human and cultural evolution around the globe. Specifically, in almost all indigenous languages, the words 'wa' and any variants of it were originally associated with the sound of crying of - and certainly were selected as the common ancestral word with the meanings of "house, home, homeland, motherland, and so on" by - early humans living in different parts of the world. This book provides many neglected but still crucial environmental and biological clues about the rise and fall of civilizations - ones that have largely resulted from mankind's long-lasting "Win-Stay Lose-Shift" games throughout the world. The narratives and findings presented at this book are unexpected but reasonable - and are what every student of anthropology or history needs to know and doesn't get in the usual text. "Professor Guo explores the dynamics of civilizations from the beginnings to our perplexingly complex world. There are lots of thought-provoking ideas here on the rise and decline of civilizations and nations... Anyone wishing to understand global developments should give this book serious consideration." ----John Komlos, University of Munich, Germany, and Duke University, USA "It is interesting to see a Chinese perspective on the questions of deep history that have engaged Jared Diamond, Yuval Harari and David Christian. Guo argues that understanding cyclical threats has been the key to human progress, which is driven by the dialectic of material privation and human ingenuity." ----Peter Rutland, Wesleyan University, USA

Enduring Western Civilization

The Construction of the Concept of Western Civilization and Its "others"

Praeger Pub Text **What do we mean by Western Civilization? When did the expression originate and why? At a time when there is a widespread perception that Western Civilization is undergoing a historic crisis, and when postmodernism, feminist theory, afrocentrism, deconstruction, and other current philosophical schools define themselves as alternatives to, or critiques of, Western Civilization, this book seeks to trace the development of the concept of Western Civilization and to examine the reasons for its endurance. It also suggests ways in which proponents of Western Civilization can co-opt ideas from opponents. Written from a multidisciplinary viewpoint, the essays in this volume trace the development of the concept of Western Civilization and seek to explode many standing beliefs--primarily those which concern the very existence of a Western tradition. Bound to be controversial, the book will be of interest to scholars and activists in the fields of cultural history, anthropology, and the history of ideas, as well as general readers interested in the enduring discussion of the notion of Western Civilization.**

Reflections on the Revolution in France ... The third edition

The Venture of Islam, Volume 1

The Classical Age of Islam

University of Chicago Press **The Venture of Islam has been honored as a magisterial work of the mind since its publication in early 1975. In this three-volume study, illustrated with charts and maps, Hodgson traces and interprets the historical development of Islamic civilization from before the birth of Muhammad to the middle of the twentieth century. This work grew out of the famous course on Islamic civilization that Hodgson created and taught for many years at the University of Chicago. "This is a nonpareil work, not only because of its command of its subject but also because it demonstrates how, ideally, history should be written."—The New Yorker Volume 1, The Classical Age of Islam, analyzes the world before Islam, Muhammad's challenge, and the early Muslim state between 625 and 692. Hodgson then discusses the classical civilization of the High Caliphate. The volume also contains a general introduction to the complete work and a foreword by Reuben Smith, who, as Hodgson's colleague and friend, finished the Venture of Islam after the author's death and saw it through to publication.**

The Black Jacobins

Toussaint L'Ouverture and the San Domingo Revolution

Penguin UK **In 1789 the West Indian colony of San Domingo supplied two-thirds of the overseas trade of France. The entire structure of what was arguably the most profitable colony in the world rested on the labour of half a million slaves. In 1791 the waves of unrest inspired by the French Revolution reached across the Atlantic dividing the loyalties of the white population of the island. The brutally treated slaves of Saint Domingo seized at this confusion and rose up in rebellion against masters. In this classic work, CLR James chronicles the only successful slave revolt in history and provides a critical portrait of their leader, Toussaint L'Ouverture, 'one of the most remarkable men of a period rich in remarkable men'.**

Trust, Politics and Revolution

A European History

[Bloomsbury Publishing](#) **Tracing the relationships and networks of trust in Western European revolutionary situations from the Ancient Greeks to the French Revolution and beyond, Francesca Granelli here shows the essential role of trust in both revolution and government, arguing that without trust, both governments and revolutionary movements are liable to fail. The first study to combine the important of trust and the significance of revolution, this book offers a new lens through which to interpret revolution, in an essential work book for all scholars of political science and historians of revolution.**

History of Civilizations of Central Asia: Development in contrast : from the sixteenth to the mid-nineteenth century

[UNESCO](#) **The period treated in this volume is highlighted by the slow retreat of nomadism and the progressive increase of sedentary polities owing to a fundamental change in military technology: Furthermore, this period certainly saw a growing contrast in the pace of economic and cultural progress between Central Asia and Europe. The internal growth of the European economies and the influx of silver from the New World gave Atlantic Europe an increasingly important position in world trade and caused a major shift in inland Asian trade. Thus, 1850 marks the end of the total sway of pre-modern culture as the extension of colonial dominance was accompanied by the influx of modern ideas.**

Orientalism

Western Conceptions of the Orient

[Penguin UK](#) **'A stimulating, elegant yet pugnacious essay'—Observer** In this highly acclaimed seminal work, Edward Said surveys the history and nature of Western attitudes towards the East, considering Orientalism as a powerful European ideological creation—a way for writers, philosophers and colonial administrators to deal with the 'otherness' of Eastern culture, customs and beliefs. He traces this view through the writings of Homer, Nerval and Flaubert, Disraeli and Kipling, whose imaginative depictions have greatly contributed to the West's romantic and exotic picture of the Orient. In the Afterword, Said examines the effect of continuing Western imperialism.

Edmund Burke

[CUP Archive](#) **This is the first full, scholarly biography of Burke for over a generation, to be completed in two volumes. The first volume covers the years between 1730-1784, and describes his Irish upbringing and education, early writing, and his parliamentary career throughout the momentous years of the American War of Independence.**

[Christian Liberty Press](#) **This world history text provides a comprehensive overview of ancient history from Creation through the 1620s, from a Christian perspective. Extensive vocabulary questions and suggested projects are listed throughout the text. The text is beautifully illustrated and contains numerous high-quality maps in two-color. Grade 9.**

The Crowd

A Study of the Popular Mind

[The Floating Press](#) **The following work is devoted to an account of the characteristics of crowds. Organized crowds have always played an important part in the life of peoples, but this part has never been of such moment as at present. The substitution of the unconscious action of crowds for the conscious activity of individuals is one of the principal characteristics of the present age. Crowds, doubtless, are always unconscious, but this very unconsciousness is perhaps one of the secrets of their strength. In the natural world beings exclusively governed by instinct accomplish acts whose marvelous complexity astounds us. Reason is an attribute of humanity of too recent date and still too imperfect to reveal to us the laws of the unconscious, and still more to take its place. The part played by the unconscious in all our acts is immense, and that played by reason very small.**

English as a Global Language

[Cambridge University Press](#) **David Crystal's classic English as a Global Language considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.**

The Rise of the West

A History of the Human Community

[University of Chicago Press](#) **The Rise of the West, winner of the National Book Award for history in 1964, is famous for its ambitious scope and intellectual rigor. In it, McNeill challenges the Spengler-Toynbee view that a number of separate civilizations pursued essentially independent careers, and argues instead that human cultures interacted at every stage of their history. The author suggests that from the Neolithic beginnings of grain agriculture to the present major social changes in all parts of the world were triggered by new or newly important foreign stimuli, and he presents a persuasive narrative of world history to support this claim. In a retrospective essay titled "The Rise of the West after Twenty-five Years," McNeill shows how his book was shaped by the time and place in which it was written (1954-63). He discusses how historiography subsequently developed and suggests how his portrait of the world's past in The Rise of the West should be revised to reflect these changes. "This is not only the most learned and the most intelligent, it is also the most stimulating and fascinating book that has ever set out to recount and explain the whole history of mankind. . . . To read it is a great experience. It leaves echoes to reverberate, and seeds to germinate in the mind."—H. R. Trevor-Roper, New York Times Book Review**
